Matter intended for publication in the Supplement should reach the Press not later than Thursday.

WM. ROSS,
Publisher, Gazette of India.

II A

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

PATENTS.

Calcutta, the 5th April 1894.

NOTIFICATIONS.

No. 870 P.—APPLICATIONS in respect of the under-mentioned inventions have been filed, during the week ending 31st March 1894, under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 102 of 1894.—James Donnan, Assistant Engineer, Public Works Department, of Balaghat, in the Central Provinces, for a new or improved Terrameter.

No. 103 of 1894.—A. M. Macrae, of Kanti, Bengal and North-Western and Tirhoot Railway, Indigo Planter, for an Iron Rake, to be called "Macrae's Iron Rake."

No. 104 of 1894.—George Reid, Sub-Engineer, Irrigation Works, Public Works Department, Northern Division, Ganges Canal, Hardwar, for an Iron Portable Boulder and Shingle Trap.

No. 105 of 1894.—Everard Hesketh, and Alexander Marcet, both of 23, St. Swithin's Lane, in the City of London, England, Engineers, for improvements in, or connected with, the manufacture of gun-cotton or other manufactures in which cooling water liable to become acidulated is employed.

No. 106 of 1894.—John Cuninghame Montgomerie, of Dalmore Stair, in the County of Ayr, Scotland, Justice of the Peace, for improvements in, and in connection with, the extraction of Gold and Silver from ores or compounds containing the same.

No. 107 of 1894.—William Shaw Smith, of 20, Tanfield Chambers, Bradford, Yorkshire, Traveller, and James Frederick Nugent, of Connaught Mansions, 34, Victoria Street, Westminster, Middlesex, Manufacturer, for improvements in incandescent electric lamps.

No. 108 of 1894.—Alice Mildred Smith, of No. 39, Park Street, in Calcutta, Journalist, wife of William Henry Smith, of the same place, Journalist, for improvements in, and relating to, appliances for heating parts of the body, to be called "Grenon's Great Sempiternal Heater, and Instantaneous Fomentor."

No. 109 of 1894.—Hermann Ganswindt, of Schoeneberg, near Berlin, in the Empire of Germany, Engineer, for improved flat metal strips as supporting and bracing means in connection with ærial vehicles, ship and balloon propellers, turbines, wind-wheels, and the like.

No. 871 P.—Specifications of the under-mentioned inventions have been filed, under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of

Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the Office of the Secretary appointed under the Inventions and Designs Act, 1888, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying:—

No. 168 of 1893.—William Bridgewater, Engineer, and Henry O'Connor Bridgewater, Boot Manufacturer of Aylestons Park, Leicester, in the County of Leicester, England, in the United Kingdom of Great Britain and Ireland, for improvements in or relating to the working of punkahs. (Filed 12th March 1894.)

No. 232 of 1893.—I. L. Hauser, resident at 21, Lindsay Street, Calcutta, for the "Hauser Burglar Alarm." (Filed 15th March 1894.)

No. 272 of 1893.—Christian Hansen, of Frederiksberg, in the Kingdom of Denmark, Merchant, for a combined rocking or swinging seat and fanning device. (Filed 26th March 1894.)

No. 374 of 1893.—Walter Ernest Chick, Engineer, of 14, Kyd Street, Calcutta, for an automatic lubricated punkah wheel. (Filed 22nd March 1894.)

No. 872 P.—The fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the under-mentioned inventions for the periods shown against each:—

No. 100 of 1888.—James Alfred Campbell Rogers, Civil Engineer, of 31, Civil Lines, Cawnpore, North-Western Provinces, for the improved "Rajah" sugar-cane mill. (From 1st April 1894 to 31st March 1895.)

No. 129 of 1888.—Sandford James Kilby, late Superintendent of the Customs Preventive Service and Salt Department, Calcutta, for an improved means for facilitating the hoisting, weighing, and discharging of salt, coal, metal, metals, grain or any other articles. (From 9th January 1894 to 8th January 1895.)

No. 30 of 1890.—William Jackson, of Thorn Grove, Mannofield, Aberdeen, North Britain, Gentleman, for improvements in apparatus for drying tea leaves, coffee, grain or other produce. (From 26th May 1894 to 25th May 1895.)

No. 31 of 1890.—William Jackson, of Thorn Grove, Mannofield, Aberdeen, North Britain, Gentleman, for improvements in apparatus for subjecting substances to the action of air, more especially intended for use in withering or wilting tea leaves, but applicable also to drying coffee, grain, and other produce. (From 4th June 1894 to 3rd June 1895.)

No. 873 P.—Whereas the inventors of the under-mentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888) [or within the further time allowed under section 8, sub-section (4) of the said Act], the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act,

the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 159 of 1889.—Major L. M. Boileau's invention for a lawn tennis net straining post. (Specification filed 28th December 1889.)

No. 269 of 1889.—Mr. W. H. Phelps' invention for a new mode of cutting and fitting ladies' riding habit skirts and the like. (Specification filed 31st December 1889.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

G. W. FORREST,
Secy. under the Inventions and Designs Act, 1888.

JOHN OWENS,
Presidency Postmaster, Calcutta.

THE YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 4th and 5th June, 1894, at 10-30 A.M.

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . . .	100	50
Dictation, spelling, punctuation, etc.). . . .	100	50
Arithmetic (the whole) . .	240	160
Mensuration (*a*), the whole .	60	30
Book-keeping (*b*), mercantile	100	50
TOTAL	600	400

Minimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it, but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned:—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in Rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no applications received direct.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR,
The 30th March, 1894.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

    Nepalese Buddhist Sanskrit Literature, by Dr. R. L. Mitra. R5.

N.B.—All Cheques, Money Orders, etc., must be made payable to the "Treasurer, Asiatic Society," only.

Catalogue of Books printed at Thomason College Press and procurable from Thomason College Book Depot.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments, drawing materials, etc., are not available at the College Book Depôt, but can be obtained from the Superintendent, Canal Foundry and Workshops, Roorkee.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo with numerous Plates.

First two Volumes are published in separate convenient sized Sections, as below, but can be bound up in Volumes if required.

VOLUME I.*

Section	I.	Building Materials	(in the Press).
"	II.	Masonry	(1891), R1-8
"	III.	Carpentry	(1889), R1-8
"	IV.	Earthwork	R1-8
"	V.	Tools and Plant	(never published).

VOLUME II.*

Section	VI.	Buildings	(1891), R1-8
"	VII.	Bridges	(in the Press).
"	VIII.	Roads	(1888), R2-0
"	IX.	Railways	(1891), R1-8
"	X.	Irrigation Works	(1873), R2-0

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).

" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8.

XIII. **Drawing** (by Lieut. R. Pulford, R.E.)† R8.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simple Applied Mechanics,** Parts I and II (in the Press)

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition). R3-12.

XVI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 8*a*.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

* The other Fasciculi of these works are out of stock, and complete copies cannot be supplied.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8*a*.; mounted on cloth, to fold up. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. (In the Press). R1-4.

Specifications and Schedules of Prices for execution of various kinds of Work by Contract, etc. By Major-General F. W. Peile, R.E. R3.

Tyndall's Hand-Book of Specifications (in the Press).

The Indian Engineer's Pocket Book. 4*a*.

Wooden Bridges and Designs. By Rai Kunhya Lal. R4.

Blasting under Water (2nd edition). 12*a*.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6*a*.

Roorkee Hydraulic Experiments (in 3 Vols.—Text, Tables, and Plates). By Capt. A. Cunningham, R.E. R12.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into Decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility. (4th edition) R2.

Boileau's Tables of Log sin² ½ P (for computing time). 8*a*.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (In the Press.) R1-4.

Cape's Geometry. R1-8.

,, **Mechanics.** R2-4.

HINDUSTANI.

Elements of Hindustani Grammar. 4*a*.

Technical Dialogues—English and Urdu. R1-4.

A Vocabulary of Common and Technical Words in English-Urdu. R1-4.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small, each. R1-4.

Surveying Field-Books (ruled). R1.

Levelling Field-Books (English Pattern). R1-8.

,, ,, (Canal Pattern). R1-8.

,, ,, (College Pattern). R1-12.

P. W. D. Note-Book (in the Press). R1-4.

,, **Measurement Book.** R1-4.

Circular Card-board Protractors, 12 inches. R1-8.

MISCELLANEOUS.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1.

Ditto ditto, in Urdu. R1-4.

Perspective (fully explained). By Col. A. M. Brandreth, R.E. R1-12.

Calendars for 1891,* 1892, and 1893,* each. R4-12.

Sample Question Papers for 4th Grade Accounts Branch for 1891. R1.

Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English. R2.

Memo. of Instructions for Road Project. R1-8.

Project for College Mess (sample Project). R1-8.

Ferrotype Printing Processes. 8*a*.

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India. Drawn to a uniform scale, and prepared for the Government of India, P. W. Department, between 1864 and 1868. (Useful for Executive Engineers and Superintending Engineers' Offices.)

Bengal, 51 Plans. R5.
Madras, 99 Plans. R10.
Bombay, 91 Plans. R10.
N.-W. Provinces, 104 Plans. R10.
Oudh, 21 Plans. R2.
Rajputana, 4 Plans. R2-4.
British Burma, 19 Plans. R3-4.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(SECOND SERIES.)

Quarterly Numbers of Vols. II, VIII, and IX of the Series are available at R3-8 each, and Vol. XI at R2. Cloth covers for Volumes at R1 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15 at R2-8 each.

Index to Professional Papers, 1st and 2nd Series. 8*a*.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes held at the College will be forwarded to applicants.

* These include Question Papers for Engineer and Upper Subordinate Classes, and Superior Accounts Branch, P. W. D.

J. CLIBBORN, *Major, I.S.C.*,
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8.

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
,, each of the Madras, Bombay, and Allahabad Series . . .	6	0	0	7	0	0
,, a part of the Calcutta Series purchased separately, *inclusive of postage in India* . . .	...			2	0	0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy . .	0	8	9	0	10	3
,, each of the Madras, Bombay, and Allahabad Series; per copy.	0	5	3	0	5	9
,, the Calcutta Series. For the year	7	2	0	8	6	3
,, each of the Madras, Bombay, and Allahabad Series. For the year	4	4	6	4	11	

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1892 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	
three issues		„ 30	
six „		„ 68	
nine „	„ 45		
twelve „	„ 180		

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R a. p.	With postage.
Bengal Law Reports, for one year	20 0 0	22 8 0
Single copies, R2 per copy		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0

Bengal Secretariat Press, 10, Lyon's Range, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

INDIAN LAW REPORTS.

NOTICE TO SUBSCRIBERS.

Subscribers are hereby informed that, unless complaints of non-receipt of any number is made to the Publisher of the series within three months of the date of publication, the benefits of the subscription rates for copies lost in transit will not be allowed, and full rates will be charged. The price per copy of each of the four series at subscription rates and at full rates is shown below:—

PER COPY.

REVENUE DEPARTMENT.

Horse Surra, Report on, Vol. I, by ALFRED LINGARD, M.B..M.S., Durham. Super royal quarto. R10 (R1-4.)

[*Revised Advertisement.*]

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume ; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L. and Volume V contains the latter half of L to end of O; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Indian Wheat Trade, Parts, I, II and III, combined. Royal 8vo., Limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes:— Royal 8vo., cloth.

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Tuesday, the 27th March, 1894.

PRESENT:

His Excellency the Viceroy and Governor General of India, P.C., LL.D., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
The Hon'ble Sir A. E. Miller, KT., Q.C.
The Hon'ble Lieutenant-General H. Brackenbury, C.B.,R.A.
The Hon'ble J. Westland, C.S.I.
The Hon'ble Sir A. P. MacDonnell, K.C.S.I.
The Hon'ble Dr. Rashbehary Ghose.
The Hon'ble Sir G. H. P. Evans, K.C.I.E.
The Hon'ble Fazulbhai Vishram.
The Hon'ble C. C. Stevens.
The Hon'ble Sir Luchmessur Singh, K.C.I.E., Maháráján Bahadur Durbhanga.
The Hon'ble Gangadhar Rao Madhav Chitnavis.
The Hon'ble H. F. Clogstoun, C.S.I.
The Hon'ble W. Lee-Warner, C.S.I.
The Hon'ble P. Playfair.
The Hon'ble Maháráján Partáb Narayan Singh of Ajudhiá.

DISCUSSION OF THE FINANCIAL STATEMENT FOR 1894-95.

The Hon'ble MR. PLAYFAIR said:—"My Lord, I feel compelled to express regret that the Government of India has not been able to afford to the Members of Your Excellency's Council a longer time to consider the very volu-

minous statements of financial affairs presented to the Council on the 22nd instant by the Hon'ble Member in charge of the finances. Owing to the intervention of Easter-tide there has been practically only one day of business between then and now, in which interval it has been impossible to obtain the deliberate opinion of the mercantile community upon the Budget.

"My Lord, at the present time no one can take into consideration an Indian Budget without dealing with questions relating to the army. The Hon'ble the Finance Member gives the satisfactory assurance that the measures for the defence of the country have been nearly completed, but he does not enlarge upon the remarks on the army made in paragraph 21 of his statement presented to this Council on the 10th instant. There are many who would have been glad if he had met with some degree of fulness the arguments raised in certain quarters for the reduction of military expenditure. I am not, my Lord, inclined to treat the army as a financial reserve, and I hold that the security for peace within, as well as without, our borders must be the first consideration of the State. Having before me the Hon'ble Mr. Westland's observations, I shall await with much interest the remarks of my hon'ble friend the Military Member of Your Excellency's Council on this important subject.

"The accounts of the past year increase the apprehension that income from opium is a diminishing factor in the revenues of India. Unusual influences appear to have been at work during the year. A small crop and restricted sales have been associated with low prices, which is contrary to previous experience. It would be interesting to know how far the Hon'ble Member in charge of the finances attributes this result to the operations of the Currency Act of June last, to which a slight allusion has been made in paragraph 135 of his statement, and how far his low estimate of the value of the crop of the current year is based upon the anticipated effects of that Act. It would be further of interest to know whether the successive failure of crops is attributable to climatic influences, or whether there are grounds for the apprehension that the price now paid to the cultivators of Rs. 5 per seer for opium of standard consistency has become unattractive in being too low.

"The public in India have been waiting with keen expectation for a further expression of the views of the Government of India on the currency question, and especially the effects, financial and economic, of the working of the currency measure introduced on 26th June last; but here again the Hon'ble Member in charge of the finances is reticent. Even more immediate in its bearing upon the present Financial Statement would have been an exposition of the grounds on which in paragraph 133, in the face of market rates which are apparently being still dragged down by the continuing depreciation in the value of silver, he has assumed 1*s.* 2*d.* as the rate of exchange for the Budget of 1894-95.

"A year ago the Finance Member of Your Excellency's Council claimed to be excused for budgeting for a deficit pending the receipt by Government of the report of the Committee headed by the Lord Chancellor of England upon the financial situation. The tone of his remarks indicated that it was not a desirable conclusion to budget for a deficiency. In the estimates for the ensuing year the figures that have now been placed before the Council result in a deficiency of Rx. 302,000, which is arrived at, after additional import-duties have been taken into account, by the absorption of the famine railway expenditure, and after Provincial Governments have been called upon to surrender a portion of their balances. The prospective deficit of 1894-95 follows upon an estimated deficiency of Rx. 1,793,000 in the accounts of 1893-94. This review of the situation is certainly not exhilarating, but I am relieved to find that, in addition to the elastic character of the revenues of India, which it is again a pleasure in connection with this Budget to observe, a closer examination of the expenditure to a certain extent shows that the position of the accounts of the Empire is not so bad as it may on the surface appear to be. Revised estimates for 1893-94 show a deficit of Rx. 1,793,000, being worse than the Budget by Rx. 198,000. I find, however, that the whole of the Home payments during the year have been converted, as customary, into Rx. at the actual exchange rate realized upon the remittances of the year, namely, 1*s.* 2·6*d.*, resulting in a total charge of

Rx. 10,243,100 in the Expenditure and Revenue account, while the Secretary of State's drawings have not amounted to the sterling payments but have fallen short of the estimate of last March by £9,300,000, and therefore the total charge of Rx. 10,243,100 has not been actual expenditure. In other words, the true loss by exchange during the year has been Rx. 5,027,500 on Revenue and Rx. 512,500 on Capital account, making a total of Rx. 5,540,000, and not Rx. 10,634,800 as stated in these accounts. The balance appears to be adjusted under the heading 'Exchange on Remittance Account' as a sub-head under 'Deposits and Advances,' page 62 of the Statement, by the credit entry Rx. 5,094,800. With due submission I think this involves an error in book-keeping. All subordinate headings which properly come under 'Deposit and Advances' close to balance, but Exchange is a sub-heading which closes to Profit and Loss; therefore the adjusting credit entry of Rx. 5,049,800 should be removed from 'Deposits and Advances' and be pushed up to the Profit and Loss, *i e.*, into the Income and Expenditure portion, of the account. On this being done, it appears to me that the amount of Rx. 5,094,800 would either be deducted from the expenditure or be added to the revenue. The result then would be a visible surplus for the year 1893-94 of Rx. 3,301,800 instead of a deficit, as set forth, of Rx. 1,793,000. There is, therefore, a surplus and not a deficit on the revised estimates of 1893-94. In the same manner, if the adjusting credit entry Rx. 413,400 under the sub-heading 'Exchange on Remittance Account' of the Budget Estimate of 1894-95 be transferred to its proper place in the Income and Expenditure Account, the result will be a surplus of Rx. 111,400 instead of a deficit as shown of Rx. 302,000. I would submit therefore that I am justified in the remark that the Accounts are not so bad as they at first sight appear. It would afford relief to commerce were the Secretary of State to definitely decide how his arrears are finally to be dealt with. At present they hang over the country like the sword of Damocles.

"I fully recognise the readiness, and the soundness of the principle, with which the Government of India has addressed itself to the requirements of the future to meet the probable deficiency in the accounts of 1894-95, if Home payments have to be met in full at the present, or even a lower, rate of exchange. And I think it is necessary, as well as very desirable, that the Government should have reviewed the Imperial and Provincial expenditure with the object of endeavouring, where possible, to counteract extravagance or stop unnecessary outlay. But when the method of supplementing revenues results in an intrusion upon reserve funds and upon resources upheld for the development and protection of the country, and curtails the scanty means at the disposal of Provincial Governments, I think such means of balancing income and expenditure must be approached with very grave and serious anxiety.

"To meet the financial obligations of the ensuing year it is proposed to absorb Rx. 1,076,200 of the Famine Grant, to take from the Local Governments Rx. 405,000, and to obtain from new import-duties Rx. 1,140,000, making a total of Rx. 2,621,200. With regard to the absorption of the Famine Grant, I understand the original idea in connection with this compelled surplus was that the Government of India should have always a margin of revenue to be instantly applied to the relief of famine as it arose, but if this margin were not so applied during any one year it was not to be brought into general revenues, as it might then be used to the reduction of taxation, but was to be spent in taking precautions against famine by the construction of preventive and protective works, and latterly in addition to the meeting of interest payments on the capital of certain railways declared by the Secretary of State to be protective in their character. In the minute issued on 12th March, 1878, by a predecessor of Your Excellency, Lord Lytton, he stated that the sole justification for the increased taxation placed upon the people of India for the purpose of insuring the Empire against the calamities of future famine was the pledge that a sum of not less than a million and-a-half sterling shall be annually applied to it, and His Lordship explained that an additional revenue raised by the new taxes was required not for the luxuries but for the necessities of the State, not for general purposes but for the construction of a particular class of public works, and that a pledge had been given by the Government of India not to spend one rupee of the special resources thus created upon works of a

different character. And finally Lord Lytton remarked—I use his own words—'to carry out adequately the engagement, thus publicly contracted, immediate, consistent and persistent adherence to certain lines of conduct on the part of the Central Government is absolutely necessary.'

"My Lord, I do not know that the public revenue can be applied to a better purpose than to that of saving the lives of those who pay it. The assurances of Lord Lytton, speaking with all the great authority of the Viceroy, were received by the whole country as a satisfactory and just settlement of that controversy as to the application of the Famine Insurance Fund, which it was felt on all hands had placed the Government in an invidious and undesirable position towards the people of India. Confirmed by Your Excellency's distinguished predecessor, Lord Lansdowne, successive budgets have shown that the Government has acted up to Lord Lytton's pledges.

"Unless, therefore, the Government of India is now prepared to say—and I presume it is not—that an adequate net-work of subsidiary railways has been completed throughout the Empire, and that the precautions initiated for the protection of the people from the financial, as well as from the material, consequences of famine have been completed, the proposal now made to trespass upon this Famine Fund for purposes other than that for which it was created appears to me to be a regrettable deviation from a policy that was wisely adopted and carried out by the Government of India.

"Had the Government of India no alternative, there might be no option but to make use of this reserve fund. But if there is at hand another and more appropriate method of meeting the requirements of the revenue by an equitable and convenient system of taxation to which the community at large would not object, it appears to me that in the interests of the State resort should be had thereto.

"If the absorption of the Famine Fund and the contribution of Rx. 405,000 required from the Local Governments means a reduction in expenditure of the Public Works Department, I presume it must imply not only the postponement of the construction of railways, roads and canals, but also the throwing out of employment of a large body of servants and labourers, and the imposition of enforced idleness upon the Department, which must be prejudicial alike to the Department and to the best interests of the State. The gravamen is not even confined to this view of the matter. This requisition of Rx. 405,000 follows upon the retrenchment effected two years ago when the renewal of Provincial Contracts brought back to the Government of India the annual sum of Rx. 466,300 from Provincial Funds, a measure made necessary by the financial pressure which was deplored by the Supreme Government as contracting the resources of the Local Governments by an equal amount, curtailing expenditure on the improvement of the internal administration of the several Provinces in India, and restricting the progress of useful Provincial expenditure. Adding to these sums the estimated cost of exchange compensation payable by Provincial Governments, amounting to Rx. 232,100 for 1893-94 and to Rx. 400,400 for 1894-95, we have a cash demand upon the Provincial Governments within three years of no less a sum than Rx. 2,436,400. Of this amount the finances of 1894-95 are called upon to contribute Rx. 1,271,700. Such a sum cannot be withdrawn without injustice to the Local Governments, compelling them to arrest useful and necessary works, and probably crippling their advances to agriculturists. I feel justified in adding that such a policy partakes rather of parsimony than economy and diminishes the available resources of the people, so that the result may restrict the commercial transactions between India and England far more seriously than that erroneously feared as a possible result of the imposition of cotton-duties. If Government determines to pursue this policy, the only hope I can express in the interests of these Provinces is that, following the example set after the termination of hostilities with Afghanistan, the sums now taken from the Local Governments will be restored to them when the finances admit.

"My Lord, stagnation is already upon the country. During the past year sanction has been given to the construction of only 136¾ miles of additional railways, which can be characterised as nothing short of starvation allowance to

the wants of this great Empire. This year, it is to be presumed, no additions will be sanctioned and apparently no railway surveys of importance are contemplated. Nothing will be done but that which the Government cannot refrain from doing. Among the important decreases of expenditure set forth under paragraph 122 of the Financial Statement are included 'Construction of Protective Railways Rx. 1,054,300, Construction of Railways Rx. 50,700. Civil Works Rx. 408,600, making a total of Rx. 1,513,600, and implying a direct and most forcible restriction upon the trading and protective development of the country. On the other hand, I find there are some among the mercantile community who, looking at the closing cash balance in India of Rx. 21,684,256 in the Budget for 1894-95, advance the suggestion that from this cash balance the Government has the means to enlarge the expenditure not charged to Revenue for the construction of additional lines of railway by a sum of about Rx. 5,000,000. This indicated surplus represents part of the Secretary of State's borrowings, and therefore Capital, and unless employed for the benefit of the country must lie idle, while incurring interest payable at Home. It has been more than once admitted that with the growth of their railway enterprises the Government of India is becoming more and more deeply concerned in the development and progress of Indian trade. To keep pace with the development of trade and the course of commerce throughout the world, and to admit of rivalry with the great producing countries in the far West, the Government of India should study to keep India in such a position as will enable her to compete successfully. As a contrast to India we may look to the activity of the United States of America, where the length of railways amounts to 170,000 miles, compared with the 18,000 miles in India, and where progress has been made at a rate, not of 136¾ miles a year, but of 5,200 miles per annum during the past five years. The better equipment of rolling stock on these Western lines also permits of the transport of a much larger proportionate quantity of goods or produce, per mile of railroad, than it is possible for our well managed but scantily equipped railways in India to undertake—I refer here to goods trucks and locomotives, and not to passenger cars, a comparison of coaching returns being in favour of the Indian railways.—As these Western countries are competitors with India in the transport of produce to England, and as there is an increasing demand for cheaper carriage throughout the world, India may be left standing if she does not determine to move with the times, of which movement, however, the present Budget gives but faint hopes. Within our own border, and with a population growing at the rate of three millions per annum, there is an increased struggle for existence, as well as a struggle with other countries for trade; and not only does this give cause for serious consideration in the event of failure of crops, but is a reason why the attention of the Government should be devoted to the further development of the resources of the country, the means of promoting that development being under their control. Considering such circumstances I cannot but deplore the fact that the Government should have resolved for any reason whatsoever to divert the money, in itself not too large an amount, set apart for the construction of railroads to protect the people from the consequences of famine, and by so doing to arrest a series of measures recognised by the people to be indispensable to their welfare. This decision, my Lord, is further to be regretted, when the Government have at hand, as I think they have, and as I endeavoured in this Council on the 10th of this month to place within their power, a measure for strengthening the finances of the country by imposing that duty upon imported cotton goods which, in itself, according to the declaration made by the Hon'ble Finance Member, would almost provide the sum of money the Government now proposes to take from the Famine Insurance Fund and from the Local Governments. Successive Financial Members of Your Excellency's Council have most willingly borne testimony to the elastic and progressive character of the internal finances of India, and the Hon'ble Mr. Westland has repeated his appreciation of India's capabilities, but, as this desirable result has been attained by a liberal and progressive treatment of the country, it cannot be expected to continue when that policy is reversed, as it has been in the present Budget. The outlook of the future is, on this account, depressing."

The Hon'ble GANGADHAR RAO MADHAV CHITNAVIS said :—"My Lord, it seems specially unfortunate that on the occasion of a new and sympathetic Viceroy we should have to encounter a position of financial difficulty which must render almost impossible such measures of administration as he would doubtless wish to promote during his term of office.

"The difficult position of the Hon'ble Finance Minister also cannot but evoke sympathy from all parts of the country. He is like a man who has to swim with his hands and feet tied. With freedom of action, there would be not only the hope but the possibility of success. He is not permitted to adopt the measures which in the opinion of those most competent to judge are necessary in the circumstances, though not perhaps from abstract theory. The finances should be placed in a solvent state, and the administration freed from the embarrassment which is a bar to the successful government of the country. But we are face to face with difficulties which must be met, and the question is whether the means proposed by the Finance Minister are such as to best meet the requirements of the position, or commend themselves to the public on whom the burden of taxation falls. The means proposed are, however, not in the opinion of some sufficient to establish the desired equilibrium between income and expenditure, and are confessedly only of the order of expediency imperfectly indicated, under the plea of the year being a 'transition period.'

"The measures adopted to meet the requirements of the position are of two kinds: one is the diversion of a fund that should not be diverted according to promises made by successive rulers, and the other is the refusal to adopt available and legitimate means to replenish the exchequer, not by questionable temporary expedients, but by imposts of a permanent character not objectionable on any ground as regards the people of this country. One of the measures adopted to meet the financial situation is the resumption of the Famine Fund. This proposal has evoked, I respectfully submit, strong feeling throughout the country, because, besides weakening the assurance against famine, it is a direct violation of promises on the part of the Government, which even the exigencies of the Government at the present time must in the eyes of many fail to justify.

"The object of that fund and the pledged word of the Government have invested it with a sacredness which should save it from violation for a 'period of transition,' inasmuch as even this so-called temporary policy of one year may become the precedent of permanent alienation. The Famine Fund was instituted in 1877, and, to make assurance doubly sure, the Viceroy and the Finance Minister of the period were at pains to meet the objection that such a fund might be diverted as is now proposed.

"Lord Lytton, the Viceroy, is said to have used the following language in connection with this fund :—

'We have explained to the people of this country that the additional revenue raised by new taxes is required not for the luxuries but for the necessities of the State,—not for general purposes, but for the construction of a particular class of public works,—*and we have pledged ourselves not to spend one rupee of the special resources thus created upon works of a different character.*'

(The italics are mine.)

"Lord Lytton, the Viceroy, further declared that it was a calumny for any one to even insinuate that the fund would ever be used for any other purpose than the one declared. How in the face of these pledges, and the moral obligation which they impose on the Government, the fund can be alienated as proposed it is imposible for many who have studied the matter to conceive.

"The second resource of the Hon'ble the Finance Minister is the call upon the Provincial Governments for increased contributions. This the Hon'ble Member says is to force upon them severe economies and appropriate the results to Imperial account. This is a mild way of representing the Imperial method of crippling the Local Administrations, while it is by no means clear that the possible scope of economy in Imperial expenditure has been realised. On the contrary, there is a widespread belief that there are many items of expenditure unwarrantably high and increased charge rather than reduction intimated (as, for example, in printing and stationery, etc., which charges are said to have grown to an extravagant extent and ought to be reduced). It may

seem an easy thing to squeeze the Local Governments, but such a course simply means the weakening of the administration in matters that come more directly in contact with the people, and would be more felt by them than the action of the Imperial Government. And it may drive the Local Administrations either to the imposition of fresh burdens or to neglect of duties and postponement of the performance of other improvements which it is their province to discharge.

"It is the Local Governments who are primarily responsible for the good administration of their respective Provinces, and when they find that the Imperial Government must not only have to be supplied annually with a large fixed allotment, but also that—to use the Hon'ble the Finance Member's words—'all the fruits of careful administration must be surrendered to fill the yawning gulf of our sterling payments,'—when I say the Local Governments find themselves in such an unenviable position, the only alternative left to them is to exhaust the taxable resources of the people immediately under their charge.

"It was, as the Finance Minister says, only two years ago that the present contracts were entered into with the Local Governments, and no measure of apology would, in the opinion of many, justify a revision of those contracts so soon again. Such a revision means—I use the words of the Finance Minister again—the stoppage of all administrative improvements. Education is already starved, at least in my Province, and who knows that further curtailments of educational grants in the country will not be the order of the day? Prison reforms, so long begun as in the year 1838, will still have to be postponed till a future date. The Police is already undermanned, and in some instances even underpaid—I mean of course the lower ranks of it; and any attempts to cut down the number or pay of the constabulary is likely to lead to loss of protection of the people and introduce still greater corruptions in the service. I do not know whether it will be possible to cut down the grants to the Medical Department. Roads and communications require to be looked after and require further developments, and I do not quite see which of the various branches under their control the Local Governments mean to starve. If the Local Governments are to be thus denuded of their resources, the effect can only be disheartening, even though apparently submitted to with loyal compliance.

"In a Province where settlements are in progress the people have rightly or wrongly to fear a good deal under the force of such a policy. They always entertain the idea that attempts will be made to increase their burdens and thus increase the resources of the State, to enable the Local Governments to furnish their full quota. Their apprehensions may be wrong and ill-founded, but I have ventured to state what the feeling is likely to be under the circumstances. The position of the executive officers who have to work out these settlements and take the whole blame on their heads is a most unenviable one.

"The third resource of the Finance Minister for meeting the deficit is the re-imposition of import-duties. This is a legitimate source of revenue, and is adopted by most countries. I do not propose to enter at length into the subject of the exemption of cotton fabrics, as that has been fully discussed, with the consensus of opinion of all impartial authorities that such exemption is altogether without justification; and, after the intimation of the Secretary of State as to the possibility of reconsideration, I shall, in common with the majority of my fellow-subjects, regret if further consideration be not given and the exemption removed. Such a course would meet the exigencies of the present financial position, and, with other measures that are deemed practicable, might obviate the assumed necessity of alienating the Famine Fund, and even afford relief in other respects.

"The public are by no means assured that economy in the Imperial expenditure has been carried as far as it might be without the least detriment to the efficiency of the service. It is even thought possible—though it is in my opinion a mistake—that increased efficiency might be obtained at less cost. The Famine Fund might be used for its legitimate purposes, with every advantage to the country from its expenditure, without using it as a makeshift for a 'period of transition,' while there is no prospect of a like sum being yearly available, as there would be in the income from import-duties.

"Another matter in which there seems considerable room for retrenchment is the Home charges. Though a large portion of these may not admit of reduction, as the interest on loans, pensions and fixed charges, there is a considerable percentage of expenditure for stores which might be supplied either locally or on commercial terms much more advantageously than through departmental agency. And there are certain charges made exclusively against India which might more equitably be paid or at least shared by England; nor is it altogether equitable that the charges for frontier wars should be met so largely from the Indian treasury.

"Again, the question occurs to many as to whether it is clear that the financial policy of the Government of India has been conducted on economic principles. There have been references to the 'unprecedented treasury balance of over twenty-six crores of rupees.' The loan of three millions issued last year has simply had the effect of swelling the balance, with a loss by discount on issue of Rx. 133,000 and the interest that had accrued on the loan since its issue. This is a considerable item to pay for holding money unfructuous in the treasury, and it is only poor compensation to be told that 'the three-and-a-half per cents. are now above par.' The only advantage of the loan seems to have been to show that the credit of the Government of India has not yet collapsed. In this respect, too, something might be said of the needless and unjustifiable purchase of large quantities of silver imported for speculative competition with the bills of the Secretary of State; and also respecting the tardy imposition of the inadequate duty which is now imposed. The obvious object of these importations was to compete as a means of remittance against Council bills, and the effect has been to seriously lower the rate of exchange and to necessitate the increase of taxation—unless use can be made of some portion of the treasury balance to obviate the necessity. Now, why should not some of the needlessly large treasury balance be utilized instead of appropriating the Famine Fund? Of course, it is needful to hold a sufficient treasury reserve to ensure the convertibility of the paper currency. But it has been asserted again and again that about a third of the present enormous balances would suffice for that purpose; and, even admitting that there must be money kept to meet the drawings of the Secretary of State, there appears ample margin for that, if not also to afford some relief from taxation, instead of seeking means of increasing it. The public would be grateful for a modification of the income-tax, especially in the lower scale of its incidence, which is always the means of oppression which the poor are least able to resist or escape. Of course, after the finances resume their normal state, I would submit, if the whole of that obnoxious impost could be removed, the greater would be the satisfaction to its unfortunate and hard-worked victims. The income-tax, if I may be allowed to say so, is in my individual opinion quite unsuited to the circumstances of this country. In the case of some it is a tax which presses very heavily, as they cannot afford to escape from it; while, in the case of others, it, I make bold to say, is an incentive to dishonesty.

"In connection with the above impost, I shall only be expressing the views of the non-official community in saying that it is likely to be felt a hardship that the product of that impost should be absorbed by the grant of compensation to the services for loss by exchange. They admit that it is a hardship upon the members that their incomes should be diminished by loss in exchange. It must also be admitted that the public servants are rendering good and noble service to the country at a great sacrifice of their health, intelligence, energy and personal comfort, and the people are greatly beholden to them for the great administrative improvements they have been able to confer upon them, and surely the State is also bound to give them some relief; but whether some distinction should not have been made, and a line drawn between the older officers and others, and those who have to make remittances, or not, is a question.

"Looking at the position generally, all the classes referred to are presently in need of the greatest sympath—the Ruler of the country claims our respectful sympathy in the embarrassment of a very difficult position, his Council between the two fires of their consciences and the orders of the Secretary of State, the Provincial Government in their crippled resources blighting their hopes and aspirations, the services with their salaries

practically reduced, the commercial and trading communities in a state of uncertainty, the landholding classes always in dread of short and recurring settlements and over-assessments, and the general public the final victims of all these uncertainties, the position is really not a happy one. But our duty is plain to offer to the Government our most loyal support, to give them such advice as our limited experience may suggest in the modification of their measures, and the application of them to the requirements of the country. I have thus respect fully ventured to make certain suggestions which I believe would be beneficial, and which I hope will be taken in the spirit in which they have been submitted, and at the same time would become acceptable to the people. I trust that what has been suggested will commend itself alike to the judgment of your Excellency, and the Council and the Government, here and in England."

The Hon'ble THE MAHÁRÁJÁ OF AJUDHIÁ said:—"My Lord, I approach the subject of the Budget with considerable diffidence It is full of details with which I am unfamiliar. Fortunately there is no necessity for me to weary Your Excellency and the Council with criticisms of these matters, which I can safely leave to more experienced hands. But there are also connected with the Budget large questions of principle as to which every one possessing self-respect should be able to sustain the opinion he may himself hold. To me then the Budget is not a mere official statement of the revenue of the Empire; it is the one measure which, recurring year by year, presents to the people of India a standard by which to measure the devotion of the rulers to the interests of the ruled. My Lord, if there is one thing of which Englishmen should be proud, it is the testimony borne almost invariably by a long series of Budgets to their comprehension of India's needs and their earnest wish to satisfy those needs in an adequate manner. If there have been exceptions, I should be inclined to regard the present Budget and those of 1878 and 1882 as most open to animadversion. Before, however, touching on that matter I would crave Your Lordship's indulgence if I dwell briefly on what appear to me to be the chief defects of the Statement before the Council.

"My Lord, we all know how keen and resolute a controversy has raged in this country on the closing of the Mints and on the continued fall in exchange. In relation to these matters and speaking for the people of my own Province, I may say that what is wanted is GUIDANCE. There is a widespread alarm at the way things are drifting. The people are unable to accurately appraise their reserved resources. They wonder what the value of their silver may be, and whether they should retain their gold or convert it into a depreciated substitute. The Budget says as little as possible on these two interesting questions. It does not say enough to establish confidence, or to give the public an assurance which may encourage them to believe in the wisdom of patience.

"Then again, my Lord, in Oudh the people have a direct interest in Opium. I confess I am not encouraged by what the Hon'ble the Finance Minister has said about the Opium Revenue. In fact, I may go further and say I am distinctly discouraged at the prospects of this branch of the Revenue. I admit that there might be an excuse for reticence in the fact that a Royal Commission on Opium has yet to submit its Report; but the excuse, it seems to me, is overridden by the crisis in which the Government finds itself Is the falling off in the income from Opium due to a permanent defect of the Indian drug, to the encouragement of the growth of the poppy by the Government of China, or to causes within India itself, within the competency of Government to remove? The present Budget, my Lord, is nowhere a budget of hope, but as regards Opium it is almost a budget of despair.

"I notice also that the Provincial Governments have been called upon to contribute from their balances towards the necessities of the Central Government. This is a policy all thinking men will deprecate unless the need is of so urgent a character as to make it imperative that those balances should be appropriated in order to stave off the infliction of some new burden. In the present case this rule will not apply, and the Provincial balances are drawn upon in order to enable the Government to abstain from placing an import-duty on cotton goods.

"This, my Lord, brings me to the real subject of my remarks upon the Budget. It is in a sense peculiar and unusual, a historical document. It brings

forward in a pronounced form a policy enunciated in 1878 and 1882, and which then startled the country and led to loud protests the echoes of which were heard in the discussions which took place in this Council. Then, my Lord, the cry was for Free Trade, but that cry must now be abandoned when it is openly urged in England that the claims of Manchester must be regarded even at the expense of this country. On the 10th March, 1882, my honoured friend Mahárájá Sir Jotendro Mohun Tagore spoke of the 'neglect of justice to India in consideration of the interests of Manchester manufacturers.' I am quoting the interpretation put upon my friend's speech by Lord Ripon. His Lordship in meeting that charge declared—'from the earliest period of my public life I have been an earnest and consistent advocate of the fiscal principles of the Free Trade party, and I have been so because I believe these principles are principles of general application calculated to confer the largest benefits upon the great mass of the community of any nation to which they may be applied.' Holding such views Lord Ripon declared himself desirous 'of having a hand in conferring upon the people of India the benefit of the application of principles which I believe to be calculated to conduce to their permanent advantage and prosperity.' Here, my Lord, the policy of Government was declared in emphatic language by its Head and Chief. But Lord Ripon went further than this. He declared the financial interest of India, that which Sir John Strachey, quoted recently by my hon'ble friend Mr. Playfair, called 'the financial independence of India,' to be an object of which Government should never lose sight. He said :—

'And I can say that if I did not entertain that opinion, if I thought that the course which the Government is about to take with respect to these Customs-duties was a course that would benefit England at the expense of India, I would not have been induced by any consideration to be a party to such a proceeding. I desire, so long as I may hold the position I have now the honour to fill, to govern India in the interests of India and for the benefit of her people, and I would not consent to be a party to any measures which I did not honestly believe would conduce to that great end.'

"My Lord, it is conceivable that a crisis may arise when India may be called upon to undertake sacrifices for the benefit not of herself alone but of the Empire at large of which she is proud to form so important a part. Should such a crisis ever compel the Government to appeal for such a reason to the people, the appeal would be loyally and cheerfully responded to. No such necessity has, however, arisen. The fall in the value of the Rupee has caused serious embarrassment to this country. There is an urgent demand for an increase to the revenue, a demand so urgent as to compel the Government to reverse the Free Trade policy so strongly recommended to the country twelve years ago by Lord Ripon. And what is the result? India, which because of that Free Trade policy abolished her import-duties, has had to submit to that most distasteful of all fiscal measures—direct taxation, now finds herself compelled to look to import-duties as a permanent relief to her distresses. The principle of Free Trade is abandoned, and, rather than admit this all round, the Famine Insurance Fund controversy is reopened, railways are suspended, Provincial balances are drawn upon, and worst of all the special advocacy of Indian interests no longer forms a feature of the discussions on the Budget. An Hon'ble Member on a recent occasion assured Your Lordship that the masses of the people never heard of the debates in this Council. That is true in part, but only in part. The masses may not follow debates, the eloquence of which they would not appreciate, but they do follow the measures of the Government. These measures are discussed far and wide. The principles on which they are based are, it may be, above the heads of the masses, but for all that they are talked of much more frequently than might seem possible in every market-place and gathering in the country. It is this fact which distresses me most in regard to the defect I have pointed out in the Budget. It is this fact which forces me and all who comprehend the real influence of English rule to deplore the exemption granted to cotton goods. There is a real public opinion in India, and the result on opinion of this most mistaken exemption will be at once regrettable and disastrous. The effect upon the power and influence of the Government may be slow in making itself felt, but will be beyond question mischievous and deplorable, because, to quote

from a speech in this Council delivered by Lord Ripon on the 7th of January, 1884—'that power and that influence rest upon the conviction of our good faith more than upon any other foundation, aye more than upon the valour of our soldiers and the reputation of our armies.'

" At a time when, in connection with this question of import duties on cotton goods, the Press in England has indulged in speculations as to the " SPELL " which binds this noble dependency to the United Kingdom, I may be pardoned if I make another reference to the speech of that great statesman, Lord Ripon, from which I have just quoted. Replying to the question of the Hon'ble Mr. Thomas—'Was there ever a nation which retained her supremacy by the righteousness of her laws?'—His Excellency said:

'My study of history has led me to the conclusion that it is not by the force of her arms or the might of her soldiery that a great empire is permanently maintained, but it is by the righteousness of her laws, and by her respect for the principles of justice.'

" In these words is described more eloquently than anywhere else the secret of the SPELL of British rule in India. My Lord, I feel that I may be forgiven when I express the hope that the essential character of that spell may be maintained; when I give utterance to the wishes of my countrymen that the end of the crisis which has come so suddenly upon India may be to convince all men throughout the length and breadth of the land that Lord Ripon's words are still true, and still faithfully depict the policy and the hope, the object and the endeavour, of the Government of India."

The Hon'ble FAZULBHAI VISHRAM said:—" Your Excellency, I do not propose to detain the Council long with the few remarks which I have to offer on the Financial Statement of the ensuing year. It is a sober exposition of solid facts and figures, which, however, I am afraid, will not remove from the minds of a critical observant public the impression that the Government has no definite policy for the solution of the difficulties in which the country has for some time been involved owing entirely to the depreciation of its currency. No doubt the frank confession of helplessness, which seems to be the keynote of the Statement, disarms criticism. We realize and appreciate the ability with which the financial forecast for 1894-95 has been made. We recognise that the programme sketched is 'a programme of retrenchment and vigilance intended to take the Government over a transition period.' And yet the country will be entitled to ask, how long is this hand-to-mouth policy to continue? I shall not venture to travel over the same ground as in the course of the debate on the Tariff Bill, but it seems to me that the apprehensions which we entertained regarding the course of events have been fully justified by the Statement. The country at large asked the Government to include imported cotton goods in the Tariff Bill with the object of assisting it in its difficulties in the easiest manner possible under the circumstances. It is a peculiar fact that, whilst additional taxation is always objectionable to the people, in this instance there was a consensus of opinion that Government might fairly and wisely raise sufficient revenue to meet at least half its deficit by imposing a small duty, such as has been imposed upon other commodities, on cotton goods imported into the country. The voice of the people, who were and are willing to bear the burden, was overruled on grounds the speciousness and hollowness of which are now sufficiently exposed by the recent enunciations, journalistic and otherwise, in England. I endeavoured to show in my remarks on the Tariff Bill that the idea of protection involved in the imposition of a small duty on fine yarns and fine cotton goods imported from England is chimerical, and I adhere to that opinion. What is the result of adopting that course? My hon'ble friend the Finance Minister has been obliged to include in the Budget the Famine Insurance Fund for meeting the deficit; he is compelled also to starve the Local Administrations of various funds applicable for the better carrying on of the administration. Can anything be more disastrous than the absorption of the Famine Fund for the purpose of meeting a deficit? It might as well be thrown into the sea so far as any good to the country is concerned. I may venture, my Lord, to say that the country is still in the hope that your Lordship's Government will be able to induce Her Majesty's Secretary of State

to reconsider the position and sanction the duty on imported cotton goods. As regards the demand for a countervailing excise-duty upon cotton goods manufactured in India, had there been any parity between the goods upon which we suggest a duty should be imposed and the goods manufactured in India, and had even the levying of such an excise-duty been practicable, the suggestion would be unworthy of the greatest nation of the world towards its almost bankrupt dependency. In order, however, to do away with a wrong to the country which results in the appropriation of the Famine Grant and other items ordinarily applicable for the improvement of provincial administration, I, for one, speaking as a millowner, would be willing to support the levying of an excise-duty on cotton goods manufactured in India, assuming, of course, that such an impost can be practically levied without injustice and serious trouble. Whatever view may be entertained in this matter, I submit that no effort should be spared in obtaining the sanction for the re-imposition of the cotton-duties, for, in my opinion, the revenue derived from this source will not be the only benefit to the country. It would, as I ventured to indicate before, help to a certain extent in creating that desirable balance of trade in our favour on which so many people build their hopes of seeing a solution of the financial difficulties of India. That this hope is not altogether unfounded must be apparent to every one who has closely observed the circumstances that transpired before and after the introduction of the Tariff Bill. It requires little knowledge of economics to see that with our enormous gold liabilities to England and a large import trade with gold-using countries, an export trade, the value of which must necessarily be appraised in silver, must assume vast dimensions in order to create a balance of trade in our favour so as to compensate for the loss caused by the depreciation in the value of our currency without some such extraneous assistance as has been suggested. In my humble judgment no amount of retrenchment or vigilance exercised in the present or in the future can possibly cope with the gravity of our situation, unless and until an attempt is made to deal with it radically. Speaking with all respect, I beg to say that the currency legislation of last year has hardly received a fair trial. The enormous introduction of silver, which mainly contributed to annihilate the anticipations of Government regarding an immediate, stable exchange, took place under circumstances which leave little room for doubt that the silver imports were made by speculators, Native and European, not to meet a *bonâ fide* demand amongst the masses of the country, as is commonly supposed, but merely for purposes of speculation. And this brings me to the suggestion which has been made to Government from another quarter, namely, of making silver a Government monopoly. So far as I can see, there seems to be no objection, economic or otherwise, to adopting that course.

"As regards immediate remedial measures, I understand that on the Revenue side the mint receipts, amounting to about fourteen lakhs of rupees, are considered to be lost. Is there any objection to the Government working the mints on their own account? Considering the low value of silver and the great margin between the respective prices of bullion and the rupee, would not Government by manufacturing rupees for itself make sufficient profit to meet at least a substantial portion of the present deficit? It seems to me to be a legitimate source of revenue and one capable of materially easing our finances. I would venture to ask the Hon'ble Mr. Westland for an elucidation of this point. I understand that Government do not allow the free coinage of the copper currency, but they manufacture the coin on their own account, which leaves them a substantial profit. I have seen it stated that the metal in a rupee worth of pice is valued at about six annas only! In the same manner it is said that the margin of profit between the respective values of bullion and the rupee is about 25 per cent. exclusive of all charges and the duty. In the year 1892-93 about ten crores of rupees were coined in the Bombay mint alone, and, if Government were to do the same now, the operation should bring them an enormous profit.

"I further see that the Treasury balances are given at 26 crores and at over 21 crores at the end of the ensuing official year. Of course, nobody expects the Government to manipulate this large sum as a private individual, but again I see no reason why this great balance should not be invested either in its own paper at

4 per cent., which would relieve the finances to the extent of 84 lakhs per annum, or why even half of it should not be invested in English or other stock so as to yield a substantial income in sterling to meet sterling liabilities. Such a course would appear to be all the more desirable when the Secretary of State will be issuing a sterling loan of about 8 millions to replenish his treasury, and heavy demands for interest thereon must be met. In fact, there must already have been a large charge under the head of interest on the temporary borrowings in London this year, and it cannot be less than a quarter of a million sterling in the ensuing one, which can be easily covered by a judicious investment of funds on this side. Another opening for the large balances would be the construction, or rather continuing the construction, therefrom of what are called the 'trade railways' already sanctioned. They are proved to be productive constructive works and besides help to keep the balance of exports in favour of India, which is besides the only chance of success for our currency scheme. Last year I had the honour to suggest that the new loan for 300 lakhs might be issued at 3½ per cent. instead of 4, and it happened to be so issued. It was placed on the market at a discount, but its present rate is over par, and the annual saving to Government is 1½ lakhs in point of interest. They can secure a further saving by converting a portion of their 4 per cent. loan to 3½ per cent. by giving the usual notice.

"I will not dwell upon the Home charges and the Military expenditure, especially after what has already been said about them by the other speakers; they are more or less beyond the control of this Government; but I must, before concluding, say that I entirely sympathise with those that object to a constant increase under these heads, and urge a reduction thereof in the present crippled state of our finances."

The Hon'ble SIR GRIFFITH EVANS said:—"I do not think that, since I first sat in this Council in December, 1877, I have listened to a Budget which gives rise to graver reflections than the present one, although there are points about it which bring some hope for the future. The look-out is uncertain and unsatisfactory.

"The leading features of the situation are that, although the number of rupees composing the revenues of India are increasing steadily, yet their exchange value in respect of gold has been falling, out of all proportion to the increase in their number, and that there are symptoms that their purchasing power in this country is falling also.

"Next, we find that the expenditure is steadily increasing, and I fear to a great extent necessarily so. We cannot hope that, although there may be savings made here and there by a vigilant Finance Member and Members of the various Departments, there will not be an increase constantly going on which will out-balance these savings. Take, first of all, the general administration of the country. I do not think that it can be hoped that in a country which is so constantly improving as this is, and in regard to which we are constantly aiming at a higher standard, one can expect to have a diminution in what we might call charges for general administration which would include Police, Law, Justice and many other similar matters.

"Next, take charges connected with development of the country. In this country, where the population is increasing by leaps and bounds, at the rate of about three millions a year under the security of life and property given by the rule of England, it is evident that it becomes absolutely necessary to do what can be done in order to meet this constantly and largely increasing population. One of the things that is specially to be done is to attend to Irrigation, and thus increase the fertile area, increase production and diminish the chances of failure of crops.

"Next in the matter of development come Railways and Roads, to cheapen transport, to encourage exports and to enable the country to bring out her produce into the markets of the world and generally to stimulate trade. Unless this is done, it is quite plain that the population must become in excess of the powers of the soil, and must starve and dwindle, unless they emigrate. For food determines population. Therefore these charges are absolutely neces-

sary, and we cannot expect them to decrease whatever economies he may make in detail.

"Then comes the other great matter in the case of an Empire like this, and that is its defence. If one looks at the extent of this enormous Empire and sees how much of its Frontier is bordered by tribes and nations quite as fierce and martial as any of those barbarians who beset the Roman Empire in its latter days, when one looks at that and sees in addition the close approach of two first class European Empires, when one reflects upon what human nature is and that one never knew an Empire when it saw a chance of overthrowing another not to take advantage of that chance, when one looks at the lessons of history, one feels bound to recognize the necessity for maintaining a large efficient army. The more so that this immense Empire is full of titanic forces of disruption barely kept in a state of unstable equilibrium by a foreign element. Looking at this Budget one sees that, so long as the army is kept at its present strength, and unless some reduction is possible,—regarding which I shall have something to say hereafter,—it seems pretty plain that one cannot expect very much of a decrease in the expenditure. The same thing may be said here as I have said in regard to the civil administration. A vigilant Financial Member, co-operating with the Military Member, may knock off a lakh here and a lakh there, but with the increased expenses of the munitions of war and arms of precision, with the increase of prices and the rise of wages, one does not see that there is likely to be any great diminution of the expenses. On the contrary, one sees that it is very much more likely that some day cr another the question may arise even as regards the increase of the pay of the Native soldier and to the necessity for more British officers for each Native regiment. Eight is a small number to begin a campaign with.

"From the very nature of our Empire we have to make large gold payments to England, because England is a gold-using country and we get our European army from England—which army is absolutely necessary for the maintenance of our possession of this country; so much so that if it were taken away the Empire would disappear to-morrow; it follows that there must be a very heavy gold charge with regard to pensions and pay, and also with regard to the necessary materials of war and railways, and so on, which must be got from gold-using countries, because they cannot be obtained in India. Under these circumstances there is this crushing fall in exchange which upsets all the financial schemes devised, and makes it difficult for us to bear the burden of increased expenses of administration and defence which otherwise we might easily afford. It is in respect of the 16 or 17 millions a year that we have to pay in gold that the pressure is so crushing. The result has been, as shown in the Budget Statement, fresh taxation to meet a deficit of nearly Rx. 3,000,000, reduced, by desperate attempts at retrenchment, to an estimated deficit at the end, of Rx. 301,000. We have a deficit of Rx. 1,792,000 in the past year (1893-94) and Rx. 833,000 for 1892-93, and now Rx. 2,923,000 in the present year.

"Under these circumstances it is quite evident that fresh taxation of some sort must be resorted to, for, notwithstanding that it is said to be a period of transition, yet the Financial Member said in his Statement that it is a position, whether transient or not, which compels us to look for money and provide for it by some permanent source of revenue.

"Now, before I pass on to consider what that ought to be, I wish to say a word in regard to Exchange Compensation. This is really raising the rupee salaries to partially meet the fall in exchange. This has been very bitterly attacked outside, but the observations made about it in the Council here so far have been comparatively mild. That is to say, it has been protested against in a certain way, with a feeling that something ought to be done if possible—if we could afford it. I will not go into the details of that measure, but I would put it simply on the broad ground that it is absolutely necessary if there is to be an English Empire maintained here. We must have a British army, and that army must be paid, and that involves adequate payments for their pay and pensions. The next thing is

that you must have a certain number of Englishmen here to administer the Empire. I am not speaking of how many there ought to be or how few there ought to be, but it is quite necessary that they should be here, and if you want to have men of the right sort it is also certain that you must give them adequate pay, and that, when they have laboured here for a number of years, they should feel that they have something to fall back upon in their own country, and the charges connected with all these services are absolutely necessary for the maintenance of the Empire. It is also necessary to have a certain number of Europeans in other branches of the administration—the railways, and so on; and if you have these men out they too must be adequately paid.

"Now, what has happened? I take the Civil Service. I will not go into too much detail as regards all the rest, but I take the Civil Service as an example. Years ago the Civil Service was placed upon a certain basis of payment in the rupee. Why was this done? Was it on account of some great liberality or of some desire to place these men in a position of unnecessary opulence? Not at all. It was because they came out here to administer a great Empire under many hardships and difficulties. They had to educate their children, they had to send their wives home when ill, they had to go home themselves when ill to recruit, and it was quite evident that you could not expect the kind of service that you wanted unless they were reasonably paid. The reform on the old system of Writers on small salaries with free quarters was intended to place the service in a position in which the State could expect devotion and sacrifice from them considering that they were, on the other hand, well remunerated if they happened to live through their term. Now, what happened? The exchange fell and fell until 40 per cent. went off the income of these people, and the evidence that was available before the orders were issued with regard to Exchange Compensation showed most clearly the distress and the utter change in the position of these men that had taken place. It showed that a feeling of discontent was growing up, and it indicated a state of things which really meant the demoralisation of the service. We all know what the record of the Civil Service has been, how the Empire has been governed, and what a wonderful spectacle it is that it should have been governed in the way it has been. One knows that. when the history of the Civil Service comes to be written, it will command the admiration of posterity. Faults they have had in plenty, but the service has as a body shown earnestness and capacity and devotion to their work to a rare degree, and they have been allowed by their worst enemies to be free from suspicion of corruption. There were certain fundamental matters that had to be considered. As far back as the times of the old Egyptians and the period of the Pharaohs it was laid down as an axiom that a Judge must be well paid and put out of the reach of all temptation of being bribed by the litigants. The same is true of the Rulers of Provinces. To get Englishmen to govern districts in the East (which elsewhere would be Provinces or Kingdoms) with incomes so reduced that they could not provide for their families in England and live in such reasonable comfort and freedom from petty money worries as is essential for their position and health is mere folly. But we stood in this position, that the service was becoming impatient and discontented, and it became plain that it was time to act and absolutely necessary that something should be done. I speak in this way on this subject, and you may ask what have I got to do with it? I have nothing to do with it. Since I came to the country I have not drawn one single rupee of Government pay, nor have I any relations in the Civil Service. I have no reason for expressing anything but my own personal opinion, and I am very free to do so. I have seen this change going on for twenty-five years now, and I say that the attempt to alleviate the pressure was made not one day too soon. It is said, but why make it in a time of such financial difficulty? It is because the very reasons that brought about the financial pressure on the Government also caused this dire financial pressure on the service. When we came to look into the matter there were two things to consider—they were the European army and the European service, and they had to be paid for. That is the fact of the matter, and if the payment is heavy it is a necessary payment, and it is well worth making it. If you were to put it to the people of this country now—if you put it 'Would you

like to have the European army withdrawn and be free of the expense?' there is not one single sane Native with anything to lose who would not lift up his hands in absolute horror at such a suggestion; they would be as horrified as the people of ancient Gaul (the modern France) were when the Roman army was withdrawn and the German barbarians flocked to the loot of that flourishing Province—their cry would be bitter and hopeless. Under these circum stances, while one would not wish to do anything in the way of expense that could be avoided, we should be failing altogether in our duty if we did not incur the necessary expense for the maintenance of these two services in a state of efficiency. I have spoken thus as regards the Exchange Compensation in order to explain why, as far as I am personally concerned, I agree in the necessity for that expenditure.

"I will not go over again the ground covered by the debate on the Tariff Bill.

"I will take it as clear that the general import-duties exempting cotton are inequitable and capricious in action as well as inadequate in result, and that, whether the sum required is one or two millions, it should be raised by equitable and not by inequitable taxation.

"What I propose to do now is to examine the Budget as to see how India stands and what is her financial position. What I wish to dwell upon is this: the Secretary of State is reported to have announced that in his view there was no sufficient financial pressure on India as yet to justify him in reconsidering the subject of the cotton-duties. That was before the last debate in Council, but I think, when the Secretary of State sees this Budget and marks what is done in India, he ought to be satisfied that the 'pressure' is sufficient.

"Every one has observed that the estimated deficit on the 2nd March was about 3½ millions, whereas the deficit appearing on the Budget of the 27th March is Rx. 2,923,100. The difference is principally due to the reduction of Rx. 370,700 for roads and buildings, as stated in paragraph 24 of the Statement. There are other stringent retrenchments of smaller amounts.

"But turning to paragraph 19 we find that the Rx. 370,700 is made up of Rx. 194,200 cut from Military works and Rx. 176,500 from Imperial works on the civil side—all forced upon the Government by financial pressure. The total is Rx. 370,700, cut out Public works not because they are not necessary, but simply because the money is not forthcoming.

"Add this to the present deficit Rx. 2,923 100 and we get roughly Rx. 3,300,000 as the amount at which the deficit would have stood had not these ruthless cuttings been made. It is not suggested that these works are not necessary or that this expenditure can be permanently avoided—paragraph 19 is clear as to that and the same thing is shewn by paragraphs 127, 128 and 129 These are the measures adopted to bring the deficit down to Rx. 2,923,100. I ask your attention to the meaning of this. It means a total arrest of development.

"As to Rx. 194,200. What does this mean? The barracks required in Upper Burma will not be built, the sanitary measures required for the army in India will not be carried out, and worst of all the proposed improved arrangements for water-supply for the troops all over India must stand over—this means preventible sickness and preventible deaths among our troops. The dreadful scourge of enteric fever is to run its course unchecked.

"All this to enable cotton goods to be exempted from the tax!!"

"Yet all this is not 'sufficient pressure' to induce the Secretary of State to reconsider the matter!

"As to the cutting out of Rx. 176,500, it seems *inter alia* the stoppage of new post offices, telegraph offices and other useful works.

"But it does not stop here. When the general import-duties minus the cotton-duties have been put on, yielding Rx. 1,140,000, there is still left a deficit of Rx. 1,783,100. To meet this the Famine surplus, Rx. 1,076,200, is diverted from its special purpose and used as ordinary revenue.

"I am not one of those who have any superstitions about the Famine surplus, as if it were 'taboo' protected by oaths and the wrath of the Gods

from sacrilege. But it represents a definite line of policy which is shortly this. As famines are recurrent in India sound finance requires that we should make provision for them as certainly as a owner of house-property has to set aside a margin from his rents for repairs.

"This policy was announced by Lord Northbrook in 1874, put into operation by Sir John Strachey under Lord Lytton in 1877. The rule finally laid down was that this special surplus should be budgetted for and spent either in protective works so as to avoid borrowing or reduction of debt. More than once this special surplus has been suspended from necessity, but always re-established as soon as possible, and it is to be remembered that it was originally raised by special taxation for the purpose.

"The diversion of this special surplus to ordinary revenue is only permissible during severe temporary pressure. It must be restored before our finances are in a sound state.

"This goes into the yawning chasm of the deficit and the Secretary of State still says 'insufficient pressure.' There still remains Rx. 706,900 of deficit; what next will the Financial Member throw in? Rx. 405,000 taken as it were by force from the Local Governments—a widow's mite, but all that they had. The piteous story is told in paragraphs 27 and 28; the details are in paragraph 97—the administration crippled and the heart taken out of the Local Governments.

"Is this not pressure enough? In paragraph 128 we are told these sums are obtained from the Local Governments mainly by cutting down civil works which were badly needed. How severe the retrenchment has been may be imagined from the case of Burma. It is said one of the items there is a lakh of rupees or thereabouts for a light-ship. Danger to shipping, yet insufficient pressure! It seems a pity that the Secretary of State cannot be sent for a cruise off that coast on a dark night.

"See what has been done. Rx. 370,700 cut out of the Imperial Budget for Civil and Military public works and Rx. 405,000 from Provincial works; total from necessary public works Rx. 775,000, at the expense of the development of the country and the health of the army. Substitute the cotton-duties for these retrenchments and even then you would have had to take the Famine surplus to make up the Rx. 3,300,000, and the Budget would have roughly stood thus—deficit Rx. 3,300,000 as against Rx. 3,316,000 (from cotton-duties taking them at the low figure of Rx. 1,100,000, the present duties and the famine surplus, *i.e.*, Rx. 1,100,000 + 1,140,000 + 1,076,200) = surplus Rx. 16,000. Even this would be a temporary arrangement as the Famine surplus must be restored as soon as possible. Railways and irrigation would have lost for a time the Rx. 1,076,000 of the Famine surplus. It is said this is a temporary situation or may turn out to be so, but the Financial Member has told us that it is a situation which imperatively calls for a new source of revenue of a permanent character and that general import-duties have been deliberately chosen for that purpose.

"If so, justice and expediency alike demand that, with or without a countervailing excise, cotton goods should be included. The Financial Member evidently thinks it should be without excise-duty and so do most people in India, but the enemy is strong and it may be well to make terms with him while he is yet on the way.

"My Lord, on reading the account of the Lancashire deputation one feels that the position of the Secretary of State was not a pleasant one. After a few stock phrases about disinterested concern for the poor Indian, they showed their teeth and gave him to understand very plainly that they would do their best to turn out any Ministry that opposed what they considered the interest of the trade, and pointed out that Lancashire was strong enough to win any fight she went into in earnest. His answer in effect was 'that he had decided to yield for the present.'

"The Secretary of State was between the devil and the deep sea. The tempter was close at hand, while the deep sea of Indian discontent was moaning sullenly in the distance. He told the deputation the sound was always in his ears. It is much louder now.

"It is a great deal louder now, and I can only hope that this matter will be settled without delay, for, as your Lordship will perceive from what has been said to-day and what may be heard outside, it is clear there is no change in the attitude of the public with regard to this matter, and it is exceedingly desirable, for reasons which have been laid before the Council on the last occasion, that no time should be lost in settling it.

"I pass on then from this to consider whether any, and, if so, what savings are possible in the Indian expenditure. The Council will see from what has been said that I do not anticipate any very great savings. I do not see that the main expenses are at all likely to decrease, and therefore the matter stands in this way that the only place in which reductions would appear to be in any way possible is the army. Now, with regard to that I would only say that, looking at the Budget and with such figures as I have had access to, I do not think that you can reduce expenditure very much so long as the army is at its present strength. Savings may perhaps be effected by the strenuous efforts of the Financial Member in connection with the Military Department. But no one but an expert can deal with that mass of details. There are, however, one or two items to which I should like to call the attention of the Council. One is the Commissariat. Commissariat charges are always increasing—there are twelve lakhs more charged for the Commissariat this year, and former years show a strong tendency to increase. I have tried to discover how this has come about, but it is too mysterious a subject for an outsider like myself. As far as I can gather, there are one or two elements in it which involve some amount of uncertainty. There is a system of compensation for food in the Native army by which there is an allowance made to the men when the bazar rate for certain provisions or grains goes above a certain point, and this, so far as I can make out, appears to be based upon certain price-currents certified to by the Commanding Officer. How this price-current is made is not very clear to me; for the Commanding Officer may not always be a very great authority on the subject of prices, and also, if he is a good Commanding Officer and considerate to his men, which is only very natural, he may not be much inclined to be as hard upon them as the Account Department or some of those other Departments which are said to be devoid of any human feeling whatever—I have very often found them disputing about a pice, and I have known a long official correspondence to have taken place in which the amount involved did not exceed two annas. What I wish to say is that Commanding Officers generally are not men of a close-fisted disposition and it is possible they may not revise these price-currents very accurately. I admit that the Commissariat estimates must increase to some extent, because prices have risen, but the question is, whether the increase is not going up too fast. That, however, is comparatively a small matter.

"And now I should like to make a few remarks on a graver and more important subject.

"My Lord, I am perfectly sensible that the question of the reduction of the army is not a question to be taken in hand as a temporary measure to meet a deficit. More than that, I also understand, very well understand, that if you made any reduction, it would not operate as a reduction in that particular year, and that it would not come into effect for some considerable time. I am also further aware that this matter of reduction is an Imperial one and that it is a matter of high State policy. It is one of the 'arcana of Empire' and is not a matter to be debated on the housetops, and therefore I do not propose to offer any views of my own on the matter at all. I would only say this, that, so far as I can see, unless the Native troops can be diminished in number there will not be any great reduction in the cost of the army. Whether that can be done or not I do not propose to discuss, but I think I am within my right in saying that, so far as I can see from this Budget, unless this is possible there will be no great reduction in expense. It will be of little profit to howl at the Military Member and urge him to look at and reduce all this enormous expenditure. But I have no doubt that the Financial Member will stir him up to as much reduction as it is possible to effect. One thing is clear, that whatever reduction may be made there is no reduction possible in the British army in India.

That, my Lord, even at present is standing below the proportion which was considered by the Commission which sat after the Mutiny to be the safe one, and therefore no question can arise on this point. The question of reducing the Native troops is one upon which I do not offer an opinion. Nor will I say anything more as to the reduction of numbers than that it is the only way in which any large saving can be effected.

"Then there are two or three small points to which I should like to refer to. I observe that Rx. 50,000 or 5 lakhs have been set apart for the Afghan delimitation. This is a very moderate estimate. I only hope it may prove approximately correct. But I think the Financial Member will be a very fortunate man if he effects the delimitation of the Afghan Frontier for this sum. I should not like to take the contract.

"The next thing I observe with great satisfaction is the smaller provision for charges for special expeditions: this saving amounts to Rx. 132,000: this is very encouraging and a thing to be grateful for. The only thing is that the Financial Member may have his hand forced by circumstances in spite of his good intentions.

"On the whole it is a Budget in which the main blot is the non-inclusion of cotton goods in the new taxation, but it is one contingent upon so many things—the absence of small wars, the absence of famine and above all the maintenance of the rupee at 1*s.* 2*d.* while its intrinsic value is 10½*d.*, that the Financial Member can do little more than watch the expenditure and pray for a rise in the rupee.

"There is one other subject of meditation which I would take the liberty of suggesting to my hon'ble friend during his sojourn in Simla, and that is succession or death-duties.

"These duties are very unobjectionable in principle and are paid at a time when the person taxed has just received an accession of property through no exertion of his own. There are no doubt practical difficulties, but I expect they could be got over and the tax would be a very productive one. The present position as to succession-duties is very anomalous. The estates of Europeans, Eurasians, Jews, Native Christians and others not being Hindus, Sikhs, Jains, Buddhists or Parsis are by the combined effect of the Succession Act and Court-fees Act subject to a succession or death-duty of 2 per cent. including the land. The Hindu who makes a will in Bengal is in the same position. The rest of the inhabitants only pay 2 per cent. under the Succession Certificate Act, 1889, on debts they are obliged to collect through the Court or which the debtors refuse to pay. The Jews are few, and, roughly speaking, it may be said that there is a tax on Christianity in this country, while what the missionaries term the 'heathen' go free. It is time some of the great societies who devote themselves to the religious welfare of this country should raise the cry of free trade in religion. I am aware that this state of things has grown from natural causes so to speak with no intention on the part of Government to favour any religion or nationality. The history of it will be found in the debates of 1889. But this is the present result.

"I now pass on to my last topic, the Home Charges.

"Most of the Home charges, interest on debt, railway guarantees and pensions—are irreducible. Of the £4,000,000 of military expenditure, most of it is in the same position. The charge for stores is being looked to and reduced by getting what can be got in India. But there are old grievances as to past over-payments as regards the army, and this is a chronic irritation as to the charges coming under the head of 'Army effective' amounting to about £800,000.

"This matter was the subject of very serious debates in the House of Lords on the 15th May, 1893, and the 3rd July of that year. They are reported in the 12th and 14th volumes of Hansard for that year. They are very painful reading. They show that the India Office has for over thirty years been systematically overborne by the War Office and the Treasury, that there are old grievances to be redressed as well as the future effective charges to be settled on a more equitable basis.

"We find Lord Northbrook, Lord Cross and the Duke of Argyle (an ex-Viceroy and ex-Secretaries of State for India) going out through the long tale of

remonstrances disregarded and charges imposed against their will—the Persian and Chinese contribution, the use of Indian troops for Imperial purposes without payment, and the impossibility of getting a fair adjustment of the charges made in respect of the prior training of British soldiers sent to India.

"Lord Northbrook even went to the length of suggesting that the Secretary of State and his Council should refuse to pay certain of the charges as being contrary to the Act, which compels him to appropriate the revenues of India to 'the purposes of India alone'.

"I will not repeat what the noble Lords have so ably expressed: It has made a deep impression in this country. People had long known that there was something wrong, but it was impossible to get the details. In the debate of March, 1890, in this Council (Proceedings, page 155), Sir David Barbour promised to look through the correspondence and said that 'if he found that there was any correspondence or other paper which might with advantage be made public he would propose, with His Excellency's permission. that they be published in the Gazette of India.' No such papers have been produced or published. I would suggest to my hon'ble friend that he should cause the material part of the correspondence to be published or explain why this is not done.

"I fear that the debate in the House of Lords gives the key to it. Lord Kimberley then agreed with the other noble Lords and he sought their aid in this unequal fight against possible further demands. But for the rest he said that the able men who advised him in the India Office were against taking steps to refer the matter to any Commission lest it should result in further demands and charges. He has not moved so far as can be seen since that time.

"Some of the papers mentioned in that debate—letters of 1872 and 1874—have been published and show the strong but unavailing fight then made by the Duke of Argyle and Lord Northbrook.

"But the two later papers mentioned by Lord Northbrook, which bring the discussion up to date, have not been published. They are the 'long and able despatch' from the Government of India of the 25th March, 1890, enclosing a note by the Military Secretary, and the Secretary of State's despatch to the Government of India of the 18th August, 1892.

"As to the India despatch of 1890, stating the principles according to which the Government of India consider these charges ought to be settled, Lord Northbrook said. 'His hon'ble friend (Lord Kimberley) the other day expressed a doubt whether the despatch could with advantage be laid before the House, and, on that ground, he would abstain from moving for it. But if at the end of the present session nothing had been done in the matter, it was only fair that that despatch and other despatches sent by his noble and gallant friend to the Government of India should be produced in order that public opinion might be brought somehow or other to support and strengthen the Secretary of State in the difficult position he was now placed."

"The Secretary of State is apparently still afraid to move, but the matter cannot be left here. People in India must be given the means of making up their minds whether they will sit down under what all those noble Lords, ard apparently the Government of India, consider to be unfair charges or take the verdict of Parliament.

"The charges in question are mainly comprised under the head Army Effective charges, which amount to between £800,000 and a million. There are also shown the Political charges for Persia, China, etc., which ought to be reduced if not done away, and if fixed should be fixed in silver and not in gold, being Eastern charges. Some of the Non-effective charges are also challenged. The rest of the Home Military expenditure or most of it is, as I have said, irreducible except so far as we can buy our stores in India.

"Now, the Secretary of State and his able advisers may be right in thinking they will get no redress but only fresh claims. But, so long as those noble Lords who spoke in the debate and the Government of India are of opinion that the charges are not fair, public opinion here, so far as I can gather, is unanimous

that the matter must be decided and that it is better that it should be fought out rather than it should be said that it is hopless to urge any claim of India which touches British pockets. Had the Secretary of State known the invincible tendency of the natives of India to carry every matter up to the ultimate Court of appeal, he would not have resolved on this course. He would have bethought him of the Madras litigant who petitioned in vain up to the Secretary of State and had many petitions returned as not having come through the proper channel, and who wound up with a last despairing petition to 'Almighty God, care of the Governor of Madras.' With all our faults as a nation, I hold to the belief that there is a strong spirit of justice and fair play underlying the British character which will answer to a clear and ringing appeal. I do not doubt the desire of the House of Commons, the ultimate arbiter, to do justice; the fear is that the case is too complicated and the issues may get confused. The risk must be faced and the controversy decided one way or another. It is a political necessity it should be. I hope the result will not show us, like the worshippers of Baal, crying to deaf ears while the Secretary of State and his able advisers in the India Office mock us, saying 'cry louder; peradventure he is asleep or on a journey.'

"The feeling of injustice has been intensified by the exemption of the cotton goods. People say—'you demand gold from us which competent authorities say you are not entitled to in equity or law, and you refuse to allow us to impose equitable taxation to pay it.'

"For the rest, I am glad to see there is a diminution in the Secretary of State's Budget for the year in respect of salaries—some redundant officials have disappeared—*inter alia* a 'senior supernumerary clerk' and an 'Assistant Private Secretary.' There is a saving made of a little over £4,000 in India Office salaries. The pensions appear, however, to be very heavy and on a very liberal scale, though I have not sufficient information as to the principle on which they are granted to comment upon them, except that Indian officials, who already have Indian pensions, seem to get fresh pensions from the India Office, and that India contributes to the pension of the Chairman of the Board of Inland Revenue because of his former services as Deputy Director of Military Accounts at the India Office.

"As to those ancient pachyderms the War Office and Treasury, they guard each their own interests and look at nothing else. The more charges they can throw on India to their own relief, the better they are pleased. As to getting a refund from them, it is like trying to get a pat of butter out of a dog's mouth."

The Hon'ble DR. RASHBEHARY GHOSE said:—"My Lord, the spectacle of a Finance Minister struggling against adversity cannot fail to call forth our respectful sympathy, and Mr. Westland has shown that, although he is obliged to pursue the wrong, he both sees the right and condemns the wrong he is doomed to pursue. My labours have, I am glad to say, been considerably simplified by the previous speakers, who have spoken with an authority and experience which I cannot pretend to possess. I will, therefore, confine my observations only to one or two features of the Budget we are met to discuss. I am sorry to say, my Lord, that the Financial Statement which has been placed before us confirms the worst misgivings felt by the public when cotton goods were excluded from the Tariff Act. The bulk of the Famine Insurance Fund has been appropriated to the purposes of general administration, while the Provincial Governments have been also called upon for contributions out of their not over-abundant means. In the words of the Hon'ble Finance Member, this last measure 'practically means the stoppage for the time of all administrative improvement, a measure which they feel must take all the heart out of Provincial Governments, by making them surrender all the fruits of careful administration to fill the yawning gulf of our sterling payments.' The suspension of the Famine Grant, or the Famine Insurance Fund, as it is generally and properly called, is a still more serious matter, the gravity of which cannot be over-estimated. In introducing the Tariff Bill, the Hon'ble Mr. Westland said—

'The next head—that of FAMINE—includes, besides what is usually a small amount of actual famine expenditure, the grant which we make out of our surplus revenues, when

we have any, towards protective irrigation and protective railways. We have at present a compulsory expenditure under the last category of about Rx. 380,000 towards the loss accruing to Government on account of the Bengal-Nagpur and Indian Midland Railways. This amount is now shown in the Railway account, but the balance of Rx. 1,500,000, after this loss is met, is used, when we are able to afford it, for actual construction of railways and canals.'

"Now this language can hardly, I venture to think, be reconciled with the declarations of Government when the fund was first created out of the proceeds of certain taxes which were imposed for the first time in 1878 by the Government of Lord Lytton. The previous speakers have already referred to the pledge repeatedly given by his Lordship and I need not further dwell upon it.

"On the 27th December, 1877, Sir John Strachey, in laying the Financial Statement of the coming year before the Council, thus explained the objects of the fund:—

'Unless, then, it should be proved hereafter by experience that the annual appropriation of a smaller sum from our Revenues will give to the country the protection which it requires, we consider that the estimates of every year ought to make provision for religiously applying the sum I have mentioned to this sole purpose, and I hope that no desire to carry out any administrative improvement, however urgent, or any fiscal reform, however wise, will tempt the Government to neglect this sacred trust.'

* * * * * * * *

'I feel confident that I shall be able to satisfy the Council and the public that the resolution which the Government has proclaimed will be faithfully carried out, and the proceeds of these new taxes will be expended for the purpose of providing what I have called an insurance against famine, and for no other purpose whatever.'

* * * * * * * *

'The object which I thus stated is a perfectly simple one. These new taxes are required for the sole purpose of giving us, year by year, a sufficient surplus of income over expenditure, to meet these famine charges, which had not hitherto been taken into consideration in our yearly accounts.'

"It is true that some Finance Ministers have since declared that in their opinion the Famine Insurance Fund could be resumed a case of imperative necessity, but these declarations are opposed to the solemn pledge given by Lord Lytton as the representative of the Queen-Empress in India. But suppose, in a very exceptional case, to avoid exasperating sacrifices or the imposition of extravagant burdens, to use the language of Sir Auckland Colvin, the Famine Insurance Fund may be trenched upon, has any such case been made out in the present instance? I submit not, and I fear, my Lord, the public would continue to believe that the fund which was created for the purpose of developing the resources of the country and of saving the lives of millions from famine has been sacrified for the purpose of serving the interests of a few English manufacturers. And this brings me to another question—the exchange compensation allowance—a subject on which I will only say that opinion is very much divided. Now, the question will be asked, even by moderate men, at this moment whether it is either fair or just that the taxes raised for the purpose of protecting the people from famine should be applied to increasing the salaries of the European servants of the Government. I find that the Hon'ble Mr. Westland in his speech in introducing the Tariff Act said:—

'There is another serious burden, arising from this same fall in the value of the rupee, which we have to bear, namely, the compensation which we have to pay to our European services for the fall in the exchange value of their salaries. The necessity for this had been pressing itself upon the Government for some time, and it was only with some hesitation that the Government decided, when the Budget Estimates last year were under consideration, that the decision on the question must be put off until the settlement of the currency measures then under consideration of the Herschell Committee. When these measures were settled, the announcement was made that an allowance would be made to the class of Government officers to which I have referred, of which the amount would be equivalent to the remittance of half their salaries (up to a maximum of £1,000), at an exchange of 1*s*. 6*d*.

'In justification of the necessity and policy of this measnre of limited compensation I wish to quote two or three weighty opinions, carefully guarding myself against any

mere official utterance, which might under the circumstances be considered to be affected by personal considerations. The first is an extract from the address of the spokesman of the deputation to Lord Lansdowne of February 3rd, 1893, which declared itself as representing merchants, traders, shipowners, bankers, landowners, producers, manufacturers, importers and exporters, and which certainly did not contain a single European official member:—

'" My Lord, we freely confess to a strong feeling of sympathy with the servants of Government who find their incomes daily dwindling, and who in consequence are in some cases put to severe straits, such as are calculated to do serious injury to the efficiency of the administration. We realise, in fact, that it will be absolutely impossible for Government to carry on the administration on the present terms. We are strongly convinced, however, that the adjustment of salaries and all other adjustments can only be properly effected by the reform of a currency system which has gradually, but with increasing rapidity, brought the country the present pass."

'The Herschell Committee, whose standpoint was a purely impartial one, reported on the same subject as follows:—

Servants of Government.

'" 17. The difficulties which the Indian Government have in meeting the Home charges are aggravated by the fact that the fall in exchange has led to claims on the part of their officers, civil and military, who receive salaries in rupees, to some compensation for the loss which they sustain owing to the fall in exchange. Many of those officials are under the necessity of remitting a considerable portion of their income to this country for the support of their families and the education of their children. It has been said that prices have fallen in this country during the last fifteen years, and that a smaller sterling remittance will now purchase more than formerly. This is no doubt to some extent true, but it does not apply to all prices It is a matter of dispute how far the fall of prices in this country compensates for the smaller sterling remittance which the same number of rupees will procure ; but it is certain that, when due allowance has been made for this, the purchasing power of the incomes of Indian officials has been largely reduced.

Practice of private employers.

'" 18. It appears that some European employers have felt themselves bound to make an allowance to the Europeans in their service in India sufficient to counterbalance to some extent the loss which they experience owing to the fall of the rupee ; and there can be little doubt that even in existing circumstances, and still more if the fall of exchange continues, the Government of India cannot turn a deaf ear to the appeals of their servants for similar treatment without the danger of engendering serious discontent, apart from the question whether such appeals are just and reasonable."

" We have here, if I may say so without offence, presented to us only one side of the question. With regard to the address of the spokesman of the deputation to Lord Lansdowne, we cannot shut our eyes to the fact that they represented what is known as the Currency Association, and that all that they meant to convey was that the reform in the currency system which they were advocating would put an end to the demand for exchange compensation by the European servants of the Government. With regard to the recommendation of the Herschell Committee, it is to be observed that while conceding that prices have fallen in England during the last fifteen years to some extent it is asserted that some European employers have felt themselves bound to make an allowance to their European servants as compensation for the fall in the value of the rupee, an example it is suggested the Government of India might well follow. I am, however, bound to say that, although I have made enquiries in the matter, I have not heard of any such allowance being made by private employers of Europeans in this country. As I have already said, there is another side to the question which derives peculiar importance at this time from our present financial condition. That view has been presented to Government by the Press, by public speakers, as well as the different political associations in the country. I will here, with the permission of the Council, read a passage from a memorial submitted to Government by the Puna Sarvajanik Association. After pointing out that the supply of educated men in England has increased considerably since the salaries of European servants in this country were settled on their present basis, the Assocation goes on to say:—

'The Committee would further submit that the present scale of the salaries of the European officials in this country was fixed at a time when it took six months to go from here to England and when those that came out to India had practically to live the life of exiles, when periodical trips to England could not be thought of, and when, owing to the absence of railways and other conveniences, the Europeans serving in this country had to live for the most part in complete isolation from one another. All these unfavourable conditions of life have, however, now changed for the better. In these days of cheap communication, when railways and steamers have annihilated distance, residence in India cannot be so irksome or costly to the European as it must have been in old times. Under these circumstances, privileged rates of remittances constituted nearly the whole of the indulgence which European officers of Government who had to make such remittances could claim equitably. The present scale of Indian salaries, in the higher grades es-

pecially, as compared with the English and Colonial scales, is again so excessively high that, even with silver low as it is, these salaries cannot fail to be a great attraction to English youths. As a matter of fact, competition for Indian posts has not been found to be less keen than ever it was before.

'The Committee of the Sabha would, therefore, respectfully pray that, for the reasons stated above, His Excellency the Viceroy in Council will be pleased to reconsider these rules with a view to introduce such modifications in them as would (1) prevent retrospective effect from being given to them; (2) limit the privilege to actual remitters up to certain amount; and (3) exclude Eurasians, who presumably have no English domicile; and (4) lastly, that His Excellency the Governor General in Council will order that no officer who has entered Government service during the last five years, or who may enter it hereafter, should be entitled to the special privilege secured by these rules.'

"But even allowing every weight to the recommendation of the Herschell Committee, the question now is not whether the Government of India can fairly turn a deaf ear to the appeals of their servants for compensation for the loss sustained by them owing to the fall of the rupee, or whether such appeals are in themselves from an abstract point of view just and reasonable. That is not the question; that is not the issue now. The question is whether, having regard to the present condition of our finances, when, in the words of Mr. Westland, we must follow a programme of retrenchment and of vigilance, intended to tide us over a transition period, the Famine grant should be suspended, even for one year, instead of the compensation allowance. The question now is whether, in order that such allowance should be paid, all administrative improvements should be suspended and even a few lakhs of rupees wrung out of the Provincial Governments out of the fruits of careful administration. In other words, the question is whether, in view of the imperious necessity of filling up the 'yawning gulf' in our finances, the compensation allowance should not either be abolished, reduced or modified, or at least suspended during the period of transition, in preference to the mode which has been adopted for restoring the equilibrium of our finances. In conclusion, I must say that we are all sensible of the difficulty in which the Government of India has been placed owing to the opposition of Her Majesty's Government to the re-imposition of the cotton duties—an opposition which has driven the Government of India to take measures which would seriously retard the improvement of the country, cripple the resources of the Local Governments, and may possibly, in the event of a famine overtaking us, result in the loss of thousands or even millions of lives among the poorer people in this country."

The Hon'ble LIEUTENANT-GENERAL BRACKENBURY said:—"I came into this Council room prepared to answer in detail or in bulk any criticisms that might be made upon military expenditure, and I must say that I have been most agreeably surprised to find how slight those criticisms have been. My hon'ble friend Mr. Playfair said that he did not look on the army as a financial reserve for the Government of India. I welcome that statement, and I think it is an expression of the sound commonsense which is the characteristic of the commercial community in this country. My hon'ble friend Sir Griffith Evans has strengthened the hands of the Government of India in recognizing that it is necessary to keep up a strong British army in this country, and he has generously said that he believes that, if the strength of the army is to be maintained, it cannot be maintained more cheaply than it is now. He has suggested one or two points of criticism to which I shall gladly presently reply, and he has again strengthened our hands, I hope, for the future in pointing out how difficult it would be to maintain such a reduction as that made this year in military works. He has certainly done more for us by that statement than he has done against us by his criticisms in regard to the Commissariat and the numbers of the Native troops, which I am sure I shall be able to meet to his satisfaction. But my hon'ble friend Mr. Playfair invited me to 'meet with the same degree of fulness the arguments raised in certain quarters for the reduction of the military expenditure.' My Lord, I have never seen such arguments. I have seen denunciations, I have seen invectives, I have seen statements and assertions, and I have seen appeals to the Government of India to reduce expenditure, but I have never yet seen one single argument. I have seen no argument put forward by anybody to show that military expenditure in this country could reasonably

be reduced. I think that the absence of intelligent criticism may partly be due to the fact that very few people who question the causes of this military expenditure are properly informed, because our military estimates are not, as a rule, explained in this Council in the manner they are in the Parliaments of other nations; and I think it is desirable, in the face of the appeal which has been made by my hon'ble friend Mr. Playfair, that I should state as briefly as I can what is the nature of our military expenditure, how that military expenditure is divided between home and this country, and why that military expenditure cannot be reduced. In doing this I will deal with the estimates of the present year as compared with the estimates of the past year, and I wish openly to state here that the Government of India has nothing to conceal in this matter, that it courts the fullest publicity as regards its military expenditure, and that it welcomes and will always welcome any practical suggestions made to it in the direction of economy.

"Our military expenditure may, first of all, be classed under two heads—expenditure in India and expenditure at home. Over expenditure in India your Excellency's Government exercises practically direct control. Over expenditure at home, except as it is affected by India's demand for stores, the Secretary of State exercises entire control. Now, I would first deal with military expenditure in India. Military expenditure in India comes under three separate heads. First, there are what are called the Indian Budget Estimates; second, the Military Works Estimates; and, third, the Special Defence Estimates. Taking the Indian Budget Estimates first, these contain provision for the general administration of the army in India, British and Native troops, for the pay of the troops, for feeding them, for clothing them, for the provision of horses for the mounted troops and for army transport, for medical and surgical attendance on men and horses, and for the provision of all the weapons and material of war. Last year, in speaking in this Council, I pointed out that from 1884-85, which was the year when military expenditure had touched its lowest after the Afghan War, there was a great jump in the year 1885-86. That year was a year in which the army, both European and Native, was largely increased and resolutions were taken to prepare for mobilization, and to have the army at all times fully equipped and ready for war. I showed that between 1885-86 and 1893-94 there had been a rise of Rs. 62,00,000 in the Military Budget Estimates; but that, of this Rs. 62,00,000, Rs. 57,50,000 were due to the fall in exchange, and that the actual increase in all those years, apart from what was due to fall in exchange, was only Rs. 4,50,000. Now, we have almost exactly the same tale to tell this year. It is essential that I should deal with net figures in dealing with military expenditure, for our receipts in many items rise directly with our expenditure. The net figures of the Budget of 1893-94 that is, last year, were Rs. 14,98,16,000. The net figures for 1894-95, that is, the present year, are Rs. 15,41,67,000, showing a rise of Rs. 43,51,000. Of this, Rs. 39,00,000 are due to exchange, leaving as due to other causes a rise of Rs. 4,50,000 this year. This rise of Rs. 39,00,000, to explain it more closely, is made up in this way. There is a sum of Rs. 46,50,000 for exchange compensation, and there is on the other side as against that the sum of Rs. 7,50,000 due to the British soldier's pay, which is taken, subject to revision, at 1*s*. 3¼*d*. instead of 1*s*. 2¾*d*. Now, we have, as I have said, in our estimates a sum of Rs. 46,50,000 for exchange compensation allowance. That exchange compensation allowance has been attacked to-day in this Council, and I will endeavour to show why I think it is absolutely necessary that it should be given to all the officers of the army. The pay and allowances of the officers of the Hon'ble East India Company's service were fixed in the last century. They were composed of two parts. They included British pay, converted into Indian currency at the rate of 2*s*. 6*d*. to the rupee, together with certain allowances fixed in rupees. We have three classes of officers now; first, the officers of the Indian army. The few of them who still remain receive exactly the same pay and allowances as in the old Company's days. Secondly, the British officers. The pay and allowances of the British officers were fixed in the days of the Hon'ble East India Company. The principle followed was to make their pay and allowances, as a whole, equal to those of officers of corresponding rank in the Company's service: this equalization was carried out in 1797 and

1811. While as regards the third class of officers, that is, the officers of the Staff Corps, their pay was fixed in 1861 at identically the rates of the lower scale which had for many years been in force for infantry officers of both the Hon'ble East India Company's service and the British service when not in the field and when serving within two hundred miles of the seat of the Government of each presidency. Thus, the basis of pay of all the military officers serving in India is the pay of the same ranks in England converted at the rate of 2*s.* 6*d.* to the rupee, and the allowances in rupees were fixed at a time when the commercial value of the rupee had never, I believe, fallen below 1*s.* 11*d.* and when the Government rate of exchange had never fallen below two shillings. Now, with a rupee at or below 1*s.* 3*d.*, as it now is, it is evident that the sterling value of the allowances of these officers has fallen 50 per cent. and that the sterling value of their pay has fallen 37½ per cent., while I think that no one can deny that the cost to a British officer of living in India has risen rather than fallen, that there has been a general rise in the price of British goods, and that there is ample evidence to show that prices in India are rising rather than falling as apart from British goods. Under these circumstances, the rate of their pay having fallen 50 per cent. and of their allowances 37½ per cent., so great was the hardship from which officers were suffering that some measure of relief had become not only an act of the most elementary justice but an act of absolute necessity.

"Now, turning from the exchange compensation allowance to the question of the Military Budget Estimates, I said that, setting aside the differences due solely to exchange, there is a rise this year over last year of Rs. 4,50,000 in the estimates which has to be accounted for. One item alone, and a very unforeseen item, very nearly accounts for it. We had a very bad fire at Peshawar last autumn, and Commissariat godowns, containing great quantities of stores and equipment, were burnt to the ground. The replacing of these stores will alone cost over Rs. 3,80,000. The second item—an incidental item it may be called—is this. Last year, by a mere chance, one of our cavalry regiments was absent for half the year, having been sent to Egypt, and therefore we only took into account in last year's estimates the maintenance of that cavalry regiment for half a year. This year we have to take it for the whole year. That gives Rs. 3,10,000, making, with the above sum of Rs. 3,80,000, on these two items alone a sum of Rs. 6,90,000 as against our total rise of only Rs. 4,50,000.

" The estimates vary in their items and details very much from year to year. Increases in one part of the estimate are met by decreases in another. Decreases, I am sorry to say, are generally more than balanced by increases. I do not wish to trouble the Council with details, but there is one item of increase which I think it is necessary to speak about, and the more so because it is one of those which formed the subject of criticism by my hon'ble friend Sir Griffith Evans. And that is the question of the Commissariat accounts. These show in the estimates for this year an increase of Rs. 4,90,000 due to rise in the price of food. There was also an increase last year due to the same cause. I made this the subject of a special enquiry and was furnished by the Commercial Branch of the Finance Department, through the Commissary General, with some figures as to prices in India which I think Hon'ble Members of this Council will find, as I did, somewhat startling. The number of seers of different articles of food which can be purchased for a rupee at different stations, and certain characteristic stations, were taken, and going back to the year 1884, the lowest, as already explained, in military expenditure, since the Afghan War. I find that the price of rice has risen 38 per cent. between 1884 and 1892 on the average of Madras and Rangoon; wheat, which we have taken for seven stations, has risen 72 per cent. between 1884 and 1892; barley, which is one of our most important items as food for horses, has risen 85 per cent. between 1884 and 1892; and the price of gram has increased 49 per cent. between 1884 and 1892, taking such stations as Cawnpore, Delhi, Rawalpindi and Karachi. Now, this is a very remarkable fact, and when my hon'ble friend Sir Griffith Evans asked whether we would enquire whether the Commissariat prices have not risen a little too fast, I am happy to inform him that the Commissariat prices have not risen so fast as the prices given to us by the Commercial Branch of the Finance Department.

"I now come to another subject of friendly criticism by my hon'ble friend Sir Griffith Evans,—the question of compensation for dearness of food to Native soldiers and the compensation for forage also given to Native soldiers in the silladar cavalry regiments. Sir Griffith Evans seems to think that the rates of compensation were solely dependent on the certificate of the Commanding Officer. That is not so. It is perfectly true that a certificate is sent in by the Commanding Officer that these were the ruling rates in the bazar at the time, and that upon that the claim for compensation is admitted. But that claim is subject to what I consider a most important check. It is subject to audit in the Controller's office, it is subject to check by what is known as the *nirik* prices. which are not prepared by the Commissariat Department or by the Commanding Officer, but by the Civil Officer of the district, and which are certified to by him; and that is the check upon any possibility of collusion between the Commanding Officer or his men, which would be very unlikely, or between any one in the Commissariat Department and the men. That is, I consider, a most necessary, separate and independent check.

"I do not know that, as regards these Indian Budget Estimates, I need trouble the Council any further. I have shown that, apart from exchange, there is a rise of Rs. 4,50,000 this year which is due to circumstances over which we have no control.

"The next matter to which I will refer is the Indian Military Works Estimates. These estimates provide for the construction and maintenance of all military buildings for British troops, and in certain places for the barracks for Native troops, for military roads, for the maintenance of all our defensive works, and for the construction of all such works, other than some to which I shall presently allude, that have been provided for in the Special Defences Estimates. Upon these Military Works Estimates fall the cost of water-supply and drainage of our cantonments and all barrack establishments, also the construction and maintenance of military hospitals. Those of this year show a reduction of Rs. 19,42,000 over last year. Now, I may say at once—and in doing so I am speaking for the Government of India as well as for the Commander-in-Chief and myself—that we have agreed to a reduction this year to meet a financial difficulty; but it will be very easy for me to show how impossible it would be for such a reduction as this to be continued. The system of devoting a fixed grant to military works was settled in 1880, and it was then arranged to give one crore of rupees for military works. That was 21 per cent. below the average expenditure of the previous five years, which had varied from Rs. 1,18,00,000 to Rs. 1,33,00,000 per annum. And therefore the fixed grant given in 1880 was 21 per cent. below the average expenditure of the previous five years. Since that time all the following additional causes of expenditure have been thrown upon the crore:—there has been an increase of 10,000 British troops; Baluchistan has been occupied and barracks for the troops have been built; Upper Burma has been annexed and barracks for the troops have been built there; and in addition to that the great demands of sanitary science have compelled us, and rightly compelled us, to do a great deal more for the health of the troops than had been done previously; a water-supply—above all, a pure water-supply—is one of those things which we have endeavoured to obtain for the troops. In 1880 also it was only to the needs of British troops that this crore was applied, but since then we have had to send Native troops to out-of-the-way places like Baluchistan, where they have to live in severely cold climates, where such huts as they can build with unskilled labour are utterly insufficient, and consequently we have been obliged to build lines for them; and this again and the maintenance of these buildings are drawn from the crore. Last, but not least—the straw that breaks our back—there has come this year upon the crore the charge for exchange compensation allowance for the establishments maintained by that crore. The result is that, though we have agreed to this temporary reduction to meet a financial difficulty, it means practically the undertaking of no new works, the diminution of the amount for repairs desirable to military roads and buildings, and I would say an almost complete stoppage of all sanitary improvements.

"I now turn to the Special Defence Estimates. These Indian Special Defence Estimates contain provision for the original works of certain

special defences, such as the defenees of the seaports of Calcutta, Bombay, Madras, Rangoon, Karachi and Aden, and the defences of the passages of the Indus and the defences of Quetta. The maintenance of these special defence works will fall again upon the Military Works Budget. The Special Defence Estimates are only for the original works. In 1890-91 the Special Defence Estimates in India were Rs. 53,66,000; for 1894-95 they are only Rs. 15,23,000; so that there is a diminution here of Rs. 38,43 000. This is due to the fact that the expenditure on original works is coming to an end, and also that we have taken as little as possible this year of the amount remaining to be spent.

"Thus, taking all these different estimates, as far as India is concerned, there is an increase of Rs. 43,51,000 on the Military Budget Estimates as against a decrease of Rs. 57,85,000 on the Military Works and Special Defence Estimates, which gives a total reduction as compared with last year of Rs. 14,34,000, a reduction which, had it not been for the exchange compensation, would have been Rs. 60,91,000.

"I will next speak of expenditure at home. Expenditure at home comes under three different estimates. These are what may be called the Army Estimates for Effective Services; the Army Estimates for Non-Effective Services; and lastly, the Special Defence Estimates. In 1893-94 the Effective Army Estimates were £2,244,100. This year they are £2,069,200. There is therefore a reduction in the Effective Army Estimates at home of £174,900 this year Of this reduction we can really only claim here in India the credit for £10,000. We have made our demands for stores this year less by £10,000 than they were last year. The remainder is due to a regulation of payments between the Secretary of State for India and the Secretary of State for War. It is always a complicated business, and we never can know how much we shall have to pay in one year and how much will hang over for the next; but I can only say that the whole of those effective estimates are due to payments under the orders of the Secretary of State which it is very difficult indeed for us to check. As regards the Non-Effective Estimates, those for 1893-94 were £2,253,400; those for 1894-95 were £2,351,600; giving an increase this year of £98,200. That increase has as yet been scarcely explained to us by the Secretary of State. We cannot control that. It is practically a question of our share of pensions, deferred pay, and so on, for the British army, and it is a question of pensions also to the officers of the Indian Services. The rise or fall in it is automatic and practically out of the control of the Government of India.

"Next, as to the Special Defence Estimates at home. Last year, that is, 1893-94, they amounted to £174,700. This year they are £22,600, showing a decrease of £152,100. Now, whereas the special defences in India are for works, the special defences at home are for armaments, and these home Special Defence Estimates show this great reduction for the same reason that the Indian ones do, namely, that the works and the armaments are coming to an end.

"The summary of all this is that on the whole the Home Military estimates this year as compared with those of last year show a total reduction of £228,800, or something like Rs. 39,00,000 at 1*s.* 3*d.* exchange. The total reduction upon the whole estimates at home and here amounts to Rs. 53,34,000, and that after taking into account exchange compensation allowance, but for which there would have been a decrease of a crore.

"I have thus shown that we have effected this year a very considerable decrease in our military expenditure both in India and at home.

"And now I wish to say a few words on the general question of military expenditure. First of all, as regards those home charges to which my hon'ble friend Sir Griffith Evans has alluded. It is well known that the Government of India has long held that the home charges were greater than the Government of India thought that they ought to be. The Government of India has made repeated representations on that subject to the Secretary of State, and the Secretary of State has,—there is not the slightest doubt,—given to those representations his most earnest attention. The question of out-

standing accounts between ourselves and the War Office had attracted a great deal of attention, and a committee was formed with Lord Northbrook as president which took the question of these payments into account. The result was a very considerable diminution on the recommendation by Lord Northbrook's Committee of the amount which India had to pay to England, and the fixing for the future of a capitation grant of so much per head per man to be paid to the War Office in lieu of the old system of assessing those charges year by year. That no doubt has effected a considerable reduction in our expenditure. But we were still not satisfied; and not long ago—my hon'ble friend Sir Griffith Evans has quoted the date of the Despatch as having been mentioned in the House of Lords—we did in 1892 address the Secretary of State and ask him to have this question still further taken into consideration by a Royal Commission; but the Secretary of State has replied to that Despatch, and he says that he does not consider that the questions at issue are such as can be taken into consideration by a Royal Commission; that they involve questions of great Imperial policy, and therefore he does not think it desirable to adopt our suggestion. It will still be open to us, I presume, on any particular points, to press for any change or to invite reconsideration by the Secretary of State.

"As regards Indian charges, that is to say, military expenditure in India, with which I am of course more directly concerned than with the home expenditure, the position of the Military Member of Your Excellency's Council is always a very difficult one. He has, as it were, a double responsibility. He is jointly responsible with the Commander-in-Chief for the efficiency of the army; for under him (the Military Member of Council) are those great services the Commissariat and Transport Department, the Ordnance Department, the Military Works, the Remount Department, on the efficiency of which the efficiency of the army very largely depends. He has, therefore, a joint responsibility with the Commander-in-Chief for the efficiency of the army and also that great responsibility which he shares with every member of Your Excellency's Council—the responsibility for economy and in such a time as this the responsibility for keeping expenditure down as low as possible. It is never an easy task In times of financial pressure it is a most onerous task: My hon'ble friend Sir Griffith Evans spoke in the recent debate on the Tariff Bill of my hon'ble Financial colleague grovelling in the dust-heaps among fish-maws and shark-fins to meet a deficit of $3\frac{1}{2}$ crores. I think, if he were to see the Military Secretary, Sir Edwin Collen, and myself wrestling with such questions as whether we should allow another kerosine lamp in the ward of a hospital or another sweeper in a camp in the hills, or whether we should allow British soldiers in the hills to have hob-nails for their boots, I think he would extend the same pity to us as he has extended to our Financial colleague. I can only say that it is only possible to carry out this task if the Military Member has, as I have had, a Financial colleague who wisely recognises that there is a point beyond which it is impossible to effect reduction, and a Commander-in-Chief who, with broad and statesmanlike views, has accepted the difficulty of the financial situation and has been willing to aid me in reducing expenditure. But I think that if my hon'ble friend had seen the Commander-in-Chief and myself with a long list of items before us—items every one of which we had accepted for consideration in the estimates, recognizing that each one would either improve the efficiency of the army or the health or the comfort of the soldier—and if he had seen us ruthlessly compelled to strike out these items one after another, some of them amounting to a few rupees, some of them to lakhs of rupees, because of the financial situation, I think he might have used another scriptural simile and might have rightly compared us to two fond and loving fathers of families who were ordered by Herod to take part in the massacre of the innocents.

"My Lord, the fact of the matter is that the bulk of the Indian Military Budget Estimates cannot be touched. These Estimates are based upon fixed numbers of troops, fixed rates of pay and allowances, fixed scales of food and clothing, fixed armaments and fixed reserves of stores. The establishments are kept as low as it is possible to keep them, and there are only three possible methods of effecting a reduction of military expenditure. These are (1) either reducing the number of troops, or (2) reducing the pay of the troops, or (3) reducing the reserves of stores. Now, I will deal with

the last first. There is hardly anything more easy than to effect a reduction of military expenditure by reducing the reserves of stores. It is so easy that there is great temptation to do this whenever a Government finds itself in financial difficulty; but I believe it to be the most wicked and the most wasteful thing which can be done, especially in India. I was a member in England a few years ago of a Royal Commission of which Lord Hartington was chairman on the military and naval administration of the United Kingdom. Lord Hartington had been Secretary of State for War and Secretary of State for India. Other members of that Commission were Mr. Smith, who was at the time First Lord of the Treasury and had been Secretary of State for War; Lord Randolph Churchill, who had been Chancellor of the Exchequer and Secretary of State for India; and Mr. Campbell-Bannerman, who had been previously, and now is, Secretary of State for War. On many points we may have differed, but on one point we were absolutely unanimous, and that was that we thought it so dangerous, even in England—this temptation of Governments to reduce their reserve of stores in order to get money in time of emergency—that we unanimously agreed that it should be an instruction to Secretaries of State to publish to Parliament what was the authorized reserve of stores and how far the reserve in every department corresponded with the authorised reserves, in order to put it out of their power to reduce these reserves without its being known to the public. If that course be so wasteful and dangerous at home, where you have all the great manufacturing establishments in England at your disposal, how infinitely more dangerous and wasteful would it be in India, where we are dependent upon England for the greater portion of our materials of war? The second method which I have indicated is that of reducing the pay of the British troops. You cannot reduce the pay of the British soldier. It is based on contract and is untouchable by you. It would be most unjust and you cannot do it. And, as regards the Native troops, I would wish to point out that here, as in England, ours is the only one nation in the world whose proud boast it is that every soldier in the army is a volunteer. We have no conscription, and if you are to keep up a volunteer army you must go into the market and pay such a rate as will get you the right class of recruit. All my information goes to prove that it would be quite impossible to reduce the pay of the infantry soldier of the Native army below what it now is, and we have only recently had to raise the pay of the soldiers of the silladar cavalry in order to get the right men.

"I come at last to this question, can the numbers of the army in India be reduced? That is not a question on which I would personally wish to express an opinion, for this reason, that the strength and number of the troops as they now are have been definitely fixed by the Government of India and the Secretary of State. After reviewing the condition of India, they have been fixed according to what is considered necessary for safety against external and internal danger. That strength is reviewed by the Government of India from time to time, and has recently been reviewed by us and by the Secretary of State, and no reduction of the army in India can be made by the Governor General in Council alone. No reduction can be made except on well-considered grounds, carefully studied and so reasoned out as to convince Her Majesty's Government; because the strength of the army in India is not only a question of Indian but is a question of Imperial policy.

"I wish I could say that, even with the present strength of the army, there is no probability of a rise in military expenditure, but I cannot honestly say that, I have shown one steady cause of increase—increase in the food prices; food alone amounts in our budget estimates to 180 lakhs per annum. Wages too have undoubtedly risen; we cannot get followers for the same wages as formerly. We have been obliged in some instances to raise the rates of their pay, and I am very much afraid that further rises may take place. Special defences erected out of the Special Defences Grant are now all perfectly new, but bye and bye they will require renewal and their renewal will fall upon the Military Works Grant. All those things which we have to purchase at home are increasing in cost. As the rupee falls prices rise, and not only is our British cavalry largely, but our British artillery is entirely dependent upon Australia for horses, and Australia is a country with a gold currency. The volunteers are

a constant and steady source, I am very happy to say, of increase in our military expenditure, because their numbers and the numbers of efficients are constantly increasing. Sanitary demands upon us cannot, I venture to think, be withstood. A pure water-supply and better sanitation for our cantonments, in order that that curse and scourge of India, enteric fever, may be reduced—these are absolutely necessary; and above all things there is one class of our estimates in which expenditure has risen—and if science continues to go on doing for military armaments what it has done in the past, expenditure will continue to increase in a most extraordinary way. I refer more particularly to the ordnance part of our expenditure. To give you some idea of what these changes in armament mean with regard to increased expenditure I will cite a few instances. We have recently re-armed our field batteries with 12-pr. breech-loading guns instead of 9-pr. muzzle-loaders. The 9-pr. muzzle-loading gun cost £90 and the 12-pr. breech-loading gun costs £270; that is three times as much as the 9-pr. The 9-pr. battery cost £2,652, while the 12-pr. breech-loading battery costs £5,325. Again, we have recently armed our British infantry with the Lee-Metford magazine rifle. The rifle itself costs little more than the Henry-Martini, but its ammunition costs Rs. 103 per thousand rounds as against Rs. 52 per thousand rounds for the old rifle. The shells for the 12-pr. cost £68 per hundred and shells for the 9-pr. cost only £15 per hundred. The sights of a 9-pr. again cost £2 apiece, while the telescopic sights for the 12-pr. cost £12. To turn to the larger ordnance. It is a very long time, quite a matter of ancient history, since I joined the army But when I joined the army the largest gun was a 68-pr. and the price of it was £97. The price of a 10-inch gun mounted in India now is £10,000, and only a few years ago, before your forts were re-armed, the 9-inch gun mounted in India cost only £1,500. The projectile of the largest gun in the service now costs £23, so that four shots from the largest gun in the service now cost as much as the largest gun cost when I joined the army. These facts will give you some idea of the uselessness of talking about reducing military expenditure in the face of the greatly increased expenditure arising from improvements in armaments and weapons of precision which have resulted from the progress of modern science, a charge which in the nature of things too must ever go on increasing, and which will always add very greatly to our financial difficulties. All that I can promise to do is to use every effort to keep down military expenditure consistently with the efficiency of the army for war. The most searching enquiries are in progress into all causes of increase, and will be pushed home. A system of control which we have lately introduced will enable the Military Member of Your Excellency's Council to keep his finger on the pulse of military expenditure constantly in a way that I think it had been impossible to do before. Every rise of that pulse will be marked, and such remedies as are possible will be applied. But, I repeat, our Army, British and Native, is an army of volunteers, and I could conceive no more dangerous or foolish course than to push economy to the point of either diminishing efficiency for war, or creating discontent in the army."

His Honour THE LIEUTENANT-GOVERNOR said:—"I have a few remarks to submit to Your Excellency's Council on the subject of the so-called Famine Insurance Fund. I do not propose to join the noble army of those who have so often and so unsuccessfully attempted to explain away the misconceptions which have grown up round this unfortunate phrase, or to enlighten the invincible ignorance which prevails on the subject in the minds of the public. I call it an unfortunate phrase because a surplus and an insurance fund are things totally different in character. An insurance fund must be kept up regularly or the insurance is vitiated: a surplus is a result which you may aim at but which circumstances beyond your control may make it, as now, impossible for you to achieve. If this unfortunate phrase had not been in use it would have been unnecessary for my hon'ble friend the Finance Minister to say that he intended to suspend the Famine Grant; it would have been sufficient for him to say that, as he had a deficit, he had not got a surplus. But even here, in the purest region of official thought and language, a misconception is created by the use of this misleading term. The Hon'ble Finance Minister has told us that he has got a deficit of three crores to meet. But, when he

says that, he does not mean what you or I should mean if we used that expression, nor what the public thinks he means. He has really only got a deficit of two crores, that is to say, his estimated expenditure exceeds his estimated receipts by two crores. But he would like to have a surplus of a crore and to spend it on reducing debt or on protective public works; and compared with that ideal position his revenue is too small by three crores.

"But, my Lord, my object in addressing the Council to-day is not to dispute about the use or meaning of words, but to ask the Council to consider the question, how this resolution to provide, if possible, an annual surplus of 1½ crores arose, and whether the conditions have altered so far that the necessity for such a provision has wholly or partially passed away.

"The original calculation of the amount of the so-called Famine Insurance Fund was made in this way. In the ten years preceding 1878 there had been two great famines, or rather one great famine—that of 1877—and one severe scarcity—that of 1874. In these two cases the expenditure on famine relief, including remissions of revenue, had been 16¼ crores of rupees. But, assuming that this expenditure had been somewhat exceptional, the Government estimated that 15 crores might be taken as the amount that would ordinarily be spent on famine relief in ten years, and therefore they decided to provide a surplus of one-tenth of that sum, or 1½ crores, each year which should be spent either on reducing debt or on protective railways, so that, when the next famine came upon us, it would cost less to meet it, because we should have an enlarged railway system by which to transport food, or, if we had to borrow, we should be in a better position to do so, and should not have increased the total volume of our debt.

"Nearly at the same time the Famine Commission approached the problem from a different direction. They held that the maximum number of persons to be relieved in the worst conceivable year was 2½ millions, and the cost of such relief, at Rs. 50 per head, was 12½ crores. Calculating from past experience, they estimated that the average number to be relieved in a series of years would amount to a little less than 250,000 persons, and the cost of such relief to 1¼ crores per annum. Their estimate, framed in 1880, was therefore a little lower than that framed by the Government of India in 1878, and the convergence of these two independent modes of calculation justified the belief that the amount which it was intended to provide as a surplus (1½ crores) was not likely to be exceeded as the average charge for famine relief over a series of years.

"Speaking in this Council in 1877, Sir John Strachey said :—

'Unless it should be proved hereafter by experience that the annual appropriation of a smaller sum from our revenue will give to the country the protection which it requires, we consider that the estimates of every year ought to make provision for religiously applying the sum I have mentioned (that is, 1½ crores,) to this sole purpose.'

"I venture to think that the time has come for enquiring whether the grounds on which this figure of 1½ crores was arrived at still remain unchanged. My hon'ble friend Mr. Playfair has led up to this enquiry by his question in the speech we have just heard, whether the Government of India is now prepared to say—and he presumed it is not—that an adequate network of subsidiary railways has been completed throughout the Empire, and that the precautions initiated for the protection of the people from the financial as well as from the material consequences of famine have been completed. I shall attempt to show that so large a sum is no longer required for the special purpose of providing against the expenditure likely to be incurred when a famine visits us, although it must always be desired that a surplus of this amount should exist and should be available for the development of the resources of the country.

"I begin by reminding the Council that the calculations made by the Famine Commission shewed that the provision of 20,000 miles of railway, nearly half of which had been completed at the time the Report was written, would suffice to ensure the means of sure and speedy transport of food into every part of India that is liable to be afflicted with famine. The cost of constructing an additional length of 10,000 miles of railway was estimated by them at sixty crores of rupees. But they went on to say that 'it was probable that less than one-half of the length first named, or 5,000 miles, in addition to the exist-

ing lines, would go far to remove all future risk of serious difficulty in supplying food to any part of any district in the whole country.' The number of miles of railway open at the end of 1893-94 was 20,395 ; and though this includes some military lines on the frontier, and some others which only indirectly serve for the transport of food, it may safely be said that we have more than covered the minimum of 5,000 miles of additional lines demanded in the above quotation.

"The next point I wish to bring forward is that the Famine Commission drew up (page 172 of their Report, Part II,) a list of the railways which they thought specially requisite for the purpose of protecting the parts of India most exposed to famine. They specified in the Punjab, the tract north and north-west of Delhi irrigated by the Western Jumna Canal; in the North-Western Provinces, the province of Bundelkhand ; in Bengal, the districts of North Bihar and Bhagalpur, and country to be traversed by the East Coast Railway from Calcutta to Cuttack and on to Madras through the Godavari and Kistna Deltas; in Madras, the Ceded Districts, which ought to be put in communication with the same deltas; in Mysore and the Bombay Dekkhan, certain projected lines connecting those districts with the existing railways and with the sea. The Council is probably aware that the whole of this programme, except the East Coast Railway, which is still in hand, has been carried out. We have constructed the Delhi-Umballa-Kalka line, the Rewari-Ferozpur line, the extensions of the Tirhut and Northern Bengal line, the Indian Midland, the Southern Mahratta system, and the Nellore and the Bezwada-Guntakul Railway, and we have made two important protective railways besides which the Famine Commission did not contemplate, the Dharmaveram-Mutupet, which runs through some of the poorest parts of the Madras Presidency, and the Bengal-Nagpur, which, though not penetrating a region likely to be visited by the famine, taps the rich districts of Chattisgarh and enables their food-stuffs to be carried to the relief of distress in other parts of India. The total mileage of these lines is 4,896 miles, and the East Coast, which is unfinished, if carried out to Madras and to Calcutta, will add about 1,070 miles to the number. We have thus in these fifteen years carried out almost all the schemes which the Famine Commission held to be necessary for the protection of the country against famine, and two useful schemes besides, and it is a reasonable thing for us now to reckon up the results and to consider what remains to be done. Have any defects been discovered in the scheme of the Famine Commission? Is there any tract which they did not know of but which we now know to be specially liable to famine and unprotected against it? I am not aware of any. Speaking with such authority as attaches to me as Secretary to that Commission and with such knowledge as I have gathered in the various offices I have filled since that time, I do not hesitate to say that the only considerable spot in India on which I could now lay my finger as both liable to severe famine and insufficiently protected against it is Orissa. When the East Coast Railway is finished—and I trust that whatever constructive work is starved in this black year my hon'ble friend the Minister for Public Works will not allow this work to be starved—I believe that the work of railway extension with the special object of famine protection will, as far as human foresight can guide us, be completed.

"It seems obvious then, that the results being attained, the efforts for achieving those results may cease or be relaxed. Insurance becomes less costly as the danger from fire decreases. Our house was of thatch. We have rebuilt it in brick and iron. Surely we no longer need the apparatus of water-buckets and the machinery for pumping and the staff for applying the hose which we were obliged to provide before.

"It may be said 'this is mere *à priori* argument : you think you have provided a machinery for putting down famine, but wait till it is tried. You have fortunately been spared any such visitation as that of 1877 : who can tell that if such a calamity should recur you may not have to pour out money again like water to save life.' To this I answer that we have been tried and our machinery has been found to work and act successfully. We have certainly not experienced such a famine as that of 1877-78, or of 1868-69, and may we long be spared such visitations; but, as far as I can judge, we have experienced droughts and climatic conditions similar to those which produced the famines of 1861 and 1874, but we have escaped from experiencing the same effects.

The Bengal famine of 1874 was one of those the expenditure on which (about six crores) was included by Sir John Strachey in framing the estimate of fifteen crores as the cost of famine relief in a ten-year period, and I think it is not too much to say that the possibility of such a famine or such an outlay has been stamped out by the construction of the railway system north of the Ganges. In Behar within the last six years, in 1888 and 1891, there was a failure of rain equal or very nearly equal to that which occurred in 1873. My predecessor in 1889 and I myself in 1892 made preparations for a visitation of famine, but we had to meet nothing worse than severe scarcity in a limited area. On both of these occasions, in place of the six or seven crores of 1874, we had to spend three or four lakhs of rupees. I say therefore that such a famine as that of 1874 is now impossible, and such an outlay as that will not be again required and need not be provided for. You can wipe six crores out of your bill of fifteen, and even then you will have provided amply, and more than amply, for the worst attacks that fortune can make upon you.

"No doubt the same experience has been shared by other parts of India. I believe that my hon'ble friend Mr. Lee-Warner will bear me out when I say that in the Kaladgi or Bijapur District of Bombay, where the famine of 1877 fell heaviest in that Presidency, there were two years, between 1880 and 1885, when there was an almost complete failure of rain and the blackest anticipations were indulged in. But the newly opened section of the Southern Mahratta line poured in such an ample supply of food that panic never got its head, prices were kept down, and, though the Bombay Government were on the watch and kept many lakhs of rupees in reserve in case of a demand, there was no necessity for any large famine expenditure.

"As a matter of fact, the accounts show that in the last thirteen years the direct expenditure on famine relief has only been Rx. 337,760, or less than 34 lakhs, or than three lakhs of rupees a year. The rest of the surplus has been spent, 5½ crores on protective railways, 5½ on reduction of debt, and 1¾ on irrigation works. If therefore the calculation which was made by Sir John Strachey in 1878 were now repeated, it is clear that the Government might be content to provide three lakhs of rupees instead of 1½ crores for expenditure on famine relief proper. If the calculation made by the Famine Commission were now re-made *de novo*, it would be necessary to ascertain the cost of the uncompleted part of the East Coast Railway and of any other railway projects which later experience has shewn to be requisite for the protection of exposed tracts, and to distribute that total amount over a certain number of years, as the provision which it is necessary to make against famine. To this must be added the amount hypothecated to meet the loss on the guarantee on the Indian Midland and Bengal-Nagpur Railways, as long as that loss continues, which I trust will not be many years more. But in any case I trust I have convinced the Council that there is good reason for thinking that it is no longer necessary to set apart so large a surplus as 1½ crores for the definite purpose of meeting the recurring expenditure which the occurrence of famines entail. It is of course always desirable to budget for a surplus, and the larger the better; but my respectful advice to the Government of India now is that they should re-consider the amount which it is requisite to attempt to provide, and should in future frankly and fairly call it a surplus, and drop the phrase Famine Grant or Famine Insurance Fund altogether."

The Hon'ble MR. WESTLAND said:—"The remarks of Hon'ble Members with regard to myself have for the most part been expressions of sympathy with me in my financial distress, for which I assure the Council I feel very grateful; but the circumstance points to one special feature in the present position. It is this, that the Budget is not put forward by the Government of India as one that is satisfactory to itself; our programme pretends only to be the best that we can frame under the conditions on which we are this year compelled to work. I shall not, therefore, attempt to defend our position upon its merits; the mere fact that I have declared a deficit for the coming year is sufficient to show that the position is indefensible on its merits. The controversy upon this point hangs round the question of the cotton-duties, and that is at the present moment rather in a political than in a financial phase. Its financial aspect has been ably treated by

my friend Sir Griffith Evans, who, to use a celebrated phrase, can speak from a position of greater freedom and less responsibility. Every word that he uttered in criticism of the general financial position displayed in the estimates I could easily accept as my own—it is a position of strain which can last only for a limited time, and which we have loyally accepted, for that limited time, under the circumstances already fully laid before the Council. But on this general question I abstain from entering on further discussion, for I could only repeat what I have said on an earlier occasion.

"I wish to say, before I pass from the general subject, how much I appreciate the efforts which were made by the heads of the great spending departments, General Brackenbury and Sir Charles Pritchard, to reduce their demands to the very lowest point. Had it not been for their assistance in this matter, I certainly would never have succeeded in producing in my estimates so low a deficit as only 30 lakhs of rupees.

"Before discussing the larger questions arising out of the debate, I propose to take up one or two smaller subjects to which the Hon'ble Mr. Playfair and other members have made reference. Mr. Playfair, with some justice, complained of the very short time allowed to the community of Calcutta to consider the Financial Statement before our taking up the final discussion. It is due to the misfortune, for which I am afraid I cannot accept responsibility, of Easter falling during the week that succeeded the presentation of the Estimates. The Estimates themselves are fixed by certain circumstances within a very narrow limit of time. Our practice is to have everything practically complete about March 10th, and then, before closing the figures, to wait for the reports of the receipts and outgoings of the month of February. These come to us, say, about March 12th to March 15th, and we proceed to make any final corrections in the Estimates which seem on the consideration of February's figures to be called for, close them about March 15th to 18th, so that they are ready, after the necessary examinations, for presentation to the Council about March 21st or 22nd. I mention this in order to shew that in the regular course of business we could not avoid presenting the Estimates just before the Easter holidays. The Hon'ble Member is aware that the curtailment to five days, of the week ordinarily allowed for consideration, was due to arrangements made for the convenience of certain non-official Members who would have been unable to attend on Thursday. I shall do my best to make better arrangements next year, as I shall certainly avoid any cause which would deprive the Government of the helpful criticism of the Bengal Chamber of Commerce.

"Mr. Playfair has asked me certain questions about opium cultivation, and the short crops of the last two years. In the first of these years the shortness of the crop was due to drought, which produced a small crop of high consistency, and in the second it was due to heavy rains, which produced a large maundage but of very low consistency. The causes were, therefore, in both cases climatic. The question of increasing the payment made to cultivators has been already under consideration, but it was impossible to take any definite steps while the whole question of opium in India was under examination by a Royal Commission. The fact is that for years our hands have, in the matter of opium administration, been very much hampered by the persistent calumniation and misrepresentation which we have suffered from an English Association of gentlemen, who think that the excellence of their motives is sufficient justification for the baselessness of their statements. We are very glad that the whole subject has, to their dismay, been made the subject of elaborate enquiry instead of a simple condemnation; and, though we do not in any way presume to anticipate the findings of the Royal Commission, we cannot conceive but that, after the evidence which has been made public during the last cold weather, the result will be to leave the Government of India more free to administer its Opium Department in the manner which it knows to be right and just to all interests concerned, without the perpetual presence of the feeling that every step it takes will be misunderstood and misrepresented in England.

"As regards the price of opium taken in our estimates, the Hon'ble Member is right in his supposition that we consider the price to be largely influenced by the fall of silver. China, as he is aware, is a country with a silver currency—a currency which cannot be protected from depreciation in the manner

in which we have protected ours. Our opium fetches a certain number of dollars in China, and the Calcutta prices are determined by the China prices. The fall in the value of silver can at any rate have no immediate effect upon the dollar price in China, but it makes those dollars produce a smaller number of rupees in India. I cannot say if we can rely upon receiving, during 1894-95, the amount of opium revenue which we have taken in our estimates—it is notoriously one of the items in which our estimates are very uncertain. But I have at any rate taken a lower revenue than has ever yet been estimated, and I live in hope that it will be realized.

"My hon'ble friend asks me if I can justify the exchange rate of 14*d*. taken in the estimates. I admit I cannot do so with any confidence, but I ask him, in turn, what rate he would propose and how he would justify that rate. The whole question of exchange is at present in a state of flux, and the question what rate we should realize depends upon many circumstances. It depends more than anything upon the rate that will prevail during the next export season, and I do not know that any man in India can foretell that. Fourteen pence may prove too high, and, on the other hand, it may conceivably turn out too low. I think it is a fair and not too sanguine compromise between opposing considerations.

"I was pleased to hear that it was possible to hold the opinion that our accounts if properly made up would shew a surplus of some millions instead of the deficit I have deduced. But I am afraid that I cannot accept the view. The manner in which the accounts of India were made up till about 1884 was this. The sterling pounds of the English expenditure were added to the Rx. of the expenditure in India, and then to the total of the whole was added an item called 'Loss by Exchange,' which was the difference, as compared with two shillings, upon the actual remittances of Council Bills during the year. One result of this system was that, in any year in which the Secretary of State failed to obtain by his drawings the full amount of his expenditure, the result of the year's account was benefited by his failure. While the rupee remained somewhere in the vicinity of a tenth of a pound, no great harm was done. Remittances sometimes fell short of, and sometimes exceeded, the expenditure of the year; but taking year's account with year's account the result on the whole was fairly correct. But when the rupee began to sensibly fall away from this standard, the difference threatened to vitiate our accounts. I was Comptroller General at the time, and I urged upon the Government that the only way our accounts could be protected from serious inaccuracy was by taking the sterling expenditure to account at its actual equivalent in rupees, whether the amount was, or was not, obtained by actual remittances during the year. I may say that the inaccuracy to which I refer was, or rather would practically always have been, an inaccuracy in understatement of the expenditure. After some discussion in which the sole question was how to frame the accounts so as to express the facts with the greatest correctness, my proposals were accepted, and since then we have, in adding £ sterling to Rx., inserted the column which is headed 'Exchange.'

"The peculiarity of our accounts, as is well known, is that, while all our revenue is received in rupees, a large portion of our expenditure is in sterling namely, some 15½ million pounds. Now I hold that, to make your accounts correct, you are bound to set every pound of that expenditure against your revenue, as absorbing, say, 16 rupees of it. If you meet the 15½ million pounds by remittance, this is the result that actually takes place, and you have met your £ sterling liabilities out of your actual revenue. If you do not make the remittance, you will have to borrow money in sterling and pay sterling interest on it in future until you do discharge the liability by remittance; but, however you put it, you do not meet the sterling charges of the year, until you charge them off (or, in fact, until you have met them by actual remittance) at their full equivalent of R16 per £. That we separate the R16 into two columns, of which the first shews R10 and the second R6, is a matter of convenience; the essential point in the account keeping is that we bring in the whole R16, and, if it were not for this fact, the first column where the R10 is shown would not have any business in our accounts at all. I cannot conceive the correctness of a system by which, during a year like the last, in which our

remittances fell short by £8,000,000, we would become entitled, by reason of that failure, to bring Rx. 5,000,000 to credit of revenue; and I am quite sure that no book-keeping arguments would for a moment be allowed in justification of such a course. Mr. Playfair is perfectly correct in his description of the book-keeping entries by which the amounts are brought upon our books, but the technical answer to his argument is that the credit to deposit account by debit of the exchange that we have charged off is *not* closed to Profit and Loss, but is closed to Balance and held at credit to meet the charge upon the theoretically necessary eventual remittance which will discharge the liability. But there are certain matters relating to the presentation of the Government accounts which cannot be discussed from the mere book-keeping point of view; and I am quite sure that in no mercantile accounts could £1 of expenditure be charged off as R10 on the mere ground that no remittance had been made to meet it.

"I pass on to the more general questions which have been raised during this debate; and the first of these is that relating to the Famine Grant.

"The questions involved in the so-called resumption of the Famine Grant have been several times explained in this Council. The very positive statements of Sir John Strachey and of Lord Lytton have repeatedly been brought forward, as if they interposed some insuperable obstacle in the way of the Government doing what seems to it, from all considerations, right and proper with its resources. I am free to admit to the full the argument that these statements—pledges if you like to call them so—bind the Government of India, in some special way, to recognise in its financial arrangements the necessity of providing for famine, even in a year in which famine does not occur. But that every other financial consideration has to be subordinated to this one necessity was never their meaning. Sir John Strachey himself at the very beginning foresaw that an absolute pledge of this kind was an impossibility. He said:—

'It is the firm intention of the present Government to apply the funds now to be provided for this special purpose strictly to the exclusive objects which they were designed to secure. In such matters, no doubt, Governments cannot fetter their successors, and nothing that we could now say or do would prevent the application of this fund to other purposes. Without thinking of a future far removed from us, events might, of course, happen which would render it impracticable even for us, who have designed these measures, to maintain our present resolutions.

'So far, however, as we can now speak for the future, the Government of India intends to keep this million and a half as an insurance against famine alone. In saying this, I should explain that we do not contemplate the constitution of any separate statutory fund, as such a course would be attended with many useless and inconvenient complications, without giving any real security'

"Had it not been for the ample explanation already laid before the Council by Sir Charles Elliott, I would have gone on to quote the statements made by Sir Auckland Colvin on the subject of the alleged permanent obligation of the famine grant; but I shall content myself with referring to the discussions in this Council in March, 1886, and to the explanations given in the Financial Statement of March, 1887 (paragraph 71, etc.). I think it is a little unfair to the Government that the question of the resumption of the grant should, at this stage, be attacked as if it were something altogether new and unheard of. As a matter of fact I am only repeating a policy adopted, and fully justified, by Sir Auckland Colvin, under similar circumstances, and I should not be called upon again to reply to arguments which he fully disposed of at the time, and which are now again brought forward as if no reply or explanation had ever been given with respect to them.

"But, first, as regards the redeeming of the so-called pledge of Sir John Strachey and of Lord Lytton, I find from past accounts that during the thirteen years, beginning 1881-82, the following moneys have been appropriated out of this fund:—

	Rx.
Actual Famine Relief	294,000
Protective Railways	5,483,000
Irrigation	1,732,000
Bengal-Nagpur and Midland Railways	2,772,000
Reduction of Debt, direct or indirect	5,327,000
TOTAL	15,609,000

"Considering in what financial straits the Government of India has been during part of this period, I think these figures show a fair redemption of the pledge given that a surplus revenue should be raised and spent upon Famine Relief and Insurance.

"In fact, I think Sir John Strachey himself would admit that the time had now come to consider whether, in our present state of preparedness for famine, the old obligation still remained to us to find 1½ crores a year upon policy and insurance. His own statement, in continuation of the quotation I have already made, was—

'Unless, then, it should be proved hereafter by experience that the annual appropriation of a smaller sum from our revenues will give to the country the protection which it requires, we consider that the estimates of every year ought to make provision for religiously applying the sum I have mentioned to this sole purpose.'

"Sir Charles Elliott has already dealt with this aspect of the case with an authority to which no other officer of Government can lay claim. For his experience as Secretary of the Famine Commission in laying the foundation of the policy, and afterwards as Public Works Member of the Government of India in helping to carry it out, invest his opinion on the subject with a special value.

"But that the actual question of the suspension of the grant is in the present year more a question of book-keeping than of anything else will be apparent from what I said in my Financial Statement. If we had maintained the grant upon our accounts, we would spend upon the East Coast Railway the amount of 110 lakhs which is to remain uncharged during 1894-95. Although I am charged with having, resumed, and in some way appropriated, this amount, I have, as a matter of fact, arranged that 76 lakhs shall nevertheless be spent upon this very railway, though charged to another head. I am, in short, not stopping the actual outlay of the money, for, with the exception of 34 lakhs of rupees, the whole of the 150 lakhs supposed to form the Famine Grant will be expended during the year in exactly the same way as it would be if the grant were still charged off in our books.

"Now in all these discussions about resumption of the grant, one thing seems to me to be forgotten. It ought to be distinctly stated by our critics what their alternative is. There are only two possible alternatives; if you continue to charge off the grant, you must either declare a deficit of Rx. 110 lakhs in excess of my figure, or you must raise a further sum of Rx. 110 lakhs by taxation. We have given reasons why we consider this second course inadvisable for the present year, and, as regards the first, it is, except as regards the 34 lakhs by which we consider it advisable to reduce the expenditure, little more than a question of book-keeping. The declared, and the substantial, object of the Famine Grant policy was the maintenance of a sufficient surplus of revenue over expenditure to provide for certain charges. If you do not possess that surplus, and overpowering financial considerations prevent your taking measures to recover it by searching out new taxation, you are not a whit nearer carrying out the Famine Grant policy, when you write down in your accounts that you have spent a certain amount which you know you have not obtained by raising revenue to meet it.

"More than one reference has been made in the speeches of Hon'ble Members to the desirability of our employing in some fashion, to the advantage of the State, the large Silver Balances which at present lie in our Treasuries. We are urged to use them on the construction of Railways, or on the purchase —by which, I presume, is meant the discharge—of our Rupee paper.

"Now it must first of all be borne in mind that the main object of Indian Finance at present is the re-establishment of the Rupee; to that alone we look for our future salvation, for, if we succeed in this object, everything else is easy to us. The loss for a year or two of the benefit we might get from the utilisation of our excess silver balances (which by the way is wrongly put at 84 lakhs, for we could obviously not part with more than ten crores of the amount) is as nothing compared with the gain, both financial and commercial, which will accrue to us if the Rupee settles to a rate of 15*d.* or 16*d.*, and becomes independent (as I think it has already become) of the value of bullion. I therefore lay it down as an axiom, so far as present circumstances are concerned, that we should not use those balances so as to interfere with our

currency policy. And I think it obvious that any measure which sets these balances free for commercial use—either by expending them, at a rapid rate, on Railways or by using them in the discharge of loan—is not only an interference of this kind, but is a measure whose direct effect will be to defeat the object of our currency legislation. We have already lost enough by being obliged to considerably increase sterling debt; the only gain which we can set against that loss is the fact that on this side of the sea the same circumstances have led to the temporary lock-up of some ten crores of rupees. I would have preferred, as I said before, that things had gone on in regular course, and the said ten crores issued in payment of Council Bills. But the commerce of the country would not have it so, and we must accept the position in which these commercial forces have landed us. I am aware that by issuing these moneys I might reduce the rate of interest from its present figure of 9 or 10 per cent. to perhaps 4 or 5. But unfortunately commerce has declared that a rate of 9 or 10 per cent. is necessary to induce merchants and Banks to supply themselves with funds by the regular and ordinary method of Council Bills. I would not consider myself justified in creating a stringency of money by the withdrawal of funds from the money market, and I have never attempted such a policy; but when, in the ordinary course of commercial dealings, and as a result of the action of commercial forces, this result shews itself, I accept the fact, and I do not attempt to resist the operation of these forces by flooding the market with my pent-up rupees. The only result would be that another failure of Council Bills would take place, and my rupees would all come back to me. We have realised during the last few months the fact that it is to the operation of commercial forces alone that we must look for the accomplishment of the objects of the Currency Legislation, and I must, if I look for success in the operation, allow free play to that particular force which has driven into my reserve treasuries ten crores of rupees for which I have no use. Any attempt to use them would certainly cost the State more by the fall in the value of the rupee than we could possibly get by investing them, in any way, in our own loans.

"My hon'ble friend Mr. Playfair has suggested that five crores of this balance might well be used in pushing forward the construction of Railways, and he has contrasted our rate of progress in Railway construction unfavourably with that of the United States of America. Now, first of all, I wish to point out that the expenditure of money upon Railway construction, or at least its economical expenditure, does not depend merely upon our possessing the money to meet the charges. It is the result of elaborate arrangements that have to be made beforehand—plans, arrangement of work, settling of establishments, purchase and manufacture of material. Our Railway construction is therefore carefully planned beforehand for some years in advance, and, although minor modifications in these plans are possible, such an utter change in them as is involved in the sudden addition of five crores to our outlay is, otherwise than as a form of waste of money, impossible.

"I wish to point out that the stringent measures we have had to adopt with regard to our revenue account have not forced us into any very great diminution in the rate of progress of Railway construction. The figures I gave in my estimates will show that the total outlay on construction (including Protective Railways) is on the whole only reduced from Rx. 4,027,400 in 1893-94 to Rx. 3,450,000 in the coming year. And the comparison which my hon'ble friend has made between the rate of construction in India and the rate in the United States is, in more than one respect, unjust to India. It may be true that we do not reckon in our yearly construction as many hundreds of miles as the United States reckon thousands, but then, if you take the construction of Railways by the State, it must be remembered that the Government of the United States does not contribute a single mile to the construction in that country. We possess some 17,000 or 18,000 miles of railway in India, of which there is hardly a single mile that has not been constructed either by the State or under its guarantee. I do not think there is a single mile of the United States Railways which can in the same way be attributed to the direct outlay or direct financial assistance of the Government. In the matter of Railway construction by the State I feel sure that the Government of India can challenge comparison with the Government of any other country in the world. And I rather think

that, in his quoted mileage, my hon'ble friend has restricted himself to direct construction by the State, and has omitted certain current construction by Companies under contract with the State.

"I must confess to a little surprise in finding the proposal put forward by one of the commercial Members of Your Excellency's Council that we should buy silver at its present low price, and coin it for issue at the appreciated value of the Rupee. It ought not to be necessary to point out that any such process is in its nature a fraud upon the present holders of rupees. Every lakh of rupees profit which we make by such a transaction accrues to us by diminution in the value of all existing rupees—that is, by an operation of indirect plunder of the existing possessors. The analogy of copper coin is in no way in point: copper coin does not pretend to represent in its intrinsic value anything like its coinage value, and the latter is maintained only by our practically undertaking to issue to any holder of 64 pice a silver rupee in exchange for them. At present, our rupees are certainly, to use the technical language of economies, neither a token nor a coin. We want them to pass from the 'coin' state to the 'token' state, and they are at present in the transitional stage; but nothing is more certain than that, if we continue to coin them before they reach the token stage, they will never reach it at all.

"I may be permitted to quote in this connexion an extract from some instructions which I wrote a short time ago regarding the advice to be given to Native States about their currency. I said—

'If they adopt, to begin with, the policy of maintaining the existing par cf exchange with British rupees, as most of them are now doing by closing their mints, they will give their coin the same appreciated value as the British rupee, and the temptation will always be present to the Durbar to make a handsome profit by buying silver and converting it into coin. The loss necessarily falls upon the holders of existing coin, which will be at once depreciated by such a measure, the profit of the Durbar being one that may be once realized, and then is exhausted. But I do not know if every Durbar that undertakes coinage will be able, if matters are left to themselves, and no systematic policy expressly adopted by the Native States, to withstand the temptation of practically plundering its subjects by abandoning the policy now advised, and in many cases apparently adopted, of maintaining a par of exchange with Government rupees.'

"I shall certainly refuse myself to fall into this temptation.

"Occasions such as the present are almost the only public opportunities which a Member of Your Lordship's Government has to reply to criticisms publicly made upon our action: I therefore make no excuse for asking Your Lordship's permission to refer shortly to some matters affecting my department, even though they have not been made the subject of criticism in this Chamber.

"I wish especially to refer to the kind of criticism which is not unfrequently directed against us in England.

"My first reference is to a pamphlet published at the end of last year by a gentleman who may be called a professional financier, the statements in which have been quoted, on the authority, I presume, of the author's reputation, in the House of Commons; and I have seen them also quoted in this country. The author, after stating certain figures as belonging to the Indian Accounts of 1879-80, and comparing them with certain other figures of 1892-93, finds a difference of 22 crores of rupees as the increase of expenditure, excluding exchange, between the two years. He then says:—

'It seems difficult to believe that the Indian Government, which never says anything about the 22 crores of additional General Expenditure, should come to grief over a crore or two of further loss on exchange.'

"The explanation is simply that our critic has blundered in picking out his figures. The figure he took from the earlier year was the total of expenditure, excluding the Railway Revenue Account, and the figure he took from the later year was the total of expenditure including that Account. As the expenditure on this account in 1892-93 alone amounted to about 21 crores, it would itself be sufficient almost to account for the difference which our critic brings out, and which, it will be seen, only means that we were in 1892-93 the posses-

sors of some thousands of miles of railway which very nearly paid their own charges, interest and all. Of course there have been other increases of expenditure between the two years, but they are concealed by reason of another mistake committed by the author in taking out the figures. He omitted to observe that the figures of the earlier year included nearly 5 crores of War Expenditure!

"I quote this as a specimen of the kind of thing which is seriously accepted in financial circles in London as criticism of Indian Finance.

"Let us pass to another case. Hon'ble Members may remember a recent telegram which Reuter for some mysterious reason thought it worth while to send out from London, which told us of an article in a leading London newspaper, bidding us in a vague and airy way to give up talking about cotton duties, and go in for reductions in all departments of viceregal expenditure. I have seen this quoted in one or two Indian newspapers with the very natural enquiry—what did the writer mean by 'viceregal' expenditure? I can explain the expression only in one way. Indian newspapers know something about Indian finance, and they know, therefore, that, of all the adjectives of which the English dictionary affords a choice, 'viceregal' is a most singularly inappropriate one to apply to Indian expenditure. The writer in England, I am afraid, used the expression simply because he did not know that 'something about Indian finance.'

"I pass to another case, one of the London financial papers, which reached us by last mail, the *Statist* of February 24th. The writer says—

'Even at the present value of the rupee, the expenditure in India this year is estimated at 53 millions sterling; and, if we may use the word without offence, it is nonsense to tell us that no further reduction can be made in an expenditure of 53 millions sterling.'

"Now, the beauty of an argument like this is, that you can never escape its force. Let us assume, for the sake of argument (I would not admit it for any other reason), that by hook or by crook we could reduce the expenditure by the three odd millions. Back would come the old argument, 'it is nonsense to tell us that no further reduction could be made in an expenditure of 50 millions sterling.' And so on *da capo*. I must do this writer the justice to say that he admits he knows nothing of the subject, and is not prepared to suggest, out of the whole 53 millions, a single item which might be made the subject of the reduction. His words are—

'To suggest where retrenchment could be enforced, without having access to all the official information, would be ridiculous; but in our own minds we have not the slightest doubt that outlay could be cut down in many quarters.'

"Of course he has not access to *all* the official information, but the amount of official information to which he has access is quite sufficient to satisfy the craving of any ordinary mortal. Hon'ble Members will no doubt be interested to learn that the writer of this critique proceeds in his next sentence to solve in fifteen words the whole of the difficult problem of taxation in India. He says:—

'And as for the taxation, we are equally confident that that could be considerably increased.'

"Needless to say he does not give the slightest suggestion either as to method or as to direction of increase, but he is not the less confident in his conclusions. This is the criticism, it must be remembered, of a *financial* newspaper of high reputation, to which I admit I often turn with profit and advantage. Consistently enough, the whole object of the article from which I have been quoting is to urge that any acquaintance with Indian Finance is a disqualification for its administration.

"It is positively refreshing to turn from declamation of this sort to the intelligent criticism we receive in India. Although it is sometimes adverse, it at least has some reference to the facts.

"I would remark that there is not the slightest difficulty in carrying out the kind of reduction of expenditure which some of our English critics would have

us enforce. I could cut down the expenditure in our Revenue Departments to-morrow—only the chances are that for every rupee of expenditure I save I shall lose five rupees of revenue. I allowed the other day about six lakhs for increases to our Customs establishments. I might have insisted upon the old establishments continuing the work, but I know I would have remonstrances from the merchants who found their business impeded while they danced attendance at the Customs Houses and waited till their turn came round. Even a payer of revenue may claim some consideration. I could cut down the number of Courts of Justice, but I know I would meet with remonstrances on behalf of the complainants who, having paid for the luxury of a civil suit, find more than the law's delays interposed between them and their object. I could cut down Railway expenditure, and would probably be reminded of my folly by a railway accident within a few months. I could reduce expenditure upon repairs of public buildings, and I would probably find I had run up a heavy charge for depreciations and had greatly increased subsequent urgent demands. Many of our public offices are still housed in what are little better than hovels; I might have made them wait longer for decent accommodation. I might have reduced the amounts which the Military Department tell me ought to be spent in sanitary measures with reference to our troops; and I would possibly be reminded of the effect of it by the outbreak of one of those illnesses with which in India we are always warring. And so I may go through the list. The question of reducing expenditure in India is not that of putting your pen through the figures presented to you by responsible officers, and I am not prepared to manage the finances of India upon the principles of administration applied by a bull to a china shop.

"After remonstrating against these vague and general charges, I do not wish to pass in silence over the only representation we have received with reference to my recent review of Indian finance which pretends in any measure to go into detail. It is a letter from the Bombay Presidency Association, of which the Chairman is a Member of this Council, who is unfortunately unable to be in Calcutta for this debate. The letter has been published in the Bombay newspapers.

"Adverting to my statement that our present troubles were due only to the exchange difficulty, the letter says :—

'The fountain sources will be found elsewhere than in low silver. They must be easily traced to the appalling growth of military expenditure in all its ramifications during the past eight years—in the increased charges on army services, arms and ammunitions, stores, military roads, special defences, and strategic railways. The large growth, again, of the charges on account of civil salaries and establishments must be next held responsible. Upper Burma is a third cause which has grievously burdened the general revenues of the empire. And, lastly, the unjust compensation allowance to the Services.'

"The 'unjust' compensation to the Services I shall deal with separately.

"As regards Military Expenditure, I think there is some misapprehension of the argument I used on March 1st. The increase of Military Expenditure I admitted, but I pointed out that it had its origin before 1888. My argument was that that increase had been met by the fiscal steps we had recourse to in 1888, and that the new necessities that arose since 1888 were due to exchange and exchange alone. It did not arise, therefore, in immediate connexion with the discussion of our present position.

"The question of military expenditure has been so fully dealt with by my hon'ble colleague General Brackenbury that it would be superfluous for me to say anything. But the argument of the Association to whose criticism I am replying will be traced in the following paragraph of their letter :—

'The annual expenditure on the Army Services has been allowed, under a variety of pretexts, to mount up higher and higher, without any control whatever, not to say aught of the many extraordinary charges incurred on account of the Penjdeh affair, the pacification of Upper Burma, the many uncalled-for and bootless expeditions on the North-West frontier, and last, though not the least, the special defences, east and west, in pursuance of the so-called policy of "preparedness"—a policy of adventure and external aggression which is calculated to enlarge the already unwieldy boundaries of the empire and weaken its strength and stability.'

"I am afraid there is an irreconcileable difference of opinion between your Excellency's Government and the Association. If the latter seriously mean to describe the policy of 'preparedness' on the North-Western Frontier, which I admit has cost us very much on frontier railways, frontier roads and 'special defences,' as a policy of adventure, which has weakened the strength and stability of the Empire, I am afraid that no argument of mine will succeed in meeting the objections they raise to the expenditure involved.

"As regards Upper Burma, the burden of it has distinctly diminished. The expenditure of Upper Burma (excluding military occupation) has all along been about 180 lakhs; its revenue has gradually risen from 76 lakhs to 120. There is certainly, in the burden of Upper Burma, no objection to be taken to my argument that all our difficulties since 1888 have been due to exchange and exchange only.

"I come to the Civil Expenditure, and here I would remind the Council how I addressed myself to the question on March 1st. I broke up the gross figures into a multitude of details and then analysed the nature and the cause of the increases; it seems to me that any reasonable discussion of the question must proceed upon these lines. If further explanations are wanted, or if it is desired to pass into greater detail, it can be done; but to abandon the detail altogether and to go back to the gross figures, and quarrel with them as a total increase does not in the least advance the discussion. Nor does the peculiar manner in which the Association have manipulated the gross figures in any way promote the explanation of the matter. Following the usual practice, I shewed that the increase was so much a year—say, upon any given figure, ten lakhs a year. The Association's letter pile up the ten lakhs additional expenditure in each of the eight years they review, and denounce the increase as an increase of eighty lakhs. I can only say that I have attempted to explain the ten lakhs a year, and I must ask them to believe that the same explanation applies to the total additional expenditure of eighty lakhs in eight years.

"It is a curious commentary upon the letter of the Bombay Association, that, while I was considering it, a Calcutta Association of exactly the same character (it is called the Bengal Provincial Conference) was holding its meeting. This occurred last Friday, and I quote here two of the Resolutions they adopted—they were the only ones which had any reference to State expenditure:—

'(a) That the administration of civil justice in these Provinces urgently requires amelioration in respect of (1) court-fees and process-fees levied upon litigants; (2) the number of judicial officers; (3) the qualifications for Civil Court amin; (4) the pay and prospects of the subordinate ministerial agency; (5) the encouragement of a resort to arbitration.'

'(c) That the Conference regrets that the Government should, for financial and other reasons, have found it impossible to give effect to some of the most important recommendations of the Police Committee, which have reference to the raising of the pay and the status of Sub-Inspectors and Inspectors of Police, and the Conference is of opinion that financial considerations should not be permitted to stand in the way of a much-needed reform, which has such an intimate bearing upon the administration of justice and the happiness of the people. The Conference accordingly recommends that the suggestions of the Police Committee be given effect to in their entirety.'

"On the general subject of economy in financial administration I do not think it is possible to put the question in more appropriate language than has been used to-day by Sir Griffith Evans, and his criticisms, coming as they do from a non-official gentleman who has long been familiar with public affairs, are a valuable support to a Government assailed on the one side by perpetual demands, not altogether avoidable, and on the other by wild criticisms such as I have quoted from the Home papers.

"It is very difficult for any one not actually engaged in administrative work to realize how constant and how pressing are the demands for the expenditure of money in India—expenditure which is on all hands admitted to be desirable, but which has continually to be refused for want of funds. The wants of India are so enormous that there is no limit to useful expenditure if we only had the funds for it. Every one is convinced that money is wanted and should be given for the

particular object he has in view, and he is often quite right; but it is only those who sit at the centre where all these demands are focussed, who realize both, how great the demands are, and how constantly endeavour must be made to prevent them from sweeping away all the revenue we have. If economy is to be measured by the number of proposals for expenditure that are rejected on their way to the final sanctioning authority, or that are rejected by that sanctioning authority, the Government of India can assuredly claim a magnificent record.

"It is easy enough to attack big figures, and to say that because these figures are big, therefore it must be possible to reduce them. But, unfortunately, the big figures,are composed of a number of little ones, and, if reductions or economies have in actual practice to be carried out, it is not by mere alterations in the big figures but by actual measures adopted with respect to the little ones. And in the same way the expenditure is to be defended, not by merely taking up a big figure and making some general statement with respect to it, but by explaining and defending the details which build up the totals. This process of explanation and defence is continually going on, especially in connection with the preparation of the annual estimates. And it is by an examination of these processes—which I admit would be a very tedious business to any one not engaged in it as a matter of duty—that assurance can be given of economical management. I entirely deny that, in a country like India, the more fact of the total of one year being bigger than that of an earlier year affords the slightest presumption of the absence of economy. Our general answer to criticisms of the kind is that we do not and cannot admit the premiss from which they too often start, that in a rapidly progressing country like India it is possible to go on from year to year without increasing the figures of expenditure.

"In illustration of what I have just stated as to the manner in which proposals for expenditure continually press upon us, it is legitimate to refer to the questions which from time to time have been put at this Council to the Members of Your Excellency's Government. At our first meeting I think Mr. Buckingham suggested that additional allowances should be given to officers serving in Assam. At a subsequent meeting the Hon'ble Mr. Chitnavis suggested that additional grants might be given to educational institutions in the Central Provinces. Again, the Maharaja of Ajudhia suggested that the salaries of the Provincial Services in the North-Western Provinces might be increased. Or take the case of the Native gentlemen interested in politics who met at Christmas at Lahore to show us how we ought to govern India. I have carefully read the first dozen of their resolutions, and I find they contain nine distinct proposals, some of them very large ones, for increase of expenditure. That is the contribution of their united wisdom to the solution of the present financial difficulties, and yet it is not the whole of it; the same twelve resolutions contain also four proposals for sweeping reductions of revenue. I of course entirely accept the fact that, when India comes to be ruled on Congress principles, you will always be able to create the means to meet additional expenditure by going in for large reduction of revenues; but your Excellency's Government have at present to administer India under sublunary conditions, and therefore, having to meet a large new expenditure on account of exchange, they have been unfortunately obliged to lay before the Legislative Council proposals for increase of revenue, instead of merely saying that they have made up their minds to give up the revenue the Government already possesses. Although our remedial measures are so different in character, I think I am entitled to quote our critics in support of the view that there are many directions in which the Government might, with advantage to the country, increase the expenditure even above its present limits.

"But here I wish to say a word about one special item of increasing expenditure which comes into our accounts for 1893-94, and which I alluded to in my speech of March 1st—namely, the exchange compensation allowance. I mentioned then in what way it was immediately connected with the general question of the measures taken during the year, with reference to the exchange difficulty, desiring rather to explain why it had come upon us in the hour of our difficulty, than trying to justify it upon its own merits. To this last task I wish, as the question has been raised in public, to address myself now.

"I am glad to find that the Hon'ble Members of your Excellency's Council have taken a much broader view of the question than has been taken by some

of our public critics, especially in the Native Press. The remarks that I have to make would not be necessary if the attack on these allowances had been made in the enlightened spirit which distinguishes our critics within this Chamber. But, in view of what has been said outside it, I think it my duty to make use of this occasion to explain pretty fully a policy which, perforce, occupies a somewhat conspicuous position in my Financial Statement.

"It has for a very long time been foreseen by the Government that measures would have to be taken to make up to its European officers some portion of the practical diminution of salary which the fall in exchange has brought upon them. The administration in India must be European in character, and the principal posts in it must be filled by Europeans; that is a mere necessity of the position. The salaries attached to these European appointments are practically the same, measured in rupees, as they were a quarter of a century ago. Lieutenant-Governors, Commissioners, Judges and Collectors, although their duties are now far more important and far more laborious, draw all over India practically the same rupee salaries as they did when the rupee was worth nearly twice as much as its present value. The same may be said of the Military Services; the pay of the officers of the army was fixed long ago, when the rupee was over two shillings; it is the same number of rupees now, when the rupee is 1*s.* 2*d.*; but the military part of the question has been amply dealt with by the Hon'ble the Military Member.

"It is a necessity of European life in India that the European officer must bear a large amount of sterling expenditure. He cannot separate himself from Europe, and, if he could, it is not desirable in the interests of Indian administration that he should. The European portion of the administrative services is, as matters stand, extremely limited, and its European quality must be maintained. Even if you could get officers to quit for ever their connection with Europe, and make India their permanent home, these would not be the kind of men who could rule the India that England has created. You must, therefore, accept the position that there is a portion of your Services whose salaries are, for the purposes of their necessary expenditure, partly at least to be reckoned in sterling, both as regards the conditions with reference to which they were originally fixed, and with regard to the expectations of the officers themselves.

"I do not know that I can express myself on this point better than by using the words employed at a recent public meeting in Calcutta by a gentleman whose opinions on commercial matters always carry great authority—

'We require for our Indian Services the very best men that are available, and, unless we pay sufficient salaries to attract such men, we will deservedly suffer for our false economy. It is true that in the interest of the tax-payer we must be guided by the laws of supply and demand. Salaries should be no higher than may be necessary to secure the high standard of character and ability which are indispensable. I will add that I think our public servants are entitled to treatment generous beyond the strict interpretation of their contracts. The man who has been induced to spend many years of his life in India with certain prospects cannot fairly be told that if he does not like the service he can leave it. It is no longer open for him to change his career, and while we should engage new men on commercial principles our old servants are entitled to generous treatment. It will be said that by pressing these sentiments upon Government we will be increasing their embarrassment by suggesting additional expenditure. I care not for this. We must discharge the obligations of a great country, whatever be the difficulty of ways and means.'

"Whether the present measure of exchange compensation is generous or not I shall not discuss. I am afraid that many of the recipients of it think that the permission to remit half their salaries to England at 1*s.* 6*d.* is poor compensation for the loss of the ability to remit the whole of it at 1*s.* 10*d.* or 1*s.* 11*d.* I can only say that the present measure of compensation is certainly all we can afford. It is a question, even, whether the Government were not too tardy in admitting it. It was sanctioned only after Government had found that the services were not only suffering in efficiency by feelings of disappointment and distrust of the future, but that they were actually being obliged, by financial pressure in their domestic concerns, to give up the attempt to maintain that amount of independence of personal position which in India is almost neces-

sary for the exercise of personal influence. It is a serious disadvantage from a merely administrative point of view that the representatives of the Government should appear before the public as living on straitened means, and that was the condition which in many cases had been actually reached.

"The letter of the Bombay Association from which I have already quoted boldly meets the difficulty by asserting that the cost of living in England has decreased. I presume they mean, though they do not say it, that it has decreased *pari passu* with the gold value of the rupee, as otherwise their argument would be irrelevant. They quote statistics to shew that the price of a cwt. of wheat has in ten years fallen 30 per cent., the price of a cwt. of bacon 23 per cent., of a gross of buttons 20 per cent., of a dozen pair boots and shoes 26 per cent , and so on. I can only ask the Association—which is mostly, if not entirely, composed of Native gentlemen—to accept my assurance that these things have very little to do with the cost of living in England, and that ample evidence could be produced, if it were necessary, to shew that, even as measured in gold, the general cost and standard of living in England has not diminished of recent years.

"It is not upon us only that this charge for compensation has fallen, or by us only that it has been recognized. The Ceylon Government long ago admitted it to its officers. The Herschell Committee noted that some European employers had felt themselves bound to make to the Europeans in their service an allowance of the kind. My hon'ble friend Dr. Rashbehary Ghose intimates some scepticism on this point, and says he has not been able to find the cases to which the Herschell Committee referred. Probably he has not looked for them in the right place. The conclusions of the Committee were based upon evidence recorded by it, which will be found attached to its report; it is in that evidence that the particular cases referred to are most likely to be found. Again, within the last few days I find the following in the editorial columns of the *Times of India* :—

'We are enabled to-day to make an announcement which will be received with great satisfaction by European railway employés in India, and by the public generally as a fair settlement of a fair claim. One of the leading railway companies in India are, with the sanction of Government, about to give orders for the payment of exchange compensation allowances to their European employés. * * * There was never any reason to doubt, after the distinct promises which we quoted the other day from the Chairman of two of the leading lines in India, and after the Secretary of State's recognition of the principle involved, that justice would be done to a class of men who are serving the public so well. Private employers have in some instances been more prompt and more bountiful in acknowledging similar claims; but that is a point which need not be pressed, except so far as it may help to show that the companies and the Government have not been more free with the money of the shareholders and the public than the strict equities of the case warrant them in being.'

Railway Employés and Exchange Compensation.

"The Hon'ble Member to whom I last referred has also attempted to show by reference to Colonial comparisons that the salaries of the European Administrative Service are already high enough. I know something about Colonies and Colonial work, and can easily test the value of this comparison. Take the Colony of New Zealand: it contains 600,000 inhabitants—about half the population of an Indian district—and it has a Governor on £5,000, a Ministry, two Houses of Parliament (of which all the Members draw salaries), and any number of Heads of Departments. Take Tasmania, a Colony of 160,000 inhabitants—one-fifth of the population of Calcutta: it has the same paraphernalia of administration, except that its Governor's salary is only £3,500. Take Ceylon, with its Governor, its Legislative Council, its Secretary and Treasurer, Attorney-General, Chief Justice and Justices: if it were made over to India, we would convert it into two districts of the Madras Presidency, and administer it with a couple of Collectors, with the usual district staffs. If you compare Colonial salaries with Indian salaries, you must remember that the whole business of Colonial administration is on a much smaller scale than Indian, and you must make the comparison not between functions which appear to correspond with each other in name, but between officers who exercise duties of something like comparative responsibility. You pay your Indian Viceroy, if His Excellency will pardon my alluding to a personal matter, a salary of £15,000

or £16,000 for ruling a population of 300 millions and administering a public revenue of, say, 53 millions sterling. I doubt if all the Colonies put together would shew a much bigger revenue, or in fact if they would shew as much, and I am sure that they would shew only a small fraction of the population.

"I admit that I am not surprised to see strong objection raised to the allowance on the ground of its differentiating between two classes of officers. I can only say that the difference exists in fact, and I do not see why it is unjust to recognize it in our arrangements. It is easy for those who dwell or who serve Government in their own country, who are exempt from all the hardships imposed upon the European servants of the Government, by the fact of their residence in India, to denounce the compensation given for those hardships. 'They jest at scars, who never felt the wound.' Formerly, it was said, and said truly, that the liberal scale of salary paid to the European services was the compensation in question; but, when by the automatic failure of that scale it ceases to be compensatory, I do not see on what principle of justice you can point to the letter of your contract to say that service on the old terms must be continued, when the compensations for it are diminished. I have not furnished myself with statistics on the subject, but I have been long enough acquainted with the work of the Financial Department to be able to say that there are not many of the Departments of Government service, officered by natives of India, which have not during the last quarter of a century had their scales of salary enhanced, and their general position, in a pecuniary sense, improved. Whether it is because the rupee is now less valuable, or because we require a better class of men for our work than before, or whether, as is more likely, both these causes have operated, the fact remains that in nearly every department there has been a gradual increase of the standard of salary.

"I have examined by way of test the Civil List of Bengal for 1867, and compared it with that of 1894, so far as regards the subordinate services. In 1867 I find that Deputy Magistrates began at the grade of R200, one-third of the whole number being in this grade; and they might rise to R700. In 1894, the lowest grade is R250, and it contains only one-fifth of the whole number, while the highest grade is R800. In 1867 in the Subordinate Judicial Service, 188 officers drew R150, R200, and R250, and 26 drew higher salaries of R400 and R600. In 1894 they begin with R250 (excluding a probationary class on R200, none of whom have yet two years' standing), and they go on through grades of R300, R400, R600, R800 and R1,000. The salaries of the Subordinate Educational Service I cannot compare. In 1867 the salaries were too small to be taken cognizance of by the official Civil List, but in 1894 they begin with R150 and they rise to R500.

"I have not a doubt that if I were to examine the lists of other provinces I would find the same facts; but I quote these merely to show that I am not talking without book. At one of the recent meetings of the Council my hon'ble friend Sir Antony MacDonnell had occasion to refer to an increase of salary given only the other day to the Provincial Service of the North-Western Provinces. And I have referred to-day to cases in which the very persons who raise objections to the enhancement of the rupee salaries of the higher services are urging the claims of the subordinate ones to have their salaries increased.

"It is only when you come to the higher-paid services, the men whose work and whose responsibility have been to the largest degree added to by the changes of a quarter of a century, that you find that the salaries have remained practically stationary during the whole time, until the Government has at last been obliged to extend to them also a share, which seems by statistical comparison to be only a small share, in the increase which has gradually, and by a more imperceptible process, been given to the lower-paid.

"And in fact, in the attacks that have in some quarters been made upon this compensation allowance, we are to some extent suffering the consequence of our own tardy recognition of its necessity. Had we interfered at the time when the Rupee was worth 18 pence, with a declaration that the loss by exchange, of which many of our officers were even then complaining, would after that point be made up for by some such measure as that adopted in August last, its fairness would possibly not have been impeached. It would have

been recognized that we were only providing, in a moderate and equitable way, against the inevitable deterioration of such of our administrative services as are recruited from England, if we permitted the salaries we offered to be stated to the candidates we require at their sterling equivalent. It is because we have so long put off a measure which has been so long pressed upon us, that we lay ourselves open to attack on the ground of our having added, at a single stroke, 63 lakhs to our expenditure. Had we met as it arose the demand which we have now admitted, we would have had to pay some 10 lakhs on this account in 1886-87, 22 in 1887-88, 28 in 1888-89, and so on. And if the demand is just and proper in itself, as I hold it to be, it is not the more open to attack because, being so long postponed, and at length, through stress of circumstances, at last recognized, it has come upon our accounts as a sudden and new item of 63 lakhs.

"I have not a doubt that we shall receive full value for the concessions we have given. India imposes upon her public officers—and especially upon her European officers—a far higher standard of work than is accepted as sufficient in any other country—a standard of work which it would be perfectly impossible to maintain, apart from the conditions in which Europeans live in India. They divide their lives between longer periods of work in India and shorter periods of rest in Europe, and they look forward to retirement from active service, if they live, at a comparatively early age. Unless there was this sharp-drawn distinction between periods of work and periods of rest, you would never find your European officers willing to live in that perpetual atmosphere of work which in this country surrounds them. In short, if you want to get your work done without immensely increasing your present staff, you must accept the condition that the European official must not only live free from the actual discomfort of pecuniary cares, but after such fashion that he may, during his working life, have a margin to put aside for his periods of rest. This I say is the peculiarity of Indian official life, and, if the State wishes to benefit by the acceptance on the part of its officers of a standard of work far in excess of anything required or expected by other Governments, it must accept on its part the necessity of maintaining, in the allowances it makes to its officers, something approaching that standard of living with reference to which the salaries were originally fixed, and with reference to which the present high standard of work and of efficiency has been established.

"The concession that has already been granted is a very limited one, but it is all we can afford. The orders restrict it, for the reasons I have explained, to the classes of officers who may be said to represent the European Administration of India. The extent of the concession is, I admit, very much less than that of the personal hardships imposed by the fall of the rupee. No class of cases has given me more pain to deal with than the numerous applications I have received from officers who do not come within the terms of the order. I had little idea of the hardships of family life which many of our officers were suffering, until they had occasion to represent them to the Government in this connexion. I have seen, over and over again, cases in which officers of what we call the Indian Services of the Government, filled with the honourable desire to give to their wives and families the benefit of a European residence and education, and occasionally compelled to do so in the interests of their health, have straitened and pinched themselves to meet the ever-increasing demand that their determination had made upon their purses. These and like cases have brought home to me, in a manner with which I was not fully acquainted before, at what sacrifice of personal comfort, at what cost of personal feelings, and with what surrender of all that makes life enjoyable, the service of the Government of India is too often carried on. The compensation allowances have gone some way, as I hope, to remedy these evils, but I cannot conceal from myself that many unremedied hardships still remain behind.

"It is too much to hope that even after this explanation the somewhat ungenerous denunciations directed in some quarters against this increase of allowances will altogether cease. But I trust it will at least be seen that the arguments apply with equal force against the increases which I have described as taking place throughout the ranks of the services ordinarily filled, and honourably filled, by Natives of India. You cannot reasonably expect to get the work

of the present day done, either by Natives or by Europeans, upon the salaries you offered twenty-five years ago; nor can I imagine anything more unjust, when you are obliged to raise the standard of your salaries, than to declare that the higher allowances are to apply only to new men; but that the officers who have served you for ten or twenty years, being now helplessly bound to your service, must be content to continue on the old scale. You have long given up the attempt to continue the old standard of salary in the case of the Native services with results entirely beneficial to the administration; I do not see why you should call it anything but bare justice when at length you are obliged to give it up also in the case of the higher paid European Services."

His Excellency THE PRESIDENT said :—" The time has now come when the discussion on the Budget Statement of the year must, so far as this Council is concerned, come to a close. It has on this occasion, I think, been broken up into two parts—for the introduction of the Tariff Bill forestalled, and I think necessarily forestalled, much that would otherwise have been appropriate to the proceedings of to-day. On the whole I do not think that the Government of India have any reason to be dissatisfied with the prolongation of the criticism to which they have been subjected.

" It has been acknowledged on all hands that our embarrassments have been serious, but financial embarrassments may proceed from various causes. I do not think that on this occasion there has been any disposition to think that our embarrassments have arisen from causes under our control. Criticisms there, no doubt, are—what system of administration of human affairs could expect to escape them ?—of different branches of our policy, but I think it is admitted on the one hand that in regard to expenditure we have been, and are, exerting ourselves to keep our expenses within bounds. We are doing so subject, of course, to the stipulation that we must maintain in complete efficiency that system of Government which has been built up in India, on which our position in India depends, and which it is our duty to India to conserve. I quite agree with the views expressed by my hon'ble friend Sir Griffith Evans when he pointed out that the development of an Empire necessarily lays upon us fresh duties, and that fresh duties must often mean fresh or increased expenditure, but I think that General Brackenbury, in the statement which he has made with regard to military expenditure, has shown that the Government of India are willing to submit the details of their expenditure to the Council, and also, so far as is possible, to keep these increased demands within the limits of the funds which are at their disposal. On the other hand, without entering into any matters of controversy, I think that the general lines of the fiscal policy which was adopted last summer have been recognised as having been forced upon the Government of India, and as having been the best that circumstances permitted. The Secretary of State has announced in the most emphatic terms that the Mints will remain closed, and that announcement has, I believe, met with pretty general approval in this country.

" This, then, being the position, I think that the principle on which it was necessary to frame the Budget, now before the Council, becomes pretty clear. Some objection has been taken to its being a transitional Budget; but what else was open to us? A great operation like that of last summer cannot be carried out in a day, though people talk sometimes as if it could be done by the stroke of a pen. Circumstances have tended to prolong somewhat the period of transition—circumstances, as I have said, beyond our control, and which depend to a large extent on the general conditions of trade, and also on schemes of legislation in other countries. I do not think, therefore, that the Government would have been justified in treating the position as one with the characteristics of permanency, or as one to be met at all events in full by permanent measures.

" Like other Members of the Council, I do not propose to renew the argument of the question whether in the import-duties, now re-imposed, the duties on cotton ought to have been included. The view taken by the Government of India has been expressed by the Financial Member, and will appear from the papers that will be laid before Parliament. All that I would say is that no object is advanced by undervaluing the strength of the opposition to it. For my

part, I have no doubt whatever that Her Majesty's Government have considered this subject with the earnest wish to serve the true interests of India. They have thought it their duty not to consent to a duty on cotton goods at this moment, looking, as they are bound to do, to all the interests of the Empire of which India is a part. But they have told us that they will be ready, if necessary, to reconsider this question in the future. I venture to think that it is a mistake to suppose that no advance has been made. I believe that a body of opinion has been created, not only here but in England, which may very materially affect the decision to be arrived at in the future. In the discussion of this question I would urge that it is quite possible to lose nothing of the strength and determination to do what my hon'ble friend Sir Griffith Evans described as bringing pressure upon the Secretary of State, while looking matters fully in the face, and recognising that in practical politics we sometimes have to take into account opinions with which we do not agree, and to calculate with all calmness what the attainable balance may be. In this connection I was glad to hear the remarks of the Hon'ble Mr. Fazulbhai Vishram. I am not to be taken as indicating any view of the manner in which an arrangement may be arrived at, but as an illustration of the spirit of fairness which I should like to see used. I was glad to hear him, as a mill-owner, say that he was willing to consider the imposition of an excise-duty.

"I should like to add that I have a great sympathy with the dislike expressed by so many Members to its having been necessary to utilise for the purposes of the year sums which otherwise might have been available for the Famine grant, and also the Funds of Local Governments.

"I confess I think there is some confusion of thought in reference to the position of the Famine grant. I do not understand how it can be supposed possible for a Government to bind its successors in all time coming to spend its revenues in a certain manner, whatever their judgment of the respective claims upon them may be at the time, and, as a matter of fact, from the quotations which have been read it does not appear that the Government of that day wished to do so. His Honour the Lieutenant-Governor has given us some very interesting information showing the good purpose to which this grant has been put, and the extent to which the objects proposed by those who established the grant has been met.

"The Hon ble Sir Griffith Evans spoke of a statement by Lord Northbrook, and described this grant as a percentage for repairs; but I think he will admit that a percentage for repairs is less on a well-constructed building. At the same time, for my part, I should be very sorry to take up the position that we had done our work in the construction of the class of works of this character. The Hon'ble Mr. Playfair has drawn an unfavourable comparison between India and America in the provision of railways. I do not know that the comparison would be complete without a consideration of the circumstances of the two countries, and especially, as the Hon'ble Mr. Westland has pointed out, of the extent to which private enterprise has influenced the matter. It would be highly desirable were we to see private enterprise giving more assistance to us in this country; but, as the case stands, I maintain that the Government has been right to regard the withdrawal of the Famine grant and the contributions from Local Governments as temporary parts of their Budget. At the same time I quite see that, in looking upon these parts of our Budget as temporary, we may, perhaps, be increasing our difficulties in the future. That is a disadvantage which we shall have to face when the time comes. It is a part of the position which it will be our duty to call the special attention of Her Majesty's Government to, if, or when, the time comes for us to ask for the reconsideration of our taxation which they have promised. In the meantime we must do our best with the means at our disposal."

The Council adjourned to Thursday, the 29th March, 1894.

S. HARVEY JAMES,
Secretary to the Govt. of India,
Legislative Department.

CALCUTTA;
The 2nd April, 1894.

SUPPLEMENT TO

The Gazette of India.

No. 14.} CALCUTTA, SATURDAY, APRIL 7, 1894

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 24th, 1894.

General Summary.—There is nothing of special interest to record in the meteorology of the past week. No important changes of pressure took place causing any well marked or general disturbance. It has been a week of feebly unsettled weather over the greater part of the country, with local thunderstorms and dust-storms, occasioned by somewhat irregular changes of pressure from day to day; which though small in amount, differed considerably at neighbouring stations. A shallow depression appeared over Sind on the 19th and was persistent up to the morning of the 23rd, but its formation was due to hot weather actions and not to the transference of a disturbance from Baluchistan, and in this case it did not prove to be of any importance. The air has been unusually dry in many parts of India and very low humidities have been recorded at stations in West, North and Central Bengal, and the central parts of the country. Temperature has varied considerably in North-Western India, but the mean temperature of the whole week for the whole of India was normal.

Daily Summary *Sunday.*—A general fall of the barometer took place over the whole country: the fall being greatest in the Punjab. A shallow depression of no great importance lay over Central Bengal, due to increased temperature in that area and the depression of the day previous off the Malabar Coast had commenced filling up. Pressure was slightly above the normal in North-Western India. Westerly winds were increasing steadily in the Gangetic plain, and winds were stronger on the Bengal and Orissa coast and in the Deccan. Rain had continued in South India. Calicut received 2·24 inches and Colombo and Negapatam over one inch.

Monday.—Pressure had increased briskly in Malabar and slightly in Bengal, filling up the depressions in those areas, and had given way briskly in Sind and Baluchistan. Pressure was very nearly normal over the whole of India, and hence its distribution was what usually prevails at the commencement of the hot season. Winds were still northerly in Sind and Kathiawar, but they had fallen off in strength. Westerly winds were blowing over the whole of Western and Central Bengal, causing a large reduction of humidity in that part of the country. Rain had again fallen in the South, Cochin registering 2·03, Colombo 1·53 inches, Trivandrum 1·45 inches, and several stations over half an inch. Duststorms with light rain had occurred in the Central Provinces.

Tuesday.—Pressure changed very irregularly in amount causing feebly unsettled weather with shallow depressions of no great importance in Sind, North Bengal and the Bombay Deccan. Westerly winds continued in Bengal, causing a still further reduction in humidity. The following abnormally low humidities were recorded: Dinajpur 24, Patna 30 and Dhubri 38. A thunderstorm had given 2·24 inches of rain at Wellington, but all other showers reported were very light and of little or no importance.

Wednesday.—Pressure increased briskly in North Bengal, Khandesh and Kathiawar, filling up depressions in North Bengal and the West Deccan, but re-

mained unchanged in Baluchistan and Sind. The changes of pressure continued irregular and the weather was consequently feebly unsettled. Westerly winds were still blowing to an unusual extent in West and Central Bengal and Behar, and humidity continued abnormally low. At Hazaribagh it was only 23 per cent. Dust-storms and thunderstorms had occurred in various parts of the country and rain had fallen in the Peninsula,—Belgaum reporting 1·73 inches and Mercara 1·12 inches. Light rain had also fallen in North-Western India.

Thursday.—Pressure again changed irregularly. The changes were generally small, but differed considerably in amount at neighbouring stations. Pressure was in moderate defect in Sind, where a depression was still apparent, and was in slight to moderate excess in North-Eastern and Central India. Winds were stronger than usual in the Punjab, and especially so at the hill stations of Upper India. Numerous duststorms and thunderstorms were again reported, in many cases accompanied with light rain.

Friday.—Except in Sind, where pressure had risen rapidly, filling up the depression over that area, pressure had changed by small amounts and somewhat irregularly. It was in slight to moderate excess over nearly the whole of India. The great uniformity of its distribution was its chief feature. Strong winds continued at the Upper India hill stations and northerly winds to an unusual extent in Sind and the Bombay Coast districts. Light showers of rain had fallen in the Punjab and Central Provinces.

Saturday.—The barometer rose briskly to rapidly in North-Western India and Beluchistan, completely modifying the pressure distribution, with steep gradients in the Gangetic plain and the Punjab. A shallow depression was lying over North and Central Bengal and another over Central and Lower Burma. Moderately strong north-westerly winds prevailed in the Gangetic plain and westerly winds in Bihar, and North and Central Bengal. Low humidities were recorded at Neemuch (18), Sutna (27), Khandwa (29) and Hazaribagh (29). Thunderstorms were reported from the hill stations in Upper India and light showers of rain, in many cases accompanying thunderstorms and dust storms from other parts of the country. Peshawar, Cherat and Ahmednagur each received over half an inch.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different provinces of India :—

PROVINCE.	MARCH 1894.							Mean variation of week.
	18th.	19th.	20th.	21st.	22nd.	23rd.	24th.	
	°	°	°	°	°	°	°	°
Burma	−0·2	+1·5	+1·6	+1·7	+0·9	+1·7	+2·2	+1·3
Bengal and Assam	+2·5	+3·1	+1·1	+0·4	+1·0	+0·6	+1·8	+1·5
North-Western Provinces and Oudh	+1·9	−1·2	−2·1	+1·2	+1·2	−0·1	+0·2	+0·2
Punjab	−2·5	−1·7	−1·0	+0·8	+2·4	−1·6	−4·6	−1·2
Bombay	+1·7	+1·4	+1·8	+1·0	−0·3	−0·5	+0·3	+0·8
Central Provinces and Berar	+2·2	+0·2	−0·8	+2·3	−0·4	−2·8	+0·1	+0·1
Central India and Gujarat	+3·7	+0·5	+0·6	+1·7	−1·9	−5·0	−3·7	−0·6
Sind and Rajputana	+0·1	−1·0	+0·2	+2·0	−0·5	−1·8	−5·5	−0·9
Madras	−1·4	−1·1	−1·0	−1·0	−1·9	−1·7	−0·6	−1·2
MEAN FOR WHOLE OF INDIA	+0·9	+0·2	0	+1·1	+0·1	−1·2	−1·1	0

From the above it will be seen that the mean temperature for the whole of India did not vary much from the normal on any day of the week, the greatest variation being a defect of 1·2° on the 23rd. The mean temperature of Bengal and Assam was in excess on every day of the week and that of Burma on all but one day. On the other hand, the temperature of Madras was in slight defect throughout the week, while that of the remaining provinces varied irregularly. The largest defect was 5·5° in Sind and Rajputana on the 24th, and the largest excess 3·7° in Central India and Gujarat on the 18th. The mean temperature for the week was in excess in Burma and Bengal in defect in the Punjab and Madras, and nearly normal in the other provinces. For the whole of India it was exactly normal. The highest maximum recorded during the week was 105·6° at Minbu, Central Burma, on the 20th.

Rainfall.—Of the 52 rainfall divisions shown in the following table, 28 received rain, while in 24 no rain fell. The rainfall of the week has been very small in amount, for only in four of the 28 divisions did the average actual rainfall exceed half an inch, and in 20 it did not exceed a quarter of an inch. The largest average rainfall was 2·02 inches in Coorg. In most divisions the fall was below the average of the week, and in only the Bombay and Malabar Coast Districts, Central Provinces (West), Gujarat, East Coast (South) and in Madras (South) was it in excess. In all other divisions it was either normal or in defect.

The last column of the rainfall table shows that the average rainfall for the period, 4th to 24th March, was in excess of the normal in most divisions of the Punjab and Bombay and Malabar Coast Districts; and in Eastern Bengal, Central Provinces (West), East Coast (South), and Madras (South).

The largest falls recorded during the week were in Southern India. Kotagiri (Nilgiris) received 6·01 inches during the week, Morekolum (Madura) 4·26 inches, and Alleppy (Travancore) 3·35 inches.

F. L. O'CALLAGHAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

OME DEPARTMENT.

REVIEW OF THE REPORTS OF THE SEVERAL LOCAL GOVERNMENTS AND ADMIN TRATIONS ON THE ADMINISTRATION OF THE REGISTRATION DEPARTME FOR THE THREE YEARS ENDING WITH THE YEAR 1892-93.

No. 680.

Extract from the Proceedings of the Government of India in the Ho Department (Public),—under date Simla, the 3rd April, 1894.

Read—

Home Department Resolution No. 6/259—271, dated the 17th February 1891.

Read also—

The Registration Reports of the several Local Governments and Administrations for the three years ending with the year 1892-93.

RESOLUTION.

OBSERVATIONS.—The last full reports on the administration of the Registration Department were submitted for the period of three years ending with the year 1889-90. The reports for the ensuing triennial period have now been received, and the following remarks on the various provincial reports briefly indicate the more salient features. In the statement attached to this Resolution the statistics for the past four years are compared for each province.

2. In the Madras Presidency the steady progress in the operations of the Department continued during the period under review. The number of documents registered rose from 762,471 in 1890-91 to 873,161 in 1892-93. The ratio of advance during the triennial period of compulsory and optional registrations affecting immoveable property was 20 and 23 per cent. respectively. On the other hand, the number of documents relating to moveable property declined during the same period by 5·4 per cent. Of the documents registered in 1892-93, 828,075 related to immoveable property, and of these 555,028 were compulsory and 273,047 optional registrations. The total number of documents affecting moveable property registered during the year was 42,62?, of which 90 were compulsory registrations, the remainder being optional. The aggregate value of the property affected by the transactions registered, which was R1,567⅝ lakhs in 1891-92, rose to 1,772 lakhs in 1892-93, of which 1,643 lakhs represent immoveable and 129 lakhs moveable property. The total value of documents registered during the triennium ending 1892-93 was 48½ crores of rupees against 41¼ crores in the corresponding period ending 1889-90. The average value of each document has slightly fallen from R202 in the triennium immediately preceding to R199 in that under review. The variations in the average value of sales and mortgages during the past six years have been comparatively slight, and the Local Government considers that there is nothing to suggest any general or permanent impoverishment of small landholders as a consequence of the continued unfavourable seasons It is believed also that, at any rate in the more advanced districts, the ryots are less dependent than formerly upon professional money-lenders, and that the ownership of land is not passing from the agricultural to the non-agricultural classes to any injurious extent.

The receipts of the Department have gradually increased from R10,75,727 in 1890-91 to R13,14,784 in the year 1892-93. The expenditure in 1890-91 amounted R7,67,891, and rose to R8,33,169 in 1892-93. The proportion

of expenditure to receipts fell from 71·3 in 1890-91 to 63·4 in 1892-93. The surplus of receipts over charges was R4,81,615.

3. In the Bombay Presidency also there has been a progressive increase in the number of documents registered during the triennial period under review: though the total figures are still comparatively small. The number of documents registered, which in 1889-90 was 154,326, reached 177,170 in 1892-93. The annual average for the triennial period was 167,419. There has been a continuous increase in the number of compulsory registrations of documents relating to immoveable property, while optional registrations of such documents have remained nearly stationary. The number of compulsory registrations of this class was 122,477 in 1889-90 and 144,669 in 1892-93; while the number of optional registrations, which was 26,029 in 1889-90, stood at 26,487 in 1892-93. The aggregate value of property affected by registered documents amounted to R887 lakhs in 1892-93 against R809 lakhs in the preceding year. The aggregate value of the immoveable property affected rose (as compared with 1891-92) from R789 lakhs to R865 lakhs, and that of the moveable property from R20 lakhs to R22 lakhs.

The Transfer of Property Act (No. IV of 1882) came into operation on the 1st January 1893 in all the districts of the Presidency, except those in the Province of Sind and Aden and Deesa. The introduction of the Act will doubtless be followed by an increase in the operations of the Department. The number of registrations of instruments affecting moveable property still continues very small, being only 4,653 in 1892-93.

The revenue of the Department shows a steady increase. In 1889-90 it amounted to R4,41,809, and in 1892-93 to R5,12,881. The expenditure during 1892-93, R2,64,452, was about the same as in the preceding year—R2,64,958. The surplus during 1892-93 was R2,48,429 against R1,94,464 in 1889-90.

There has been a marked increase in the number of documents registered under the Deccan Agriculturists' Relief Act. The number registered in 1892-93 was 137,521 against 127,560 in 1891-92 and 119,839 in 1890-91. The increase was confined to the case of documents relating to immoveable property. There was a decline in the number of those relating to moveable property, which numbered 40,406 in 1889-90 and 36,557 in 1892-93. The financial results of registration under this Act show a deficit; but the amount of deficit, exclusive of the value of books and forms supplied free of charge, has gradually decreased from 13,324 in 1889-90 to 7,914 in 1892-93. The question of the amendment of the Act is now receiving the consideration of the Government of India.

4. The statistics for Bengal show a satisfactory advance in the operations of the Department. The number of documents registered rose from 893,608 in 1889-90 to 1,102,321 in 1892-93, and the annual average number during the triennial periods ending with these two years was 798,354 and 996,033 respectively. There has been an increase in the number of registrations of all kinds during the period under review, which the Lieutenant-Governor attributes to the growing confidence of the public in the Registration Department. In 1889-90 the deeds affecting immoveable property, which were compulsorily registered, were 594,933 in number; they steadily rose during the triennium, until in 1892-93 they numbered 732,259. The number of deeds affecting immoveable property, the registration of which was optional, similarly increased from 147,191 in 1889-90 to 207,395 in 1892-93. The aggregate value of property transferred by registered documents, which was 1,490⅝ lakhs in 1889-90, gradually increased during the three years, and in 1892-93 amounted to 1,773½ lakhs.

The operations under the Muhammadan Marriage Registration Act, I (B. C.) of 1876, increased from 8,215 in 1889-90 to 12,175 in 1892-93. The Inspector-General of Registration considers that in the majority of districts Muhammadan Registrars are gradually gaining popularity, though in certain

places they have failed to do so owing either to their own action or to the opposition of interested headmen and zemindars. The Act is in operation in 19 districts.

The receipts and expenditure of the Department increased respectively from R11,98,801 in 1889-90 to R14,35,541 in 1892-93, and from R6,27,434 to R7,26,771. The average annual surplus during the triennial period was in round numbers R6½ lakhs, or a lakh and a half more than the average surplus in each of the preceding three years.

5. In the North-Western Provinces and Oudh the number of documents registered in 1889-90 was 208,568 and 207,162 in 1892-93. The number of documents relating to immoveable property of the compulsory class rose from 122,905 in 1890-91 to 124,120 in 1892-93, while optional registrations affecting immoveable property fell from 36,622 in the former to 35,197 in the latter year. The number of transactions affecting moveable property was 43,722 in 1890-91, 46,616 in 1891-92, and 46,538 in 1892-93. The total number of optional registrations was about 40 per cent. of the total number of documents registered; it has stood at this figure during the past six years, and the statistics in general seem to denote that the condition of registration is at present stationary.

The most important change in the past three years has been the gradual introduction into the North-Western Provinces of the Oudh system of entrusting the work exclusively to departmental sub-registrars, and thus relieving tahsildars of this additional duty—a change which has been in progress since the year 1885. Considerable relief has already been afforded to the revenue officials, as out of 172 tahsildars who were employed in registration work in 1888-89, only 75 were still so employed in 1892-93. The change is not yet complete, and it is premature to form any final judgment on its effects.

The receipts of the Department rose from R3,90,334 in 1889-90 to R4,10,413 in 1892-93, and the expenditure from R1,82,802 to R1,98,202 in the same period.

6. In the Punjab there has been an increase since 1889-90 in the number of documents registered, the year 1892-93 showing 124,120 compared with 95,690 registered in the preceding year, and 78,384 in 1889-90. This increase in the operations of the Department is attributed mainly to a ruling by the Chief Court in 1890, under which (it is said) absolute security in respect of immoveable property is not guaranteed unless the document is registered, even though its registration may be optional under section 50 of the Registration Act, III of 1877. In consequence of this decision, registrations affecting immoveable property gradually rose from 72,497 in 1890-91 to 114,505 in 1892-93. There has been a gradual decline in optional registrations relating to moveable property, which numbered 8,786 in 1892-93 compared with 9,726, the average of the preceding triennium. The total number of optional registrations was 38,386 in 1892-93, or about 30 per cent. of the total number of registrations. The value of immoveable property transferred by registered deeds rose from 360½ lakhs in 1890-91 to 413⅓ lakhs in 1891-92 and 477⅘ lakhs in 1892-93 (the average for the preceding three years was R3,40,29,067), while that of moveable property so transferred remained almost stationary at about 20 lakhs. The gradual extension of the system of employing non-official sub-registrars instead of official agency is going on with satisfactory results.

The income was R3,23,398 in 1892-93 as compared with R2,63,558 in the previous year and R2,31,714 in 1890-91. The expenditure has likewise increased from R94,125 in 1890-91 to R1,00,267 in 1891-92 and R1,11,569 in 1892-93.

7. The number of documents registered in the Central Provinces rose from 28,676 in 1889-90 to 31,103 in 1892-93. The increase is most marked under sales and mortgages of immoveable property, which, taken together, form the bulk of registration in these provinces, yielding 26·2 per cent. and 41·2 per cent. of total registrations respectively. The value of the property affected by registered documents fell from R1,30,73,092 in 1891-92 to R1,18,36,553 in 1892-93, or by

R12,36,539, chiefly owing to a falling off in the Narsinghpur District, where in 1891-92 four documents affecting property valued at more than 13 lakhs were registered in the course of litigation. The aggregate value was R1,02,50,323 in 1890-91 and R1,02,16,266 in 1889-90.

The receipts of the Department rose from R1,00,696 in 1889-90 to R1,12,129 in 1892-93, and the expenditure from R40,298 to R48,413 during the same period, leaving a net income of R63,716 in the year 1892-93.

8. There has been a large increase in Lower Burma since 1889-90 in the number of documents registered, the year 1892-93 closing with 17,369 as compared with 10,822 in 1889-90 (showing an increase of 62 per cent.). The largest increase occurred in documents relating to immoveable property of the compulsory class, which rose from 8,957 in 1889-90 to 15,023 in 1892-93. The number of optional registrations of immoveable property was 629, or only ten more than in 1889-90.

The total number of registrations relating to moveable property advanced from 1,203 in 1889-90 to 1,678 in 1892-93. The aggregate value of immoveable property transferred during 1892-93 was R196⅕ lakhs compared with R135⅕ lakhs in the previous year, while the value of moveable property transferred during those years rose from R16⅘ lakhs to R21⅗ lakhs. The Transfer of Property Act has not yet been brought into force in this province.

The gross income of the Department amounted to R54,752 in 1892-93 against R40,218 in the preceding year and R36,053 in 1889-90, and the expenditure rose from R16,948 in 1889-90 to R18,066 in 1891-92 and R21,856 in 1892-93.

There were in all 20 registration offices in Upper Burma at the close of 1892-93 as compared with 16 during the two preceding years. The number of registrations in 1889-90 was 1,534 and 2,402 in 1892-93. The amount of fees realized in those years was R4,015 and R6,130 respectively. The questions of the extension of compulsory registration throughout Upper Burma and the amendment of the Upper Burma Registration Regulation of 1887 with a view to provide for optional registration are at present under consideration.

9. In Assam the total number of instruments registered was 30,993 in 1892-93 against 31,242 in 1889-90; in the intermediate years the registrations numbered 31,239 in 1890-91 and 30,698 in 1891-92. Out of the 30,993 documents of all classes registered during the year 1892-93, 26,560 related to immoveable property, 4,323 to moveable property, and 110 to wills and authorities to adopt. Of the total number of documents registered during this year, 27,271, or 87·99 per cent., were registered in the Surma Valley, 3,640, or 11·74 per cent., in the Assam Valley, and 82, or 0·27 per cent., in the Hill districts. The total aggregate value of the transactions in 1892-93 was R55,70,820 against R51,95,802 in 1891-92 and R52,62,308 in 1890-91, and the average value of each transaction was R185 against R173 in each of the two preceding years.

The receipts of the Department during the year 1892-93 amounted to R44,295 against R43,187 in 1890-91 and R44,728 in 1891-92. The expenditure during the year was R24,203 against R24,551 in 1890-91 and R26,378 in 1891-92. There was a larger surplus in 1892-93, being R20,092 against R18,636 in 1890-91 and R18,350 in 1891-92; but, as explained by the Chief Commissioner, this result is due to the fact that the proportionate cost of the office of the Inspector-General of Registration, which was debited against the Registration Department up to the end of 1891-92, and which amounted to R3,024 during the year 1892-93, has been transferred to "General Administration." On the whole, registration is stated to be making little progress in Assam.

10. In Coorg there has been an increase during the triennial period in the number of documents registered, but the increase has not been progressive. The number of registrations in 1892-93 (1,938), though smaller than in 1891-92, when it reached 2,109, was in excess of that in 1889-90 (1,539). Although

the number of documents registered during 1892-93 was fewer than in 1891-92, the aggregate value of the property transferred during the later year, which was R28⅓ lakhs, was very largely in excess of that in 1891-92, when it amounted to about R14⅓ lakhs. This result was due to the fact that in 1892-93 a single deed of transfer amounted to R17 lakhs. The aggregate value of property transferred during 1890-91 and 1891-92 respectively (R14⅘ lakhs and R14⅓ lakhs) was smaller than that in 1889-90 (R17 lakhs).

The financial results show an increase in the receipts, with a decrease in the expenditure, during 1892-93 compared with the preceding year, the receipts amounting to R9,948 compared with R7,948 in 1891-92, and the expenditure to R3,485 against R3,776.

11. On the whole there has been an increase during the last triennial period in the number of documents registered in the Hyderabad Assigned Districts. The figure (31,162) reached in 1892-93 was smaller than the corresponding figure (31,766) for 1889-90; but the latter considerably exceeded the totals of all other years The increase since 1890-91 is confined to documents relating to immoveable property, the number of registrations affecting moveables having remained almost stationary. The aggregate value of property transferred, which was R80⅗ lakhs in 1891-92, exceeded R92 lakhs in the following year.

The income of the Department has risen from R70,550 in 1891-92 to R75,734 in 1892-93. The expenditure has likewise grown from R38,127 in 1891-92 to R47,548 in the next year.

In Secunderabad the documents registered during the two last years numbered 830 and 978 respectively. The receipts amounted to R2,566 and R3,111, and the expenditure to R1,078 and R1,284.

12. The total number of registrations in India gradually rose from 2,167,130 in 1889-90 to 2,597,477 in 1892-93, and the increase was general to all provinces, except the North-Western Provinces and Oudh and Assam, where the operations of the Department were on the whole stationary. The receipts of the Department also show a progressive rise from R35,35,360 in 1889-90 to R42,96,987 in 1892-93—a rise which was common to all provinces. The expenditure of the Department also increased in all provinces, the total having risen from R19,95,544 in 1889-90 to 22,80,953 in 1892-93. The percentage of expenditure to receipts declined from 56·4 in 1889-90 to 53·0 in 1892-93.

The Governor-General in Council is glad to see that the results of the operations of the past three years again on the whole show satisfactory progress in the operations of the Department and an increase in its popularity. In the North-Western Provinces and Oudh, however, the figures are less satisfactory than in any of the other larger provinces; and the attention of His Honour the Lieutenant-Governor and Chief Commissioner is invited to the stationary condition of registration in the territories under his administration. His Excellency in Council trusts that, as has frequently been urged, the necessity for affording everywhere reasonable facilities for registration by expending a part of the available surplus will be kept in view.

ORDER.—Ordered, that a copy of the Resolution be forwarded to the Local Governments and Administrations marginally noted, and to the Foreign Department and the Department of Revenue and Agriculture for information, and that the Resolution be published in the *Gazette of India.*

Punjab.	Hyderabad.

[True Extract.]

C. J. LYALL.

Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RIOTS IN THE KAMRUP AND DARRANG DISTRICTS IN ASSAM.

The following papers are published for general information :—

No. 792-Rev./8440 R., dated Shillong, the 4th November, 1893.

From—F. C. DAUKES, Esq., Secretary to the Chief Commissioner of Assam,

To—The Secretary to the Government of India, Revenue and Agricultural Department.

I am directed to forward, for the consideration and orders of the Government of India, copy of letter No. 4000, dated the 3rd August 1893, with enclosures, from the Director, Department of Land Records and Agriculture, Assam, submitting, in accordance with rule 18 of the Assam Valley Resettlement Rules, his final report on the reassessment of the Assam Valley Districts.

2. With my letter No. 3032-R., dated the 7th July 1892, I submitted with other papers, for the information of the Government of India, copy of a Note dated the 29th June 1892, drawn up by Mr. Ward, in which he reviewed the previous correspondence which had taken place with the Government of India on the subject of the reassessment, and stated the principles on which he considered the reassessment should be made. In your letter No. 1677-A.—191, dated the 6th August 1892, you conveyed the general approval of the Government of India to the instructions issued by the Chief Commissioner in accordance with the principles laid down in his Note, and suggested that those instructions should be recast in the form of rules to be issued under section 29 of the Land and Revenue Regulation. This suggestion was accepted by the Chief Commissioner, and draft rules for the reassessment of the Assam Valley were prepared and published for criticism in the *Assam Gazette* of the 8th October 1892.

In publishing the draft rules it was stated that the rules would be taken into final consideration on or before the 8th November 1892, and that all criticisms must be received before that date. Owing, however, to representations received from various quarters that the time allowed to the public for criticising the rules was too short, they were not finally issued until the end of December 1892, when they were published in the *Assam Gazette* of the 23rd December 1892 with certain amendments, which the criticisms submitted showed to be necessary.

3. In paragraphs 10 to 27 of the report now submitted will be found set forth the substance of all the criticisms which have been offered on the rules, and the Chief Commissioner has nothing to add to Mr. Darrah's remarks upon them. In Mr. Ward's opinion none of these criticisms is deserving of very serious consideration. They have, moreover, all been effectually disposed of in the correspondence, notes, and discussions which preceded the issue of the rules. Many of the criticisms offered are also based on the assumption, for which there is no foundation whatever in the rules themselves, that it was the intention of the Chief Commissioner to double the land revenue assessment all round. It is needless to say that the Chief Commissioner has never contemplated anything of the kind, although he certainly held the view, which the report now submitted shows is supported by every district officer in the Assam Valley, that there are very large areas in each district which could well bear the assessment upon them being doubled.

Principles of assessment laid down in the resettlement rules.

4. The principles of assessment laid down in the rules in question are fully explained in paragraphs 10 to 13 of Mr. Ward's Note of the 29th June 1892, and may be briefly recapitulated as follows:

(1) The present system under which all land in the valley is divided into three classes only, *viz.*, (*a*) homestead and garden ; (*b*) low rice lands (*rupit*) and high lands (*faringati*), without any regard

whatever to comparative advantages and disadvantages in the matter either of situation as regards markets, or of productiveness of soil, or of liability to inundation, &c., is discontinued, and lands of each of these three classes or descriptions are sub-classified and assessed upon an approximate estimate of their actual value.

(2) The rules required that the comparative value of lands of each of the three descriptions referred to is estimated not by crop experiments (which, so far as these experiments have hitherto extended in the Assam Valley, are not a sufficiently safe guide), nor by any minute enquiries into the net profit derivable by the cultivator from each description of land (which in this part of India can, in the Chief Commissioner's opinion, never lead to any practical or reliable results), but mainly by reference to the actual demand for land, as shown partly by the comparative density of the population in different parts of a district, partly by the proportion in each village of waste unsettled to the total cultivable land and of permanent to shifting cultivation, and partly by the amount of land sublet by the settlement-holder to tenants. Statistics as to the relative density of the population in different villages in each district are easily obtainable from the results of the recent census, while the cadastral survey maps (there being a separate map for each village) show on their face in what villages the demand for land is greatest, and where, therefore, the land is most valuable. It may here be mentioned that there are some villages the maps of which show that every *bigha* of land in them is taken up, and that the whole of the cultivation is permanent, while there are others the maps of which show a large proportion of land lying waste. It was chiefly upon an examination of these maps that the Director, Department of Land Records and Agriculture, after consulting the Chief Commissioner, based his provisional classification of villages into first, second, and third class villages, and issued it, as required by rule 9 of the Resettlement Rules, to the several district officers as a basis for future proposals.

(3) The provisional classification of villages divided all villages in the valley into three classes only, *viz.*, first, second, and third class villages, and the rules laid down that ordinarily all the lands, whether homestead, *rupit*, or *faringati*, were to be assessed at first, second, or third class rates according to the class of villages in which they fell. The three classes of rates laid down by the Chief Commissioner for each of the three recognised classes of land above mentioned are given in rule 3 of the Resettlement Rules. In first class villages the existing rates were doubled, in second class villages they were raised 50 per cent., and in third class villages they were raised 25 per cent.; at the same time full discretion was allowed to the district officers to propose a fourth class of villages, and therefore fourth class rates, for each of the three main descriptions of land if they considered the third class rates laid down in the rules were too high. It was also clearly pointed out in paragraph 12 (4) of Mr. Ward's Note of June 1892, a copy of which was sent to all district officers for their information and guidance, that the best lands in every district need not necessarily be assessed at first class rates if any officer considered that the lands of his district were inferior in productive power, or in any other respect, to those of another district, or that there were other considerations which might lead him to recommend that his first class villages should not be assessed at the same rate as similar villages in other districts. It was further pointed out in paragraph 13 of the same Note that district officers were at liberty to propose that in any particular village, though classed, say, as a first class village, the lands of each description should not all be placed in the first class.

(4) The provisional classification of villages having been issued to the district officers, rules 9 to 12 of the Resettlement Rules laid down the procedure to be observed by them in making the provisional classification widely known, and in inviting the people to come forward and object.

(5) Paragraph 13 of the rules limited the admissible objections to certain heads. Thus, general allegations that the people of the villages were too poor to bear any enhancement of assessment whatever, or that no village in the district could bear an enhancement of 100, 50, or 25 per cent., as the case might be, were not to be entertained, but any villager might object that his village was in the provisional classification classed too high, or, admitting the correctness of the village classification, that all the lands in the village could not bear first class rates.

(6) In dealing with the admissible objections above noticed, district officers were enjoined to devote their tours of the last cold weather to making complete enquiries into the validity of the objections raised without having recourse to crop experiments or to minute enquiries regarding the net profits derived from the land by the Government settlement-holder, and their attention was chiefly directed to the necessity of enquiring into the comparative productiveness of village lands, which had not been taken into consideration at all in preparing the provisional classification list of villages. The facility of bringing the produce of the land to market was also to be considered (Rules 6 and 13). Thus, while the provisional classification of villages issued by the Director was based only on the single consideration of the demand for land, district officers were directed to modify that classification, where necessary, by reference to further considerations, *viz.*, the relative productiveness of land in the different villages and the accessibility of the land to markets.

(7) In paragraph 13 (5) of Mr. Ward's Note of June 1892, it was pointed out in what manner, and to what extent, each district officer was to make his local enquiries with reference to the objections preferred to the provisional classification. He and the subdivisional officers were required to visit personally as many villages as they could, and in regard to villages which they could not visit, they were to collect together the tahsildars or mauzadars and other subordinate revenue officials who had large local experience, and also the settlement-holders themselves, and elicit from these all the information they could, the information so obtained being confined to noting down only very marked distinctions in such advantages or disadvantages as might attach to villages in regard either to productiveness of the soil, liability of the land to floods, proximity to markets, and so forth, such as might enable the district officer to bring together a considerable number of adjoining villages into one homogeneous group for purposes of applying the rates of assessment laid down in the rules.

Khiraj lands under special cultivation.

5. The principles referred to in the last paragraph as those upon which the reassessment was to be made have reference only to the reassessment of lands taken up for what is known as ordinary cultivation, that is to say, for the ordinary staple crops of the Assam Valley. In the original draft of the resettlement rules it was proposed to treat in the same way lands under special cultivation, *i.e.*, tea lands which had been taken up under the ordinary settlement rules on what is known as *khiraj* or full revenue-paying *patta*; that is to say, Mr. Ward had originally intended to assess all such lands at the village rates laid down in the rules according to the class of the village in which they were found to be situate. The Indian Tea Association, however, and planters in the Assam Valley generally, took exception to this mode of assessing their lands. Their objections were based on an entire misconception of the extent to which their interests would be really affected by the draft rules. Lands taken up under the special

Waste Land Rules (section I of the Assam Valley Settlement Rules) are not affected at all by the present reassessment, and will not be affected until the expiry of the terms of the existing thirty-year leases, when they will be liable to be assessed at the ordinary prevailing rates. Some of the grants under the Waste Land Rules in force prior to 1876 will be affected only to the extent of having to pay a higher local rate. The amount of *khiraj* land under tea in the Assam Valley, which is alone immediately affected by the reassessment, is insignificant, amounting altogether to less than 88,000 acres out of a total area of nearly 600,000 acres taken up for tea in the Assam Valley. Details for each district will be found in paragraph 22 of Mr. Darrah's report. In view, however, of the objections raised by the planting community to the rules, the Chief Commissioner amended the original draft by providing a special rule (rule 15) for the assessment of tea lands held under *khiraj patta*. This rule left it open to the Chief Commissioner, with the approval of the Government of India, to assess *khiraj* tea lands at such special rates as he might think proper, subject to a limit of 50 per cent. increase on present rates. After the final issue of the rules in December last, the Chief Commissioner took the opportunity, when visiting on tour each district of the Assam Valley, to explain the rules to the planters who met him, and finally arranged with Mr. Buckingham, the Chairman of the Assam Branch of the Indian Tea Association, to meet at Dibrugarh delegates of planters from each district, and to discuss with them the question as to what would be a fair rate to assess on *khiraj* tea lands under rule 15 above referred to. It is unnecessary to trouble the Government of India with details of the discussions which took place at the conference. It is sufficient to say that the planters were all agreed that they could not claim total exemption from enhancement on their *khiraj* lands; that they were agreeably surprised to find that the new rules only affected their *khiraj* lands; and that they fully admitted that tea cultivation in Upper Assam could bear a higher rate of assessment than similar lands in Central or Lower Assam, and that lands in Central Assam were more valuable than in Lower Assam. The most productive and at the same time the most profitable tea lands in the Assam Valley are admittedly to be found in the two districts of Lakhimpur and Sibsagar and in the Sadr subdivision of Tezpur; the Chief Commissioner has, therefore, decided, subject to the approval of the Government of India, to raise the assessment in this tract from 8 annas to 12 annas a *bigha*. In the Nowgong district tea lands are not so productive or so profitable, and the assessment here has been fixed by the Chief Commissioner at 10 annas a *bigha* only; while in the subdivision of Mangaldai, which belongs to the Darrang district, and in the district of Kamrup, the assessment has been raised to 9 annas only. This assessment of *khiraj* tea lands has already been communicated by the Chief Commissioner to Mr. Buckingham, who has accepted it, and it only remains now for the Government of India to accord its sanction to the same. The increase of revenue derived from *khiraj* tea lands by this assessment is probably greater than what would have been obtained had the original draft rules been allowed to stand. *Khiraj* tea lands are generally taken up in villages where there are large areas of waste, and these would be mostly third class villages, on which the assessment under the rules cannot be enhanced by more than 25 per cent. Rule 15, however, has enabled the Chief Commissioner to increase the assessment on such lands in the two most important districts of the Assam Valley by nearly 50 per cent.

Rule 25.

6. One objection taken to the rules as originally drafted was that by raising the rates immigration and the taking up of waste land would be discouraged. The Chief Commissioner did not attach any great weight to this objection, but rule 25 was framed to meet it. At present anyone taking up waste land under the ordinary settlement rules, whether for tea or for ordinary cultivation, pays the *faringati* rate of 8 annas a *bigha* for the land taken. In the rules, as originally drafted, he would have had to pay the village rate for *faringati*, so that if he took up waste in a first class village, he would have had to pay one rupee a *bigha*. As a matter of fact, however, waste is rarely to be found in first class villages. In second class villages the proportion of waste will doubtless be greater, but it will not be very large. *Faringati* land therefore would chiefly, if not entirely, be taken up in third class villages, where the new rate is 10 annas a *bigha*. It has been strongly urged by the Director, Department of Land Records and Agriculture,

that the raising of the rate by 2 annas a *bigha* will have no appreciable effect on applications to take up waste land, and that rule 25 is therefore unnecessary. Mr. Ward, however, has decided to let the rule stand. The demand for waste land in the Assam Valley in proportion to the supply is so small, owing to the sparseness of the population in and in the neighbourhood of the tracts where such land is chiefly to be found, that it seems undesirable to offer even the smallest discouragement to the taking up of such lands.

Mr. Darrah's report.

7. The report now submitted by Mr. Darrah shows very fully how effect has been given by him and by the several district and subdivisional officers (who are the settlement officers referred to in his report) to the principles laid down in the Resettlement Rules and to the instructions contained in Mr. Ward's Note of June 1892 as to the procedure to be followed in giving effect to those principles. The following points in the report may be noticed :

Area brought under resettlement.

Paragraph 2.—This paragraph should be read with rules 4 and 20 of the Resettlement Rules and paragraph 12 (4) of Mr. Ward's Note of June 1892. Under rule 4 all lands liable to assessment at full rates and lying outside the cadastrally-surveyed areas were ordered to be assessed at the lowest rates which might finally be adopted for each district, *i.e.*, at third class rates or fourth class village rates, should any Deputy Commissioner propose a fourth class for his district. As a matter of fact, no Deputy Commissioner has proposed to have more than three classes of villages, so that all non-cadastral areas will, under rule 4, be now assessed at third class village rates, except in certain special tracts to be noticed hereafter, in which the district officers have suggested that the lands should be exempted altogether from enhancement.

It will be observed that by "cadastrally-surveyed areas" or "tracts" in the rules are meant areas of which the cadastral survey and settlement had been completed at the time the rules were issued. In regard to areas of which the settlement on cadastral survey results is not complete, and for which the materials are therefore not yet available for selecting the first and second class villages, rule 20 provides that, until the settlement papers are complete, they will be treated as non-cadastral areas and settled annually at third class village rates, but that, as soon as the settlement papers are received, these areas will be treated like other areas of which the settlement on cadastral survey results has been completed, and selections of first and second class villages will be made in them, and first and second class rates applied to these villages.

The following statement shows conveniently what the whole cadastrally-surveyed area in each district is in which the selection of first, second, and third class villages will be made, all land outside this area being treated as non-cadastral and assessed at third class rates, or exempted altogether from enhancement:

District.	Total cadastrally-surveyed area in which selection of first and second class villages will be made.	Cadastrally-surveyed area in which selection of first and second class villages has already been made (paragraph 1 of Mr. Darrah's report), to take effect from 1st April 1893.	Area in which selection of first and second class villages will be made, to take effect from 1st April 1894.	Area in which selection of first and second class villages will be made, to take effect from 1st April 1895.
	Square miles.	Square miles.	Square miles.	Square miles.
Kamrup ...	1678·43*	1286·91*	364·60	26·92
Darrang ...	857·10	547·02	...	310·08
Nowgong ...	1002·99	586·59	416·40	...
Sibsagar ...	1520·69	1370·48	...	150·21
Lakhimpur ...	269·25	*Nil*	...	269·25
Total	5328·46*	3791·00*	781·00	756·46

* Includes the 111·64 square miles of the Barpeta experimental survey.

Put shortly, the above statement means that the cadastrally-surveyed area to which the Resettlement Rules refer covers 5328·46 square miles; that the present report proposes out of this area to classify villages for the purposes of the reassessment which is to take effect from the first April 1893 in 3791·00 square miles only. Of the remaining 1537·46 square miles, 781 square miles will have the revenue enhanced to third class rates only for the current year, and be settled on annual *patta;* but the classification of villages in this area will be completed this cold weather, and certain villages raised to the first and second class with effect from the 1st April 1894. Similarly in the 756·46 square miles the village classification will be completed in the cold season of 1894-95, and will take effect from the 1st April 1895. On the completion of the village classification in these remaining tracts, periodic *pattas* will issue to the settlement-holders as in the case of those villages which have already been classified, and all *pattas* issued at the resettlement will have their terms fixed so that they may expire on the same date.

Procedure observed in inviting objections to provisional classifications of villages.

Paragraphs 7 to 9 and Appendix F of the report show the steps tåken by district and subdivisional officers to make widely known the provisional classification of villages in the cadastrally-surveyed tracts of each district, together with the new rates attaching to each class, and the procedure adopted by them in dealing with objections. The very small percentage of objections per square mile presented, as shown in Appendix F, may be noticed. In no district, except Kamrup, was there one objection to the square mile. In Kamrup the percentage was as high as 11·56, which is explained in paragraph 9 of the report. Where the settlement-holder had only a short distance to travel, he objected; but if he had a long distance to go to the Deputy Commissioner or the Subdivisional Officer, he did not think it worth his while to object, even though the provisional classification of villages might involve the existing assessment on his land being doubled.

Objections to the reassessment.

Paragraphs 10 to 27 of the report deal with the objections against the reassessment which were preferred in the shape of memorials to His Excellency the Viceroy or to the Chief Commissioner. These were all objections of a general nature and are fully dealt with, and in the Chief Commissioner's opinion sufficiently disposed of by Mr. Darrah. It may, however, be mentioned that during his recent tour through the Assam Valley, the Chief Commissioner met thousands of settlement-holders, most of them being the actual cultivators of the soil, and personally heard all they had to say against the reassessment. He also met several native gentlemen of some position and influence, including the President of the Sarbbajánik Sabha at Jorhat, and discussed with them the principles of the Resettlement Rules. As soon as it was explained that the Government had no intention whatever of doubling the existing assessment all round, but only intended to double in a limited area, to increase the assessment by 50 per cent. in some villages, by 25 per cent. in others, while possibly in certain villages there would be no increase of assessment at all, all serious objection to the reassessment may be said to have been practically withdrawn, and the only argument really pressed upon the Chief Commissioner was that, as the people were accustomed to the present broad classification of the land throughout the entire valley into three classes only, that classification should be maintained, and that the existing rates on each class should be simply increased all round by 25 per cent. A further increase than this was deprecated, as was also the sub-classification of the three main descriptions of land into first, second, and third class. The people, it was said, would probably not understand upon what valid ground the lands of one village were classed as first class, while those of an adjoining village might be put into the third class. When it was pointed out to the settlement-holders and cultivators themselves that it was manifestly unfair to Government that *rupit* lands producing 12 maunds a *bigha* should be assessed, as it now is, at the same rate as lands of the same denomination producing 5 maunds only, or that lands liable to constant inundation should bear the same assessment as lands secure from such accidents, while, on the other hand, it would be equally unfair to the Government tenant to assess the inferior lands of the same denomination at the same rate as the superior, the justice of the argument was fully admitted, but the reply was simply that existing practice ought not to be disturbed. As the Government of India are aware, it

has been decided that existing practice cannot be continued, and that while the principles upon which the present reassessment has been made lay no pretence to scientific accuracy, so far as the classification of land is concerned, it is certainly a considerable advance upon what might almost be said to be the present entire absence of any principle whatever in assessing lands in the Assam Valley. The argument that the people will not understand the division of a district into homogeneous areas for purposes of assessment is not one to which the Chief Commissioner attaches any weight. Such a division will be readily enough understood when it is introduced, just as it is thoroughly understood in Cachar and in the Jaintia parganas in the district of Sylhet, where the cultivator is not superior in intelligence to the average Assam ryot. Paragraph 24 of the report further deals with the argument of unfairness which has been raised against the principles on which the present reassessment has been made.

Apprehended migration from superior to inferior class villages.

Paragraph 26 of Mr. Darrah's report notices an objection which has been taken to the reassessment rules, based on the ground that people will abandon first class villages and go to villages of the third class. The subject is again noticed in paragraph 39 of the report. The Chief Commissioner has no fear whatever that migration to any appreciable extent will take place. It might occur if any attempt was now being made to assess the land at its full value. But the permanent cultivator of the soil will not in Assam, any more than in other parts of India, except under very high pressure, give up his permanent home and lands and take to shifting cultivation. If his cultivation is not permanent, it is not very material whether he shifts to cheaper lands or not. So long as permanent cultivation is not disturbed, there is nothing to fear, and we know that by far the greater portion of the cultivation in first and second class villages as now classified is permanent. In third class villages there may be sometimes found considerable areas of non-permanent *faringati* cultivation, but Mr. Ward doubts whether any cultivator of such lands would give them up, and go to the labour and expense of clearing new lands for the sake of saving 2 annas a *bigha*. If he is a shifting cultivator, he will shift in any case whether rule 20 stands or is cancelled; if his cultivation is not shifting, Mr. Ward believes that he will prefer to remain where he is.

Local enquiries made by district and subdivisional officers.

Paragraphs 28 to 34 of the report describe fully the nature of the local enquiries made by district and subdivisional officers with reference to the objections preferred against the provisional classification of villages and the considerations which led them classify villages as they have done. One of the objections urged against the reassessment was that a number of subordinate officials, amins, kanungos, mandals, and others of the same class would be let loose over the country to make the required classification, with the result that corruption would prevail everywhere. Nothing of the kind, however, has happened. The whole, or nearly the whole, classification has been done by the district and subdivisional officers themselves. Any such officer who knows anything about his district or subdivision knows perfectly well where the villages lie in which the density of the population is greatest, the cultivation is most permanent, the proportion of waste to cultivation is smallest, and the lands are most productive, easily accessible to markets, and free from risks of inundation. Every subdivision also has its Sub-Deputy Collector, who spends half the year in the interior of the subdivision, and is, as a rule, well acquainted with the agricultural conditions of villages. In cases where the district or subdivisional officer was in doubt as to how to classify a village, he always had the Sub-Deputy Collector to consult, and where the Sub-Deputy Collector was in doubt, reference could be made to the mauzadar, or, where tahsils have been established, to the tahsildar. There was no need for the district or subdivisional officer to consult any revenue officials of lower grade than those above mentioned; nor was there any occasion to employ such subordinate agency as amins, mandals, or inferior-paid kanungos to make any enquiries whatever for purposes of village classification. In this respect all officers followed strictly the instructions laid down in paragraph 13 (5) of Mr. Ward's Note of June 1892, and in this way all opportunity for corruption was avoided.

Procedure of the Director on completion of local enquiries.

In *paragraph 35* of the report it is shown how, after the district and subdivisional officers had completed their local enquiries, Mr. Darrah personally visited every district and subdivision, and went over with each officer the village classifications they contemplated proposing after disposing of all objections. It may here be mentioned

that Mr. Ward also visited every district and subdivision in the valley last cold weather with one exception (Barpeta), and discussed with the district and subdivisional officers their proposed classifications. As noticed by Mr. Darrah, the provisional classification had brought out an increase of revenue varying in different districts from 70 to 85 per cent.; but it was fully expected that the district officers would reduce, and in fact they were ordered to reduce, this increase to at least 50 per cent., leaving a margin for further reduction by the Chief Commissioner in cases where it might appear to him doubtful in what class a village should be placed. The report shows the difficulty which was experienced in reducing the provisional classification to the extent required. No single district or subdivisional officer could, after giving every village the benefit of every possible doubt as to the class in which it should be put, bring out a lower enhancement than 53 per cent, while the two subdivisions of the Sibsagar district, Jorhat and Golaghat, showed an increase respectively of 65 and 69 per cent.

Final reports of the district and subdivisional officers how dealt with

Paragraph 37 of the report deals with the final reports submitted by the district and subdivisional officers. Appendix G will give the Government of India some idea of the information which was required to be furnished in these reports in order to enable the Director of Land Records to submit his final classification proposals to the Chief Commissioner under rule 18 of the Resettlement Rules. In paragraphs 38 to 41 Mr. Darrah gives in detail the procedure adopted by him in going over the final classification proposals of the district and subdivisional officers. In Appendices H to M are shown for each of the five upper district of the Assam Valley how villages were, with the Chief Commissioner's approval, provisionally classified by the Director into three classes, regard being had solely to the demand for land as indicated (1) by the density of the population, (2) by the proportion of culturable waste to settled land, and (3) by the proportion of fluctuating *khiraj* (or full revenue-paying lands) to total *khiraj* lands in each village (see rule 8 of the Resettlement Rules). These three considerations formed the basis on which the Director made his provisional classification, as shown in the column of the statement referred to headed "Classification as made by provisional list." The columns headed "Serial No." give the classification of each village based on each of these considerations taken separately. The last column but two shows what modifications in the provisional list were made by the settlement officer, that is to say, by the district or subdivisional officer, when submitting his final report, and the last column but one shows the final classification now proposed by the Director after considering the final reports of the settlement officers.

Alterations made by the Director in the final classification of villages proposed by district officers.

In *paragraph 40* of his report Mr. Darrah gives a summary of his reasons for the changes he has made in the settlement officers' proposed village classification. The point to be here noticed is that the alterations made in the provisional list by the district officers have all been in the direction of leniency, the benefit of the doubt being always given to any village regarding which there was any uncertainty as to how it should be classified. In almost every case the classification of the provisional list, where it has not been accepted by the settlement officer, has been reduced. In the few cases where the classification of the provisional list has been raised, full reasons have been given in Appendices H to M. Similarly, in the few cases where the Director has raised the proposed classification of the settlement officer, reasons will be found recorded in these appendices.

The district of Goalpara. Areas which will not immediately come under full assessment Areas on which existing assessment will not be enhanced.

Paragraph 42 of the report refers to those portions of the five upper districts of the Assam Valley which, as explained above, will not immediately come under full reassessment pending completion of the settlement on cadastral survey results and the records connected therewith. It will be seen that the Deputy Commissioner of Lakhimpur proposes either to assess certain tracts in his district at fourth class rates (see rule 3 of the Resettlement Rules), or to exempt them from enhancement altogether. Subject to the approval of the Government of India, the Chief Commissioner has decided to exempt these tracts altogether from enhancement and also certain tracts in the north and south-west of the Kamrup district noticed in paragraph 40 (*a*) of the Director's report. The district of Goalpara, as the Government of India are aware, is for the most part permanently settled. The only temporarily-settled

portions of the district are the Eastern Duars, which are at present assessed at special rates. The Resettlement Rules do not apply to these tracts (see rule 3), and they will continue to be settled at special rates, the present rates being slightly raised in the more advanced and accessible tracts.

Increase in the assessment if the rates published in the Resettlement Rules are maintained

Paragraph 43 of the Director's report shows the result of applying (1) the rates laid down in the Resettlement Rules to the village classification as now finally proposed by the Director, and (2) the special rates fixed by the Chief Commissioner for *khiraj* lands under *special* cultivation. The total increase in the revenue on *khiraj* lands under special cultivation will amount to Rs. 57,265, being an increase of about 42 per cent. on the present assessment. As the planters have accepted the Chief Commissioner's rates, there is nothing more to be said on this point. Details of the increase of revenue which will be obtained from these lands will be found in Appendix N. The final results for *khiraj* or full revenue-paying lands under ordinary cultivation are given in Appendix O, and work out to an increase of Rs. 15,19,667, or a rise of 52·75 per cent. In the case of the *nisf-khiraj* lands of Kamrup (see paragraph 41 of the report), the total increase amounts to Rs. 86,784, being a rise of no less than 94·20; 15·81 per cent., however, of this increase is due to the fact that waste lands which were included in the *nisf-khirajdar's patta* at the last settlement, and which were not assessed to revenue, are now, under the terms of the *patta*, liable to assessment at one-eighth of *rupit* rates. Taking all the above three classes of estates together, the total immediate increase in revenue brought out by the application of the published rates to the Director's proposed classification of villages in the five upper district of the Assam Valley is Rs. 16,63,716, being an increase of 53·49 on the revenue demand of 1892-93.

Final proposals submitted to the Government of India.

8. The question which now has to be considered is whether this enhancement in the assessment of the Assam Valley is greater than the circumstances of the case justify, or on grounds of policy may be considered expedient. That the people can easily bear the increase cannot, in the Chief Commissioner's opinion, admit of a moment's doubt, and it is not without considerable hesitation that Mr. Ward has decided to propose to the Government of India to reduce somewhat the rates published in the Resettlement Rules. The Director's report shows that, after the most careful local enquiries, after giving the benefit of the doubt to all doubtful villages, and notwithstanding all the pressure that has been put upon the district officers to reduce the provisional classification of villages so as to limit the enhancement to 50 per cent., not one of them has found it possible to do so. They are all unanimous in finding that in each district and subdivision there are large tracts of land which can easily bear an assessment at double the existing rates, while there are other large areas on which the assessment might be raised by 50 per cent. Appendix O to Mr. Darrah's report gives the following results for each district in regard to the areas now finally classified as first, second, or third class, and the proportion which these areas bear to the whole area of the district. In other words, the following statement shows over what proportionate areas in each district the revenue on *khiraj* lands taken up for ordinary cultivation will, if the rates published in the Resettlement Rules are allowed to stand, be raised 100, 50, and 25 per cent. respectively:

District or sub-division.	Percentage of				Percentage of increase over present assessment.	Remarks.
	First class areas.	Second class areas.	Third class areas.	Areas exempted from enhancement.		
Kamrup	32·32	21·36	42·78	3·54	54·48	
Mangaldai	33·01	35·19	31·80	...	60·79	
Tezpur	...	...	100·00	...	21·66	
Nowgong	31·44	18·03	50·53	...	54·89	
Golaghat	49·48	31·82	18·70	...	73·21	
Jorhat	47·20	35·62	17·18	...	72·27	
Sibsagar (sadr)	32·45	36·57	30·98	...	59·09	
North Lakhimpur	...	...	96·21	3·79	21·25	
Dibrugarh	...	...	98·25	1·75	...	

After giving the matter his most careful consideration, Mr. Ward has decided, subject to the approval of the Government of India, to accept the assessment rates marked A proposed by the Director in his Appendix Q, not because he considers the rates laid down in the Resettlement Rules are more than the lands can easily bear, but because he thinks it undesirable on principle to suddenly double the existing rates over such large areas as the statement given above shows must be classified as first class lands. The following statement compares the rates now in force in the five upper districts of the Assam Valley, the rates laid down in the Resettlement Rules, and the rates now proposed:

Class of land.	Present rates per *bigha*.	Rates laid down in Resettlement Rules.	Rates now proposed.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
I. HOMESTEAD AND GARDEN—			
First class		2 0 0	1 6 0
Second „	1 0 0	1 8 0	1 4 0
Third „		1 4 0	1 2 0
II. RUPIT—			
First class		1 4 0	1 0 0
Second „	0 10 0	1 0 0	0 14 0
Third „		0 12 0	0 12 0
III. FARINGATI—			
First class		1 0 0	0 14 0
Second „	0 8 0	0 12 0	0 12 0
Third „		0 10 0	0 10 0

Increase in the assessment if the rates proposed are accepted. Term of settlement.

9. The rates now proposed will, on the assumption that there are no resignations, increase the revenue by Rs. 10,30,721 (including the rise of Rs. 3,050 in Goalpara) on *khiraj* and Rs. 56,266 on the *nisf-khiraj* lands of Kamrup; the total increase on the *khiraj* and *nisf-khiraj* taken together will not exceed 36·79 per cent., and on no single holding will the increase, even if it is all *faringati* land, exceed 1·75 per cent. If the increase of revenue on *khiraj* lands under tea be added, the total increase of revenue which will immediately result from the introduction of these assessment rates will be Rs. 11,44,252. In 1894-95 and 1895-96 there will be a further increase when the first and second class villages of the surveyed, but unclassified, areas of Kamrup, Nowgong, Darrang, and Lakhimpur come under reassessment.

I am now to ask the approval of the Government of India to the classification of the lands of the Assam Valley as finally proposed by the Director of Land Records, and also to the proposed revised rates of assessment to be substituted for those given in rule 3 of the Resettlement Rules. This approval is asked for under rule 18. The Chief Commissioner is aware that, under the Land and Revenue Regulation, it is not necessary to ask the sanction of the Government of India to the resettlement of any local area in Assam.

Bearing in mind, however, the large area affected by the resettlement now under consideration, and the certainty that the Government of India would receive many memorials against the resettlement; having regard also to the fact that the principles on which the present reassessment of the Assam Valley has been made do not pretend to follow the more scientific lines laid down for the guidance of settlement officers in other provinces in India, Mr. Ward purposely framed rule 18 of the Resettlement Rules as an assurance to the public that, whatever decision he might finally arrive at as to the rates to be assessed and the areas to be affected by those rates, his orders should not be given effect to until they had received the approval of the Government of India.

I am also to ask the approval of the Government of India under rule 20 to the proposal that the term of the new settlement shall be ten years.

Cost of the resettlement.

10. In paragraph 45 of his report, Mr. Darrah shows that the total cost of the resettlement will probably not exceed Rs. 4,000, as in carrying out the work of classifying villages on the lines laid down in the Resettlement Rules it has not been found necessary to incur further expenditure than what was involved in granting a small temporary increase to the establishments of the district and subdivisional officers and to the office establishment of the Director at head-quarters. More elaborate enquiries and the adoption of a more scientific system of assessment would have involved a much larger expenditure; but, as pointed out by the Director in the last paragraph of his report, the present reassessment lays no claim to scientific accuracy such as is arrived at in effecting settlements in other parts of India. Mr. Ward has always held that where the Government has no desire to assess up to anything like its fair share of the value of the produce of the soil, it is waste of time and money to have recourse to any minute and elaborate classification of soils, to crop experiments on a large scale, or to a close examination of all the elements that affect the net profits of the settlement-holder or Government tenant; moreover, the native simplicity of the Burman cultivator, who tells the settlement officer in ten minutes everything he wants to know as regards the quality and productiveness of the land he cultivates, the cost of production, the cost of carriage of produce to market, the cost of living, and so forth, thereby enabling the settlement officer, with the aid of a few crop experiments, to work out elaborate sums in profit and loss, is a quality quite foreign to the native cultivator in this part of India, who makes it his special care to misinform and mislead the settlement officer on every point to which he may direct his enquiries. The real objection to the system adopted in the present reassessment of the Assam Valley is that Government interests are sacrificed for the benefit of the settlement-holder. That, however, is a fault on the right side, and it does not matter much, Mr. Ward thinks, if we decide in the interests of the settlement-holder not to increase his revenue by more than 36 per cent., whether we prove by scientific or unscientific methods that the Government can legitimately claim an increase of from 60 to 100 per cent. It has been more than once pointed out that the unfairness to Government in placing all lands in the Assam Valley of a particular description, whether homestead, *rupit*, or *faringati*, in one class, as if they were all of the same value, lies in the fact that the lands of each description cannot be assessed at a higher rate than the worst lands of that description can bear. In this way the owner of the best lands escapes being assessed at rates bearing anything like a fair proportion to their value and to the profit derived from them. The same objection, but not to the same extent, lies to the system adopted in the present reassessment. It certainly cannot be said that all lands of each description in the Assam Valley now classified as first class are strictly homogeneous, but they are undoubtedly much more so than all *rupit* or all *faringati* lands throughout the entire valley can ever be said to be homogeneous as they were assumed to be under the old system. Under the system of village classification now adopted, the Government still sacrifices revenue by having large homogeneous tracts in each district, because it cannot assess the best lands in such tracts at higher rates than the worst lands can bear. The amount of loss, however, to Government is necessarily much less than it was under the old system, and may gradually be reduced at successive resettlements by reducing the areas of these homogeneous tracts. It is this very obvious fact which lies at the foundation of all the objections which have been raised against the reassessment. By far the greater proportion of the settled lands in the Assam Valley of each description, if we divide each description of land into three broad classes of good, fair, and indifferent, belong to the first two classes; the nearer, therefore, that an approach is made to making a fair assessment on the better classes of land, the more numerous do the objections become to any attempt to resettle at enhanced rates.

Conclusion.

11. The Chief Commissioner desires to take this opportunity to bring to the notice of the Government of India the valuable services rendered in connection with the present reassessment of the Assam Valley by Mr. Darrah, Director, Department of Land Records and Agriculture. Mr. Ward had necessarily to leave in Mr. Darrah's hands, subject only to his general directions, the entire work of the detailed classification of villages for the purposes of the provisional lists; to him also was entrusted

the immediate supervision of the work of the settlement officers, including the final scrutiny of the proposals made by them in most cases after personal consultation with the Director. This work, which was both difficult and arduous, has been carried out by Mr. Darrah with scrupulous care and marked ability, and to the complete satisfaction of the Chief Commissioner.

No. 264/24, dated Calcutta, the 27th January, 1894.

From—SIR E. C. BUCK, KT., C.S.I., Secretary to the Government of India, Revenue and Agricultural Department,

To—The Chief Commissioner of Assam.

With reference to your letter No. 649, dated 3rd July 1893, with which you transmitted memorials addressed by ryots of certain districts on the subject of the reassessment of the Assam Valley, I am to request that you will communicate to the memorialists the following orders which have been passed by His Excellency the Governor General in Council upon their memorials.

2. The objections of the memorialists to the new assessments may be classed under two heads. In the first place, they demur to the amount of enhancement involved by the proposed rates, and, in the second place, to the system on which the rates have been framed. Both these objections have received the careful consideration of the Government of India in conjunction with the report in which you have communicated your final proposals for the reassessment of the valley.

3. The first objection has been partly met by the reduction which you have yourself proposed to make in the rates. But in the orders in which His Excellency the Governor General in Council has passed on your proposals, a still further reduction has been made by requesting you to adopt the B rates of Appendix Q of the report which are for *faringati* land lower than your reduced rates. The rates thus finally determined are formally stated in the appendix to this letter. The rates as originally proposed, as revised by yourself, and as finally determined by the Government of India, should be explained to the memorialists, who should at the same time be informed that in view of the intrinsically low standard at which the rates have been assessed when compared with the value of the produce, His Excellency the Governor General in Council is not prepared to make any further concessions.

4. With regard to the second objection, the memorialists may be informed that the Government of India recognize the truth of the allegation that the broad classification which has been made of the villages and of the soils of the valley is imperfect, and that the rates are in some cases not in strict proportion to the character of the lands upon which they are assessed. But in consideration of the fact that the rates, especially as now determined, are low in comparison with the value of the produce raised, the Government of India have preferred that the present light assessment should be made without entailing on the province the trouble and expense which would have been caused by a detailed and hurried investigation of the proportionate value of each field through the agency of a large and costly establishment of amins. You are, however, to assure the memorialists that during the next ten years a careful enquiry will be made by the Land Record Department and by the revenue officials of the province which will, it is hoped before the next revision of settlement, secure as correct a valuation of soils and classification of villages as it is possible to effect.

Appendix to letter No. 264/24, dated 27th January, 1894, from the Government of India, to the Chief Commissioner of Assam.

Rates finally determined by the Government of India for the assessment of the Assam Districts.

	Basti.			Rupit.			Faringati.		
	R	a.	p.	R	a.	p.	R	a.	p
Class A villages	1	6	0	1	0	0	0	12	2
Class B ,,	1	4	0	0	14	0	0	10	0
Class C ,,	1	2	0	0	12	0	0	9	0

No. 471-24, dated Calcutta, the 15th February, 1894.

From—SIR E. C. BUCK, KT., C.S.I., Secretary to the Government of India, Revenue and Agricultural Department,

To—The Chief Commissioner of Assam.

I am instructed to communicate to you the orders of the Government of India on the proposals submitted in your No. 792 (Revenue), dated 4th November 1893, for the reassessment of the Assam Valley Districts.

2. The Government of India are aware that in the absence of the statistics, which are necessary for anything like a precise determination of the relative value of soils and of villages in the Assam Valley, no classification of lands could be otherwise than imperfect. As you have yourself admitted, the principles on which the present reassessment has been made lay no pretence to scientific accuracy so far as the classification of land is concerned. At the same time the Government of India are content to believe with you that the classification now made is an advance upon what you represent as the practical absence of any principle at all. The question is one that is of less importance when it is considered that, whatever rates are assessed, they cannot but be intrinsically low compared with the value of the produce upon which they are paid.

3. The essential point in the present settlement is to see that the rates, however low they may be in themselves, do not entail an enhancement which would be embarrassing to the payers of land revenue.

4. You have made a division of the villages into three classes—first, second, and third—with reference to the effective demand for land in each village, the quality of the land being assumed to be best where the demand for land was most effective.

The degree of effectiveness of the demand was inferred from—

(i) the proportion of culturable waste to cultivated land;

(ii) the proportion of fluctuating to permanent cultivation;

(iii) the density of population.

It is hardly necessary to point out that no assignable degree of precision for the purpose in hand attaches to these general considerations, and that they, either singly or in combination, afford no reliable assurance that some of the *rupit* land in a third class village may not be better than some of the *rupit* land in a first class village, or some of the *faringati* or *basti* in a first village worse than some corresponding land in a third class village. Moreover, the general propriety of the classification of villages is to some extent further vitiated by the inclusion in the first class for extraneous reasons of villages which are admittedly middling or inferior. It is evident therefore that, as suggested in the Director's report, Government should be specially "careful to see that our estimates err on the safe side."

5. The rates originally estimated as fair in the Settlement Rules were these—

	Homestead.			*Rupit.*			*Faringati.*		
	R	*a.*	*p.*	*R*	*a.*	*p.*	*R.*	*a.*	*p.*
1st class villages	2	0	0	1	4	0	1	0	0
2nd " "	1	8	0	1	0	0	0	12	0
3rd " "	1	4	0	0	12	0	0	10	0

And these rates showed the following percentages over the rates of the last settlement following the village classification:

	Homestead.	*Rupit.*	*Faringati.*
	R	R	R
1st class villages	100	100	100
2nd " "	50	60	50
3rd " "	25	25	25

6. The enhancement of revenue brought out by the application of this scale appeared to you excessive, and it would no doubt have required much

the immediate supervision of the work of the settlement officers, including the final scrutiny of the proposals made by them in most cases after personal consultation with the Director. This work, which was both difficult and arduous, has been carried out by Mr. Darrah with scrupulous care and marked ability, and to the complete satisfaction of the Chief Commissioner.

No. $\frac{264}{24}$, dated Calcutta, the 27th January, 1894.

From—SIR E. C. BUCK, KT., C.S I., Secretary to the Government of India, Revenue and Agricultural Department,

To—The Chief Commissioner of Assam.

With reference to your letter No. 649, dated 3rd July 1893, with which you transmitted memorials addressed by ryots of certain districts on the subject of the reassessment of the Assam Valley, I am to request that you will communicate to the memorialists the following orders which have been passed by His Excellency the Governor General in Council upon their memorials.

2. The objections of the memorialists to the new assessments may be classed under two heads. In the first place, they demur to the amount of enhancement involved by the proposed rates, and, in the second place, to the system on which the rates have been framed. Both these objections have received the careful consideration of the Government of India in conjunction with the report in which you have communicated your final proposals for the reassessment of the valley.

3. The first objection has been partly met by the reduction which you have yourself proposed to make in the rates. But in the orders in which His Excellency the Governor General in Council has passed on your proposals, a still further reduction has been made by requesting you to adopt the B rates of Appendix Q of the report which are for *faringati* land lower than your reduced rates. The rates thus finally determined are formally stated in the appendix to this letter. The rates as originally proposed, as revised by yourself, and as finally determined by the Government of India, should be explained to the memorialists, who should at the same time be informed that in view of the intrinsically low standard at which the rates have been assessed when compared with the value of the produce, His Excellency the Governor General in Council is not prepared to make any further concessions.

4. With regard to the second objection, the memorialists may be informed that the Government of India recognize the truth of the allegation that the broad classification which has been made of the villages and of the soils of the valley is imperfect, and that the rates are in some cases not in strict proportion to the character of the lands upon which they are assessed. But in consideration of the fact that the rates, especially as now determined, are low in comparison with the value of the produce raised, the Government of India have preferred that the present light assessment should be made without entailing on the province the trouble and expense which would have been caused by a detailed and hurried investigation of the proportionate value of each field through the agency of a large and costly establishment of amins. You are, however, to assure the memorialists that during the next ten years a careful enquiry will be made by the Land Record Department and by the revenue officials of the province which will, it is hoped before the next revision of settlement, secure as correct a valuation of soils and classification of villages as it is possible to effect.

Appendix to letter No. $\frac{264}{24}$, dated 27th January, 1894, from the Government of India, to the Chief Commissioner of Assam.

Rates finally determined by the Government of India for the assessment of the Assam Districts.

No. 471-24, dated Calcutta, the 15th February, 1894.

From—SIR E. C. BUCK, KT., C.S.I., Secretary to the Government of India, Revenue and Agricultural Department,

To—The Chief Commissioner of Assam.

I am instructed to communicate to you the orders of the Government of India on the proposals submitted in your No. 792 (Revenue), dated 4th November 1893, for the reassessment of the Assam Valley Districts.

2. The Government of India are aware that in the absence of the statistics, which are necessary for anything like a precise determination of the relative value of soils and of villages in the Assam Valley, no classification of lands could be otherwise than imperfect. As you have yourself admitted, the principles on which the present reassessment has been made lay no pretence to scientific accuracy so far as the classification of land is concerned. At the same time the Government of India are content to believe with you that the classification now made is an advance upon what you represent as the practical absence of any principle at all. The question is one that is of less importance when it is considered that, whatever rates are assessed, they cannot but be intrinsically low compared with the value of the produce upon which they are paid.

3. The essential point in the present settlement is to see that the rates, however low they may be in themselves, do not entail an enhancement which would be embarrassing to the payers of land revenue.

4. You have made a division of the villages into three classes—first, second, and third—with reference to the effective demand for land in each village, the quality of the land being assumed to be best where the demand for land was most effective.

The degree of effectiveness of the demand was inferred from—

(i) the proportion of culturable waste to cultivated land;

(ii) the proportion of fluctuating to permanent cultivation;

(iii) the density of population.

It is hardly necessary to point out that no assignable degree of precision for the purpose in hand attaches to these general considerations, and that they, either singly or in combination, afford no reliable assurance that some of the *rupit* land in a third class village may not be better than some of the *rupit* land in a first class village, or some of the *faringati* or *basti* in a first village worse than some corresponding land in a third class village. Moreover, the general propriety of the classification of villages is to some extent further vitiated by the inclusion in the first class for extraneous reasons of villages which are admittedly middling or inferior. It is evident therefore that, as suggested in the Director's report, Government should be specially "careful to see that our estimates err on the safe side."

5. The rates originally estimated as fair in the Settlement Rules were these—

	Homestead.			*Rupit.*			*Faringati.*		
	R	*a.*	*p.*	*R*	*a.*	*p.*	*R.*	*a.*	*p.*
1st class villages	2	0	0	1	4	0	1	0	0
2nd " "	1	8	0	1	0	0	0	12	0
3rd " "	1	4	0	0	12	0	0	10	0

And these rates showed the following percentages over the rates of the last settlement following the village classification:

	Homestead.	*Rupit.*	*Faringati.*
	R	R	R
1st class villages	100	100	100
2nd " "	50	60	50
3rd " "	25	25	25

6. The enhancement of revenue brought out by the application of this scale appeared to you excessive, and it would no doubt have required much

stronger reasons than the report affords to have justified an enhancement of 100 per cent. on all soils contained in the first class villages and one of 50 per cent. on villages of the second class. Accordingly you have proposed a modified scale as follows:

	Homestead.			*Rupit.*			*Faringati.*		
	R	*a.*	*p.*	*R*	*a.*	*p.*	*R*	*a.*	*p.*
1st class villages	1	6	0	1	0	0	0	14	0
2nd " "	1	4	0	0	14	0	0	12	0
3rd " "	1	2	0	0	12	0	0	10	0

ng percentages of excess over t

of the last settlement:

	Homestead.	*Rupit.*	*Faringati.*
	R	R	R
1st class villages . . .	37	60	75
2nd " " . . .	25	40	50
3rd " " . . .	12	20	25

The scale, however, while graduating the rate of enhancement to the class of village, makes the rate increase, as the quality of the soil within the class diminishes in fertility. This is a defect which should be avoided as much as possible.

7. The Government of India would therefore prefer that you should adopt the B rates shown in Appendix Q of the report in which the defect is less conspicuous, and which give an increase of R8,90,000 on the *khiraj* area. These rates are as follows:

	Homestead.			*Rupit.*			*Faringati.*		
	R	*a.*	*p.*	*R*	*a.*	*p.*	*R*	*a.*	*p.*
1st class villages	1	6	0	1	0	0	0	12	0
2nd " "	1	4	0	0	14	0	0	10	0
3rd " "	1	2	0	0	12	0	0	9	0

These rates show the following percentages of excess over the former rates:

	Homestead.	*Rupit.*	*Faringati.*
	R	R	R
1st class villages	37	60	50
2nd " "	25	40	25
3rd " "	12	20	12

The change will not affect the rates which you have aleady declared on *basti* and *rupit* lands, and will only require a modification in the rates of *faringati* land. The reduction in the total assessment of the valley caused by the adoption of this scale will apparently be in round numbers about R1,40,000, or the difference between R10,30,000 and R8,90,000.

8. His Excellency the Governor General in Council is assured that the enhancement which you had proposed of about R10,30,000 did not involve an intrinsically high assessment; but in view of the imperfections in the present classification and valuation of soils, as well as of the desirability of raising the assessment of the province by moderate steps, he thinks it advisable that the enhancement should be brought within lower limits; and, for the reasons given, would prefer that the reduction made should be in the assessment of the poorer land.

9. It will be observed that the increase involved by the scale does not in any case involve a higher assessment than 50 per cent. (except on first class *rupit*, where the increase from 15 annas per bigha (50 per cent. increase) to Re. 1 per bigha (60 per cent. increase) is made for purposes of convenience being in itself not excessive). This percentage cannot but be regarded as a very moderate maximum limit, having regard to the great increase in the prices of agricultural produce during the currency of the last settlement and the improved condition of the province.

10. The Government of India understand that you agree with them in thinking that no effort should be spared during the currency of this settlement to place the land revenue assessments in Assam on a more satisfactory basis than this assessment places them. It is not fair to the State nor to the cultivator that matters should remain on the present footing, which can only be regarded as provisional. The efforts of the administration should now be directed to the ascertainment of the qualities of each of the three great divisions of land—*basti*, *rupit*, and *faringati*; and probably it will not be found necessary in any village to subdivide any of these divisions into more than three qualities; next, the area of each quality in each village should be determined; and finally, revenue rates should by enquiry, observation, and experiment be fixed as fairly payable by each quality of soil. The present classification of villages can hardly be regarded otherwise than as a temporary expedient, and should make way for a true classification of soils and allotment of soil class rates, which offer the only firm basis for a proper assessment of land revenue.

No. $\frac{67 \text{ Police}}{823\text{-J}}$, dated Shillong, the 12th February, 1894.

From—F. C. DAUKES, Esq., Secretary to the Chief Commissioner of Assam,

To—The Secretary to the Government of India, Home Department.

I am directed to forward, for the information of the Government of India, copies of two letters from the Commissioner of the Assam Valley Districts, *viz.*, No. 270-G., dated the 29th January 1894, and No. 354-G., dated the 5th February 1894, with enclosures, giving details of the riots which have recently occurred in the Kamrup district and in the subdivision of Mangaldai, which immediately adjoins Kamrup, but which is part of the district of Darrang.

2. Mr. McCabe's letter of the 12th January fully explains how the people have been induced to combine against paying the enhanced revenue which has recently been assessed in the districts of the Assam Valley. There is no doubt that the mass of the ryots have been quite willing to pay, but have been frightened into refusing payment by the authority which the *mels* or associations which exist in almost every district of the valley exercise over them, and by the penalties inflicted by them, or which they threaten to inflict, on those who pay or wish to pay their revenue.

3. When Mr. Ward inspected last cold weather the districts of the Assam Valley, he found that some of these *mels* had been extorting money from the unfortunate ryots to meet what they called their expenses, which they alleged they would have to incur in contesting the proposed enhancement up to the Government of India, and perhaps even to Parliament. Notices were also found posted up on trees warning the ryots not to pay, and threatening them with penalties if they did. Mr. Ward met thousands of ryots in each of the four upper districts of the valley and heard all they had to say on the subject of the reassessment, and he was astonished to find how utterly ignorant the masses were of the intentions of Government, and how entirely they were being misled by these *mels*. It was clear that self-interested persons had been going about spreading entirely false reports as to what the intentions of Government really were, and it has proved a matter of some difficulty to persuade the ignorant ryots that they were really being misled, that they were crying out before they were hurt, and that they were acting foolishly in contributing to the funds of these *mels* without clearly understanding that they had any real grievance to complain against.

4. As the Government of India are aware, no final proposals for the reassessment of the Assam Valley were submitted by the Chief Commissioner until November last; but, long before this, numerous memorials had been received by the Government of India and the Chief Commissioner against the reassessment, the substance of which was not that the people could not bear the enhancement proposed by the Chief Commissioner (for no proposals had then been submitted), but that they could not bear any enhancement whatever.

5. These memorials were all submitted by the Chief Commissioner to the Government of India with his final report and proposals for the reassessment of

the Assam Valley in November last; and as it was not anticipated that the final orders of the Government of India could issue before the close of the year, whereas the *pattas* for the current year had to issue in October and November, and the first instalment of the enhanced revenue had to be realised in January, it became necessary for the Chief Commissioner to pass orders as to the rates to be entered in the *pattas* and at which the first instalment of revenue was to be realised; and the orders passed were that the *pattas* were to be issued and the revenue for the year was to be realised at the Chief Commissioner's proposed enhanced rates in anticipation of the sanction of the Government of India, the ryots being informed that if the Government of India reduced the Chief Commissioner's rates, the excess amount realised at the first instalment on each *patta* would be deducted from the demand of the second instalment.

6. When recently in Calcutta, the Chief Commissioner received the final orders of the Government of India on his proposals for the reassessment of the Assam Valley, and, as he was then aware that in Kamrup and Mangaldai the people were refusing to accept the Chief Commissioner's orders above mentioned upon the plea that they had received no reply to their memorials from the Government of India, Mr. Ward on the 27th January despatched the following telegram to all Deputy Commissioners of the Assam Valley, so that the people might clearly be given to understand what the final orders of Government were upon their memorials, and that they might have no further excuse for refusing to take their *pattas* or to pay the revenue demand:

> "Please let all memorialists against reassessment in your district know that Government of India have acceded to their memorials so far as to sanction reduction of rates proposed by me on *faringati* lands to 12, 10 and 9 annas respectively in first, second, and third class villages. Any excess payments already made on such lands to be refunded next *kist*, and *pattas* to be amended accordingly."

7. It is necessary to give these particulars to show what little excuse the *mels* above referred to, and the ryots acting under their influence, had for persisting in their resistance to the demands of Government. It will be seen from Mr. Anderson's report that long before he was attacked he had communicated to the ryots and others the final orders of the Government of India. Still they refused to pay and persisted in their threatening attitude. Under the circumstances the Chief Commissioner is of opinion that Mr. Anderson was fully justified in the action he took, and that he did all he could before he gave the order to fire to save the mob, which advanced upon him, from the consequences of their acts.

8. In Kamrup Mr. McCabe was fortunately able to disperse the mob, which advanced upon him, without causing any loss of life, but it may be mentioned that the disturbances at Rangia, which form the subject of his report now submitted, have since been followed by similar riots which occurred in January in the northern portion of his district. These riots, which will be separately reported to the Government of India, Mr. McCabe has also been able to quell without causing any loss of life. At present all is quiet in both Kamrup and Mangaldai; and the ryots are said to be now taking their *pattas* at the enhanced rates and to be paying in the revenue freely. The events in Mangaldai have probably shown the people the folly of continuing any longer to follow the direction of the *mels*. In the four upper districts of the Valley there has been no trouble whatever in inducing the ryots to take their *pattas* and to pay in their revenue at the rates proposed by the Chief Commissioner in anticipation of the orders of the Government of India.

No. 270-G., dated Gauhati, 29th January, 1894.

From—G. GODFREY, Esq., I.C.S., Commissioner of the Assam Valley Districts,
To—The Secretary to the Chief Commissioner of Assam.

In forwarding copy of Mr. McCabe's letter No. 2-T., dated 12th January 1894, reporting his proceedings in connection with the recent disturbances in connection with reassessments which have taken place in the Rangia tahsil, I

have the honour to say Mr. McCabe's firm attitude and the promptitude with which he has acted are deserving of great commendation, and I hope the Chief Commissioner will be pleased to approve of the same.

A body of military police will probably be required in the district for some time. I directed the Deputy Commissioner to keep you acquainted with the course of events, and the Chief Commissioner is no doubt in possession of the facts already. From later accounts order appears to have been restored in the Rangia tahsil, but the infection may possibly spread to adjoining parts of the district, and therefore I think that the military police should be kept in readiness under Mr. McCabe's orders.

No. 2-T., dated Camp Rangia, the 12th January, 1894.

From—R. B. McCabe, Esq., I.C.S., *Deputy Commissioner, Kamrup,*

To—The Commissioner of the Assam Valley Districts.

I have the honour to submit the following report regarding the looting of the Rangia hât on the 24th December 1893 and the subsequent riotous assemblies terminating in my having to disperse a meeting by force, as notified in my telegram of the 11th instant.

2. The inhabitants of this district have long outgrown the characteristics associated with the name of Assamese, that is to say, a disposition at once apathetic and law-abiding.

In the tahsils where the Muhammadan and mixed Bengali element prevails, the ryots are only too ready to follow the self-interested advice of second class mukhtiars, and have come to look upon the orders of the Deputy Commissioner as merely a medium of reference to superior authority.

The ordinary village panchayet, originally constituted as an authority on social matters, has developed into the *mel* or assembly not only of the members of a village, but of the whole of the inhabitants of even one or more tahsils. These *mels* are governed by the leading Dolois or Gossains and by the principal land-holders of the district. I can only compare the authority of these *mels* to that wielded by the Vehmgericht or, to come to more modern times, by the Nihilists. The unfortunate ryot who has to pay his land revenue is met by the tahsildar on one side, who says: "If you do not pay, your property will be attached," and on the other side by the *raij, i.e.*, the embodiment of the orders of the *mel*, which states "if you do pay, you are cursed and excommunicated." He has therefore to face loss of property on the one side or social ostracism on the other.

Proof of the issue of such orders and the means taken to enforce them will be found embodied in this report. On every occasion that I have met with the poorer class of ryots, they have expressed their eagerness to pay their revenue, but added in awe-struck voices "how can we disobey the *Raijar hukum.*" The question has therefore simply developed into the point "which is the paramount authority, the *mel* or the sirkar."

It is not difficult to explain the attitude of the Dolois, Gossains, and principal land-holders. They act from purely self-interested motives, most of them having under-tenants from whom they anticipate difficulty in realizing increased rent, and they therefore fear that their profits as middlemen will be cut down.

3. In the month of December last I made a tour through all the tahsils on the south bank, addressed a large number of meetings, and successfully induced the ryots to accept the increased assessment; on the north bank no difficulty has been experienced in collecting land revenue with the exception of the area comprised by the tahsils of Putidarrang, Nalbari, Boroma, Bajali, and the mauzas of Upper Borbhag and Sarukhetri. These are all situated in one compact block, and the inhabitants had decided on one common course of action.

I adduce the following facts in support of this statement:—

A.—At a meeting held at Moogaon, Putidarrang, on the 28th December 1893, the *Raij* criminally intimidated one Bejoy Chand Pury, who had paid R25 land revenue, and fined him a similar sum (*vide* annexure A).

B—At a meeting held at Tengabari, Putidarrang, on the 4th January 1894, the following resolutions were adopted:

1st.—Not to pay revenue.

2nd.—To avenge themselves on whomsoever attempted to attach their property.

C.—At a meeting held at Moogaon, Putidarrang, on the 9th January 1894, the assembled ryots made a vow that any one giving evidence in favour of Bejoy Chand Pury (see A) would be cursed and excommunicated. It was also resolved, *1st*, not to resist any order of attachment, and to pay revenue at the enhanced rate; but not until *bakijai* and attachment orders issued.

Resolution No. 1 is the result of my having sentenced three leading men to one month's rigorous imprisonment under section 353, Indian Penal Code, on the 8th instant, while resolution (2) was adopted with the idea that the fact of their having paid revenue under coercion would be advantageous regarding their appeal before the High Court!!

The selfishness of the ringleaders is well exemplified in the second resolution, there being no hardship in the payment of process fees by a man whose rent was R1,000, while the additional levy of R3 process fees from a ryot whose rent was say R2-4 would represent a heavy pecuniary fine.

4. I now give details of the riot at Rangia on the 24th December 1893, and the subsequent disturbances there. At 9 P.M. on that date a crowd of from 200 to 250 men, chiefly Kacharis, raided the Rangia hât and looted all the stalls, appropriating property which I estimated at about R300. They then attended a *mel* held at Bolagaon close to Rangia, and on their return journey at 5 P.M. destroyed all the huts in the hât, threatening to return on the 30th December and loot the Kyahs' shops on the pretence that their presence had caused the enhancement of land revenue. As soon as I obtained information of this raid, I deputed Mr. Reilly, the Assistant Superintendent of Police, to proceed to Rangia and investigate the matter. He could only muster 12 police, which I considered insufficient for the work, and I made over to him 10 sepoys and 1 havildar of the 13th Bengal Infantry, part of the detachment intended for the Darranga and Sobankatta outposts.

5. On the 30th December a mob, roughly estimated at from 2,500 to 3,000 persons, assembled at Rangia and made threatening demonstrations throughout the night, declaring they would destroy the thanna, post office, tahsil, cutcherry, and the tahsildar's house. The presence of the military and the police alone averted overt acts of violence.

On the 5th January Mr. Reilly, Assistant Superintendent of Police, having reported that he had only been able to arrest some of the minor offenders and did not see his way in the present excited state of the people to secure the ringleaders, I proceeded to Rangia on the 6th instant. My diary from 1st January to 10th January (annexed herewith) gives details day by day of the action taken.

The Assistant Superintendent of Police having reported that the police force ordinarily employed for preserving the peace was not sufficient for its preservation and for the protection of the inhabitants and the security of property, a list was made of the principal headmen and notice served on them under section 17, Act V of 1861, to act as special constables. This action has already resulted in the acquiescence of many villages to payment of revenue.

6. On the 8th instant a *mel* was held close to this outpost, and I succeeded in effecting the arrest of several of the men implicated in the riot of the 24th December 1893 (*vide* Diary). On the 10th instant an orderly assembly from Betna, mauza Tambalpur, came in and interviewed me, and I fully explained to them their folly in opposing Government, promising them that any abatement sanctioned by the Government of India would be made good to them. They went away perfectly satisfied, promising to pay their revenue without any further objection.

Towards evening a large mob of from 2,500 to 3,000 persons, said to represent all the mauzas of this tahsil, encamped in the fields close to the thanna.

Bundles of formidable *lathis* were ostentatiously paraded, a significant hint that the mob did not intend to allow itself to be dispersed without offering resistance. I sent out a message declaring my willingness to receive a deputation of the headmen, but the only answer vouchsafed was that I could come and speak to them myself accompanied by Mr. Reilly and without any guard. I went out and read them my order of the 10th instant prohibiting the assembly of mobs (annexure B), and called on them to disperse. In reply shouts were raised: "We won't pay the revenue at the enhanced rate," and as I turned to leave cries of "*dhor dhor*!" "seize him!" At 5 P.M. a guard arrived with R34,000 treasure from Tambalpur, which was placed in the thanna where the fifteen accused in the riot case of the 24th December 1893 were confined. As the mob drew closer to the thanna and showed no intention of dispersing, sentries were posted round the building and its approaches.

My guard was too small to warrant my attempting to disperse the people in daylight, and I thought it preferable to await the night when there was a chance of their spirits being less heated.

7. Towards 9 P.M. I received information that a plan had been made to force the thanna, release the prisoners, and loot the treasure, and on proceeding out to reconnoitre I found that the mob had picketed sentries all round their camp, and had attempted to open communication with the prisoners. They had also forcibly occupied several houses in this outpost. It was now necessary to clear the mob away from the precincts of the thanna, and I assembled ten men of the 13th Bengal Infantry and eight police with Mr. Reilly, Assistant Superintendent of Police. We charged down on the mob, and in their first scare the people started to move off; but as our force got separated, the ringleaders called on the mob to make a stand. Finding me alone, a body of about 20 men attacked me with *lathis*, and I had to draw my revolver in self-defence. I fired four shots over their heads, and a few sepoys running up we succeeded in half an hour in completely dispersing the crowd. The military maintained perfect discipline and did not shew the slightest scare.

The armed civil police were somewhat wild and let off their rifles in the air with the idea of keeping up their spirits. We arrested several members of the mob, who of course stated that the ringleaders had forcibly kept them there, and would neither allow them to go and pay revenue nor return to their homes.

8. The guard was kept under arms, and Mr. Reilly and I visited the sentries four times that night; at dawn I sent messengers to Gauhati and Darranga. I have ordered 15 sepoys, 13th Bengal Infantry, to proceed here at once, and have asked the Deputy Commissioner, Darrang, to let me have 20 frontier police. I do not anticipate any further trouble or forcible opposition on the parts of the ryots, but I cannot leave the tahsil offices without a larger guard than that hitherto sanctioned.

No. 354-G., dated Gauhati, the 5th February, 1894.

From—G. GODFREY, Esq., I.C.S., Commissioner of the Assam Valley Districts,

To—The Secretary to the Chief Commissioner of Assam.

Mr. Berington's statement.
Assamese notice.

I have the honour to forward, for the information and orders of the Chief Commissioner, copy of a report of the Deputy Commissioner, Darrang, together with enclosures as per margin, in which he describes the events which led to the loss of life which occurred on Sunday, the 28th January 1894, at Patharughat in the Mangaldai subdivision. Mr. Anderson's report, I am of opinion, shows that the collision was inevitable, and that the use of military force was absolutely essential for the safety of himself and Mr. Berington and the escort, no less than for the purpose of repressing a disorderly and tumultuous and illegal assembly.

2. I have asked the Deputy Commissioner for further details as to the number of killed and wounded, since from Mr. Berington's description of the affair it would seem probable that the casualties exceeded twelve, the number stated to have occurred in Mr. Berington's report.

3. I have also asked the Deputy Commissioner to give an account of the complaints or grievances, if any, which were advanced by the mob, and which they wished to be redressed. The assembly was, no doubt, in sympathy with similar gatherings which had recently taken place in adjoining tahsils of the Kamrup district, and which had for their object the refusal to pay revenue at the enhanced rates because certain appeals were under consideration of the Viceroy.

4. In this case, however, the rioters were informed of the orders of the Government of India in the matter, and it is curious that they should still have persisted in violent demonstration.

5. I have received later reports from the Deputy Commissioner to say that order has been restored. I would draw the Chief Commissioner's attention to the prompt action of the Volunteers in sending assistance to the authorities. I think it deserves recognition. The Mangaldai Contingent was under Lieutenant R. Davidson of Hatigarh, Bengbari; the Tezpur Contingent was commanded by Lieutenant-Colonel D. M. Lumsden of Rangapara.

Dated Camp Patharughat, the 30th January, 1894.

From—The Deputy Commissioner, Darrang,

To—The Commissioner, Assam Valley Districts.

I regret to report that on the 28th instant a very serious riot, resulting in the loss of several lives, occurred at this place. A brief account of the matter has already been sent to you by telegraph. I now submit a further report.

On Monday, the 22nd, Mr. Berington, District Superintendent of Police, returned from Kamrup with 10 men out of 22 men, one bugler, and one jemadar, the whole available force I had to spare, and of these 12 had been called in by telegram from the Balipara outpost. These men I had sent to Mr. McCabe's assistance in answer to an urgent telegram asking for armed help. On the 24th instant Mr. Ransom telegraphed to me that the ryots in the Sipajhar tahsil were assembling in *mels* similar to those which have given so much trouble in Kamrup. I have since ascertained that these *mels* were attended by enormous numbers of people from the Mangaldai and Kalaigao tahsils, and that the trouble was likely to spread. On the 25th Mr. Ransom telegraphed to me that he had called out the Volunteers of his subdivision under Lieutenant Davidson, to whose promptitude in turning out with all his men on this and a subsequent occasion I beg to call your most favourable attention. I had already telegraphed to Mr. Ransom to order the Ghagrapara guard to meet me at Patharughat, and thinking it unadvisable to call out the Volunteers until the police force at my disposal had been tried, I directed Mr. Ransom not to use the Volunteers till further notice. For fear the Ghagrapara guard should not turn up in time, I again called in the men recently returned from Kamrup, who had been sent back to Balipara guard. This was fortunate, for owing to the fact that Mr. Gait (then in camp at Ghagrapara) had taken the guard to Mr. Ransom's assistance and had then recalled them on finding that Mr. Ransom had left Patharughat, my orders never reached that guard. On the 26th I left Tezpur with Mr. Berington in command of twelve sepoys of the Balipara guard and seventeen constables, and two head constables armed civil police. We reached Patharughat on the 27th without let or hindrance of any kind. On the way I took down a notice from a tree inviting all and sundry to attend a *mel* at Patharughat in the name of the *raij*, as the Deputy Commissioner was coming and might be induced to lower the reassessment rates—"*ki jani, khazana birdhi nakare* were the words. The shopkeeper opposite whose shop the notice was stuck denied all knowledge of the matter, and I took him with me in the hope of getting further information. On the morning of the 28th I sent Mr. Berington and his police in the company of the tahsildar to distrain the property of ryots on whom notices to pay had been served. Mr. Berington returned in about an hour saying that he had distrained one man's property, but had been interrupted by a large crowd who refused to disperse, and whom he had only been able to keep from coming to close quarters by firing his revolver into the ground. Shortly afterwards we heard the sound of a large crowd approaching the rest-house in which we were sitting. Mr. Berington ordered his police

to stand to arms and accompanied me to the roadway to see the mob. As the crowd was obviously unarmed and showed no signs of an immediately hostile intention, I directed Mr. Berington to allow them to come out into the open space in front of the rest-house. They came up the road quietly enough, and filled the whole of the space between the river and the belt of trees surrounding the rest-house. I made some of them sit down, and then addressed them in Assamese. I told them that they must not hold any more *mels*, and that if any such *mels* were held, they would be dispersed by force. I informed them of the orders passed by the Government of India as to the rates of revenue, and then directed them to disperse, going among them freely, and talking to them and warning them of the inevitable consequences of a refusal to disperse. They remained firm however, and, without any way assaulting or abusing, simply refused to budge I was finally compelled to direct Mr. Berington to disperse them. Mr. Berington ordered his men to move forwards, and gradually drove the crowd out of the open space in front of the bungalow, up a narrow road lined with bamboo clumps on both sides, and thence on to a large plain, in which I for the first time realised how great a crowd had assembled. On this plain Mr. Berington formed his men into open order, and we drove the crowd right across the plain, where, however, they continued to reform in excited groups. It was impossible with the small force at our disposal to attempt to disperse these in detail, and we returned to the bungalow to breakfast. About half an hour afterwards we heard the sounds of a fresh mob approaching the bungalow. When we went out into the road we saw that the leaders were armed with sticks, and that they were beckoning to others behind to come on. The leaders seemed from their beards to be all Musalmans. It was obviously useless to allow a mob of this nature to approach the bungalow. So Mr. Berington at my request ordered his men to fix bayonets and advance at the double down the bamboo-lined road which I have already mentioned. I had still hopes, as I went with the men, of being able to induce the mob to listen to reason, but when we reached the open plain above described, it was clear that a serious collision was inevitable. The whole plain was crowded with people who began throwing sticks, bamboos, and clods of earth at us. The latter distressed the sepoys greatly, as they broke in their eyes and blinded them. The crowd first threw bamboos and other sticks at our legs (I was myself hit on the knee), and then threw clods of earth at our heads. We were all of us repeatedly hit, but the men combined to drive the crowd forward with the butts of their muskets. I may mention that in no case were the bayonets used. It was now apparent, however, that the crowd was too large and too strong for this mode of procedure, and the rioters had by this time got round to the back of the sepoys As this point Mr. Berington called in his men from the open order in which they had been extended. Of what followed a full and correct account is given in Mr. Berington's statement which I recorded at the time, and a copy of which is appended. On the 29th the Ghagrapara guard arrived, and later on ten men from Tura, for whom I had asked the Inspector-General when Mr. Ransom first reported signs of trouble. With their assistance we put up a stockade round the rest-house in case of a further attack. In the morning Lieutenant Davidson and ten men of the Assam Valley Mounted Rifle Volunteer arrived, and shared the rest-house with us. On the 30th I took the Volunteers and Military Police down to Sipajhar, returning by a different route. We found the country in a quiet state, and met with no sort of opposition or annoyance We covered about 12 miles of country. When we returned we found the ryots beginning to come in to the tahsildar with their revenue, and there being no signs of further trouble, I dismissed the Volunteers with an acknowledgment of their promptitude in coming to my assistance. I have just heard that some of the Tezpur Volunteers under the command of Colonel Lumsden have voluntarily come down to Mangaldai in the hope of being useful. I have asked Mr. Ransom to keep them at Mangaldai for a day or two, and to employ them in patrolling the adjacent country. I think the sight of even a few armed Europeans may be useful in repressing any further tendency to riot. I have sent for Inspector Navakishore Datta to aid Mr. Berington in holding an enquiry into the riots. As I write many ryots are coming in with their revenue, and I have every reason to believe that there will be no further trouble.

In conclusion, I greatly regret the loss of life which occurred on Sunday. I did all in my power to prevent it, and it was not until the police were completely

hemmed in and in imminent danger of being swamped in the crowd which pressed them that I at last authorised Mr. Berington to open fire. The lesson inflicted was a very severe one, and I can only hope and believe that it has been effectual.

P. S.—I think it right to say that until I saw that the police were being hard pressed and in great danger of being mastered, I had no expectation whatever that there would be serious resistance. I went out to meet the crowd quite unarmed personally, and without even a stick in my hand; to the last I hoped that they would listen to me, and to the last I begged them to fall back. It was only when my small body of police was completely hemmed in that I allowed them to fire. Had the crowd been able to wrest the rifles from the police, it is certain that not a man of them would have been left alive. I deeply regret the loss of life that ensued, but I did all in my power to prevent it. I am convinced that the attack was premeditated and that the rioters trusted in the strength of overwhelming numbers. Since this letter was drafted (it has taken some time in the copying), I have informed you demi-officially of all that has occurred. In some parts of this sub-division the ryots still maintain a hostile and defiant attitude; but I am patrolling the country every day with the larger force now at my command, and the ryots are at last beginning to pay in their revenue. I have brought the Sipajhar tahsil in here. R600 odd were paid yesterday, R1,754 to-day, and I hope to collect a much larger sum to-morrow. I have now thirty-two military police here, and by now there ought to be twenty-two men at Mangaldai. I do not anticipate any further trouble of any serious character. I have been able to arrest some of the rioters, and hope to secure some more to-morrow. I extremely regret the necessity that was forced upon me of firing upon the mob, but not even my keen regret can blind me to the fact that this step was absolutely inevitable.

TRANSLATION.

Notice is hereby given to the public that they should assemble and meet together at Patharughat and hold a public meeting (*Raij-mel*) there on the subject of the enhancement of revenue. All men should therefore come. Whoever fails to come will incur the curse of the *raij* (public). The meeting takes place on the 12th, 13th, and 14th of Magh. The Deputy Commissioner Saheb will come, and possibly the revenue will not be enhanced. The 12th Magh (Wednesday), 1301 B. S. It is therefore necessary that all people should assemble in a meeting and remain deliberating.

This is the notice I took down just before the riot of Sunday last.

PATHARUGHAT;
The 1st February 1894.

J. D. A.

Mr. J. R. Berington, Officiating Commandant of Military Police, makes the following statement.

I left Tezpur on the 26th instant in charge of seventeen police, eight of whom were armed civil and nine thanna men, and two head constables; also one havildar and twelve sepoys, Military Police, whom, at the request of the Deputy Commissioner, I called in from the Balipara guard on the previous day. The Deputy Commissioner accompanied my party; we halted the night at Mangaldai, and next day at about midday marched to Patharughat, where we arrived at about 5-30 P.M. That night there was no disturbance. On our way at Ghaingaon we found a notice struck up on a tree.

The Deputy Commissioner translated the notice to me. It proved to be a notice to all passers-by to attend a *mel* on three consecutive days in Magh. I think the 13th, 14th, and 15th. This morning, the 28th, I went with a party of military police and armed civil police to attach the property of a defaulting ryot. This was by order of the Deputy Commissioner. On the way I saw about

200 men collected in a paddy field to the right of the line of march. On getting to the defaulters' houses, I left half my guard with the havildar to attach the property, and, in company of the rest, remained outside the enclosure. I then saw the 200 men advancing towards me. I went to meet them, and halted about 100 yards from the enclosure. The crowd made a rush up to within about three paces of the guard. Fearing that my men would be rushed, I fired a shot from my revolver into the ground, which had the effect of making the crowd retire about 100 yards. I then called the tahsildar, and, in company of several mandals, went and had thirteen men identified among the crowd. Their names were taken down by the tahsildar. I also ordered four men to accompany me. I did this because two of them were exciting the crowd and two of them did not give satisfactory answers as to their residence, &c. The attachment of property being finished, I marched back to the rest-house and reported myself to the Deputy Commissioner. About 1 P.M., when we were having breakfast, the sentry reported that a large number of men were coming down the Mangaldai road towards the rest-house. I immediately turned the guard out, and the Deputy Commissioner gave orders to allow all the people to assemble in front of the rest-house.

The Deputy Commissioner addressed the people in Assamese (a language which I do not understand), and subsequently ordered them to disperse. As they did not do so, the guard by my order cleared the road. There were then about 800 to 1,000 people collected.

About half an hour afterwards the sentry reported that a body of men with *lathis* were coming down the road. The guard was again turned out and advanced at the double on the crowd, which fell back through the jungle surrounding the rest-house along the Mangaldai road and came out into the maidan, where a crowd of at least 2,000 was assembled. I gave the order to extend from the centre, and the men advanced in extended order. The crowd then began to advance on us, throwing sticks and clods of earth. Many of them were armed with split bamboos, and were arming themselves with other bamboos from a pile near the village. The men were then being hit; the Deputy Commissioner and myself were also hit, and a crowd was gathering behind us. It was impossible to advance further. I then fired a shot from my revolver over the heads of the crowd, and seeing that this had no effect whatever, and the crowd being in overwhelming numbers, I asked and obtained permission from the Deputy Commissioner to open fire. This did not deter the crowd for an instant, who continued to press my men so closely that I called them together and retired, firing, to the bund of the Mangaldai road which was immediately in our rear. We retired about 50 yards along the Mangaldai road, firing all the time, and the crowd pressing on us all the time. I then halted the men and told them to fire a careful volley, and then charged the crowd, firing continuously. The crowd then at last gave way, and I immediately gave the orders to cease firing. I then proceeded to count the men who had been hit. There were twelve men lying on the ground killed or wounded. It was impossible to ascertain with any particularity, for the crowd was reforming at a distance of two hundred and fifty yards. Knowing that it would be impossible to stand a rush in the open with so small a body of men, I retired on the rest bungalow, and set about fortifying the bungalow as best I could by means of carts and a barricade of thatching grass round the verandahs. Water was brought in the gharras. Sentries were set and ammunition served out to the men. Four men, who had been appointed special constables that morning by the Deputy Commissioner, and who had been detained since the morning, were sent to warn the crowd to disperse. They were also told to tell the people to take their wounded to the Mangaldai dispensary, as we had no means of treating them here. Information was also sent to the Sub-divisional Officer of Mangaldai. In my opinion, unless we had fired when we did, the detachment would have been swept away.

Telegram No. 280, dated Calcutta, the 12th February, 1894.

From—The Secretary to the Government of India, Home Department,

To—The Secretary to the Chief Commissioner of Assam.

Please submit within one week a report on recent riots in Assam. If full report cannot be sent, an *ad interim* report will do.

Please also wire information showing—

(*a*) the names of places at which riots occurred, with the dates of the riots;

(*b*) the number of persons killed and wounded at each place, distinguishing ryots from police;

(*c*) whether the orders of Government India reducing assessments had been communicated to each body of rioters before they broke out;

(*d*) whether the revenue as enhanced by you—that is, unreduced—was collected from any of the rioters.

Telegram No. 954-J., dated Shillong, the 13th February, 1894.

From—The Chief Commissioner of Assam,

To—The Secretary to the Government of India, Home Department.

Your telegram 280 Public, dated 12th January. Summary of reports on recent riots in Assam Valley as far as received despatched yesterday; further reports will follow; (*a*) and (*b*) Rangia hât in Gauhati subdivision, Kamrup district, looted on 24th December 1893; no casualties. Riots occurred at Rangia on 10th January; no casualties. At Lachima in Barpeta subdivision, Kamrup, on 21st January one mandal beaten by rioters died on 28th January. At Patharughat in Mangaldai subdivision, Darrang district, on 28th January, 12 ryots reported killed and wounded so far as known. (*c*) Orders of Government India reducing assessment wired by Chief Commissioner to Deputy Commissioners, Assam Valley, on 26th January, and were communicated on the spot by Deputy Commissioner, Darrang, to rioters at Patharughat, Mangaldai subdivision, before riot actually broke out. (*d*) Information not available Deputy Commissioners concerned have been wired to furnish.

Telegram No. 317, dated Calcutta, the 17th February, 1894.

From—The Secretary to the Government of India, Home Department,

To—The Secretary to the Chief Commissioner of Assam.

Assam riots. Please ascertain and report by telegraph whether the enhanced assessment was to any material extent collected in the disturbed localities, or whether, notwithstanding the promise to refund excess payments, the people still held off. Information should be given separately for Kamrup and Darrang.

Telegram No. 204-T., dated Lower Dibrugarh, the 21st February, 1894.

From—The Chief Commissioner of Assam,

To—The Secretary to the Government of India, Home Department.

Your No. 317 Public, dated 17th. Assam riots. In Darrang enhanced assessment was nearly all collected in Sadr subdivision before Mangaldai riot; next to nothing collected Mangaldai subdivision; in Kamrup very little revenue collected in Barpeta subdivision before Rangia riot, but out of ten and half lakhs, one lakh seventy thousand collected in Sadr subdivision before riot.

No. 18, dated Calcutta, the 14th March, 1894.

From—The Government of India,

To—The Secretary of State for India.

In continuation of our telegram dated the 6th February 1894, we have the honour to forward a copy of the papers entered in the annexed list, giving details of the riots which have recently occurred in the Kamrup district and in the adjoining subdivision of Mangaldai in the Darrang district in the province of Assam.

Letter from Chief Commissioner of Assam, No. 792-R.—8440-R., dated 4th November 1893, and enclosure.

Letter to Chief Commissioner of Assam, No. [illegible], dated 27th January 1894.

Letter to Chief Commissioner of Assam, No. [illegible], dated 15th February 1894.

Revenue Proceedings A, August 1892, Nos. 26 and 27.

Revenue Proceedings A, November 1892, No. [illegible].

Revenue Proceedings A, January 1893, Nos. 14 and 15.

3. As you are aware, the disturbances were occasioned by the introduction of the new assessments in the temporarily-settled parts of the Assam Valley Districts; and we enclose a copy of the correspondence which has taken place between ourselves and the Chief Commissioner on the subject of these assessments. The Assam Valley had been assessed in 1873 at very lenient rates, which were declared to be in force for a period of 10 years (afterwards extended), and in July 1892 the Chief Commissioner submitted to us certain preliminary proposals as to the rates to be substituted in the new settlement for those then in force. The proposed rates were published for criticism in October 1892, and were finally notified in December of that year with our general approval. They entailed an enhancement in some villages of 100 per cent., in others of 50 per cent., and in others of 25 per cent. on each holding; and they brought out a general enhancement for the valley of 16·6 lakhs, or 53 per cent.

4. It appears that the amount of enhancement which it was proposed to take was much exaggerated by rumours spread among the people, and during the latter half of last year we received several memorials against the new assessments. As the Chief Commissioner had promised to report further on the matter, we deferred passing orders on these memorials until we should be in possession of his views, and such of the memorialists as asked for early orders on their petitions were informed that a report on the subject from the Chief Commissioner was awaited. The report, which we had originally expected in July, reached us on the 25th of November, and received our immediate attention. We found that the Chief Commissioner, after completing the classification of the villages, had arrived at the conclusion that the rates proposed by him in 1892 were too high, and desired to reduce these rates to a scale which involved a total enhancement for the valley of about 37 per cent. We were at the same time made aware that the revenue, of which the first instalment was payable on 15th December, would, in anticipation of our sanction, be collected at the lower rate of enhancement now proposed by the Chief Commissioner.

5. Our examination of the Chief Commissioner's report led us to hold that he had assessed the poorer lands at rates which, though moderate in themselves, were higher in respect of the capacity of the land than those fixed for the better soils; and we accordingly determined, while accepting his proposal for the better classes, to reduce the rates on the inferior lands: the gross enhancement of the revenue of the valley was thus further reduced to 32·7 per cent., and the enhancements on individual holdings were limited, even in the cases of the best villages, to about 50 per cent. of the previous *jamas*. In villages not of the first class the maximum enhancement was considerably lower, as will be perceived from reference to our Secretary's letter of the 15th February to the Chief Commissioner of Assam. A letter was despatched on the 27th January 1894 to the Chief Commissioner, requesting him to inform the various memorialists of the new scale of rates prescribed by us, and Mr. Ward, who was then in Calcutta, issued telegraphic orders on the same day to the Deputy Commissioners of the Assam Valley Districts. These orders were received by the Deputy Commissioner of Darrang and explained to the ryots before the disturbances which took place on the 28th idem. Formal orders on the assessment were issued to the Chief Commissioner on the 15th February.

6. We concur with the Chief Commissioner in thinking that the rioters were influenced by bad advisers, and had no excuse for resisting the revenue demand made upon them, more especially as the orders of the Government of India on the memorials reducing the rates of assessment on the poorer classes of land had been communicated to the people before the serious riot in Mangaldai occurred. From the papers now forwarded it will also be seen that the assessments imposed in Assam are believed to be, even after the recent enhancement, light in comparison with the rates which it is usual to take in some other provinces; and this belief is strengthened by the fact reported in the Chief

Commissioner's letter of 12th February that the villagers are now accepting the enhanced rates and paying in the revenue freely.

7. As at present advised, we see no reason to doubt the Chief Commissioner's view that the Deputy Commissioner of Darrang gave the orders to fire on the mob only when other means of dispersing it and preserving the lives of his party from imminent danger had proved ineffective.

No. 122 Police / 1858 J., dated Shillong, the 23rd March, 1894.

From—The Officiating Secretary to the Chief Commissioner of Assam,
To—The Secretary to the Government of India, Home Department.

In continuation of paragraph 8 of this office letter No. 67 Police / 823, dated the 12th February 1894, and with reference to your telegram No. 502 Public, dated the 8th March 1894, I am directed to forward, for the information of the Government of India, a copy of letter No. 643-G., dated the 12th March 1894, from the Commissioner of the Assam Valley Districts, with Mr. McCabe's detailed report on the Lachima riot in the Barpeta subdivision.

2. I am to add that the Chief Commissioner agrees with the Commissioner in his opinion that Mr. McCabe deserves great credit for his action in quelling the riots in the Kamrup district.

No. 643-G., dated the 12th March, 1894.

From—G. GODFREY, Esq., I.C.S., Commissioner of the Assam Valley Districts,
To—The Secretary to the Chief Commissioner of Assam.

In continuation of my letter No. 270-G., dated 29th January 1894, forwarding copy of Mr. McCabe's letter No. 2-T., dated 12th idem, in which he described the events which had taken place in connection with the agitation regarding the reassessment of land revenue, I have the honour to forward copy of the same officer's letter No. 4-T., dated 22nd February 1894, in which he describes the events subsequent to those referred to above, and the course of action pursued with reference thereto.

2. In order to keep the Chief Commissioner informed of what was going on, I forwarded to him direct Mr. McCabe's diary, in which his action from 11th January up to the 2nd February 1894 is fully described.

3. The Deputy Commissioner is, in my opinion, entitled to great credit for the successful manner in which he has conducted the operations for the suppression of the outburst of lawlessness which has occurred in the Kamrup district, and it is a matter of congratulation that he had no occasion to resort to extreme measures in quelling disturbances. This is, I think, mainly due to Mr. McCabe's personal courage and tact and the way in which he managed the disposition of the force under his control.

4. Exception may be taken to prisoners under trial being made to build a lock-up for themselves, but I think in the circumstances the Deputy Commissioner's action in this respect was not only excusable, but unavoidable, since it was out of the question that the rioters should be released on bail, as matters had reached a crisis in which force had to be employed to put down force, and to have released the prisoners would only have added to the difficulties of the situation.

5. Order has now been fully restored in the district.

No. 4-T., dated the 22nd February, 1894.

From—R. B. McCABE, Esq., I.C.S., Deputy Commissioner of Kamrup,
To—The Commissioner of the Assam Valley Districts.

In compliance with the orders conveyed in your No. 463-G., dated the 16th instant, I beg to submit the following report :—

2. This report is in continuation of my letter No. 2-T. to your address, dated Camp Rangia, 12th January 1894, and gives details of the action taken towards

fully re-establishing Government authority in the Rangia tahsil, and in the riots which took place in mauza Sarukhetri in the Barpeta subdivision on the 21st and 25th January.

In my above-noted letter I described the general attitude of the ryots with regard to the enhancement of revenue, the constitution of the *mel* or village assembly, and the authority exercised; and seeing that this authority was wielded in a manner detrimental alike to the interest of the ryot as well as that of Government, I noted the steps taken for the suppression of these assemblies by appointing the leading members special constables under section 17, Act V of 1861. My letter further gave a description of the looting of the Rangia bazaar on the 24th December 1894 and of the riot at Rangia on the 10th January 1894, on which latter occasion I had to use force in dispersing the mob.

3. I now proceed to give in the form of connected narrative details of events from the 12th January up to date. After dispersing the Rangia mob on the night of the 10th January 1894, I saw that although I could defend the post if I consented to remain locked up there, it was necessary if I wished to control the district that my guard should be strengthened. I accordingly called in fifteen men of the 13th Bengal Infantry on duty at Darranga frontier outpost, 25 miles from Rangia. I had no hesitation in calling in these men, as the Bhutias had not yet commenced to come down. And I also sent a telegram to the Deputy Commissioner, Darrang, asking him to let me have twenty frontier police. By the 13th January I had completely stockaded and entrenched the tahsil cutcherry, and my reinforcements having arrived, I was enabled to take the initiative. Orders were issued for the attachment of all the licensed guns in the Rangia, Nalbari, Boroma, and Bajali tahsils, these being the centres of disaffection. The ordinary police only were utilised in issuing perwannahs and in arresting men inculpated in the riots, and the military and frontier police were kept as a guard over the treasure and prisoners. After arresting one or two men who had been appointed special constables, and who had failed to appear on issue of notice, the others at once came in. I fully explained to them the Government policy, and pointed out the responsibility incurred by them in instigating ignorant ryots to oppose constituted authority, and then sent them out as missionaries to exert their local influence in inducing the ryots to obey orders and follow constitutional measures only in bringing their grievances to the notice of Government. These measures worked well. By the 22nd January the Rangia ryots paid in Rs. 60,000 out of a total demand on the first *kist* of Rs. 90,000, and I found this part of the district so settled that on the 20th January I had dispensed with the presence of Mr. Reilly, Assistant Superintendent of Police, and of that of Mr. Berington and ten men of the Darrang Frontier Police.

4. Meanwhile I had proceeded with the trial of the accused concerned in looting the Rangia bazaar on the 24th December last, and had been in active communication with the officers in charge of the neighbouring tahsils. The ryots of the Tambulpur tahsil, whom I had interviewed, paid in their revenue freely; but I received information from Nalbari, Boroma, and Bajali that *mels* were still being held, and that by threats of personal injury the leaders prevented the ryots from paying in revenue. In the Boroma tahsil the *mel* appointed their own dâk peons to carry orders from one village to another, and organised a corps of lathials to oppose attachment of property.

5. Affairs were in this condition when, on the 22nd January, I received an urgent letter from my Extra Assistant Commissioner in charge of the Barpeta subdivision reporting that a serious riot had taken place at Lachima in mauza Sarukhetri. This substance of his report was as follows:

On the 21st January the mauzadar, accompanied by the mandal and the revenue peshkar, went to Kapla village to realize revenue, some of the ryots having intimated their willingness to pay. It appears that about the same time a head constable and four constables had gone to a spot close by to prohibit the holding of an unlawful assembly. The ryots who had agreed to pay had handed over Rs. 35 to the mauzadar, when the members of the unlawful assembly rushed up and savagely assaulted the mauzadar and mandal. The latter was so severely injured that (as I may note here) he died a few days afterwards.

Two of the constables at once proceeded to Lachima, where the Extra Assistant Commissioner was in camp, and informed him of the occurrence, and he deputed an Inspector

of Police with three constables to the assistance of the mauzadar. The Inspector succeeded in arresting some seventy-five men and brought them to the camp of the Extra Assistant Commissioner, but on a mob of 3,000 men advancing towards the camp, the latter thought it advisable to let the accused go after recording their names and residence. This, however, did not appease the crowd, as they took up a position about 100 yards in front of the rest-house, and with loud and angry shouts threatened to attack and burn the place. The Extra Assistant Commissioner made the best disposition he could of his force, which consisted of three newly-recruited armed civil police, who were absolutely ignorant of the use of a rifle, and by threatening to shoot the first man who approached, he kept the mob, which had gradually increased to 5,000 men, at bay till midnight, when they dispersed, promising to return and capture the camp the following morning. The Extra Assistant Commissioner then despatched an urgent requisition to me for assistance, and wisely abandoned the post and retired to Barpeta.

6. On receipt of this news I at once had some coolies collected, made all arrangements for the defence of the Rangia post, and by 8 P. M. had started for Lachima, 30 miles off. I had sent off my guard of 15 sepoys, 13th Bengal Infantry, and 15 armed police, with a few coolies, at 6-30 P.M. I soon passed them, and, picking up a mounted Sub-Inspector of Police as guide at Nalbari, reached Lachima at midnight, expecting to find the Extra Assistant Commissioner there, but found the place was absolutely deserted. My guard arrived at 8 A.M., having marched 30 miles during the night, and I sent in a friendly villager to inform the Extra Assistant Commissioner at Barpeta, some 15 miles off, of my arrival. He arrived the same evening, and I then learnt that his messenger with his letter informing me of his intention to retire from Lachima had not been able to reach me. Measures were adopted to arrest the ringleaders of the riot, and by the 25th January 59 of the principal offenders had been secured. I employed all my prisoners in building a fortified lock-up, as I had no accommodation for them.

7. On the afternoon of the 25th January a mob of 6,000 men approached my camp; they sent me in an impertinent letter, in which they declined to pay revenue, and demanded the release of the prisoners. The letter was signed "6,000 ryots." I declined to accede to their request, and sent back the messenger after giving him full instructions regarding Government orders. I told him that any remission made by the Government of India would be at once refunded; that I had no intention of realizing revenue at the end of the bayonet; and that the ryots could please themselves about paying or not paying, but that the ordinary revenue procedure would be enforced. I explained to him that the ryots had had due notice of the enhanced rate of revenue, and that by occupying the land after 1st April 1893 they had virtually accepted the settlement, and must therefore expect to be served with *bakijai* notices if they did not pay the Government demand.

8. This message had no effect, and I sent out a Sub-Inspector of Police to tell the mob to disperse. They raised their *lathis* at him and forced him to retire, and then advanced on my camp. As soon as they reached the prohibited limit, I sallied out with 20 men with fixed bayonets and charged them. *Sauve qui peut* ensued, and we effectually dispersed them over miles of country after a couple of hours' run. Not a shot was fired nor a bayonet used; the butt of the rifle sufficed, and the lesson taught on this occasion, *viz.*, that we had no need of our reserved strength, has resulted in thoroughly quieting this part of the district.

9. The Extra Assistant Commissioner of Barpeta now commenced a preliminary enquiry regarding the rioting on the 21st January which resulted in the death of the mandal. Almost all the revenue of this mauza having been realized and quiet restored, I sent part of my guard to Bajali and Boroma, two tahsils in which the *mel* was still paramount, and then returned to Gauhati on the 5th February, from which place I deputed 70 men of the 44th Gurkhas to relieve my police and the 13th Bengal Infantry at Bajali, Boroma, and Lachima. My orders to all the military and frontier police guards have been that their duty is strictly limited to defending the posts at which they are stationed, and when called upon by the civil officer to render assistance in dispersing unlawful assemblies.

10. Almost the entire land revenue of the district has now been realized, and in every instance the ryots have attended personally at the tahsil cutcherries

and paid the Government demand. On receipt of the Government of India's orders regarding the reduction of revenue on *faringati* lands, the widest publicity was given to the notification both by posting notices in every tahsil and by beat of drum.

11. I have taken every opportunity by visiting the villages and by addressing meetings to impress on the ryots the futility of active resistance to the orders of Government, and I cannot recollect an instance (except in the case of unlawful assemblies) in which the ryots did not express their desire to pay revenue, stating that they were only prevented from doing so from fear of the *mel.* In many instances the leaders of the *mel* have been dismissed head constables and released convicts who, having no obstensible means of existence, have taken the opportunity of raising a subscription of from 4 annas to 8 annas per house on the pretence of preparing an appeal to Parliament. Most of the money so collected will remain in the hands of these misleaders of the people, than whom as a mass no race in India is more loyal or law-abiding. No ill-will is borne against the Government officials, and in every place I have been the native gentlemen have called to thank me for the extreme leniency with which Government has acted towards the misguided people. I may also add that I have done all my marches throughout the district unaccompanied by any guard.

12. Whilst laughingly stating that the enhanced rate of revenue is ruinous, the ryots have admitted that the subscriptions they have had to pay and the loss of time caused by the agitation have far exceeded the increased revenue demand. Under the favourable decennial tenure granted to them as a matter of grace by Government, good *rupit* and *basti* land has so increased in value that any land of this class resigned would at once be taken up. *Faringati* land is constantly being resigned, as in most instances the cultivation is fluctuating.

13. I close this report by noting that at Rangia, when the riots took place, not a pice of revenue had been collected.

No. 679, dated Simla, the 4th April, 1894.

From—C. J. LYALL, Esq., C.S.I., C.I.E., Secretary to the Government of India, Home Department,

To—The Chief Commissioner of Assam.

I am directed to acknowledge the receipt of your letter No. $\frac{122 \text{ Police}}{1855\text{-J.}}$, dated the 23rd ultimo, forwarding a letter from the Commissioner of the Assam Valley Districts, with a detailed report by Mr. McCabe on the riot at Lachima in the Barpeta subdivision of the Kamrup district.

2. In reply, I am to say that the Governor-General in Council cordially agrees with you in your commendation of Mr. McCabe's action in dealing with the riots in the Kamrup district, and considers that he deserves the thanks of the Government of India, which I am to request that you will convey to him.

C. J. LYALL,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, March 31st, 1894.

General Summary.—The anti-cyclonic conditions prevailing in North-Western India at the close of the previous week continued up to the morning of the 25th, but these conditions were largely modified by the changes of the next twenty-four hours, and from the morning of the 26th to the end of the week the chief feature of the pressure distribution was its great uniformity over the whole of the Indian area, due chiefly to the persistent abnormal excess of pressure in Northern India. At the commencement of the week temperature was generally in defect in Northern India, but as the week advanced temperature continued to rise, and humidity consequently decreased, especially in the central parts of the country and in North-Western India, where very low humidity percentages were recorded; the most remarkable being 9 per cent. at Mount Abu, 12 at Neemuch, 14 at Murree, and 15 at Pachmarhi, all registered at 8 A.M. on Thursday, the 29th. Owing to the abnormal dryness of the atmosphere in North-Western India, the day temperature rose to considerably in excess of the normal, while the night temperature continued slightly in defect. Accompanying and caused by the rapid increase of temperature, shallow depressions appeared during the week over Sind, South Deccan, and Central Burma, which, however, were not of any great importance, and filled up again without causing any well-marked disturbance in those areas. Fine weather prevailed throughout the week over the whole of India, only a few showers of rain being reported from the south of the peninsula, in most cases probably accompanying thunderstorms. The mean temperature for the whole of India during the past week was 1° below the normal.

Daily Summary.—*Sunday.*—No important change in the pressure distribution had taken place during the previous twenty-four hours. Steep gradients favouring westerly winds continued in Northern India; the shallow depression in Bengal had become more prominent, and covered North Bengal and Bihar, but the one in Burma was unchanged in position and character. Moderate to strong westerly winds prevailed in the North-Western Provinces, Bihar, and Chota Nagpur, and a strong north wind was blowing at Cherat, which appeared to indicate an indraught of dry cool air from the Afghan mountain area. Humidity had decreased largely in the Central Provinces and also in North, Central, and West Bengal, Bihar, and parts of the Deccan. The only rain reported was a very light shower at Nagpur.

Monday.—Pressure had given way rapidly in Upper India and increased briskly in North-Eastern India, thus modifying the pressure distribution very considerably. The anti-cyclonic conditions prevailing in North-Western India had disappeared, and the distribution of pressure was very uniform over the greater part of the country. The Bengal depression had filled up, but the Burma depression was unchanged, and a shallow depression was shown in the Madras Deccan districts. The westerly winds in the Gangetic Plain and North Bengal had decreased in strength. Humidity continued to decrease in Northern and Central India. No rain was reported.

Tuesday.—Pressure had increased over the whole of India, except in Sind, where a shallow depression was shown, caused by the increase of temperature in that area. The depressions in Burma and the South Deccan had filled up, and the chief feature of the pressure distribution was its great uniformity, the extreme range of pressure over the whole of the land area being only about a tenth of an inch. Winds were shifting to their normal directions in Orissa and Chota Nagpur. Rain fell during thunderstorms at several stations in Southern India. Wellington received 1·64 inches, Calicut ·51 inch, and Chitaldrug ·41 inch.

Wednesday.—Pressure changes were small and of no great significance, the distribution of pressure continuing very uniform over the whole of the land and sea areas. Winds showed an increasing southerly or easterly tendency in Bengal and Chota Nagpur. Temperature was increasing over the whole of India, except Burma, Madras, and Mysore. Light showers of rain were again reported from a few stations in the south of the peninsula, in most cases probably accompanying thunderstorms.

Thursday.—Pressure had increased slightly in Baluchistan and Upper Sind, temporarily filling up the shallow depression over Sind. It had also increased briskly in the Deccan, but was still very uniform over the whole of the Indian area, due to the persistent excess of pressure in Northern India, where it was from one-tenth to one-eighth of an inch above the normal. South-westerly winds had set in over the whole of South and Central Bengal, where they had caused a considerable increase of humidity. Temperature continued to increase in all Provinces except Madras, and the area of maximum temperature was being gradually transferred northwards. Humidity had hence decreased still more in North-Western and Central India, and remarkably low humidities were recorded at Mount Abu (9 per cent. of saturation), Neemuch (12), Murree (14), and Pachmarhi (15). Rain continued in the south, Colombo receiving ·82 inch, Mangalore ·78 inch, and Trivandrum ·46 inch. Moulmein reported 1·05 inches of rain.

Friday.—The barometric changes of the past twenty-four hours were generally small in amount, but irregular in character. The chief features of the pressure distribution continued to be its great uniformity and large excess, especially in Northern India and Baluchistan. Winds were unusually westerly in South Bengal, and were increasing in strength. They were normal in direction on the Bombay Coast. No rain was reported.

Saturday.—Pressure had given way slightly in Sind and the South-West Punjab, causing the re-appearance of the Sind hot weather depression; but great uniformity of distribution and general excess of pressure continued, the greatest excess over normal being in the Gangetic Plain and Baluchistan, where it exceeded an eighth of an inch. Winds had shifted to the normal hot weather directions on the Sind, Cutch, and Kathiawar Coasts, and were increasing in strength on the Bombay Coast. Temperature continued to increase generally, and the day temperature was considerably above the normal in the Punjab, Sind, and Rajputana. Jacobabad registered a maximum of 105·9° and Hyderabad (Sind) of 105·7. Ahmednagar received ·34 inch of rain, and a few other stations reported light showers.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different provinces of India:

Province.	March 1894.							Mean variation of week.
	25th.	26th.	27th.	28th.	29th.	30th.	31st.	
	°	°	°	°	°	°	°	°
Burma	+2·2	+2·8	+1·9	+0·6	+1·8	+0·5	+0·5	+1·3
Bengal and Assam	+1·5	—0·6	—2·6	—1·9	—1·0	—0·3	+0·5	—0·6
North-Western Provinces and Oudh.	—2·4	—7·0	—6·0	—4·7	—3·5	—2·7	—1·1	—3·9
Punjab	—5·9	—5·1	—2·3	—1·7	—0·1	+1·4	+2·7	—1·6
Bombay	+1·3	+1·8	—0·1	+0·7	+1·2	—0·3	—0·3	+0·6
Central Provinces and Berar	—0·4	—2·5	—2·8	—1·3	+0·6	—3·0	—1·1	—1·5
Central India and Gujarat	—2·8	—4·9	—3·7	—2·9	—1·3	+0·3	+0·8	—2·1
Sind and Rajputana	—3·3	—4·6	—3·0	—1·7	0	+1·7	+3·4	—1·1
Madras	+0·2	+2·5	+2·0	—0·6	—2·3	—3·1	—1·7	—0·4
Mean for whole of India	—1·1	—2·0	—1·8	—1·5	—0·5	—0·7	+0·4	—1·0

In North-Western India the temperature at the beginning of the week was considerably in defect, possibly owing to the indraught of cool air from the Afghan mountain region, as indicated by the strong northerly winds reported from Cherat; but towards the close of the week the day temperature rose very rapidly, and by the 31st was about 7° in excess of the normal in the Punjab, Sind, and Rajputana. The night temperature, however, due probably to the abnormal dryness of the atmosphere, was persistently below the normal throughout the week, which reduced the mean of the day to much nearer normal than it would otherwise have been. The mean temperature of Gujarat, Central India, and the North-Western Provinces varied similarly, the lowering of the temperature in these provinces being due to the advance of the cool wave from the north-west; the influence of which, in the case of the North-Western Provinces, was still discernible at the end of the week. In Burma, Madras, and Bombay, on the other hand, temperature was in excess at the commencement of the week and in defect towards its close. The somewhat irregular variations of temperature in the Central Provinces and Berar is probably traceable to the effects of local duststorms in that area. The mean temperature for the whole week was in Bengal, Bombay, and Madras nearly normal; in Burma it was slightly in excess, and in all other Provinces more or less in defect. For the whole of India it was 1° below normal.

Rainfall.—Only sixteen of the fifty-two rainfall divisions received any rain during the past week, and in five of these the average rainfall did not exceed one-tenth of an inch. Tenasserim received ·80 inch, Bombay Deccan ·62 inch, and Malabar ·59 inch. These were the largest average rainfalls. The remaining eight divisions received less than half an inch. As will be seen from the table at the close, the rainfall of the week was practically confined to the Peninsula, the only divisions which received rain outside of that area being Tenasserim, Assam (Brahmaputra), Punjab (North-West), and Central Provinces (West). The rainfall for the week was thus decidedly below the normal. Tenasserim, Berar, Central Provinces (West), Madras (Central), and the divisions of the Bombay and Malabar Coast Districts (with the exception of Coorg, which was normal) are the only divisions showing an excess.

The rainfall of the period for 4th to 31st March was also generally in defect. The Bombay and Malabar Coast Districts, Berar, Central Provinces (West), three of the Punjab divisions, two of the Madras divisions, and Tenasserim were the only parts of the country where the fall was in excess of the normal. The defect was greatest in Assam, where the actual fall was only 4·53 inches, while the normal fall for this period is 12·21 inches, thus showing a defect of 7·68 inches.

The largest amounts registered during the week were 4·13 inches at Karmala (Sholapur) in the Bombay Deccan, 3·48 inches at Deulgaon Raja (Buldana) in Berar, and 3·40 inches at Tellicherry (Calicut) on the Malabar Coast.

W. A. BION,

SIMLA, *5th March, 1894.*

Actg. Asst. Meteorological Reporter to the Government of India.

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 31st March.*—Showers in parts of the Deccan, Coimbatore, and Tinnevelly, and general in the Nilgiris and West Coast. Agricultural operations generally at a standstill, except where irrigation available. Supplies of water limited, but some cultivation proceeding in Central and Southern districts after recent rainfall. Standing crops generally good, except cotton in parts. Some harvest still going on with fair outturn. Pasturage scarce, but fodder sufficient, and cattle generally in good condition. Prices almost unaltered, though slightly easier in Central and Southern districts.

Bombay.—*For week ending 4th April.*—Rain generally slight in parts of fourteen districts. Standing crops damaged by blight, frost, or rain in parts of four districts; otherwise good except cotton in parts of Guzerat. Reaping of late crops progressing throughout Presidency, and ploughing and sowing operations going on in ten districts. Cotton picking progressing in six districts. Prices steady, except in ten districts. Agricultural stock good. Fodder sufficient, except in parts of Baroda. Numbers on relief works: Baroda, 574.

Bengal.—*For week ending 31st March.*—No rain, but fine settled weather prevailed throughout the week. Ploughing and early sowings have been retarded for want of rain. Spring rice and indigo are doing well, but would be benefited by rain. The spring harvest is being rapidly completed, and from most districts a good outturn is reported. In Nadia and Malda the outturn is below the average. The collection of opium is nearly finished, and weighments will shortly commence. The yield has been prejudiced by blight in Chota Nagpur. The *mahua* (*Bassia latifolia*) crop promises well, but mango prospects are indifferent. The price of common rice is stationary. The supply of fodder is generally sufficient, but want of water is beginning to be felt in parts of East Bengal, Nadia, and Jessore.

North-Western Provinces and Oudh.—*For week ending 4th April.*—Weather seasonable. Harvesting of spring crops, collection of opium, and sugarcane sowings are in progress. Prospects are favourable. Prices generally steady.

Punjab.—*For week ending 4th April.*—Rainfall *nil.* Reaping of spring crops commenced. Sowings of extra spring crops in progress. Ploughings and sowings of sugarcane and cotton commenced. Condition and prospects of standing crops good. Crops are reported to have been injured by field rats in parts of Lahore and by rust in parts of Dera Ismail Khan. Cattle are generally in good condition. Fodder sufficient throughout the Province. Condition of poppy crop good. Prices falling in four districts; stationary elsewhere.

Central Provinces.—*For week ending 5th April.*—The weather has continued to be cloudy, and thundershowers have fallen in places. Wheat outturn about one anna in Saugor and Damoh, where wheat is selling at fourteen and thirteen seers respectively per rupee. Import of wheat into these districts has commenced. The Jabalpur crop is only six annas; elsewhere in the north the outturn is much better, except in one tahsil of Hoshangabad. In the Southern and Eastern districts a fair crop has been gathered. The cold weather pulses have done fairly everywhere.

Burma.—*For week ending 31st March.*—Showers of rain in three districts in Lower Burma; none elsewhere. No agricultural operations in progress. In Upper Burma ploughing and planting of dry weather paddy progressing. Standing crops looking healthy, but island crops slightly damaged by sudden rise

in river. Price of paddy stationary and much below normal. In nearly all districts the price of rice has fallen, and is now very low. Fodder and water-supply sufficient.

Assam.—*For week ending 3rd April.*—Weather variable. Sowing of early rice commenced. Condition of cattle good. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 4th April.*—MYSORE: Slight rain has fallen throughout Mysore State. Standing crops in good condition. Rice sown in parts of Tumkur. No material change in prices.

COORG:—Slight rain. Manuring of rice fields continues, and threshing of *ragi* (*Eleusine coracana*) completed. Rain excessive and has injured coffee blossoms in some parts. Prices stationary. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 4th April.*—BERAR: Weather warm and cloudy. Harvesting of spring crops nearing completion in Amraoti, and threshing of wheat, linseed, and gram continues in Ellichpur. Preparation of land for ensuing crop in progress. Fodder insufficient in parts of Ellichpur and Akola talukas. Water-supply enough for requirements. Prices almost stationary.

HYDERABAD: No rain during week; total from 1st January 29 cents. Weeding of hot weather crops continues. Prices steady.

Central India.—*For week ending 28th March.*—Slight rain in Bhopal, Bundelkhand, Western Malwa, and Bhopawar. Harvesting of crops continues in all parts. A fairly good outturn is expected in most agencies. In others crops have been slightly damaged, especially the wheat crop in Bundelkhand. Cattle in fairly good condition in all agencies, except Bhopal. Prices of food-grains rising in Bhopal, slightly fluctuating in parts of Bhopawar, and steady in other agencies. Opium crops indifferent in Dewas, Bhopal, and Neemuch; fairly good in other parts.

For week ending 4th April.—Slight rain fell during week in Bhopal and Bhopawar. Weather cloudy and warm in Indore. Harvesting operations still in progress in all parts of Central India. Good outturn expected in the Neemuch district, Bhopawar, and Western Malwa; average in Baghelkhand, and below average in parts of Gwalior, Bhopal, Bundelkhand, and Goona. Cattle in fairly good condition. Pasturage good and sufficient, except in parts of Gwalior. Prices of food-grains steady at high rates, but low in Neemuch district. Opium crops indifferent in Dewas, Bhopal, and Neemuch; fair in other agencies.

Rajputana.—*For week ending 4th April.*—Agricultural operations, standing crops, and cattle generally satisfactory. Harvesting continues. Prospects generally good, but damage to crops reported from Karauli and Dholpur. Pasturage or fodder sufficient. Prices falling in three States, fluctuating in two, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 3rd April.*—Rain fell during the week. Land being prepared for autumn crops. Prospects of standing spring crops good. Water for irrigation sufficient. Prices stationary.

JAMMU PROVINCE.—*For week ending 4th April.*—No rain. Crops in fair condition. Prices stationary.

Nepal.—Report not received.

M. FINUCANE,

Offg. Secretary to the Government of India.

No. 256 of 1889.—Messrs. J. E. Emerson and T. Midgley's invention for improvements in, and relating to, the manufacture of wire belts. (Specification filed 6th January 1890.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

G. W. FORREST,
Secy. under the Inventions and Designs Act, 1888.

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

A. W. PEET,

Conservator of Forests, Northern Circle.

CONSERVATOR'S OFFICE, NORTHERN CIRCLE,
MADRAS PRESIDENCY,
Visagapatam, 18th July, 1893.

THE YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 4th and 5th June, 1894, at 10-30 A.M.

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . . .	100	50
Dictation, spelling, punctuation, etc.)	100	50
Arithmetic (the whole) . .	240	160
Mensuration (*a*) the whole .	60	30
Book-keeping (*b*), mercantile	100	50
TOTAL	600	400

Minimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.

(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it, but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned.—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in Rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no applications received direct.

J S. SLATER,
Principal, Civil Engineering College.

SIBPUR,
The 30th March, 1894

১৮৯১ সালের এপ্রেল মা সর ১লা তারিথ অবধি যাবৎ অন্য আজ্ঞা না হয় তাবৎ কলিকাতার বোটানিকেল গার্ডণের অর্থাৎ কোম্পানির বাগানের সুপারিন্টেণ্ডেণ্টের নিকট গবর্ণমেণ্টের কর্ম্মচারিগণ এবং অপর কোন ব্যক্তি এক কালীন দশ পৌণ্ড ক্রয় করিলে নিম্নলিখিত হিসাবে জ্বরঘ্ন সিন্‌কোনা পাইবেন অর্থাৎ চারি ঔন্স টিন ২॥০ টাকায়, আট ঔন্স টিন ৫, টাকায় ও এক পৌণ্ড টিন ১০, টাকায় পাইবেন। সর্ব্ব সাধারণে কোম্পানির বাগানের সুপারিন্টেণ্ডেণ্টের নিকট নগদ মূল্য দরে এই এই হিসাবে অর্থাৎ চারি ঔন্স টিন ৩, টাকায়, আট ঔন্স টিন ৬, টাকায় এবং এক পৌণ্ড টিন ১২, টাকায় পাইতে পারিবেন। কলিকাতার প্রধান প্রধান ইউরোপীয় ও দেশীয় ঔষধ বিক্রেতাগণও এই ঔষধ বিক্রয় করিয়া থাকেন। উপরোক্ত হার ছাড়া চারি ঔন্স টিনের ।০, আট ঔন্স টিনের ॥০ ও এক পৌণ্ড টিনের ৸০ ডাক মাশুল দিতে হইবে।

PURE SULPHATE OF QUININE,

Manufactured at the Bengal Government Cinchona Plantation.

The price of this Quinine is as follows:—

1 Pound tin,	R16,	or, post free,	R16-12
½ „	R 8,	„	R 8-8
¼ „	R 4,	„	R 4-8

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta. It can be had either white or coloured pink.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন ।

এই কুইনাইনের নিম্নলিখিত মূল্য, যথা—

১ এক পৌণ্ড টিন .	১৬৲ বা ডাকমাশুল বিনা	১৬৸০
½ আধ „ „	৮৲ বা ডাকমাশুল বিনা	৮৷০
¼ সিকি „ „	৪৲ বা ডাকমাশুল বিনা	৪৷০

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধরূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারিগণের নিকট বিক্রয় করা যাইবে এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে। ইহা শাদা বা পাটল বর্ণের পাওয়া যাইতে পারিবে।

Catalogue of Books printed at Thomason College Press and procurable from Thomason College Book Depot.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments, drawing materials, etc., are not available at the College Book Depôt, but can be obtained from the Superintendent, Canal Foundry and Workshops, Roorkee.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo with numerous Plates.

First two Volumes are published in separate convenient sized Sections, as below, but can be bound up in Volumes if required.

VOLUME I.*

Section	I.	Building Materials	(in the Press).	
„	II.	Masonry	(1891),	R1-8
„	III.	Carpentry	(1889),	R1-8
„	IV.	Earthwork		R1-8
„	V.	Tools and Plant	(never published).	

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-8
„	VII.	Bridges	(in the Press).	
„	VIII.	Roads	(1888),	R2-0
„	IX.	Railways	(1891),	R1-8
„	X.	Irrigation Works	(1873),	R2-0

* Date of Edition on sale.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8.

XIII. Drawing (by Lieut. R. Pulford, R.E.)† R8.

XIIIa. Drawing. First Principles of Geometrical (by do.) (4th edition). R1-4.

XIV. Simple Applied Mechanics, Parts I and II (in the Press)

XV. Examples of Estimating. Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition). R3-12.

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 8a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth, to fold up. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. (In the Press). R1-4.

Specifications and Schedules of Prices for execution of various kinds of Work by Contract, etc. By Major-General F. W. Peile, R.E. R3.

Tyndall's Hand-Book of Specifications (in the Press).

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs. By Rai Kunhya Lal. R4.

Blasting under Water (2nd edition). 12a.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Roorkee Hydraulic Experiments (in 3 Vols.—Text, Tables, and Plates). By Capt. A. Cunningham, R.E. R12.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into Decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility. (4th edition.) R2.

Boileau's Tables of Log $\sin^2 \frac{1}{2}$ P (for computing time). 8a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (In the Press.) R1-4.

Cape's Geometry. R1-8.

„ **Mechanics.** R2-4.

HINDUSTANI.

Elements of Hindustani Grammar. 4a.

Technical Dialogues—English and Urdu. R1-4.

A Vocabulary of Common and Technical Words in English-Urdu. R1-4.

† Originally published at R15, reduced to R8.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small, each. R1-4.
Surveying Field-Books (ruled). R1.
Levelling Field-Books (English Pattern). R1-8.

British Burma, 19 Plans. R3-4.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(SECOND SERIES)

Quarterly Numbers of Vols. II, VIII, and IX of the Series are available at R3 8 each, and Vol. XI at R2 Cloth covers for Volumes at R1 each.

(THIRD SERIES)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15 at R2-8 each.
Index to Professional Papers, 1st and 2nd Series. 8a.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt Application to be made to the Curator.
Apparatus for printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes held at the College will be forwarded to applicants.

* These ______ Papers for Engineer and Upper Subordinate Classes, perior Accounts Branch, P. W. D.

J. CLIBBORN, *Major, I.S.C.,*
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876.—

Terms of subscription payable annually in advance.

For the complete Series, *including postage*. R22-8.

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series		
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*		
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*		

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit —

	For town. R a. p	For mofussil. R a. p.
For the Calcutta Series; per copy	0 8 9	0 10 3
" each of the Madras, Bombay, and Allahabad Series; per copy		
" the Calcutta Series For the year		
" each of the Madras, Bombay, and Allahabad Series. For the year	4 5 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh
Superintendent of Government Printing, Bengal

Orders and subscriptions for 1892 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page*

REVENUE DEPARTMENT.

Horse Surra, Report on, Vol. I, by ALFRED LINGARD, M.B.,M.S., Durham. Super royal quarto. R10 (R1-4.)

[Revised Advertisement.]

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume ; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G ; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O ; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Indian Wheat Trade, Parts, I, II and III, combined. Royal 8vo., Limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes :—

PROMISSORY NOTES.

Lost.

The Government Promissory Note, No. 212466, of the 4 per cent. of 1865, for R1,000, originally standing in the name of the Comptroller-General, and last endorsed to Syed Ally Zamin, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of proprietor.

SYED ALLY ZAMIN,

Shahjahanpur.

The Hon'ble SIR ANTONY MACDONNELL replied:

"My Lord, these questions were submitted by the Hon'ble Mahárájá on the 26th instant. They are therefore not within time, and under the rules might have been excluded, but, with Your Lordship's permission, I will answer them.

"The answer to the first question is supplied by official papers submitted to Parliament last year. From one of those papers, a letter from the Government of the North-Western Provinces, I make the following quotation:

'Under clause (*c*), section 34 (of the North-Western Provinces Municipal Act), the Municipal Board has exempted from the rate all buildings which are exclusively used for religious purposes. A Hindu temple, equally with a Muhammadan mosque or Christian church or chapel, is entitled to the benefit of this exemption if it is not used for any purpose other than that of religious worship. But in Benares, as elsewhere, the premises of Hindu temples are frequently occupied by Brahmans and others for residential purposes, and in such cases exemption is not claimable. The Gonesh temple at Benares has been assessed to the water-rate because it has been occupied by about twelve persons. The Anapurna temple includes a refectory where Brahmans are fed and lodged. The Municipal Board has therefore held that these two temples are liable to pay the water-rate. The majority of the Members of the Board are Hindus and are elected by the townspeople, and may therefore be assumed to be not unfriendly to the claims of their co-religionists'

"This statement of fact then justifies an answer in the negative to the Hon'ble Member's question.

"The answer to the second question is still under consideration.

"The answer to the third question is in the negative, the matter being one which would be more suitably submitted for the consideration of His Excellency the Governor of Madras in Council."

PRESIDENCY SMALL CAUSE COURTS ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR ALEXANDER MILLER presented the Report of the Select Committee on the Bill to amend the Presidency Small Cause Courts Act, 1882. He said: "I must take this opportunity of saying that under present arrangements the Bill will not be further proceeded with until a copy of the Report has been sent home and considered by the Secretary of State in Council."

CODE OF CRIMINAL PROCEDURE, 1882, AMENDMENT BILL.

The Hon'ble SIR ANTONY MACDONNELL moved that the Report of the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, be taken into consideration. He said: "My Lord, it will be seen from the Report that the Select Committee have modified the Bill in only one point. The last provision of the Bill, that enabling the Local Governments to appoint village-headmen for the purposes of the Act, stood originally in the shape of an *explanation*. His Honour the Lieutenant-Governor of Bengal in his comments on the Bill drew attention to that provision, and demurred to its taking the form of an *explanation*. The Select Committee have met His Honour's wishes by throwing the provision into a separate section, and have also accepted His Honour's suggestion that Local Governments should be enabled to make rules in order to control the operation of the section. We were unable to accept the only other change in the Bill advocated by His Honour, namely, the exclusion of the word 'occupiers' from section 45, because, under the law as it now stands, the responsibility of reporting offences rests on 'occupiers,' and it is not the object of the Government to diminish that responsibility.

"Generally speaking, the Bill has been favourably reported on by Local Governments, but Native political associations are not in favour of it. Some are more pronounced in their opposition than others, but the following passage which I quote from the opinion of the Bengal Zamindari Panchayat appears to me to express moderate Native opinion:

'The amendments, the Committee of the Zamindari Panchayat believe, have suggested themselves to the Legislature by the frequent occurrence lately of riots in several parts of the country, and they are of opinion that the amendments proposed are sound in principle. Having regard, however, to the backward condition of education in the country

and the general ignorance of the rural population, also to the nature of their ordinary pursuits, habits and manners, there is reason to fear that the provisions of the draft Bill are calculated to throw on the public responsibilities which they are incapable of discharging and which may prove meddlesome in the hands of the police, as well as cause considerable annoyance to the mass.'

"In this opinion, my Lord, the soundness of the principle on which the Bill is based is not challenged, but it is thought that, owing to the ignorance of the people, the Bill will remain inoperative; while it is feared that, owing to the character of the police, it may be used as an engine of oppression. If Your Lordship permits me, I will say a few words on each of these objections, beginning with the last.

"No one is more alive than I am to the defects in our police, nor, if I may be permitted to say so, has any one striven more earnestly for many years to correct them. The importance of this question of police reform is fully recognized, and already much has been done in all—I think I may say all—provinces to improve the prospects and *personnel* of the force. I do not think that the Native public realize the difficulties with which the Government have to contend in this matter. The Native public are urgent in their demands for a better police, but they forget that the morality of our police cannot be much better than the morality of the classes from which the police are drawn. Some improvement is no doubt effected by the checks and the discipline which we impose: but at bottom the morality of the police is the morality of the classes of Native society which furnish the police. Now, the Government of India cannot raise the standard of public morality by an order in the Gazette, and, if we are to postpone those precautions which the maintenance of law and order requires until the guardians of order shall have outgrown the frailties of their origin and environment, we shall have to wait a long time. As practical men, we must make the most of our instruments, doing, meanwhile, all we can to improve them. Besides, in the matter in hand, the police will have no arbitrary power of interference at all. Failure to comply with the injunctions of this Bill will not be a cognizable offence into which the police can enquire or with which the police can interfere of their own motion.

"The objection that the Bill, if passed into law, will be inoperative appeals to a different order of ideas—the prophetical order, if I may use the phrase. To an argument of this order all one can say is that he believes or does not believe. If he believes, there is nothing more to be said; if he doesn't believe, the matter is equally at an end. My own experience of prophecies, my Lord, whether as prophet or as disciple, has not been encouraging, and I am therefore loath to take prophecy for argument in the present matter. I am assured by responsible administrators that the law is defective on the points with which this Bill deals; I am assured by them that the proposals of this Bill are calculated to correct the defects, and my judgment confirms their assurances. In these circumstances we ought not to be deterred by forebodings of failure. If we do fail, we shall be no worse off than before.

"The Council will notice that the Calcutta High Court object to the inclusion of 'unlawful assembly' among the offences of which the public is by the Bill bound to give notice. It is hardly necessary for me to say that I entertain great respect for the opinion of the Hon'ble Judges of the Calcutta High Court, and I should in this matter have hesitated to differ from them did I not believe that the Hon'ble Court have not looked at the matter from our standpoint. Had the object of the Government of India been punitive, had we wished to secure the punishment of malefactors, I should have been disposed to accept the views of the Hon'ble Judges; but our object has not been punitive, but preventive. We want to prevent the commission of the crime more than to punish the criminal. Take the case of riots. Riots begin with unlawful assemblies, and, if we maintain (with the High Court) the obligation to report the commission of a riot, we should, I submit, take the riot in its inchoate form and nip it in the bud. This we cannot do unless we make it incumbent on people to report the occurrence of an unlawful assembly.

"But it is urged that an unlawful assembly may be a most trivial matter, not calling for the submission of any information to the authorities. That no doubt often is the case, and then the Magistrate would not expect a report and would naturally ignore the omission to make it. But an unlawful assembly may

also be of a different complexion, and may lead to very serious infringements of personal rights and individual liberty. Then it becomes a very serious matter indeed, and leads to developments of much greater moment than even a riot. It is in connexion with such cases that this Bill has been considered necessary, and I submit to the Council that the power which it confers should not be withheld from Local Governments.

"The last point I wish to notice is that clause (*f*) of the Bill (as it now stands, after the incorporation in the law of the provisions of Act III of 1894) is objected to as being too wide and as likely to lead to the harassment of the *public*. But I would point out now, as I was careful to point out in my speech introducing the Bill, that clause (*f*) of section 45 does not apply to the general public, but only to the village-officers enumerated in the first clause of the section—that is say, to village-headmen, village-watchmen, village-accountants, village-police-officers and the owners and occupiers of land with their agents. The obligation of giving information in response to the Magistrate's call under clause (*f*) touching matters affecting the preservation of the peace will, if this Bill becomes law, be imposed—not on the general public—but on those persons enumerated in the section who from their position in the village and means of information are specially able to give it, and who by order of the Magistrate, with the previous consent of Government, have been directed to give it. This is a very different thing from placing an obligation on the public generally.

"His Honour the Lieutenant-Governor in his written comments on the Bill is doubtful whether breaches of the obligation imposed by clause (*f*) can be brought home to the delinquents, and thinks that the clause will have little or no practical effect. But His Honour will, I think, admit that, if the provisions of the clause do have the effect anticipated, the effect will be far-reaching and beneficial in the interests of order. A provision similar to this has worked very usefully in Burma, and, as I said before, if the provision does not work in India, we shall be no worse off than we were. I would submit to the Council that when we have on the one side responsible and experienced administrators coming up to us with the statement that the law is defective on this point, and that the defect will be probably cured by this provision, which has already been tried with advantage—and when, on the other side, the soundness of the principle is admitted, while only doubts as to its effectiveness are expressed,—then I would, I repeat, submit to the Council that as practical men we are bound to give the remedy a trial. If it turns out to be ineffectual, no harm will have been done, while we shall have gained experience on a matter in which we can only advance securely by cautiously feeling our way. With these remarks, my Lord, I would commend this Bill to the acceptance of the Council."

The Hon'ble DR. RASHBEHARY GHOSE said: "I wish to say a few words on the motion before the Council. The Bill has met with considerable opposition from my countrymen, but the opposition, if I understand it rightly, is not to the principle of the Bill, but only to the way in which it is feared it may be worked by an unscrupulous police. Now, my Lord, I must say I am not altogether free from such misgivings, possibly because, as Sir Antony MacDonnell would say, I cannot rise superior to my environments. But two considerations have mainly influenced me in giving my support to the Bill. The first duty of the Government is to keep the peace, and when a spirit of lawlessness is abroad, if its responsible advisers think that special powers are needed to maintain the public peace, anybody who opposes such a measure must incur a very serious responsibility, which I, for my part, am not prepared to risk in the present instance. The second consideration is that section 44 of the present Act, the proposed addition to which has called forth the strongest opposition, imposes upon the public the duty of giving notice of a great many offences, but I have never heard that it has been oppressively used by the police. Sir Antony MacDonnell has warned us against prophesying till you know; but there is a well known saying that the best prophet of the future is the past. The history of section 44 is a blank, like the chapter on snakes in the famous History of Iceland. There can be therefore no serious cause for alarm, at least in the minds of those who believe that by widening the responsibility of the public you would

not add a new terror to section 44. The offence, moreover, is not a cognisable one. On these grounds, although fully appreciating the anxiety of my countrymen, I am prepared to give my support to the measure."

His Honour THE LIEUTENANT-GOVERNOR said: "I did not intend to make any remarks on this Bill, as the objections which I had taken to it have been mentioned with perfect fairness by my hon'ble friend in his opening speech; they have been considered by the Select Committee, and some of the suggestions have carried weight; while others have not been thought of sufficient importance to necessitate any alterations in the terms of the Bill. I do not therefore wish to press them any further. My only reason for making a remark on the present occasion is that I wish to refer to an observation which fell from the Hon'ble Dr. Rashbehary Ghose, who seemed to imply, if I understood him rightly, that the Bill was likely to be altogether a dead-letter. I should be very sorry if this impression got abroad. I believe that the genesis of the Bill arose to a great extent out of the lamentable anti-cow-killing riots which occurred in various places up-country last year, and because it was found necessary to strengthen the hands of the Executive with a view to putting down any recurrence of cases of this kind. But I should very much regret if an impression got abroad that when cases of this kind occurred—if widespread and nefarious conspiracies should again be hatched over a large extent of country, inducing Hindus to attack Muhammadans in the exercise of their religious privileges or of their private rights—I should, I say, be sorry if any impression got abroad that the Government would not take advantage of the provisions created by this amended Bill to punish any headmen of villages, or any officers of any kind who could be proved to be cognisant of such conspiracies beforehand, and who had failed to report them to the Government whose business it is to put such riots down. Speaking for myself, I can safely say that my endeavour will be to work these sections effectively if any such unfortunate occurrences should again break out, and I sincerely trust that if the law does turn out to be a dead-letter, as the Hon'ble Dr. Rashbehary Ghose seems to think it will, it will be a dead-letter for this reason, that it will arise from fear of the consequences of the provisions of the Bill being given effect to, so that it will not be necessary to put the law into force because conspiracies will not be hatched or riot will not break out. I trust it will be distinctly understood that it is the intention of the Government to put this law into force, and, if occasion should unfortunately occur, that the Bill will not be allowed to remain a dead-letter."

The Hon'ble DR. RASHBEHARY GHOSE, with the permission of His Excellency the President, said that his observations had been somewhat misunderstood by His Honour the Lieutenant-Governor of Bengal. His, the speaker's, remarks had been confined to section 44 only of the Code, the proposed amendment of which had caused widespread alarm, and he had wished only to draw attention to the fact that, although, even under the present law, the public are bound to give information of the commission of a variety of offences, it was not said by the critics of the present Bill that the law had been vexatiously or oppressively used by the police.

The Hon'ble SIR ANTONY MACDONNELL said: "I think that I express the feeling of the Council when I say that we recognise the loyal and patriotic spirit which animated the remarks of the Hon'ble Dr. Rashbehary Ghose. He says that when responsible administrators think, with reference to events which have unhappily taken place, that it is desirable to strengthen the means of preserving order, that it becomes every patriotic and loyal subject of Her Majesty the Queen not to reject at once the demands which have been made by those administrators, but, where they are reasonable and do not exceed the bounds of wisdom, to agree to them. I consider that Dr. Ghose's remarks on this point are conceived in good spirit, and I wish to express my acknowledgments to him. I do not, however, take the same view that he does that this Bill will be inoperative. His argument on this point seems to be that because, in his opinion, section 44 of the Criminal Procedure Code has been inoperative, therefore this Bill must also fail. I am not prepared to admit that section 44 of the Criminal Procedure Code has been inoperative. I have no statistics at hand just now as to its working, but even if the general public have not given the information which the section requires, the information has, all the same, reached the

authorities. It is not necessary that the public should give information to the police with regard to such offences as murder, attempted robbery, etc. The people who are injured in such cases come forward, and they take off the general public the responsibility of making these reports. The police are in possession of the reports regarding the serious offences in section 44, and it is only to enable them to get information with regard to other offences which individuals have not the same interest in reporting that we now desire to enlarge the bounds of the section.

"I have listened to my hon'ble friend the Lieutenant-Governor's remarks with satisfaction, inasmuch as they shew that this Bill will, in the interests of law and order, be put into operation, not oppressively, but in such a manner that information will reach the Executive in time to prevent such outrages as some of those which took place during the last year. It is unnecessary for me to say more, and I am glad to find that the Bill commends itself to the judgment of the Council."

The Motion was put and agreed to.

The Hon'ble SIR ANTONY MACDONNELL also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

DEKKHAN AGRICULTURISTS' RELIEF ACTS, 1879 TO 1886, AMENDMENT BILL.

The Hon'ble MR. LEE-WARNER moved for leave to introduce a Bill to amend the Dekkhan Agriculturists' Relief Acts, 1879 to 1886. He said: "My Lord, the comparatively short Bill which I now ask leave to introduce represents the desire of the Government of Bombay to give effect to the recommendations made by a Commission of Enquiry appointed by the Government of India. If it does not go to the full length of the resolutions of that body, it goes further than the Local Government would of itself have proposed, and it continues the policy which the Government of Bombay has pursued since 1879 of courting full criticism and discussion upon an interesting experiment, and accepting amendments which will not interrupt the success of past legislation. Before explaining the amendments, I will briefly recall to mind the course of events leading up to the recent Commission which has now brought us to further legislation. On the 17th of July, 1879, the Hon'ble Mr. Hope introduced a Bill for amending the procedure of the Courts in certain classes of litigation in four districts in the Dekkhan, and relieving, so far as any Legislature can deal with a great agrarian and social problem, certain incidents of agricultural distress and discontent which had attracted prominent notice in that part of India. He catalogued his objects in these terms:

'(1) Precautions against fraud by either debtor or creditor in their original transactions with each other; (2) interposition of friendly conciliation between disputants previous to litigation; (3) approximation of the Courts to the homes of the people; (4) some small simplification of procedure and diminution of the expense and technicalities arising from legal practitioners, (5) equitable jurisdiction to reduce all exorbitant, fictitious and fraudulent claims; (6) finality of judicial decisions, subject to adequate safeguards; (7) prompt and unfailing enforcement, through the Collector when necessary, of all adjudicated claims of reasonable amount; (8) discharge of the debtor from such claims, or the balance of them, as after all reasonable enforcement for a long period could not be fully realised, except by demoralisation and life-long bondage.'

"The Bill as amended became law in October, and, in 1881, 1882 and 1886, the Act, XVII of 1879, was further amended by this Council.

"A healthy and most beneficial criticism of the Act was excited both in this Council and elsewhere—a criticism to which must be attributed the popularity which the Acts have on the whole enjoyed in the districts where they run, and in the surrounding territory. Some of the fears which then racked the minds of observant critics may be mentioned. It was feared that any attempt to place the peasant-debtor, weighted with ignorance and inherited debt, and his creditor, with his superior advantages of purse and intelligence, upon a fairer footing would produce injustice by intercepting some of the legitimate profits of the

moneylender's trade. The exercise of a correctional power over contracts and improvident bargains seemed a novel and dangerous task, and it was anticipated that the moneylending class would soon discover methods of evading the law, partly by insisting on the actual transfer of the land as security, and partly by means of fictitious proceedings before the conciliator or by other transactions. The demoralisation of rural society was predicted as a consequence of the temptations offered by paternal legislation to the setting up of false defences. Errors due to corruption, incapacity and irresponsibility were expected to flow from the substitution of revision for regular appeals. The system of conciliation would only create delay and offer opportunities for evasion of the Act and for corrupt practices. The 'blundering benevolence' of the provisions as to registration would lead to oral contracts. Such were some of the criticisms offered in this Council which found echo elsewhere. The amending Act of 1881 enabled Mr. Justice West to express in his usual weighty and thoughtful style the fears which occurred to his mind in looking forward to the probable effects of the Act. The Secretary of State for India, Lord Hartington, thereon called for a special report, which was drawn up and submitted by Mr. Woodward in 1883. Certain issues raised in it were subjected to further discussion by a Committee, sometimes called Mr. Gonne's Committee, and upon this information the Government of Bombay assured the Secretary of State for India that the Act had proved a success. In November, 1884, Lord Kimberley, the Secretary of State, accepted the following conclusions :

'It is shown that cultivation has extended in area since the Act became law; that it has not fallen off in quality; that the revenue is realised as punctually as ever; that it has ordinarily been paid from the produce of the land, not by borrowing or by the sacrifice of agricultural stock; and that, in those tracts which have suffered at once from short harvests and low prices, the people have struggled against the difficulties of the seasons as successfully as they did before the Act was passed. It is the opinion of officers who possess intimate knowledge both of the working of the law and of the condition of the people that the moral effect of the law has been good; that it has encouraged thrift, prudence and mutual help. Finally, it is confidently stated that the opinion of the raiyats themselves is altogether in favour of the Act.'

"Lord Kimberley's despatch eventually led to the amendments which were embodied in Act XXIII of 1886, and it is principally in regard to the sections then added to the original Bill that the Bill which I now seek leave to introduce asks for further powers from the Legislature. In 1888 Lord Cross suggested a special report upon the working of the Act if the continuance of the Special Judge was advocated. In April, 1889, Mr. Woodburn submitted his report, and it received the most searching criticism at the hands of Sir Raymond West, who had then become a Member of the Bombay Council. In view of the large issues raised, upon which, so far as the Bill is concerned, the Council need not be troubled to exercise its judgment, the Government of India decided to appoint an independent Commission, under the presidentship of Mr. J. W. Neill, to ascertain how far the results of the legislation had justified the anticipations of its promoters. The report of the Commissioners, dated 11th June, 1892, confirmed the opinions expressed by those who preceded them, that a load of debt had been taken off the raiyat's shoulders without demoralising him or shaking his credit and without ruining the moneylender. They affirmed the success of the six leading provisions of the Act, namely, (1) the provisions against *ex parte* decrees, (2) those for going behind the bond, (3) those for redemption-suits and suits for account, (4) those for payment by instalments, (5) the abolition of imprisonment for debt, and (6) the limitations upon sales of immoveable property to cases where it was specially pledged, and recommended the retention of conciliation and compulsory registration. They criticised each section of the Acts and advocated a series of amendments. They went further and proposed an outline of a general Act for agriculturists throughout India, and certain amendments of the general laws affecting all classes of the community in respect of contracts, civil procedure, evidence and limitation, which lie beyond the scope of this simple Bill. Upon their report the matured views of Sir Raymond West are not wanting, and a paper which he read before the Society of Arts in London on the 18th of May, 1893, will no doubt have attracted the attention of those who are interested in the whole question. Meanwhile, the Government of Bombay had in March of

last year arrived at its conclusions upon the report, so far as that report dealt with the law actually in force in the Dekkhan, and addressed the Government of India. The Bill which I seek to introduce gives effect to the final decision of the Government of India upon the particular issues so raised.

"I have thought it my duty, my Lord, to give the Council this outline of the discussion through which the Acts introduced by Sir Theodore Hope have passed. The Council will not fail to observe the unusual degree of attention given to the operations of the Acts by the Local Government, the ability with which actual and potential objections to the Acts have been brought to public notice, the deliberate judgments passed by Her Majesty's Secretaries of State, and more recently by the Commission appointed by the Government of India, and the safe foothold thus obtained by experience and deliberation for further action. Having served in two of the districts in several capacities both before and after the introduction of the Dekkhan Relief Acts, I might be justified in stating the results and grounds of my own experience; but I think it unnecessary to trouble the Council with any general remarks in view of the more simple and narrow issue raised by my present motion. I am sure that the Council will attach weight to the view that a law dealing with contracts and transactions of rural society, which has been in force for nearly fifteen years in a certain area, could not be materially altered without a grave dislocation of existing relations and calculations, and that neither the opinion of the Local Government or of the population affected, nor that of the Secretary of State, nor that of the recent Commission would justify such a reversal of our past proceedings. The principle of avoiding great changes of law will, I trust, commend itself to this Council as a reasonable proposition, and as it involves no tax upon their critical or jural faculties will tend to disarm controversy. If that is conceded, I have only to show that the few amendments which it is proposed to introduce are reasonable and uncontentious.

"The changes which require mention are the following. A power to extend the Act to any other districts was conferred on Government in 1886; but there may be strong reasons for extending its operations to parts of a district and not to the whole of it. The district of Nasik, for instance, was created by severing talukas from Ahmadnagar and Khandesh, by the annexation of Peint, and by raising the core of the district round Nasik from a sub-district to the dignity of a district. With the Act in force in Ahmadnagar, its extension to the talukas in similar circumstances which have been transferred from it and added to Nasik might be necessary without bringing Peint or some of the Khandesh talukas under the law. Section 1 as amended will give this power. The alterations in section 2 in the definition of 'agriculturist' explain themselves, and, in one instance, the change of phrase from 'includes' to 'means' actually represents what was originally intended. A well-guarded addition is made to section 13, so as to give what effect is possible to the Commission's recommendations in favour of agreements for the set-off of profits against interest and assessment. The present section 14 is made of general application and transferred to Chapter XI as section 69B. The amendment to section 15D (3) is an obvious improvement, since it gives the mortgagor time to find the money payable under the decree, and so gives effect to the intention of the Legislature. **It is probable that hereafter section 61 will be altered so as to place the village-registration under the district-officers. The administration of the Relief Acts was intended to be the especial care of the revenue-officers, and there is not a revenue-officer in Bombay outside the four districts who, in view of the great agrarian question (the sale of rights in the soil) that is pressing for decision, can afford to treat as of no concern to him the working of the Dekkhan Acts. The separation of village-registration from the control of the district-officers was not intended by the framers of the Act, and the Government of Bombay has been addressed on the subject of amending this section. A new clause has been added in new section 69A providing for payments out of Court, which is in accordance with the spirit of decisions passed by various High Courts in India. For the rest the omissions of sections 8, 9, 15, 19 and 73 of the existing Acts will no doubt meet with the approval of this Council, and they require no detailed explanation. In conclusion section 72 is**

amended so as to exclude from the special limitation period any new tracts of country to which the Dekkhan Relief Acts may be extended, in the expectation that the ordinary law of limitation will presently be amended so as to provide a reasonable time within which all suits will be brought."

The Motion was put and agreed to.

The Hon'ble MR. LEE-WARNER also introduced the Bill.

The Hon'ble MR. LEE-WARNER also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the Bombay Government Gazette in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

The Council adjourned *sine die*.

S. HARVEY JAMES,

Secretary to the Government of India,
Legislative Department.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 7th, 1894.

General Summary.—The great uniformity in the distribution of pressure and its large excess in Northern India, which formed the chief features of the meteorology of the previous week, did not continue long during the week under review. A rapid fall of pressure over nearly the whole of India had taken place by the morning of the 1st; and, though pressure still continued pretty uniform, the changes accompanying a further fall during the next twenty-four hours made important modifications in the pressure distribution, and steepish gradients, with pressure more or less largely in defect in North-Western India, prevailed till the morning of the 5th. By the morning of the 6th a rapid fall in North-Eastern India and a rapid rise in the north-west had produced greater uniformity in the pressure distribution, and had restored pressure to nearly the normal over the whole of India, preparatory to a reversal next day of the conditions that had prevailed hitherto; for by the following morning an unusually rapid fall in North-Eastern India had transferred the area of largest defect to that part of the country. A deepish depression was shown over North Bengal and North Bihar, with steep gradients to the south and west, giving strong easterly winds in the Assam Valley, very strong southerly winds at the head of the Bay, and steady west winds increasing in strength down the Gangetic Plain. The depression was evidently due to a disturbance in the mountain or plateau area to the north of Bengal. It gave heavy rain to some parts of Assam and snow in Upper Sikkim, but in Bengal the westerly winds it produced showed their influence in a decrease of humidity and an increase of temperature. The first part of the week was marked by steadily increasing temperature in North-Western India, and on the 2nd the maximum day temperature rose to 110·3° at Jacobabad, or 13° above the normal maximum temperature of the day; but from the 3rd temperature in North-Western India commenced to decrease, and the area of

highest temperature was gradually transferred eastwards, until by the end of the week the highest maximum recorded in India was 106·3° at Chaibassa in Western Bengal. With the exception of a few showers of rain generally accompanying thunderstorms in the Punjab, Bengal, and the south of the Peninsula, fine weather prevailed throughout the week. The mean temperature for the whole of India for the week was 1·1° in excess of the normal.

Daily Summary.—*Sunday*.—A general fall of pressure over the whole of India reduced pressure to practically the normal everywhere. Shallow low pressure areas lay over Sind and North-West Rajputana and the eastern districts of the North-Western Provinces, but they were not of much importance. Light showers of rain were reported from a few stations. Ordinary hot weather conditions prevailed generally.

Monday.—Pressure continued to give way everywhere, the fall being greatest in the Punjab and Sind, where a deepish depression was shown accompanying the rapid increase of temperature in that area. A shallow depression of no great importance lay over Central Burma. Winds had increased in strength on the Sind and Kathiawar and the Bengal and Orissa Coasts. A few showers of rain were reported, the heaviest being one of ·70 inch at Sibsagar.

Tuesday.—Pressure had changed irregularly and by small amounts, and its distribution differed but little from that of the previous day. The Central Burma depression was unchanged in position and character, but the one in the north-west had moved eastwards, and now lay over the Central and South Punjab. Local thunderstorms were reported from Bengal, the Circars, and the Punjab Hills, and rain had fallen at several stations, Cocanada receiving 1·03 inches, Bogra ·66 inch, False Point ·59 inch, and Mymensingh ·50 inch.

Wednesday.—A general rise of pressure had taken place, and pressure was shown considerably in excess in Assam. The South Punjab depression had moved eastwards and had broken up among the hills, and the hot weather depression in Sind had reappeared with pressure nearly a sixth of an inch in defect at Jacobabad. Strong winds continued on the Bengal Coast and in Cutch, Kathiawar, and the western districts of Rajputana and Central India. Rain was reported from Bengal, Assam, and the Punjab and Kashmir Hills, and a few showers from the south of the Peninsula. Srinagar received 1·02 inches and three other stations over half an inch.

Thursday.—Pressure continued to increase, but the barometric changes, as for some days past, were very irregular. The hot weather depression in Sind was more clearly defined, and another very shallow depression, with winds showing a feeble cyclonic tendency, lay over the central districts of the Gangetic plain. Strong easterly winds were blowing in the Lower Assam Valley, and strong southerly winds continued on the Bengal Coast. Showers of rain exceeding half an inch were reported from Mangalore (1·45 inches), Colombo (1·15 inches), Silchar, and Sibsagar.

Friday.—Temperature had fallen rapidly in the Punjab and Sind, due to numerous duststorms, and the hot weather depression in that area had temporarily filled up. The barometric changes were large and irregular, and the pressure distribution was more uniform than it had been for some days past. The Central Burma low pressure area was more prominent, and a shallow depression was shown over West Bengal. Over half an inch of rain was received at Colombo (·75 inch), and at a few stations in Bengal, Assam, and the Punjab.

Saturday.—The barometric changes were large and important. Pressure had given way very rapidly in North-Eastern India and Upper Burma, the fall amounting to nearly two tenths of an inch in Assam and North Bengal. A low pressure area with steep gradients to the south and west covered North Bengal and North Bihar. Winds had increased considerably in South Bengal. Easterly winds were blowing in the Assam Valley and westerly winds down the Gangetic plain, extending across Bihar into West Bengal, where they had caused a considerable decrease in humidity. Heavy rain was reported from Silchar (2·75 inches) and Sibsagar (2·09 inches), and nearly 1 foot of snow from Gnatong. Rain had also fallen in the Punjab, at the Upper India Hill stations, and in the south of the Peninsula, but the falls were generally very light. Calicut received 1·48 inches during a thunderstorm.

Temperature.—**The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:**

Province.	April 1894.							Mean variation of week.
	1st.	2nd	3rd	4th.	5th.	6th.	7th

Mean for whole of India .	+0·9	+1·1	+0·9	+1·4	+1·3	+1·0	+0·9	+1·1

The only feature of the temperature of the week calling for special notice is the excessive temperature registered in the Punjab and in Sind and Rajputana. In all the other Provinces the variations from the normal were not large; and, with the exception of the North-Western Provinces and Oudh, where it was slightly in excess, the mean temperature for the week may be considered normal. But in the Punjab and in Sind and Rajputana the mean temperature for the week was more than 4° in excess. In the Punjab the excess varied between 4° and 7° each day until the morning of the 6th, when a large fall of 5½ degrees took place in the mean temperature of the whole Province, caused by the occurrence of numerous duststorms in that area during the previous day. The mean temperature for the whole of India was in more or less slight excess on every day of the week. For the whole week it was 1·1° above the normal.

Rainfall.—The rainfall of the week, though mostly small in amount, has been more general than that of the previous week. Thirty-one of the fifty-two rainfall divisions received rain. In eleven the average rainfall for the week did not exceed a tenth of an inch, in fifteen others it varied from a tenth to half an inch; and in only three did it exceed one inch. The largest average rainfall was that of Assam, where it amounted to 4·11 inches in the Surma Valley and 2·35 inches in the Brahmaputra Valley. In twenty-one divisions the rainfall of the week was in excess of the normal, but in only Assam, Central Bengal, the Punjab Hill Districts, and Malabar did the excess amount to more than ·25 inch.

As will be seen from the following table, the rainfall for the period 4th March to 7th April was generally in defect. It was in excess only in Tenasserim, Berar, Central Provinces (West), Bombay and Malabar Coast Districts, Madras (South and Central), the Punjab Hill Districts, and the North-West and West Punjab. But since the normal rainfall for this period is small, the defect in all cases was also necessarily but small. The largest defect continued to be in Assam, where it amounted to 5·50 inches this week as against 7·68 inches last week.

The largest amounts received at individual rain-gauge stations during the week are all reported from Assam and Bengal, and are the following: Cherra (Khasia and Jaintia Hills), 8·83 inches, Sylhet, 6·72 inches, Silchar, 4·95 inches; Bogra, 4·17 inches (3·51 inches of which fell in one day, the 4th), and Brahminbaria (Tipperah), 4·13 inches.

An important snowfall report received during the week from the Superintendent of the Observatory at Leh in Ladak for the month of February stated that the snowfall in Ladak during the past winter had been unusually heavy and quite abnormal. The passes were all blocked with snow up to the end of February, and it was estimated that the accumulation of snow on the higher passes was not less than 20 feet. Snow had been lying continuously since the 21st January in the open Indus Valley down to an elevation of 8,000 feet, which is a very rare occurrence.

highest temperature was gradually transferred eastwards, until by the end of the week the highest maximum recorded in India was 106·3° at Chaibassa in Western Bengal. With the exception of a few showers of rain generally accompanying thunderstorms in the Punjab, Bengal, and the south of the Peninsula, fine weather prevailed throughout the week. The mean temperature for the whole of India for the week was 1·1° in excess of the normal.

Daily Summary.—*Sunday.*—A general fall of pressure over the whole of India reduced pressure to practically the normal everywhere. Shallow low pressure areas lay over Sind and North-West Rajputana and the eastern districts of the North-Western Provinces, but they were not of much importance. Light showers of rain were reported from a few stations. Ordinary hot weather conditions prevailed generally.

Monday.—Pressure continued to give way everywhere, the fall being greatest in the Punjab and Sind, where a deepish depression was shown accompanying the rapid increase of temperature in that area. A shallow depression of no great importance lay over Central Burma. Winds had increased in strength on the Sind and Kathiawar and the Bengal and Orissa Coasts. A few showers of rain were reported, the heaviest being one of ·70 inch at Sibsagar.

Tuesday.—Pressure had changed irregularly and by small amounts, and its distribution differed but little from that of the previous day. The Central Burma depression was unchanged in position and character, but the one in the north-west had moved eastwards, and now lay over the Central and South Punjab. Local thunderstorms were reported from Bengal, the Circars, and the Punjab Hills, and rain had fallen at several stations, Cocanada receiving 1·03 inches, Bogra ·66 inch, False Point ·59 inch, and Mymensingh ·50 inch.

Wednesday.—A general rise of pressure had taken place, and pressure was shown considerably in excess in Assam. The South Punjab depression had moved eastwards and had broken up among the hills, and the hot weather depression in Sind had reappeared with pressure nearly a sixth of an inch in defect at Jacobabad. Strong winds continued on the Bengal Coast and in Cutch, Kathiawar, and the western districts of Rajputana and Central India. Rain was reported from Bengal, Assam, and the Punjab and Kashmir Hills, and a few showers from the south of the Peninsula. Srinagar received 1·02 inches and three other stations over half an inch.

Thursday.—Pressure continued to increase, but the barometric changes, as for some days past, were very irregular. The hot weather depression in Sind was more clearly defined, and another very shallow depression, with winds showing a feeble cyclonic tendency, lay over the central districts of the Gangetic plain. Strong easterly winds were blowing in the Lower Assam Valley, and strong southerly winds continued on the Bengal Coast. Showers of rain exceeding half an inch were reported from Mangalore (1·45 inches), Colombo (1·15 inches), Silchar, and Sibsagar.

Friday.—Temperature had fallen rapidly in the Punjab and Sind, due to numerous duststorms, and the hot weather depression in that area had temporarily filled up. The barometric changes were large and irregular, and the pressure distribution was more uniform than it had been for some days past. The Central Burma low pressure area was more prominent, and a shallow depression was shown over West Bengal. Over half an inch of rain was received at Colombo (·75 inch), and at a few stations in Bengal, Assam, and the Punjab.

Saturday.—The barometric changes were large and important. Pressure had given way very rapidly in North-Eastern India and Upper Burma, the fall amounting to nearly two tenths of an inch in Assam and North Bengal. A low pressure area with steep gradients to the south and west covered North Bengal and North Bihar. Winds had increased considerably in South Bengal. Easterly winds were blowing in the Assam Valley and westerly winds down the Gangetic plain, extending across Bihar into West Bengal, where they had caused a considerable decrease in humidity. Heavy rain was reported from Silchar (2·75 inches) and Sibsagar (2·09 inches), and nearly a foot of snow from Gnatong. Rain had also fallen in the Punjab, at the Upper India Hill stations, and in the south of the Peninsula, but the falls were generally very light. Calicut received 1·48 inches during a thunderstorm.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:

SIMLA, *12th April, 1894.*

W. A. BION,
Actg. Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 7th April.*—Showers have fallen in many parts, especially in the Central, Southern, and Western districts. Agricultural operations almost at a standstill, but some harvesting still proceeds with moderate yield. Standing crops generally fair. Pasturage scarce, but fodder abundant, and condition of cattle good generally. Prices generally easier, and especially in the southern half of the presidency.

Bombay.—*For week ending 11th April.*—Rain generally slight in parts of ten districts. Standing crops damaged by blight, rust, insects, or scorching winds in parts of three districts; otherwise good, except cotton in parts of Guzerat. Reaping of late crops progressing in thirteen, and ploughing and sowing operations in as many districts. Cotton picking progressing in six districts. Agricultural stock poor in one district, and fodder insufficient in three others. Prices steady, except in one district. Numbers on relief works Baroda, 615.

Bengal.—*For week ending 7th April.*—There were storms with rain over the greater part of Bengal Proper and Orissa. Ploughing and early sowings are going on, but more rain is wanted. Prospects of spring rice and indigo are good. Sugarcane is being planted. The spring harvest is nearly over, and from most districts the outturn is reported to be satisfactory. The weighment of opium has begun; a somewhat deficient result is expected owing to damage by late blight. The *mahua* (*Bassia latifolia*) crop is giving a good outturn in Chota Nagpur, but is not up to average in the Sonthal Parganas. Cattle are generally in good condition, and the supply of fodder and water is sufficient. The price of common rice is steady.

North-Western Provinces and Oudh.—*For week ending 11th April.*—Weather seasonable. Harvesting of spring crops approaching completion. Threshing and winnowing in progress. Sugarcane is being irrigated in the Eastern and Central districts; elsewhere sowings are in progress. Irrigation of summer crops going on. Opium collections nearly finished. Markets well supplied and prices fairly steady.

Punjab.—*For week ending 11th April*—Rain has fallen in six districts. Harvesting of spring crops commenced. Sugarcane and cotton sowings in hand. Land is being prepared for other autumn crops. Standing crops are in good condition, and the yield is expected to be good. Crops injured by field rats in parts of Lahore and by hail in parts of Dera Ismail Khan. Cattle generally in good condition, and fodder is sufficient throughout the province. The poppy crop is in good condition. Prices unsettled in one district, rising in another, falling in five districts; stationary elsewhere.

Central Provinces.—*For week ending 11th April.*—Weather hot and generally cloudy. Wheat crops a complete failure in Damoh. Scarcity of food

beginning to make itself felt in parts of Saugor, and imports of grain have commenced Harvesting of linseed and gram completed in Bilaspur and in progress in Raipur; that of wheat is either complete or in full swing. Ploughing for autumn sowings commenced in Nagpur, Nimar, and in parts of Seoni. Prices stationary, except in Nagpur, where the price of wheat is rising.

Burma.—*For week ending 7th April.*—Showers of rain have fallen in one district of Lower Burma and in six districts of Upper Burma. In Upper Burma planting of dry-weather paddy continues in some districts and is completed in others. Sowing of early wet-weather paddy has commenced. Plucking of pulse crops and tobacco progressing. Standing crops generally are looking well, but slight damage by insects is reported from three districts. Fodder and water-supply sufficient. The price of paddy has fallen slightly in Rangoon, where the prices both of paddy and rice are much below the normal; fluctuations in prices elsewhere are unimportant.

Assam.—*For week ending 10th April.*—Weather warm. Sowing of early rice continues. Condition of cattle good. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 11th April.*—MYSORE: Rainfall good in parts of the Hassan district, and slight elsewhere. Crops and prospects good. Rice harvested in parts of the Tumkur district. Prices fallen in the Bangalore district.

COORG:—Rainfall moderate. Fodder and water for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 11th April.*—BERAR: Rainfall moderate. Weather hot. Harvesting of spring crops continues in the Amraoti and Ellichpur districts. Preparation of land for the ensuing rain-crop in progress. Water-supply ample. Grazing reported insufficient in the Akot taluka. Prices almost steady.

HYDERABAD: Rainfall moderate during the week. Weeding of hot-weather crops continues. Prices steady.

Central India.—*For week ending 11th April.*—Some rain fell during the week in the Bhopal Agency. Harvesting completed in Western Malwa and Neemuch; in progress in other Agencies. Crops have been more or less damaged in Gwalior, Bhopal, Bundelkhand, Baghelkhand, Bhopawar, and Goona, and the outturn in these Agencies will probably be below average. Agricultural stock in good condition, except in parts of Bhopal. Pasturage good and sufficient in all Agencies, except in some parts of Gwalior. Prices of food-grains steady at high rates, but fluctuating in parts of Bhopawar. Opium crop indifferent in Bhopal; fair elsewhere.

Rajputana.—*For week ending 11th April.*—Agricultural operations, standing crops, and prospects generally satisfactory, but damage to the crops by insects is reported from Karauli and Dholpur. Harvesting continues. Cattle in good condition. Pasturage or fodder sufficient. Prices falling in five States; steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 10th April.*—Rainfall moderate during the week. Weather again fine. Ploughing in progress for the autumn crops. Prospects of spring crops good. Water ample for irrigation. Prices stationary.

JAMMU PROVINCE.—*For week ending 11th April.*—No rain. Crops fair. Cattle in good condition. Prices stationary.

Nepal.—*For week ending 7th April.*—Weather fine. Prospects good.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

No. 1204-*I.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to apply the provisions of Act I of 1894 (The Land Acquisition Act, 1894) to the Hyderabad Assigned Districts, subject to the following modifications, namely:

(1) For the words "Local Government" and "official gazette," or "local official gazette," wherever they occur in the Act, the words "Resident at Hyderabad" and "Hyderabad Residency Orders" respectively shall be read.

(2) In section 1, the sub-sections (2) and (3) shall be omitted.

(3) In section 2, the words "and section 74 of the Punjab Courts Act, 1884," shall be omitted, and for the word "are"-in the same section the word "is" shall be read.

(4) In section 4, sub-section (2), for the words "such Government," the words "the Resident at Hyderabad" shall be substituted.

(5) In section 6, for the words "a Secretary to such Government," the words "the Secretary for Berar to the Resident at Hyderabad" shall be read.

(6) In section 47, the words "or (within the towns of Calcutta, Madras, and Bombay) to the Commissioner of Police" and the words "or Commissioner (as the case may be)" shall be omitted.

(7) In section 54, for the words "High Court" the words "Judicial Commissioner, Hyderabad Assigned Districts," shall be substituted.

2. So much of the notification of the Government of India in the Foreign Department, No. 212-J., dated the 24th October, 1873, as applied the Land Acquisition Act (X of 1870) to the Hyderabad Assigned Districts, and the notification of the said Government in the same Department, No. 209-I.J., dated the 20th October, 1881, are hereby cancelled.

No. 1219-*I.*—Whereas the Governor-General in Council has power and jurisdiction within the Civil and Military Station of Bangalore; In exercise of such power and jurisdiction, and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, XXI of 1879, and of all other powers enabling him in this behalf, the Governor-General in

Council is pleased to apply to the Civil and Military Station of Bangalore the provisions of Act IV of 1889 (The Merchandise Marks Act), as amended by Act IX of 1891, so far as they may be suitable.

2. In exercise of the power conferred by section 16 of the Act as so applied, the Governor-General in Council is further pleased to direct that the provisions of Home Department notification No. 1474, dated the 13th November, 1891, shall apply to that station.

The 13th April, 1894.

No. 1221-*I*.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to make the following rules for the regulation of the manufacture, preparation, and sale of articles of food and drink within the Cantonment of Secunderabad:

1. The Cantonment Committee at Secunderabad may by bye-law—

(*a*) prohibit the manufacture or preparation for sale of any specified articles of food or drink in any premises not licensed by the Cantonment Committee;

(*b*) regulate the grant and withdrawal of licenses to premises for the manufacture or preparation for sale of such specified articles of food or drink;

(*c*) regulate the hours and manner of transport within the cantonment of any specified articles of food or drink;

(*d*) fix the places in which any specified article of food or drink may be sold or exposed for sale, or the places in which it may not be sold or exposed for sale:

Provided that no person shall be punishable for breach of any such bye-law made under clause (*a*) or clause (*d*) of this rule by reason of the continuance of such manufacture, preparation, or exposure for sale, or sale upon any premises which are at the time of the making of such bye-law used for such purpose, until he has received from the Cantonment Committee six months' notice in writing to discontinue such manufacture, preparation, or exposure for sale or such sale in such premises.

2. In making any bye-law under the last foregoing rule, the Cantonment Committee may direct that a breach of it shall be punishable with fine which may extend to fifty rupees, and when the breach is a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues.

3. (*1*) No bye-law made under the powers hereby conferred shall come into force in the Cantonment of Secunderabad until it has been confirmed by the Resident at Hyderabad, and published for such time and in such manner as the Resident may prescribe in this behalf.

(*2*) The Resident may cancel his confirmation of any such bye-law, and thereupon the bye-law shall cease to have effect.

4. Nothing in these rules shall be deemed to confer power on the Cantonment Committee with regard to alcoholic drinks.

H. M. DURAND,

Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Thursday, the 29th March, 1894.

PRESENT:

His Excellency the Viceroy and Governor General of India, P.C., LL.D., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
The Hon'ble Sir A. E. Miller, KT., Q.C.
The Hon'ble Lieutenant-General H. Brackenbury, C.B., R.A.
The Hon'ble J. Westland, C.S.I.
The Hon'ble Sir A. P. MacDonnell, K.C.S.I.
The Hon'ble Dr. Rashbehary Ghose.
The Hon'ble Sir G. H. P. Evans, K.C.I.E.
The Hon'ble Fazulbhai Vishram.
The Hon'ble C. C. Stevens.
The Hon'ble Gangadhar Rao Madhav Chitnavis.
The Hon'ble H. F Clogstoun, C.S.I.
The Hon'ble W. Lee-Warner, C.S.I.
The Hon'ble P. Playfair.
The Hon'ble Mahárájá Partab Narayan Singh of Ajudhiá.

QUESTIONS AND ANSWERS.

The Hon'ble DR. RASHBEHARY GHOSE asked:

(1) Whether the Chief Commissioner of Assam originally proposed an increase of land-revenue in revising the assessments in the Assam Valley

Districts amounting on an average to nearly 70 per cent., and in a large number of cases to about 100 per cent.

(2) Whether the raiyats of the affected districts submitted memorials complaining of the excessive character of the increase, and whether the Chief Commissioner of Assam rejected those memorials and confirmed the rates originally fixed by him.

(3) Whether, after the rejection of those memorials and about four months before the final orders of the Government of India were passed, the Chief Commissioner did not reduce the increase in the rates to about 50 per cent. in a large number of cases and an average of about 40 per cent.

(4) Whether the Chief Commissioner did not pass orders for the realisation of the revenue according to the revised scale of rates while the appeals submitted to the Government of India against his orders were still pending.

(5) Whether the Chief Commissioner did not disallow the prayer of the raiyats for the postponement of the realisation of the increased revenue till the final orders of the Government of India were passed.

(6) Whether, as stated in the newspapers, a large number of Gossains or religious dignitaries of the Hindu religion and other respectable persons in the Kamrup District were confined in the lock-up at Rangia, and were, while so confined, employed on earthwork as a form of out-door labour.

(7) Whether the Government revenue in the lower districts of the Assam Valley is not now being realised by the agency of the respectable inhabitants of the place, who have been appointed special constables for the purpose of realising Government revenue.

(8) Whether the Government of India will be pleased to lay on the table papers showing (*a*) the cause or causes of the recent riots in the different places in Assam; (*b*) the places where such riots occurred, and the circumstances under which the police used arms for the purpose of suppressing the riots; (*c*) whether, as stated in the newspapers, ball cartridge was used by the police; (*d*) the number of people killed and wounded in each place; and (*e*) the places, if any, where the police fired upon the crowd without the authority of the Magistrate.

The Hon'ble SIR ANTONY MACDONNELL replied:

"*First question.*—The answer is that in some cases the increase, as originally proposed, was 100 per cent., but on the average the increase was 53 per cent.

"*Second question.*—The answer is in the affirmative.

"*Third question.*—The answer is yes: the Chief Commissioner, having observed the operation of the rules, reduced the increase from an average of 53 per cent. to an average of 37 per cent.

"*Fourth question.*—The answer is yes.

"*Fifth question.*—The answer is yes, the raiyats having been at the same time informed that full credit would be given to them for payments in excess of whatever rates might be finally fixed by the Government of India. I may add that the Government of India have reduced the increase from an average of 37 per cent. to an average of 32·7 per cent., and have limited the maximum enhancement on an individual holding to about 50 per cent. on the previous rental.

"*Sixth question.*—Certain prisoners, arrested for rioting and confined in the Rangia lock-up, have been employed in constructing temporary houses for themselves, the accommodation afforded by the lock-up being insufficient. But on this point further detailed enquiry will be made.

"*Seventh question.*—The answer is no. Special constables have been appointed under the Act to assist in preserving the peace, but not for collecting the revenue.

"*Eighth question.*—The Government of India have reported on the occurrences to the Secretary of State, and intend to publish the correspondence for general information after the despatch shall have reached the India Office—that is, within about a fortnight. It may, however, be said that the reductions ordered by the Government of India had been communicated to the people before the

riot at Mangaldai, and that the police in firing on the mob acted in self-defence and in the dispersion of an illegal assembly."

The Hon'ble DR. RASHBEHARY GHOSE asked :

Whether the attention of the Government of India has been drawn to the conflict of opinion between the Punjab Chief Court and the Allahabad High Court in their interpretation of the word " object " in section 295 of the Indian Penal Code, the former regarding it as wide enough to include *animate* objects, and the latter restricting it to *inanimate* objects ; and whether, having regard to such conflict, the Government of India do not deem it expedient to set the question at rest by explicit legislation.

The Hon'ble SIR ANTONY MACDONNELL replied :

" The answer to the first part of the question is yes. To the second part of the question, the Government has not as yet come to any decision on the subject."

The Hon'ble MAHÁRÁJÁ PARTAB NARAYAN SINGH OF AJUDHIÁ asked :

1. Is the Government aware of the feeling which prevails as regards the management of religious endowments throughout the country, and is it aware that the funds of these endowments are misapplied and diverted from their original purposes, with the result that throughout the country a strong feeling exists of dissatisfaction at the mismanagement of endowments ?

2. Will the Government of India instruct the Local Governments and Administrations to enquire into this matter and submit reports at an early date ?

The Hon'ble SIR ANTONY MACDONNELL replied :

" To question 1 I would reply : The Government has no recent official information on the subject, but it has noticed in the public newspapers certain expressions of dissatisfaction in regard to it.

" To question 2 I would reply : The position of Government as regulated by Act XX of 1863 in relation to religious endowments and trusts is one of neutrality : but that Act enables persons interested in such trusts to sue the trustees for misfeasance ; and a further remedy for malversation in respect to such trust-funds is supplied by section 539 of the Civil Procedure Code.

" It is for the persons or public bodies interested in the religious endowments in question to submit, if they are dissatisfied with such remedy, such representations as they think fit, accompanied by the evidence which they consider to support them, to the Local Government in the first instance, and through that Government to the Government of India, if they desire an enquiry to be made with a view to a better remedy being applied than those provided by the enactments I have mentioned. In the absence of any such well-supported representations, the Government of India do not propose to direct Local Governments and Administrations to enquire into the matter."

The Hon'ble GANGADHAR RAO MADHAV CHITNAVIS asked :

Is Government aware that under section 47 of the Central Provinces Land-revenue Act, 1881, sources of miscellaneous income cannot be taken into account in the assessment of land-revenue without the previous sanction of the Governor General in Council ?

Was such sanction applied for by the Chief Commissioner or granted by the Supreme Government in the settlement already made in the Raipur and Bilaspur districts ?

Whether it is the fact that miscellaneous income of all sorts has been taken into account to form the basis of assessment in the above districts, and in other districts where the settlement proceedings are now in progress ?

Is it not the fact that miscellaneous income in many villages is of a trifling and precarious character, and in many instances is generally appropriated by the villages and not by the proprietors ?

Will the Government be pleased in view of the above facts to exempt such incomes of a trifling and precarious character from being taken into account in the matter of assessment?

The Hon'ble SIR ANTONY MACDONNELL replied:

"The miscellaneous income referred to by the Hon'ble Member is the *julkur*, *bankur* and *phalkur* of the Bengal Revenue Regulations. To a share of this income the State has an incontestable right.

"The settlement procedure in force in the Central Provinces was based on the rules in force in the North-Western Provinces, one of which runs as follows:

'In addition to the assessment on rentals, the Settlement-officer may take into consideration the average receipts from natural products, such as fruit, fish and other sayar, and add them to the total of the corrected rent-rolls.'

"I may further add that, in reporting for the sanction of the Government of India the special settlement procedure proposed for the Central Provinces, the Chief Commissioner submitted a pattern assessment statement which clearly exhibited siwai or sayar income among the assessable assets.

"The Government of India approved of the Chief Commissioner's proposals, subject to a restriction which does not touch the present questions.

"From this explanation it will be apparent that the answers to the Hon'ble Member's first, second and third questions are in the affirmative. To the first part of the fourth question the answer may also be in the affirmative, as doubtless there are estates without any sayar income, while that source of income is large in others. To the second part of the fourth question I can give no answer, having no specific information on the point. To the fifth question the answer must be in the negative, because, while the share of the sayar income taken as revenue should never exceed a moderate proportion, it is not proper to exempt from assessment altogether without special reason any legitimate source of land-revenue The proper course to follow in the cases, if any such there be, to which the question refers is to make sure that the right of the State is moderately and fairly assessed wherever siwai income exists and not otherwise."

The Hon'ble GANGADHAR RAO MADHAV CHITNAVIS asked:

Whether the Government would enquire fully and consider whether in the interests of improvident raiyats it is not desirable that occupancy-raiyats' holdings should be included in the first proviso to section 266 of the Civil Procedure Code.

The Hon'ble SIR ANTONY MACDONNELL replied:

"I understand the Hon'ble Member to ask the Government whether they will take into their consideration the question of imposing restrictions on the free transferability of raiyats' holdings. This is a most important matter on which various representations have reached the Government, but they are not at present in a position to state whether any action, and, if so, what action, may be suitably taken upon them."

The Hon'ble DR. RASHBEHARY GHOSE said that he had been requested, in the absence of the Hon'ble THE MAHÁRAJÁ OF DURBHANGA, to put the questions standing in his name. The questions were—

1. Is it not a fact that the Municipality of Benares has assessed the Hindu temples of worship, whereas the Muhammadan mosques and Christian churches have not been so assessed?

2. Whether the Madras Proprietary Village Service Bill has received the sanction of His Excellency the Viceroy in Council?

3. Will the Government be pleased to publish the report of Mr. J. D. Rees, while Head Assistant Collector of Tinnevelly in 1879, on the increase of crimes in certain of the raiyatwari villages consequent on the changes in the immemorial village-system by the introduction of Village Service Act, which transferred the control of the village-watchmen from the inhabitants of the village to the direct control of Government.

Summary of Financial Statement, 1894-95.

The Financial Statement was presented in the Legislative Council on March 22nd.

The accounts of 1892-93 had been closed with a deficit of Rx. 833,000, being better by Rx. 248,000 than the results anticipated last March.

The Revised Estimates for 1893-94 show a deficit of Rx. 1,793,000, being worse than Budget by Rx. 198,000. The Imperial Revenue is better than Budget by Rx. 319,000, which is made up of a large improvement of Land Revenue, and a remarkable improvement in Railway Revenue; but a great loss in Opium, and a considerable falling off in Salt. The Land Revenue exceeds by half a million any realizations yet recorded, and Railways show a Revenue of a million better than last year. On the other hand, the Opium Revenue is Rx. 1,185,000 lower than any recorded in recent years.

On the Expenditure side there is a saving in Opium Expenditure, due to a short crop, of Rx. 370,000. An excess of other Imperial Expenditure in India of Rx. 514,000, due chiefly to discount and charges on new Loan, Rx. 160,000, Railway Expenditure, Rx. 151,000, and Army charges Rx. 318,000. The greater part of this last excess arises from the payment of Exchange Compensation Allowance, the charge for which in the Civil Departments has been mostly met by savings in the Budgetted Expenditure.

The saving on Special Defences was in India Rx. 89,000 and in England £66,000. In England there is an excess expenditure of £104,000 in interest due to the Secretary of State having had to raise money in England by borrowing.

Exchange charges are estimated to cost Rx. 307,000 in excess of estimate.

Total expenditure in excess of Budget Rx. 517,000.

The Budget Estimates for 1894-95 are first explained without reference to three special measures taken to meet the deficit.

The Imperial Revenue is taken at Rx. 155,000 better than the Revised Estimates of this year, a very low estimate of Opium Revenue and the loss of seignorage on coinage being made up for by improved Land, Salt, and Railway Revenue.

The Budget Estimates of Imperial Expenditure compared with Budget Estimates of 1893-94 shew, excess in India Rx. 444,000, saving in England £13,000, and additional exchange charges Rx. 1,371,000.

The principal items under the first are, the Expenditure under the recent agreement with the Ameer, Rx. 110,000, Exchange Compensation, Rx. 713,000, partly met by general economies, Railway Revenue Account, Rx. 295,000 due to larger traffic; against reductions of Expenditure under Works, Military and Civil, of Rx. 371,000, and under Special Defence, Rx. 139,000. In England the new charges for interest are made up for by less expenditure under Marine, and on Special Defences.

These figures leave the accounts of 1894-95 in deficit by Rx. 2,923,000. This deficit is met by new Import Duties, net Rx 1,140,000, suspension of Famine Railway Expenditure, Rx. 1,076,000, and Contributions from Provincial Balances of Rx. 405,000.

The final deficit stands at Rx. 302,000.

The Finance Member's Statement proceeds to review the history of the Currency legislation, and its effects on Council Bills and on the price of silver. It announces with the usual reserve that Secretary of State proposes to draw in 1894-95 for £17,000,000 and to raise by temporary loans £2,300,000 besides renewing £6,000,000 outstanding at end of the current year. There will be no loan in India, where the silver balances are over 26 crores.

The Statement concludes with describing the programme as one of retrenchment and vigilance, intended to tide over a transition period; and after pointing out the temporary nature of the relief obtained, says that the position will have to be reconsidered a year hence in the light of the more definite knowledge then available of the conditions on which the future financial position depends.

No. 2 is at present under treatment for an ulcer on the leg.

Applicants intending to buy them should apply to the undersigned, Vizagapatam.

A. W. PEET,

Conservator of Forests, Northern Circle.

CONSERVATOR'S OFFICE, NORTHERN CIRCLE,
MADRAS PRESIDENCY,
Vizagapatam, 18th July, 1893.

THE YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 4th and 5th June, 1894, at 10-30 A.M.

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)	100	50
Dictation (spelling, punctuation, etc.)	100	50
Arithmetic (the whole) . .	240	160
Mensuration (*a*), the whole .	60	30
Book-keeping (*b*), mercantile	100	50
TOTAL	600	400

Minimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it, but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned:—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in Rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no applications received direct.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR,
The 30th March, 1894.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1894. The session begins on Monday, the 4th June, 1894. Candidates must furnish proof that they have passed one of the following tests:—

(1) The F. A. Examination of the Calcutta University or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B. A. Examination in the B. Course. The candidate's age must be under 23 years. (These students are admitted direct into the 2nd-year class.)

The number to be admitted each year is limited to 40. The position in the University Examinations and the age of candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

Ten scholarships will be awarded to students entering the Engineer Department, not being already holders of junior or senior scholarships.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eyesight.

Further particulars will be supplied on application to the Principal.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR,
The 19th April, 1894.

From 1st April, 1891, and until further orders, Cinchona Febrifuge can be purchased by all Government officers and by any one taking *ten pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—four-ounce tin, *R2-8;* eight-ounce tin, *R5;* one pound tin, *R10.* The general public can be supplied by the Superintendent,

Botanical Garden, *for cash only* at the undernoted rates—per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12.* This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

জ্বরঘ্ন সিন্‌কোনার মূল্য কম করণ।

১৮৯১ সালের এপ্রেল মাসের ১লা তারিখ অবধি যাবৎ অন্য আজ্ঞা না হয় তাবৎ কলিকাতায় বোটানিকেল গার্ডণের অর্থাৎ কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট গবর্ণমেণ্টের কর্ম্মচারিগণ এবং অপর কোন ব্যক্তি এক কালীন দশ পৌণ্ড ক্রয় করিলে নিম্নলিখিত হিসাবে জ্বরঘ্ন সিন্‌কোনা পাইবেন অর্থাৎ চারি ঔন্স টিন ২৷৹ টাকায়, আট ঔন্স টিন ৫৲ টাকায় ও এক পৌণ্ড টিন ১০৲ টাকায় পাইবেন। সর্ব্ব সাধারণে কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট নগদ মূল্য দরে এই এই হিসাবে অর্থাৎ চারি ঔন্স টিন ৩৲ টাকায়, আট ঔন্স টিন ৬৲ টাকায় এবং এক পৌণ্ড টিন ১২৲ টাকায় পাইতে পারিবেন। কলিকাতার প্রধান প্রধান ইউরোপীয় ও দেশীয় ঔষধ বিক্রেতাগণও এই ঔষধ বিক্রয় করিয়া থাকেন। উপরোক্ত হার ছাড়া চারি ঔন্স টিনের ।৹, আট ঔন্স টিনের ৷৹ ও এক পৌণ্ড টিনের ৷৷৹ ডাক মাশুল দিতে হইবে।

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

The price of this Quinine is as follows :—

1 Pound tin,	R16,	or,	post free,	R16-12
½ „	R 8,		„	R 8-8
¼ „	R 4,		„	R 4-8

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta. It can be had either white or coloured pink.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

এই কুইনাইনের নিম্নলিখিত মূল্য, যথা—

১ এক পৌণ্ড টিন .	১৬৲ বা ডাকমাশুল বিনা	১৬৷৷৹
৷ আধ „ „	৮৲ বা ডাকমাশুল বিনা	৮৷৹
। সিকি „ „	৪৲ বা ডাকমাশুল বিনা	৪৷৹

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধরূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারিগণের নিকট বিক্রয় করা যাইবে এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে। ইহা শাদা বা পাটল বর্ণের পাওয়া যাইতে পারিবে।

Catalogue of Books printed at Thomason College Press and procurable from Thomason College Book Depot.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments, drawing materials, etc., are not available at the College Book Depôt, but can be obtained from the Superintendent, Canal Foundry and Workshops, Roorkee.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo with numerous Plates.

First two Volumes are published in separate convenient sized Sections, as below, but can be bound up in Volumes if required.

VOLUME I.*

Section	I.	Building Materials (in the Press).		
„	II.	Masonry	(1891),	R1-8
„	III.	Carpentry	(1889),	R1-8
„	IV.	Earthwork		R1-8
„	V.	Tools and Plant (never published).		

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-8
„	VII.	Bridges	(in the Press).	
„	VIII.	Roads	(1888),	R2-0
„	IX.	Railways	(1891),	R1-8
„	X.	Irrigation Works	(1873),	R2-0

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8.

XIII. **Drawing** (by Lieut. R. Pulford, R.E.)† R8.

XIIIa. **Drawing. First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simple Applied Mechanics, Parts I and II** (in the Press).

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition). R3-12.

XVI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 8*a*.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8*a*.; mounted on cloth, to fold up. R1-12.

* Date of Edition on sale.

† Originally published at R15, reduced to R8.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. (In the Press). R1-4.

Specifications and Schedules of Prices for execution of various kinds of Work by Contract, etc. By Major-General F. W. Peile, R.E. R3.

Tyndall's Hand-Book of Specifications (in the Press).

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs. By Rai Kunhya Lal R4.

Blasting under Water (2nd edition). 12a.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 8a.

Roorkee Hydraulic Experiments (in 3 Vols.—Text, Tables, and Plates). By Capt. A. Cunningham, R.E. R12.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into Decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility. (4th edition) R2.

Boileau's Tables of Log sin² ½ P (for computing time). 8a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (In the Press) R1-4.

Cape's Geometry. R1-8.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(SECOND SERIES.)

Quarterly Numbers of Vols. II, VIII, and IX of the Series are available at R3-8 each, and Vol. XI at R2. Cloth covers for Volumes at R1 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15 at R2-8 each.

Index to Professional Papers, 1st and 2nd Series. 8a.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes held at the College will be forwarded to applicants.

J. CLIBBORN, *Major, I.S.C.,*
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1880, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8.

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series . . .	10	0	0	12	8	0
" each of the Madras, Bombay, and Allahabad Series . . .	6	0	0	7	0	0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India* . . .						
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India* . . .						

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy .	0	8	9	0	10	3
" each of the Madras, Bombay, and Allahabad Series; per copy .	0	5	3	0	5	9
" the Calcutta Series. For the year	7	2	6	8	6	3
" each of the Madras, Bombay, and Allahabad Series. For the year	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
Superintendent of Government Printing, Bengal

Orders and subscriptions for 1892 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 6

REVENUE DEPARTMENT.

Horse Surra, Report on, Vol. I, by ALFRED LINGARD, M.B..M.S., Durham. Super royal quarto. R10 (R1-4.)

[Revised Advertisement.]

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O; Vol VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Indian Wheat Trade, Parts, I, II and III, combined. Royal 8vo., Limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes:— Royal 8vo., cloth.

PROMISSORY NOTES.

Lost.

The Government Promissory Note, No. 212466, of the 4 per cent. of 1865, for R 1,000, originally standing in the name of the Comptroller-General, and last endorsed to Syed Ally Zamin, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of proprietor.

SYED ALLY ZAMIN,

Shahjahanpur.

SUPPLEMENT TO

The Gazette of India.

No. 16.} CALCUTTA, SATURDAY, APRIL 21, 1

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Simla, the 18th April, 1894.

No. 7.—The Governor General in Council has been pleased to grant Mr. Kenworthy Brown, Barrister-at-Law, Reporter for the Indian Law Reports in the High Court, Madras, leave of absence from 7th April 1894 to 1st November 1894, or until further orders.

No. 8.—Mr. R. A. Nelson, B.A., LL.B., Barrister-at-Law, Principal of the Law College, Madras, has been appointed to officiate as Reporter for the Indian Law Reports in the High Court, Madras, during the absence on leave of Mr. Kenworthy Brown, or until further orders.

The 20th April, 1894.

No. 9.—Whereas the non-official Additional Members of the Council of the Governor of the Presidency of Fort St. George have, in accordance with the Regulations published in the Notification of the Government of India in the Legislative Department, No. 19, dated 23rd June 1893, recommended the Hon'ble V. Bhashyam Aiyangar, B.A., B.L., Rai Bahadur, for nomination as an Additional Member of the Council of the Governor General for the purpose of making Laws and Regulations to fill the vacancy caused by the death of Mir Humayun Jah Bahadur, C.I.E., His Excellency the Governor General, under the authority vested in him by section 10 of the Indian Councils Act, 1861 (24 and 25 Vict., Chap. 67), and section 1 of the Indian Councils Act, 1892 (55 and 56 Vict., Chap. 14), has been pleased to nominate the said Hon'ble V. Bhashyam Aiyangar, B.A., B.L., Rai Bahadur, to be an Additional Member of the said Council of the Governor General.

S. HARVEY JAMES,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 19th April, 1894.

No. 733.—In exercise of the powers conferred by section 27 of the Indian Arms Act, 1878, the Governor General in Council is pleased to cancel the first sentence of Home Department Notification No. 591, dated the 29th April 1886, so far as it relates to bullets, and the second sentence of that Notification altogether.

No. 734.—In exercise of the powers conferred by section 4 of the Indian Arms Act, 1878, the Governor General in Council is pleased to declare that leaden bird-shot and bullets, when possessed in quantities exceeding 1 cwt. at any one time throughout India and in any quantity in Burma, shall be deemed to be military stores within the meaning of the said Act, and shall be subject to the same restrictions as those placed on lead by clause (*b*) of Home Department Notification No. 508, dated the 1st March 1888.

ESTABLISHMENTS.

The 19th April, 1894.

No. 215.—His Excellency the Viceroy and Governor General has been pleased to make the following appointment on His Excellency's Personal Staff, with effect from the 16th April 1894:

Mr. Henry Babington Smith to be Private Secretary.

MEDICAL.

The 19th April, 1894.

No. 237.—The services of Surgeon-Captain C. Duer, M.B., F.R.C.S., Indian Medical Service (Bengal), are placed temporarily at the disposal of the Chief Commissioner of Assam.

The 20th April, 1894.

No. 239.—Surgeon-Major F. F. Perry, Professor of Surgery in the Lahore Medical College, to officiate as Ophthalmic Surgeon and Professor of Ophthalmic Surgery in the Medical College, Calcutta, during the absence on special leave on urgent private affairs of Surgeon-Lieutenant-Colonel R. O. Sanders, with effect from the 24th April 1894.

JUDICIAL.

The 16th April, 1894.

No. 426.—Under section 26, sub-section (2), of the Petroleum Act, 1886, the Governor General in Council is pleased to prescribe that drafts of proposed rules relating to Upper Burma under the Act shall be published:

(*a*) When the authority making the rules is the Chief Commissioner, in one issue of the local official Gazette in English and in such other language or languages as the Chief Commissioner may direct; and

(*b*) When the authority making the rules is the Governor General in Council, in one issue of the *Gazette of India* in English and in one issue of the local official Gazette in English and in such other language or languages as the Chief Commissioner may direct.

The 19th April, 1894.

No. 443.—Mr. H. W. Gordon, Indian Civil Service, took his seat as an officiating Judge of the High Court of Judicature at Fort William in Bengal on the afternoon of the 9th April 1894.

C. J. LYALL,

Secretary to the Government of India.

CHIEF COMMISSIONER OF BURMA.

NOTIFICATION.

JUDICIAL DEPARTMENT.

Rangoon, the 16th April, 1894.

No. 134.—In exercise of the power conferred by section 5 of the Scheduled Districts Act (XIV of 1874), and with the previous sanction of the Governor General in Council, the Chief Commissioner of Burma is pleased to extend Act XII of 1850 (for avoiding loss by the default of public Accountants) to the whole of Upper Burma (except the Shan States).

By order,

F. C. GATES,

Secretary to the Chief Commissioner, Burma.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATIONS.

No. 543-*G.*—Lieutenant E. G. Jones, Indian Staff Corps, officiating Wing Officer, 16th Madras Infantry, is appointed to officiate as Wing Officer and Adjutant, Deoli Irregular Force, with effect from date of joining, *vice* Lieutenant F. C. L. Waller.

The 16th April, 1894.

No. 557-*G.*—Captain H. Daly, C.I.E., Indian Staff Corps, Political Agent of the 3rd Class, is reappointed to officiate as a Political Agent of the 2nd Class, and is posted as Assistant Secretary to the Government of India in the Foreign Department, with effect from the 3rd April, 1894.

Lieutenant W. M. Cubitt, Indian Staff Corps, officiating Political Agent of the 3rd Class, and is posted as Attaché in the Foreign Department, with effect from the 3rd April, 1894.

The 17th April, 1894.

No. 562-*G.*—With the sanction of Her Majesty's Government, the Governor-General in Council is pleased to recognise the appointments of Messrs. A. Rehling and R. Tocke as Acting Vice-Consuls for Denmark at Bassein and Moulmein respectively.

H. M. DURAND,

Secretary to the Government of India.

The 18th April, 1894.

No. 566-*G.*—Surgeon-Captain P. J. Lumsden, Indian Medical Service (Bengal), is confirmed in the appointment of Residency Surgeon in the Persian Gulf, with effect from the 25th December, 1893, *vice* Surgeon-Major D. R. Ross, M.D., retired.

No. 1299-*I.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased, to apply the provisions, so far as they are suitable, of the Indian Registration Act (III of 1877), and of all subsequent amending Acts, to the lands (hereinafter styled the railway lands) in the territory of His Highness the Nizam of Hyderabad, which are or may be hereafter occupied by the Nizam's Guaranteed State Railway Company, by the Great Indian Peninsula Railway, by the Dhond-Manmad Railway, and by the Madras Railway respectively (including the lands occupied as stations and out-buildings and for other railway purposes), subject to the following modifications:

(1) The third paragraph of section 1 and section 2 shall be omitted.

(2) References to British India and a Local Government shall be read respectively as referring to the aforesaid railway lands in His Highness the Nizam's territory and the Resident at Hyderabad.

(3) For the first paragraph of section 17 the following shall be read:

"The documents next hereinafter mentioned shall be registered if the property to which they relate is situate within the railway lands in His Highness the Nizam's territory (that is to say,)"—

(4) For clauses (*a*), (*b*), and (*c*) of section 33 the following clauses shall be read:

"(*a*) If the principal at the time of executing the power of attorney resides within the railway lands in His Highness the Nizam's territory, a power of attorney executed before, and authenticated by, the Registrar within the railway lands in His Highness the Nizam's territory;

"(*b*) If the principal at the time aforesaid resides in any part of British India in which the Indian Registration Act, 1877, is for the time being in force, a power of attorney executed before, and authenticated by, the Registrar or Sub-Registrar within whose district or sub-district, as defined in the said Act, the principal resides;

"(*c*) If the principal at the time aforesaid does not reside within the railway lands in His Highness the Nizam's territory or in any part of British India in which the Indian Registration Act, 1877, is for the time being in force, a power of attorney executed before, and authenticated by, a notary public, or any Court, Judge, Magistrate, British Consul or Vice-Consul, or representative of Her Majesty or of the Government of India."

(5) For the words "clauses (*a*) and (*b*)" in the proviso to section 33 the words "clause (*a*)" shall be read.

(6) In section 4 for the words "territories subject to such Government" and in section 69 for the words "territories under the Local Government," the words "railway lands in His Highness the Nizam's territory" shall be read.

So much of the notification of the Government of India in the Foreign Department, No. 1144-I., dated the 22nd March, 1888, Part I, as relates to Act III of 1877 is hereby superseded.

No. 1300-*I*.—In exercise of the power conferred by section 35 of the Court Fees Act (VII of 1870), as applied to the Hyderabad Assigned Districts by the notification of the Government of India in Foreign Department, No. 212-J., dated the 24th October, 1873, and in supersession of the orders contained in clause (6) under heading A of the notification by the Government of India in the Department of Finance and Commerce, No. 4650, dated the 10th September, 1889, as applied to the Hyderabad Assigned Districts by the notification of the Government of India in the Foreign Department, No. 1015-I., dated the 26th March, 1890, the Governor-General in Council is pleased to direct that the provisions of the notification No. 4344-S. R., dated the 6th October, 1893, issued by the Government of India in the Department of Finance and Commerce under the Court Fees Act (VII of 1870), section 35, shall apply to the Hyderabad Assigned Districts.

No. 1301-*I*.—In exercise of the power conferred by section 35 of the Court Fees Act (VII of 1870), as applied to the Cantonment of Secunderabad by the notification of the Government of India in the Foreign Department, No. 213-J., dated the 24th October, 1873, and in supersession of the orders contained in clause (6) under heading A of the notification by the Government of India in the Department of Finance and Commerce, No. 4650, dated the 10th September, 1889, as applied to the Cantonment of Secunderabad by the notification of the Government of India in the Foreign Department, No. 1244-I., dated the 19th March, 1891, the Governor-General in Council is pleased to direct that the provisions of the notification No. 4344-S. R., dated the 16th October, 1893, issued by the Government of India in the Department of Finance and Commerce under the Court Fees Act (VII of 1870), section 35, shall apply to the Cantonment of Secunderabad.

No. 1304-*I*.—In exercise of the powers conferred by sections 6 and 9 respectively of the Indian Christian Marriage Act (XV of 1872) as modified by Act II of 1891, the Governor-General in Council is pleased—

(*a*) to grant a license to the Reverend Stephen H. Kearsey, Wesleyan Chaplain at Jhansi, to solemnise marriages within the Central India Agency; and

(*b*) to grant a license to the said Reverend Stephen H. Kearsey authorising him to grant certificates of marriage between Native Christians within the said Agency.

The 20th April, 1894.

No. 800-F.—The following letter is published for information :

No. 766-F., dated Simla, the 18th April, 1894.

From—W. J. CUNINGHAM, Esq., C.S.I., Secretary to the Government of India, Foreign Department,

To—SIR H. MORTIMER DURAND, K.C.S.I., K.C.I.E.

I am directed to convey to you the acknowledgment by the Government of India and by Her Majesty's Government of the very efficient manner in which your recent special duty in Kabul was performed.

2. The Government of India thus expressed themselves in writing on this subject to the Secretary of State—"We desire to place upon record our high sense of the service rendered by Sir Mortimer Durand in discharging the arduous and difficult task confided to him. A settlement such as that which has been arrived at would, in our opinion, have been altogether unattainable but for the confidence with which Sir Mortimer Durand was able to inspire the Amir. That confidence was probably in some measure due to Sir Mortimer Durand's decision to enter Afghan territory without any escort and as the Amir's guest, and there can be no doubt that, as the negotiations proceeded, His Highness became more and more impressed with the sincerity and goodwill of our representative and of the British Government, and gradually abandoned all idea of suspicion or mistrust. To conduct a protracted negotiation of this kind to a successful close required no ordinary qualities of tact and patience—qualities which, together with all others required for so exceptional a negotiation, have been found united to a remarkable degree in Sir Mortimer Durand." To this Lord Kimberley replied—"The warm terms in which your Government acknowledge the services of Sir M. Durand and of the officers attached to him are fully deserved by the admirable tact and discretion with which this most difficult negotiation has been carried through from the beginning to its very satisfactory conclusion. I despatched to you on the 10th November the telegram quoted on the margin, and I now take this opportunity of requesting that you will communicate to Sir M. Durand the entire approval by Her

Telegram, dated the 10th November, 1893.

From—The Secretary of State,

To—The Viceroy.

"Your telegram of 8th. I congratulate Your Excellency and Sir Mortimer Durand on the successful result of the mission to the Amir. The arrangements seem very satisfactory. I await detailed report before commenting on them."

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 14th April.*—Moderate to heavy showers in most parts, except in South Carnatic. Cultivation commencing on the West Coast and to a small extent in other parts, where recent rain has fallen. Standing crops generally fair. Harvest still yielding moderately. Water-supply seasonable. Pasture scarcer, but fodder available. Condition of cattle good. Prices generally slightly easier.

Bombay.—*For week ending 18th April.*—Rain generally slight in parts of the Deccan, Karnatak, and Sind. Standing crops damaged by blight, rust, or high winds in parts of two districts; otherwise good, except cotton in parts of Guzerat. Reaping of late crops progressing in thirteen, and ploughing and sowing operations in fourteen, districts. Cotton picking progressing in six districts. Agricultural stock good. Fodder insufficient in two districts. Prices generally steady. Numbers on relief works: Baroda, 609.

Bengal.—*For week ending 14th April.*—There was rain in the greater part of East Bengal during the week, and a few local showers are also reported from North and South-West Bengal and Orissa. Except in East Bengal, more rain is generally much wanted for ploughing and early sowings. Indigo and spring rice also require rain in some districts. The planting of sugarcane is in progress. The spring harvest is over with a fair outturn for the whole province. The opium weighments indicate that the general yield will be somewhat deficient. *Mahua* (*Bassia latifolia*) has yielded well in Chota Nagpur and the Sonthal Parganas. The supply of fodder and water for cattle is generally sufficient. The price of common rice is almost stationary.

North-Western Provinces and Oudh.—*For week ending 18th April.*—No rain. Weather cloudy at times. Harvesting nearly completed. Threshing and winnowing in full swing. Sugarcane and other summer crops being irrigated. Opium collections are over and weighments have commenced. Prospects good. Markets well stocked. Fodder abundant. Prices generally steady.

Punjab.—*For week ending 18th April.*—Rain has fallen in all but three districts. Reaping of spring crops going on and sowings of extra spring crops in hand. Sowings and weedings of sugarcane and cotton commenced. Standing crops are promising, and their prospects are generally said to be good. Spring crops have been injured by field rats in parts of Lahore and by hail in the Dera Ismail Khan district. Condition of cattle is generally reported good. Fodder sufficient throughout the province. The poppy crop has ripened. Prices rising in four districts, falling in two others, and stationary elsewhere.

Central Provinces.—*For week ending 18th April.*—Weather hot and cloudy. Harvesting completed in Saugor, continues in Jabalpur, Seoni,

Hoshangabad, Raipur, and Bilaspur, and nearly completed in Nimar. Wheat outturn estimated at about one anna and linseed at five annas in a rupee in Damoh. In Jabalpur the former varies from two to eight annas and the latter is one anna. Some pressure is apprehended now in Saugor, where imports of grain have nearly doubled. Imports of wheat commenced in Damoh. Water-supply reported to be insufficient in parts of Raipur. Prices rising in Saugor, Nagpur, and one tehsil of Seoni.

Burma.—*For week ending 14th April.*—Rain has fallen in two districts of Lower Burma and in most districts of Upper Burma. The showers were in most cases light. In Upper Burma planting of dry-weather paddy continues, and sowing of early wet-weather paddy and preparation of hill clearings for paddy commenced. Plucking of pulse crops nearly completed. Standing crops healthy, but slight damage by insects and floods is reported from three districts. Fodder and water-supply sufficient. The price of paddy has fallen slightly in Akyab and risen considerably in Bassein and Pokokko.

Assam.—*For week ending 17th April.*—Weather warm. Sowing of early rice continues. Planting of sugarcane commenced. Condition of cattle good. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 18th April.*—MYSORE : Slight rain has fallen throughout the State. Standing crops in good condition. Rice harvested in parts of the Tumkur district. No material change in prices.

COORG :—Rainfall heavy. Prospect of coffee crops less favourable owing to rain. Fodder and water for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 18th April.*—BERAR : Weather warm and occasionally cloudy. Harvesting of spring crops nearing completion in the Amraoti district. Threshing of wheat and linseed continues in parts of the Melghat taluka. Land under preparation for ensuing crop. Water-supply sufficient. Fodder insufficient in the Akot and Akola talukas. Prices fallen in Buldana owing to the good harvest.

HYDERABAD : Rainfall moderate. Harvesting of spring crops in progress. Weeding of hot-weather crops continues. Prices steady.

Central India.—*For week ending 18th April.*—Slight rain during the week in Gwalior, Bhopal, and Western Malwa. Harvesting continues in the Gwalior, Bhopal, Bundelkhand, and Baghelkhand Agencies ; the probable outturn in these Agencies will be below average. Pasturage good in nearly all parts of Central India. The price of food-grains is rising in Goona; steady in other Agencies. Opium gathered in Bhopal and parts of Gwalior; condition generally fair.

Rajputana.—*For week ending 18th April.*—Rainfall moderate in parts of Bikanir. Agricultural operations, standing crops, and prospects generally satisfactory, but damage to crops by insects is reported from Dholpur. Harvesting continues. Cattle in good condition. Pasturage or fodder sufficient. Prices falling in three States, rising in two, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 17th April.*—Rainfall moderate. Weather again fine. Standing crops in good condition. Ploughing for the autumn crop going on. Prices stationary.

JAMMU PROVINCE.—*For week ending 18th April.*—Report not received.

Nepal.—*For week ending 14th April.*—Weather fine. Crops in good condition, but require rain.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. 2/39.

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Surveys),—dated Simla, the 13th April, 1894.

Read—

Letter No. 426, dated 14th February 1894, from the Director, Geological Survey of India, submitting the Annual Report of the Geological Department and Museum for the year 1893.

RESOLUTION.

1. The work upon which the officers of the Department were engaged during the year under review is shown in the following table:

Name of officer.	Locality where employed.	Character of work.	Whether main object scientific or practical.
Dr. King ...	Sukkur	Inspection of oil borings ...	Practical.
	Tenasserim ...	" of coal exploitation ...	"
	Warora ...	" of the colliery ...	"
	Madras	Examination of hypersthenic igneous rocks.	Scientific.
	Katha	Examination of gold occurrences ...	Practical.
Mr. Griesbach ...	Baluchistan ...	Geological survey	Chiefly scientific and partly practical.
" Oldham ...	Calcutta	Revision of the Manual of Geology	Scientific.
	Rangoon ...	Preparation of a scheme for artisian water-supply.	Practical.
	Yenangyaung ...	Inspection of oil region ...	"
Dr. Noetling ...	Upper Burma ...	Exploration of gold, lead, and coal...	Chiefly practical and partly scientific.
	Dandot	Investigation into causes of accidents at the colliery.	Ditto ditto.
Mr. LaTouche ...	Bhaganwalla ...	Coal boring	Practical.
" Bose ...	Tenasserim ...	Coal exploration	Chiefly practical.
" Middlemiss ...	Hazara	Geological survey	Scientific.
" Datta ...	Tenasserim ...	Coal exploration	Chiefly practical.
" Holland ...	Coimbatore and Nilgiri Districts.	Field petrology and mineral survey	Scientific.
	Calcutta ...	In charge of Museum and Lectures to Geological students at the Presidency College.	Scientific and educational.
" Edwards ...	Quetta	Geological survey	Scientific.
" Smith ...	Ditto	Ditto	Ditto.
	Rewa	Ditto	Scientific and partly practical.

The rule determining the distribution of the officers of the Department for scientific and practical work was laid down in this Department Resolution

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the law relating to Customs-duties, and for other purposes, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th March, 1894:—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the law relating to Customs-duties, and for other purposes, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill, as amended by us, annexed thereto.

From Honorary Secretaries, Bombay Presidency Association, dated 3rd March, 1894, and enclosure [Papers No. 1].
From Messrs. Birkmyre Brothers, dated 6th March, 1894 [Paper No. 2].
Telegrams from Chamber of Commerce, Madras, dated 6th March, 1894; from Bombay Trades Association, dated 6th March, 1894; from Millowners' Association, Bombay, dated 6th March, 1894; from Madras Trades Association, dated 6th March, 1894; from Chamber of Commerce Bombay, dated 6th March, 1894; from Chamber of Commerce, Karachi, dated 6th March, 1894; from Chamber of Commerce, Rangoon, dated 6th March, 1894; from Poona Sarvajanik Sabha, dated 7th March, 1894 [Papers No 3].
From Messrs. W. H. Harton & Co., dated 7th March, 1894 [Paper No. 4].
From Secretary, Calcutta Trades Association, dated 7th March, 1894, and enclosure [Papers No. 5].
From the Manager, New Egerton Woollen Mills Company, Ld., dated 6th March, 1894 [Paper No. 6].
Telegram from Messrs. Best & Co., Madras, dated 7th March, 1894 [Paper No. 7].

2. In the eleven sections of the Bill we have proposed no substantive alteration except in section 5, sub-section (1), clause (a), which we have made applicable to Foreign European Settlements in India generally.

3. *Schedules.*—We have proposed several alterations in the schedules. Those in Schedule I call for no remark.

4. *Schedule II—Arms, Ammunition and Military Stores.*—We have varied Exception II with reference to exemptions now in force in pursuance of remissive orders of the Governor General in Council.

5. *Schedule III, Article 1, Wine.*—Following English laws, we have reduced from forty-five to forty-two per cent. the percentage of proof spirit in wines which is to regulate the rate of duty to be levied on them.

6. *Schedule III, Article 4, Salted Fish.*—We have removed the word "ngapi" as superfluous.

7. *Schedule IV, Article 5, Sugar.*—We have re-classified "sugar," leaving duty to be levied *ad valorem* on all kinds which are not China candy, loaf or crystallised beet. We have added crystallised beet with a tariff valuation of Rs. 14 per cwt.

8. *Schedule IV, Article 10, Agricultural Implements.*—We have removed this article from separate enumeration in the schedule.

9. *Schedule IV, Article 12 (now 11), Metals.*—We have proposed to reduce from five to one per cent. the duty on iron and steel of all kinds.

We have also proposed to make the duty on "lametta, single reels," payable *ad valorem*: and have added words expressly excluding gold bullion and coin from the list of dutiable metals.

10. *Schedule IV, Article 13 (now 12), Oils.*—We have added benzoline to the articles enumerated in the definition of petroleum, and have proposed to make the duty on batching and lubricating petroleum five per cent. *ad valorem* instead of half an anna a gallon.

11. *Schedule IV, Articles 30 (now 29) and (new) 38, Flax and Lac.*—We have proposed that there shall be an uniform duty of five per cent. *ad valorem* on all flax and articles made of flax (including linen-thread). We have also separately enumerated lac of all sorts.

12. *Schedule IV, Article 38 (now 37), Jute.*—We have proposed to remove the exception in favour of gunny-bags.

13. *Schedule IV, Article 45, Paper.*—We propose that a duty of five per centum *ad valorem* be levied on paper of all kinds.

14. *Schedule IV, Article 61, Wood and Timber.*—We have proposed to except railway sleepers and firewood and leave them free.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the law relating to Customs-duties, and for other purposes, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th March, 1894 —

We, the undersigned, Members of the Select Committee to which the Bill to amend the law relating to Customs-duties, and for other purposes, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill, as amended by us, annexed thereto

From Honorary Secretaries, Bombay Presidency Association dated 3rd March, 1894 and enclosure (Papers No 1]
From Messrs Birkmyre Brothers, dated 6th March, 1894 [Paper No 2]
Telegrams from Chamber of Commerce, Madras, dated 6th March 1894, from Bombay Trades Association, dated 6th March 1894 from Millowners Association, Bombay, dated 6th March, 1894, from Madras Trades Association, dated 6th March 1894, from Chamber of Commerce Bombay, dated 6th March, 1894, from Chamber of Commerce Karachi, dated 6th March, 1894 from Chamber of Commerce, Rangoon, dated 6th March 1894 from Poona Sarvajanik Sabha dated 7th March, 1894 [Papers No 3]
From Messrs W H Harton & Co, dated 7th March, 1894 [Paper No 4]
From Secretary Calcutta Trades Association dated 7th March, 1894, and enclosure [Papers No 5]
From the Manager, New Egerton Woollen Mills Company Ld dated 6th March 1894 [Paper No 6]
Telegram from Messrs Best & Co Madras dated 7th March, 1894 [Paper No 7]

2 In the eleven sections of the Bill we have proposed no substantive alteration except in section 5, sub-section (1), clause (a), which we have made applicable to Foreign European Settlements in India generally

3 *Schedules.*—We have proposed several alterations in the schedules. Those in Schedule I call for no remark

4 *Schedule II—Arms Ammunition and Military Stores*—We have varied Exception II with reference to exemptions now in force in pursuance of remissive orders of the Governor General in Council

5. *Schedule III, Article 1, Wine*—Following English laws, we have reduced from forty-five to forty-two per cent the percentage of proof spirit in wines which is to regulate the rate of duty to be levied on them

6 *Schedule III, Article 4, Salted Fish*—We have removed the word "ngapi" as superfluous.

7 *Schedule IV, Article 5, Sugar.*—We have re-classified "sugar," leaving duty to be levied *ad valorem* on all kinds which are not China candy, loaf or crystallised beet. We have added crystallised beet with a tariff valuation of Rs 14 per cwt.

8. *Schedule IV, Article 10, Agricultural Implements.*—We have removed this article from separate enumeration in the schedule.

9 *Schedule IV, Article 12 (now 11), Metals.*—We have proposed to reduce from five to one per cent. the duty on iron and steel of all kinds.

We have also proposed to make the duty on "lametta, single reels," payable *ad valorem* and have added words expressly excluding gold bullion and coin from the list of dutiable metals.

10. *Schedule IV, Article 13 (now 12), Oils*—We have added benzoline to the articles enumerated in the definition of petroleum, and have proposed to make the duty on batching and lubricating petroleum five per cent *ad valorem* instead of half an anna a gallon

11 *Schedule IV, Articles 30 (now 29) and (new) 38, Flax and Lac*—We have proposed that there shall be an uniform duty of five per cent. *ad valorem* on all flax and articles made of flax (including linen-thread). We have also separately enumerated lac of all sorts

12. *Schedule IV, Article 38 (now 37), Jute.*—We have proposed to remove the exception in favour of gunny-bags.

13. *Schedule IV, Article 45, Paper*—We propose that a duty of five per centum *ad valorem* be levied on paper of all kinds

14. *Schedule IV, Article 61, Wood and Timber*—We have proposed to except railway sleepers and firewood and leave them free.

15. The publication ordered by the Council has been made as follows :—

In English.

Gazette.	*Date.*
Gazette of India . .	3rd March, 1894.
Fort St. George Gazette .	6th March, 1894.
Bombay Government Gazette	6th March, 1894
Calcutta Gazette . . .	7th March, 1894.
Burma Gazette . . .	8th March, 1894.

Publication in the remaining local Gazettes has been ordered, but dates of publication have not yet been reported, and they will be later than the date of this Report.

16. We do not think that the measure has been so altered as to require re-publication, and we recommend that it be passed as now amended.

J. WESTLAND.

ALEX. EDW. MILLER.

C. B. PRITCHARD.

H. F. CLOGSTOUN.

FAZULBHOY VISRAM.

P. PLAYFAIR.

The 9th March, 1894.

We accept this Report as far as it goes, but we desire to dissent in so far as it does not include our recommendation for the imposition of customs-duties on cotton fabrics. yarns and thread.

FAZULBHOY VISRAM.

P. PLAYFAIR.

S. HARVEY JAMES,

Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA, *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

No. 3—74, dated 8th March 1893, and it has since been explained by the Government of India that in future eleven out of the fifteen executive officers above the grade of Sub-Assistant should be employed on the scientific work of the survey and four on practical investigation.

2. The most important of the scientific enquiries carried on during the season were in Baluchistan, the Salt Range, Hazara, Coimbatore, the Nilgiris, and in Upper and Lower Burma. The connected survey of Baluchistan was continued under Mr. Griesbach, with the result that a completely mapped and reported record of the area from Sibi to Mangi along the line of the Sind-Pishin Railway has been obtained. Valuable information on the geology of the Salt Range has been furnished by Mr. LaTouche, and the survey of Hazara was brought to a close by Mr. Middlemiss, who has prepared an organised account and a complete map of the geology of the whole district. The petrology of the Coimbatore and Nilgiri districts has been examined by Mr. Holland. The geology of Northern Burma has been explored by Dr. Noetling; and Messrs. Bose and Datta, while engaged on the search for coal on the Great Tenasserim river, have devoted a considerable part of their time in working out the geology of the neighbouring region.

3. At the same time investigations of economic importance have not been neglected. The coal in the neighbourhood of Quetta and in the Harnai Valley has been examined: and satisfactory reports have been prepared on the estimated resources of the Bhaganwalla colliery in the Salt Range and of the Tenasserim coal area. An expert, appointed by Her Majesty's Secretary of State to be Inspector of Mines in India, reached the country towards the close of the year under report, and has been placed under the Director of the Geological Survey.

The auriferous tracts in Wuntho, in Upper Burma, were visited by Dr. Noetling, who was able also to devote his attention to the coal and lead found in the Katha district. Inquiry has also been made as to the presence of lead in Rewa, and the extended occurrence of corundum and iron ores in the Madras Presidency has received a certain amount of attention.

4. At head-quarters Mr. Holland was in charge of the Museum, and the Government of India have learnt with satisfaction that he has made considerable progress in the classification and microscopic description of the large series of rocks collected by officers of the Department and private individuals. Mr. Oldham has brought out a revised edition of the Manual of Indian Geology, in which the letter-press has been largely re-written and the number of plates, maps, and page illustrations has been considerably increased.

The records of the Department and the *Palæontologia Indica* have at the same time continued to maintain their standard of excellence.

5. The thanks of the Government of India are due to the Director and the other officers of the Department for their exertions during the year. His Excellency in Council has it in contemplation to define still further the policy which should guide the Department and Local Governments in connexion with the prosecution of geological enquiries and the better development of the mineral resources of the country.

ORDER.—Ordered, that a copy of the foregoing Resolution be forwarded to the Director, Geological Survey of India, and to Local Governments and Administrations, and that it be published in the Supplement to the *Gazette of India.*

[True Extract.]

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 19th April, 1894.*

Printed and published for the GOVERNMENT OF INDIA, *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

Majesty's Government of his conduct of the important and difficult mission entrusted to him." The Governor-General in Council has much pleasure in thus complying with His Lordship's request.

3. The Government of India cannot but regret, however, that the occasion for conveying to you the sentiments of Her Majesty's Government should also be that on which they must bid you farewell on your departure from India.

4. You entered the Foreign Department Secretariat twenty years ago, and have almost uninterruptedly served in the same office with conspicuous merit and great distinction, occupying in quick succession all grades up to the highest, to which you attained nine years ago. You have, however, been more than once employed for a time outside this office; and your distinguished service on the occasion of your mission to Kabul last year was not the first which you had rendered to your country in Afghanistan, where you served as political officer in the field with credit in the years 1879 and 1880.

5. During your whole service you have sought little relaxation by taking leave of absence, and only when your health temporarily broke under the severe strain of your duties did you once remain absent for any long time. Besides the protracted and critical negotiations which have resulted in the settlement of the boundary and improved relations with Afghanistan, you have had to deal with many matters of the highest importance, among which may be mentioned the settlement of the boundary between Afghan-Turkistan and the Russian dominions, coupled with the negotiations conducted with the Amir on the occasion of His Highness's visit to India in 1885; the conquest, annexation, and consolidation of the administration of Upper Burma; the altered relations of the Government of India with Kashmir; the reconstitution of the Gilgit Agency and extension of political influence in Chitral, Hunza, and Nagar; the negotiations with China relative to the Sikkim frontier; the institution of a British protectorate on the Somali Coast and improvement of British relations with the tribes round Aden; the negotiations relating to the boundary of Burma with Siam and China; and the association of Native States in India with the British Government in furnishing troops for the defence of the Empire.

6. A record so distinguished as the history of your service in India cannot be closed without feelings of regret on both sides. The Governor-General in Council rejoices, however, to think that in the high office to which you have been called in Persia you will still be in a position materially to serve the interests of India, and that this country will not lie altogether beyond the horizon of your regard.

7. The Governor-General in Council now bids you a cordial farewell. You have before you the opportunity of winning great fame and distinction in a career which offers far wider scope than service in India can; and you leave behind you a record which gives brilliant promise of success in the future, while it is one upon which you may always look back with pride.

W. J. CUNINGHAM,

Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

NOTIFICATIONS.

LEAVE AND APPOINTMENTS.

Surgeon-Captain C. G. R. Naylor resigns his commission.

MARINE DEPARTMENT.

APPOINTMENTS.

No. 22.—Sub-Lieutenant E. G. Mills, Royal Indian Marine, to be an Assistant Surveyor, 4th class, Marine Survey of India, *vice* Sub-Lieutenant F. Dobson, Royal Indian Marine, who has vacated.

FURLOUGH AND LEAVE.

No. 23.—The undermentioned officers are granted leave to proceed out of India on private affairs under the leave rules contained in Marine Circular No. 7, dated the 26th April 1892, the specified period to count from the date of being struck off duty:

Commander W. Chandler, Royal Indian Marine, for one year.

Lieutenant J. H. D. St. John, Royal Indian Marine, for one year.

No. 24.—The undermentioned officers are granted leave to proceed out of India on medical certificate under the leave rules contained in Marine Circular No. 7, dated the 26th April 1892; the leave to have effect in India from the date of being struck off duty till the date of sailing; the specified period to count from the date of leaving India:

Lieutenant T. A. L. de Berry, Royal Indian Marine, for one year.

Sub-Lieutenant T. H. H. Hand, Royal Indian Marine, for six months.

P. J. MAITLAND,

for Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Simla, the 20th April, 1894.

Under clause 53 of the Regulations appended to the Regimental Debts Act of 1893, it is notified that reports of the deaths of the undermentioned commissioned and warrant officers on the dates specified were received in the Military Department between the 31st March and the 20th April 1894:

Corps.	Rank and names.	Date of decease.	Place of decease.	Testate or Intestate.	Remarks.
Army Medical Staff .	Surgeon-Captain F. L. Carte .	2nd April 1894 .	Allahabad.		
Ordnance Department, Bengal.	Sub-Conductor J. R. P. Evans	11th April 1894 .	Allahabad.		

P. J. MAITLAND,
for *Secretary to the Government of India.*

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 14th April, 1894.

No. 171.—Mr. F. J. McLaughlin, Executive Engineer, 1st Grade, Local Administration List, is permitted, at his own request, to retire from the service of Government under the provisions of Article 712 (*c*) of the Civil Service Regulations, with effect from the forenoon of the 19th April 1894.

The 18th April, 1894.

No. 173.—Mr. J. W. Parry, Assistant Engineer, 1st Grade, and Executive Engineer, old 4th Grade, State Railways, has been permitted to retire from the service of Government under the provisions of Government of India, Public Works Department, Resolutions Nos. 2873-G. and 463-G., dated the 2nd November 1893 and the 9th February 1894 respectively, with effect from the forenoon of the 7th April 1894.

TELEGRAPHS.

The 17th April, 1894.

No. 172.—The Governor General in Council is pleased to order the following officiating and temporary promotions in the Superior Establishment of the Indian Telegraph Department, with effect from the dates specified:

Name.	From	To	Date.

The 19th April, 1894.

No. 174.—The Governor General in Council is pleased to order the following reversion in the Superior Establishment of the Indian Telegraph Department, with effect from the date specified:

Name.	From	To	Date.
H. W. Smith . .	Superintendent, Class V, 2nd Grade, officiating.	Assistant Superintendent, Class VI, 1st Grade.	13th March 1894.

F. L. O'CALLAGHAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 14th, 1894.

General Summary.—The meteorology of the week affords interesting examples of the changes in temperature and consequently of pressure to be expected at this season of the year. The depression in Bengal noticed at the close of the previous week was by the morning of the 8th intensified; doubtless in part by the considerable increase of temperature in that area caused by the westerly winds it produced; but by the morning of the 9th the heavy rain received in Assam (Silchar alone registering 8·70 inches in the previous 48 hours) had commenced to show its effects by lowering the temperature in that part of the country, and thus causing a brisk rise of pressure. The area of greatest defect of pressure was thereby transferred from Assam, where it was on the 8th, eastwards to North Bengal; and easterly winds commenced to blow from the area of comparatively high pressure in Assam into Bengal, carrying cool air with them. The westerly winds which had been prevailing hitherto began to give way in Central Bengal. By next morning temperature had fallen over the whole of Bengal and the barometer had risen briskly; and, though the depression was still visible, it was steadily filling up, and by the morning of the 11th it had disappeared. At the same time temperature in Sind and North-West India, where it had hitherto been in defect, had commenced to rise; and simultaneously with this rise the Sind hot weather depression again made its appearance. On the morning of the 12th temperature in Sind was nearly 4° in excess, and pressure at Jacobabad was ·10 inch in defect. During the next 24 hours temperature rose more rapidly in the Punjab, and the Sind depression was in consequence transferred eastwards, causing duststorms and thunderstorms in Upper India, and giving heavy rain to the greater part of the North Punjab and adjacent hills. These storms in their turn caused a very rapid fall of temperature in the Punjab and Sind, followed by a rapid rise of pressure and the consequent disappearance of the depression, which had completely filled up by the morning of the 14th.

Rain continued to fall during the week in the south of the Peninsula, chiefly during thunderstorms; but the showers were mostly small in amount and not of any great importance. The most important rainfall of the week was in Assam, where Silchar received 19·59 inches during the six days ending at 8 A.M. on the 12th. Frequent duststorms and thunderstorms caused considerable changes of temperature from day to day; but the mean temperature for the week for the whole of India was normal, being only a tenth of a degree in excess.

Daily Summary.—*Sunday.*—Pressure had again fallen over the whole of India. The fall was brisk in Assam, thus intensifying the depression which had formed in North-Eastern India, and transferring its centre eastwards, where pressure was more than a quarter of an inch in defect. Strong winds with a cyclonic tendency continued in Bengal, and temperature continued to rise owing to the westerly winds generated by the disturbance. Humidity decreased from the same cause, and the lowest humidity percentage in India was that day recorded by Chaibassa in Western Bengal, *viz.*, 18 per cent. Rain fell in Cachar and Upper Assam, Silchar receiving the heavy fall of 5·34 inches. Rain was also reported from Ceylon and Southern India, the largest fall being that of 2·33 inches at Colombo.

Monday.—The depression in North-Eastern India had commenced to fill up, though pressure was still two-tenths of an inch below the normal in North Bengal and East Assam. Winds had decreased in strength in Bengal, and humidity had commenced to increase. Temperature had decreased, though it was still above the normal, the highest maximum temperature of the previous day being registered at Chaibassa. The area of lowest humidity was being transferred westwards, and the lowest humidity percentages were registered at

Sutna, Jhansi, and Patna. Rainfall was almost entirely restricted to Upper Assam and Cachar, and Silchar registered another heavy fall of 3·36 inches.

Tuesday.—Pressure continued in defect in Bengal and Assam, but the depression in that area was steadily filling up. Pressure differed but little from the normal in all other parts of India. Winds were weaker and unsteady in the interior of Bengal. Temperature continued to decrease in Bengal, but it had commenced to rise in Upper India, and there was a marked tendency to the establishment of a feeble cyclonic circulation of winds in Sind and Rajputana. Another heavy fall of rain (3·8 inches) was reported from Silchar, and showers fell in Madras and Mysore, Wellington receiving 1·2 inches and Masulipatam 1·15 inches.

Wednesday.—Pressure had again increased over the whole of India, the rise being greatest in the north-east, where the depression of the past few days had completely filled up. There was a still further rise of temperature in North-Western India, while the decrease in North-Eastern India continued. Silchar again registered the heaviest rainfall (3·84 inches), which made a total of 19·09 inches during the past five days. Rain also fell in Upper Burma, the Deccan, and Southern India, but none of the falls were heavy.

Thursday.—A further rise of the barometer in North-Eastern India had raised pressure in that area to excess of the normal, while a rapid increase of temperature in North-Western India had occasioned a decrease of pressure there and the formation of the Sind hot weather depression. Light to moderate showers of rain fell in Eastern Bengal, Cachar, Central Burma, and Mysore.

Friday.—The changes of pressure were unusually irregular. A rapid increase of temperature in the Punjab had caused pressure to give way briskly in that area, and the Sind depression was hence transferred eastwards, and was advancing towards the Punjab Hills. Duststorms and thunderstorms occurred in Upper India, the Deccan, and Southern India. The following falls of rain exceeding half an inch were reported:—Quetta ·90 inch, Mysore ·85 inch, and Akyab ·55 inch.

Saturday.—Pressure had changed irregularly and by large amounts in North-Western India, and the depression of the day before had disappeared after giving thunderstorms and heavy rain to the greater part of the North Punjab and adjacent hills. The rainfall at Cherat amounted to 2 inches, at Murree 1·66 inches, Dera Ismail Khan 1·41 inches, Rawalpindi 1·22 inches, Peshawar 1·13 inches, and Srinagar 1·09 inches. The changes of pressure in the Peninsula and North-Eastern India had led to the formation of a low pressure area in Chota Nagpur and South Bihar. Temperature had in consequence of the rainfall fallen very rapidly in the Punjab, and the mean temperature of that province was 11° lower than on the previous day. It was upwards of 16° lower at the stations of Cherat and Sialkot. Abnormally strong winds prevailed at Murree and Cherat.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different provinces of India:

PROVINCE.	April 1894.							Mean variation of week.
	8th.	9th.	10th.	11th.	12th.	13th.	14th.	
	°	°	°	°	°	°	°	°
Burma	+1·7	+2·4	+1·9	+0·2	+0·7	—2·0	—0·7	+0·6
Bengal and Assam . . .	+3·1	+3·2	+2·5	+1·4	—0·7	—0·7	+0·1	+1·3
North-Western Provinces and Oudh.	+1·0	—2·1	—2·7	—3·1	—2·1	+1·3	+2·3	—0·8
Punjab	—1·7	—3·1	—2·6	—0·7	+2·5	+6·5	—4·6	—0·5
Bombay	—0·6	—2·1	—1·4	—1·1	—0·3	+1·4	—0·4	—0·6
Central Provinces and Berar .	+2·7	—0·3	—0·7	—1·8	—2·0	+1·0	+3·4	+0·3
Central India and Gujarat .	+1·3	—0·4	—1·8	—1·5	—0·1	+1·2	+1·8	+0·1
Sind and Rajputana . .	—0·2	—1·5	—2·0	—0·6	+3·2	+3·4	—0·9	+0·2
Madras	+0·4	+2·2	+1·1	—2·4	—0·1	—0·3	—1·4	—0·1
Mean for whole of India .	+0·9	—0·2	—0·6	—1·1	+0·1	+1·3	0	+0·1

The mean temperature of the week was practically normal in all provinces, except in Bengal and Assam, where it was slightly in excess. The changes from day to day were, however, in some provinces considerable, especially in the Punjab, where at the close of the week temperature fell 11° in 24 hours. Temperature was most constant in Central India and Gujarat, where the variation from the normal on no day exceeded 1·8°. The mean temperature for the whole of India was exactly normal on the 14th, and was nearly normal on all other days of the week, except on the 11th, when it was slightly in defect, and the 13th, when it was slightly in excess. For the whole week it was also practically normal, being only 0·1° in excess.

Rainfall.—The only division in which heavy rain was received during the week was Assam (Surma), the average rainfall of which for the week was 9·80 inches. This was the only average fall exceeding one inch. Of the remaining thirty divisions which received any rain, the average fall in eight did not exceed one-tenth of an inch, in fourteen others it was less than half an inch, and in the remaining eight the fall varied between half and nine-tenths of an inch. In fourteen divisions the rainfall was in excess of the normal fall for the week, but the excess in all cases, except Assam (Surma), was small, and in only seven was it in excess by more than quarter of an inch.

For the period 4th March to 14th April the rainfall was in excess of the normal in Assam (Surma), Punjab Hill Districts, North-West and West Punjab, Bombay and Malabar Coast Districts, Berar, Central Provinces (West), Madras, and the Central and South Divisions of the Madras East Coast.

The depression lying over North Bengal and Assam at the commencement of the week gave abnormally heavy rain in the Surma Valley, the fall at Silchar amounting to 16·84 inches during the first five days of the week, and at Cherra in the Khasia and Jaintia Hills to 14·04 inches. The rainfall caused by this disturbance was almost entirely restricted to this area, the fall in the contiguous Brahmaputra Valley being comparatively small. The only other noteworthy amounts received during the week are 3·35 inches at Alleppy (Travancore) and 3·07 inches at Alipur (Jalpaiguri).

The Deputy Conservator of Forests, Bushahr Division, Simla, in an interesting report on the snowfall in the Upper Sutlej Valley during the past winter, states that an unusual number of snowstorms occurred between the 1st December and beginning of March, which were in every case ushered in by high westerly winds. The average depth of each fall was about two feet. The accumulation of snow on the higher passes at the end of March was very large. The snowfall at high elevations is considered to have been greater than the very heavy fall of last winter; but at elevations below 7,000 feet the fall was lighter, and did not descend so low as it did last winter.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 28, 1894.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

PROMISSORY NOTES.

Lost.

The Government Promissory Note, No. 112466, of the 4 per cent. of 1865, for R1,000, originally standing in the name of the Comptroller-General, and last endorsed to Syed Ally Zamin, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of proprietor.

SYED ALLY ZAMIN,
Shahjahanpur.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

PATENTS.

Calcutta, the 26th April 1894.

NOTIFICATIONS.

No. 1075P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 21st April 1894, under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888.

No. 127 of 1894.—William Henry Grant and William Ward Hill, Drapers, 13-1, Government Place, East, Calcutta, for solah topees.

No. 128 of 1894.—John Henry Rose Harley, Merchant, of No. 20, China Bazar Lane, in the town of Calcutta, for an improved life-belt.

No. 1076P.—Specifications of the undermentioned inventions have been filed, under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the Office of the Secretary appointed under the Inventions and Designs Act, 1888, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 101 of 1893.—Albert Angelo Lacey, of 116, Ripon Street, Calcutta, for extracting fibre from the agave or aloe, pineapple, and other fibrous plants. (Filed 4th April 1894.)

No. 187 of 1893.—King Charles Edmunds, residing at 6, Creek Row, in Calcutta, British India, Merchant and Agent, for an improved method of freezing liquids, and apparatus therefor, to be called " Edmunds' Excelsior Freezer." (Filed 15th March 1894.)

No. 204 of 1893.—William Bennett Rickman, of 32, Clerkenwell Road, in the County of Middlesex, England, Engineer, for an improvement in railway carriage lamps. (Filed 10th April 1894.)

No 255 of 1893.—Hugh Iorwerth Roberts, Engineer, of 33, Telkul Ghât Road, Howrah, near Calcutta, for a furnace to consume its own smoke. (Filed 4th April 1894.)

No. 278 of 1893.—Thomas Orme Colles, of Belmont, Higher Broughton, Manchester, in the

County of Lancaster, England, billiard table-maker, for improvements in outside seats for tramcars, omnibuses and similar vehicles, and other exposed seats. (Filed 13th April 1894.)

No. 359 of 1893.—Frederick Hurd, of Manygates Park, Wakefield, Yorkshire, and of 11 Grittleton Road, St. Peter's Park, in the County of Middlesex, England, Engineer, for improvements in, and connected with, coal-cutting and like machines. (Filed 9th April 1894.)

No. 360 of 1893.—Frederick Hurd, of Manygates Park, Wakefield, Yorkshire, and of 11, Grittleton Road, St. Peter's Park, in the County of Middlesex, England, Engineer, for improvements in, and connected with, electromotors or generators. (Filed 9th April 1894.)

No 6 of 1894.—Charles Hodgson, of Canterbury Road, Kilburn, in the County of London, England, Engineer, for an improvement in apparatus for working railway points and signals. (Filed 7th April 1894.)

No. 34 of 1894.—Edmund Charrington, of 5, Broad Street Avenue, in the City of London, England, Engineer, for improvements in rollers for reciprocating rods, such as those which work railway points or signals and the like. (Filed 13th April 1894.)

No. 41 of 1894.—Julius Moeller, of No. 14, Palmer Street, Westminster, in the County of London, England, Manager, for a process for the manufacture of oil gas. (Filed 13th April 1894.)

No. 65 of 1894.—Fritz Bernhard Behr, of 10, Drapers Gardens, in the City of London, England, Engineer, for improvements in vehicles and electric locomotives for single line elevated railways. (Filed 7th April 1894.)

No. 69 of 1894.—The Phonopore Company, Limited, of Faraday House, Charing Cross Road, in the County of London, England, for improvements in electrical receiving instruments and relays. (Filed 13th April 1894.)

No. 70 of 1894.—Henry Chitty, of 5, Bolton Gardens, Chiswick, in the County of London, England, for improvements in dynamo electric machines. (Filed 7th April 1894.)

No. 95 of 1894.—The Ruchill Chemical Company, Limited, of 6, Great Saint Helens, in the City of London, England, for apparatus for extracting substances by volatile solvents. (Filed 7th April 1894.)

No. 97 of 1894.—Joseph David Everett, Professor of Natural Philosophy, of Dunbarton, Derryvolgie Avenue, Belfast, in the County of Antrim, Ireland, for improvements in wheels for cycles and other road vehicles. (Filed 13th April 1894.)

No. 98 of 1894.—Samuel William Maquay, of 1, Whittingstall Road, Fulham, London, England, Engineer, for improvements in primary batteries and in their application to miners and like portable electric lamps. (Filed 10th April 1894.)

No. 1077P.—The fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 13 of 1888.—William Lindsay Henderson, of Khangaum, West Berar, Engineer, and Frederick Walter Shallis, of 9, Marine Street, Bombay, Engineer, for an improved beater cotton gin. (From 27th April 1894 to 26th April 1895.)

No. 263 of 1889.—Alexander Dunbar, of Liverpool, in the County of Lancaster, England, Barrister-at-Law, for improvements in machinery or apparatus for the manufacture of casks, barrels, and the like. (From 17th April 1894 to 16th April 1895)

No. 1078P.—Whereas the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888) [or within the further time allowed under section 8, sub-section (4) of the said Act], the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased:—

No. 80 of 1889.—Mr. Hormusji Khurshedji Bana's invention for the patent roller oil mill. (Specification filed 9th January 1890.)

No. 312 of 1889.—Messrs. J. T. Penny and W. H. Richardson's invention for an improved machine for triturating and amalgamating gold and silver bearing and other ores. (Specification filed 21st January 1890.)

No. 333 of 1889.—Mr. E. L. W. Haskett-Smith's invention for improvements in telemeters or range-finders. (Specification filed 18th January 1890.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

H. S. JARRETT, *Colonel,*

for *Secy. under the Inventions and Designs Act, 1888.*

Orders by the Vice-Chancellor and Syndicate of the Calcutta University.

The undermentioned candidates have passed the Entrance Examination :—

66. John Ralph Grundy.

R. A. STORRS,
Chaplain.

MOOLTAN,
The 2 th April, 1894.

TREASURE TROVE.

NOTICE.

It is hereby notified, under Section 5 of Act VI of 1878, that 2,916 gold coins, weighing about 13 seers of 21 tolas each, and valued at R729, were discovered on the 10th December last, within the Siva temple at Tiruvengadu, Shiyali taluk, hidden beneath the pedestal upon which the idol stood.

All persons claiming the said treasure, or part thereof, are hereby required to appear personally, or by agent, before the Collector of Tanjore, at his Office, on the 15th September, 1894, in view to the matter being enquired into and determined according to law.

H. M. WINTERBOTHAM,
Collector of Tanjore.

JOHN OWENS,

Presidency Postmaster, Calcutta.

THE YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 4th and 5th June, 1894, at 10-30 A.M.

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity) . . .	100	50
Dictation (spelling, punctuation, etc.). . . .	100	50
Arithmetic (the whole) . .	240	100
Mensuration (*a*). the whole .	60	30
Book-keeping (*b*), mercantile	100	50
TOTAL	600	400

Minimum required in all papers collectively.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it, but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned:—

(1) Certificate of good character signed by applicant's immediate official superior or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth not required if the candidate is already in permanent Government employ).

(3) Certificate that the application is in the candidate's handwriting.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, on a consideration of these certificates, to decide whether the candidate should be registered for the examination or whether his application should be rejected. He will only forward the names of accepted candidates to the Principal together with their applications in their own handwriting, statement of their ages, and fees. These should be transmitted altogether under one covering letter on the last day allowed by the rule.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

6. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

7. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

N.B.—The attention of candidates is drawn to the alteration in Rule 2 (3). In future no candidate is to apply direct to the Principal for permission to attend the examination, but must send his application through an Examiner of Public Works Accounts, who will decide whether the candidate is to be admitted.

The Principal will attend to no applications received direct.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,

The 30th March, 1894.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1894. The session begins on Monday, the 4th June, 1894. Candidates must furnish proof that they have passed one of the following tests :—

(1) The F. A. Examination of the Calcutta University or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B. A. Examination in the B. Course. The candidate's age must be under 23 years. (These students are admitted direct into the 2nd-year class.)

The number to be admitted each year is limited to 40. The position in the University Examinations and the age of candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

Ten scholarships will be awarded to students entering the Engineer Department, not being already holders of junior or senior scholarships.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eyesight.

Further particulars will be supplied on application to the Principal.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,

The 19th April, 1894.

Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

[Revised Advertisement.]

A Dictionary of the Economic Products of India.

BY DR GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics, markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the

vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove ot considerable value.

Indian Wheat Trade, Parts, I, II and III, combined. Royal 8vo., Limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes:—Royal 8vo., cloth.

PART I.

Government of India Notifications, Appointments, Promotions, &c.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 26th April, 1894.

No. 1092-*M*.—His Excellency the Viceroy and Governor General will hold a Levée at Viceregal Lodge, Simla, at 9-45 P.M. on Saturday, the 26th May 1894.

All Civil and Military Officers and the Native Officers of the Detachment of the 2nd Battalion, 4th Gurkhas, are invited to attend.

All Officers and Gentlemen attending the Levée are requested to bring with them two cards, with their names legibly written thereon—one card to be delivered on entering Viceregal Lodge, and the other to the Aide-de-Camp in waiting at the time of presentation.

Gentlemen who have not already been presented at the Court of St. James or at the Viceregal Court are requested to send their names and addresses to the Aide-de-Camp in waiting not later than Monday, the 14th May 1894; and, when attending the Levée, to have the names of those Gentlemen who are to present them also written on their cards. Gentlemen presenting others should themselves attend the Levée.

Gentlemen wearing uniform will appear in full dress.

Gentlemen not entitled to wear uniform will appear in evening dress.

By Command,

A. DURAND, *Lieut.-Colonel,*
Military Secretary to the Viceroy.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 25th April, 1894.

W. A. BION,

SIMLA, *26th April, 1894.*

Actg. Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,

Secretary to the Government of India.

B

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 21st April.*—Rainfall fair, except in Salem and the Deccan districts. Cultivation commenced on the West Coast and to a slight extent in other parts under summer showers. Standing crops generally fair. Harvest continues with moderate outturn. Water-supply fair. Pasture is scarce, though improving in places, but fodder is available. Condition of cattle good. Prices practically stationary.

Bombay.—*For week ending 25th April.*—Rain generally slight in parts of twelve districts. Standing crops damaged by blight, rust, or insects in parts of four districts; otherwise good, except cotton in Surat. Reaping of late crops progressing in six districts. Ploughing and sowing operations general. Cotton picking progressing in seven districts. Agricultural stock good. Fodder insufficient in parts of two districts. Prices steady, except in two districts. Numbers on relief works: Baroda, 982.

Bengal.—*For week ending 21st April.*—There was general and well distributed rainfall during the week over the whole of Bengal Proper and the Bhagalpur and Orissa divisions. In the Patna and Chota Nagpur divisions the falls were scanty and confined to a few places. The rainfall of the week has done good to the standing crops, and has facilitated ploughing and early sowings. In Bihar the threshing of spring crops and the weighment of opium are proceeding. The spring rice harvest has begun and promises to yield a good outturn, except in the 24-Parganas district. Prospects of sugarcane and indigo are good in some districts. The planting of sugarcane is still going on. Cattle are generally in good condition, and the supply of fodder is sufficient. There is want of drinking water in places in East Bengal. The price of common rice continues to be almost stationary.

North-Western Provinces and Oudh.—*For week ending 25th April.*—Weather seasonable; slight rain in two tahsils of the Gorakhpur district. Threshing and winnowing of spring crops and irrigation of sugarcane and extra crops in progress. Supplies and fodder are sufficient. Prices of certain grains have risen slightly in seven districts; in the rest they are practically stationary.

Punjab.—*For week ending 25th April.*—Rain has fallen in five districts. Harvesting of spring crops, and sowings of extra spring and autumn crops in progress. Weeding of sugarcane and cotton commenced. Prospects of crops are said to be good, but the outturn in two tahsils of Dera Ismail Khan is expected to be below average. Cattle are generally in good condition, and fodder is sufficient throughout the province. The poppy crop has ripened, and is in good condition. Prices rising in four districts, falling in one, and stationary elsewhere.

Central Provinces.—*For week ending 25th April.*—Weather hot and cloudy, with slight rain in places. Scarcity beginning to be felt in Saugor, but is being met by supplementary relief works. Grain is being imported into the district in increased quantities, and prices continue steady. Land being prepared for autumn sowings.

Burma.—*For week ending 21st April.*—Rain fell in two districts of Lower Burma and in nine districts of Upper Burma, the fall in Magwe and Minbu being heavy. In Upper Burma ploughing and sowing of dry-weather paddy progressing everywhere, and in two districts reaping has commenced. Sowing of early wet-weather paddy commencing. Standing crops thriving and prospects favourable The price of paddy has fallen considerably in the Ruby Mines and slightly in three other districts. Fodder and water-supply sufficient.

Assam.—*For week ending 24th April.*—Weather warm. Sowing of early rice and planting of sugarcane continue. Condition of cattle good. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 25th April.*—MYSORE : Good rain in parts of Kadur ; slight elsewhere. Crops and prospects good. Prices fallen in the Kolar and Shimoga districts.

COORG : Rainfall moderate. No standing crops, except coffee and cardamom. Prospects not very favourable. Fodder and water for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 25th April.*—BERAR : Rainfall moderate. Weather frequently cloudy. Days warm and mornings cool. No standing crops throughout the province. Threshing of wheat and linseed not yet finished. In the Melghat taluka land is being prepared for autumn sowings. Fodder supply inadequate in parts of the Akola district. Water sufficient. Slight variations in prices in three talukas.

HYDERABAD : No rain during the week. Cutting of hot-weather crops commenced. Standing crops in good condition. Prices steady.

Central India.—*For week ending 25th April.*—Slight rain during the week in Bundelkhand, Baghelkhand, and Neemuch. Harvesting completed in Gwalior, Baghelkhand, Western Malwa, and Neemuch, and in progress in Bundelkhand and Bhopawar. The probable outturn in Gwalior, Bundelkhand, and Goona will be below average, as the crops have been damaged by rain, insects, and blight. Wheat is reported a complete failure in tracts adjoining the Saugor district ; good outturn expected in Bhopawar. Pasturage good and sufficient, except in Gwalior, where it is indifferent and bad. Prices of food-grains rising in Goona and Neemuch ; steady in other Agencies. Opium is said to have been much injured in Malwa, and the yield will be below the estimate.

Rajputana.—*For week ending 25th April.*—Rainfall slight at Abu and in Bikanir ; good in Partabgarh and Ajmere. Agricultural operations, standing crops, and cattle generally satisfactory. Prospects good. Pasturage or fodder sufficient, except in Dholpur, where it is reported to be failing. Prices rising in four States, falling in two, fluctuating in one, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 24th April.*—Rainfall moderate. Weather again fine. Standing crops in good condition. Rapeseed ripening. Autumn ploughings going on. Prices stationary.

JAMMU PROVINCE.—*For week ending 14th April.*—Rainfall slight. Spring crops in good condition. Prices stationary.

For week ending 21st April.—No rain. Crops ripe. Prices stationary.

Nepal.—*For week ending 21st April.*—Weather showery and unsettled. Prospects of crops good.

E. C. BUCK,

Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 21st, 1894.

General Summary.—The pressure changes during the first three days of the week were small and irregular, but on the 18th pressure rose briskly in North-Eastern India and fell rapidly in Sind and the West Punjab, thus establishing a high pressure area in the north-east and a low pressure area in Sind, which continued to the close of the week. On the 20th pressure in the former area was a tenth of an inch in excess, and in the latter a tenth of an inch in defect of the normal. There was thus an abnormal gradient of two-tenths of an inch between Bengal and Sind, giving rise to easterly winds extending from Bengal up the Gangetic plain, which formed a principal feature in the meteorology of the week. Snow fell at Gnatong from the 17th to the end of the week, the total fall amounting to about 2½ feet. If this snowfall extended over a large area, it might account for the persistent abnormal high pressure in North-Eastern India, and also in part for the considerable decrease in temperature during the latter part of the week in Bengal, which, with the extension of easterly winds, caused a corresponding fall in the temperature of the North-Western Provinces. Shallow depressions owing to increased temperature appeared during the week in Chota Nagpur, Central Burma, North-Western India, the Deccan, and the Central Provinces, which caused local duststorms and thunderstorms; but, on the whole, fine weather, with temperature below the normal, prevailed over the greater part of the country during the week. The mean temperature of the week for the whole of India was 1·4° in defect.

Daily Summary.—*Sunday.*—Pressure had decreased in North-Eastern India and Burma, giving greater prominence to the depressions in Chota Nagpur and Central Burma. Pressure was above the normal over the whole of India, the excess in the Punjab being more than a tenth of an inch. Very strong winds were blowing at the hill stations of Cherat, Murree, and Gnatong, and winds continued to strengthen on the Bengal and Orissa Coasts. Gnatong received ·95 inch of rain during a thunderstorm. Light showers, all below half an inch, were reported from a few other stations.

Monday.—Pressure had given way everywhere, but very irregularly, and differed from the normal by small and variable amounts. Strong winds continued at Cherat and Murree, but winds had decreased in force at the Bengal and Orissa Coast stations. Rain was reported from stations in Baluchistan, the Punjab Hills, South Madras, Bengal, and Assam. Jessore received 1·26 inches, Dhubri 1·10 inches, and four other stations above half an inch. The maximum day temperature was generally lower than it had been, only three stations registering temperatures above 105°.

Tuesday.—Another general fall of pressure had taken place, reducing pressure to slightly below the normal nearly everywhere. North-westerly winds prevailed over nearly the whole of North-Western, Central, and Western India. Gnatong reported a snowstorm, the fall amounting to ·92 inch of melted snow, and several stations received light showers of rain.

Wednesday.—Except in Bengal and Orissa, where pressure had risen, a large and irregular fall of pressure had taken place over the whole of India, exceeding a tenth of an inch in the West Punjab and Sind. Shallow depressions appeared in the Deccan and Punjab as well as in Chota Nagpur and Central Burma. Numerous duststorms and thunderstorms had occurred in Bengal (where they had given several heavy showers of rain), the Gangetic plain, and the Central Provinces. Bogra received 2·6 inches, Balasore 1·11 inches, Jalpaiguri ·84 inch, and Burdwan ·60 inch. Snow continued at Gnatong, about 9 inches of snow having fallen since the previous day. Humidity had decreased considerably in Central India and the Central Provinces notwithstanding a decrease of temperature in that area.

Thursday.—Pressure had increased generally in Northern India and the eastern half of the Peninsula, and had decreased in the western half and in Sind. North-easterly winds had set in at the interior stations in Bengal owing to excess of pressure in North Bengal, and easterly winds had extended westwards over the Gangetic plain. Heavy rain had fallen in the south of the Peninsula and light to moderate rain in Bengal. Colombo registered 2·63 inches, Cuddalore 2·68 inches, Masulipatam 2·50 inches, Trichinopoly 1·65 inches, Vizagapatam 1·11 inches, and Purnea 1·38 inches. About 3½ inches of snow had fallen at Gnatong.

Friday.—Excess of pressure in North-Eastern India and deficiency of pressure in Lower Sind continued, causing an extension of abnormal easterly winds over the whole of the Gangetic plain and the South-East Punjab. Dinajpur reported 1·30 inches of rain, Silchar 1·10 inches, Bangalore 1·11 inches, Tinnevelly ·77 inch, and False Point ·55 inch. Snow continued at Gnatong, but the fall was not so heavy as it had been during the past few days.

Saturday.—The abnormal gradients causing easterly winds in the Gangetic plain were less steep owing to a brisk increase of pressure in Baluchistan and Lower Sind, but easterly winds continued in Bihar and the eastern districts of the North-Western Provinces. Temperature had increased considerably in Sind, Rajputana, Kathiawar, and Gujarat. Hyderabad (Sind) registered the highest maximum temperature, *viz.*, 112·2°, Jacobabad registered 109·8°, and Bhuj 109·6°. Snow continued in Upper Sikkim, Gnatong reporting a further fall of about 6 inches. Thunderstorms with rain were also reported, chiefly from Bengal and the North Punjab. Calcutta received 1·62 inches and Jessore 1·26 inches.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different provinces of India:

Province.	April 1894.							Mean variation of week.
	15th.	16th.	17th.	18th.	19th.	20th.	21st.	
	°	°	°	°	°	°	°	°
Burma	+1·2	+0·6	+0·7	+1·4	+0·4	—0·3	+0·4	+0·6
Bengal and Assam . .	+1·3	—1·0	+0·2	—2·8	—7·2	—6·2	—4·5	—2·9
North-Western Provinces and Oudh.	+0·2	—0·8	+0·7	—5·0	—3·6	—4·7	—4·2	—2·5
Punjab	—4·2	—1·6	—4·3	—4·1	—1·0	—2·1	—0·1	—2·5

Sind and Rajputana . .	—0·9	—0·2	—1·9	—2·1	+2·1	+1·4	+2·4	+0·1
Madras	—1·4	—0·4	—0·4	+0·7	—2·6	—4·6	—2·3	—1·6
Mean for whole of India .	—1·1	—0·8	—0·8	—2·4	—2·0	—1·7	—0·8	—1·4

Lower temperatures than usual have prevailed over the greater part of the country during the week. The mean temperature for the week was normal in Burma, Bombay, Central India and Gujarat, Sind and Rajputana. In all other provinces it was more or less in defect, the defect being greatest in Bengal and Assam and the Central Provinces and Berar. The changes of temperature from day to day in Bengal and the North-Western Provinces corresponded pretty closely with each other, and were probably due to the same cause, *viz.*, the frequent thunderstorms in Bengal, and perhaps the continuous snowfall in Upper Sikkim, the effects of which were communicated to the North-Western Provinces by the easterly winds which prevailed over the Gangetic plain for the greater part of the week. The daily variations from the normal were smallest in Burma and Bombay, and were largest in Bengal and the Central Provinces. The mean temperature for the whole of India was in defect on every day of the week. It was nearest the normal on the 16th, 17th, and 21st, and most in defect on the 18th and 19th. For the whole week it was 1·4° below the normal.

Rainfall.—The rainfall of the week has been confined chiefly to North-East India and the south of the Peninsula. It has been more general in Bengal and Assam than for some weeks past, and the average fall of five of the divisions of that province was above an inch. In all thirty-eight of the fifty-two rainfall divisions received rain during the week; the average falls of seventeen being below a

tenth of an inch, and of nine others less than half an inch. Six divisions received an average fall of over an inch, five of which were in Bengal and Assam. In none of the divisions has the rainfall been heavy, the largest amount registered during the week at any station being only 4·59 inches.

The normal rainfall of the week was exceeded in nineteen divisions. Seven of these were in Bengal and six in the south of the Peninsula.

A reference to the table at the close will show that the rainfall of the period 4th March to 21st April was in excess of the normal in East and Deltaic Bengal, Hill Districts of the Punjab, North-West and West Punjab, Bombay and Malabar Coast Districts, Berar, Central Provinces (West), and all the divisions of Madras, except Hyderabad (South). Rainfall was in defect in the whole of Burma, Assam, North-Western Provinces, Kathiawar, Sind, Central India, Rajputana, and nearly the whole of Bengal and the Central Provinces. No rain has fallen since the 4th March in Lower Burma and West Rajputana.

The heaviest falls received during the week were at Narail (Jessore) 4·59 inches, Cholapuram (Trichinopoly) 4·50 inches, Alleppy (Travancore) 4·43 inches, and Kurseong (Darjeeling) 4·36 inches.

Snowfall.—The Superintendent of the Leh Observatory, Ladakh, in a further report on the abnormal snowfall of the past winter, states that it was three times as large in amount as the normal, and more than twice as heavy as the exceptionally heavy fall of 1890-91. Cultivation is very backward, as it was only about the 5th March that the lower cultivated grounds in the Indus Valley (10,500 feet) began to be clear of the snow which had been lying on the ground ever since the 21st January.

PATENTS.

Calcutta, the 3rd May 1894.

NOTIFICATIONS.

No. 1102 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 28th April 1894, under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 129 of 1894.—Samuel Maurice Johnson, Managing Director of the Muir Mills Company, Limited, Cawnpore, for an improved fastener for the purdahs and *kanaths* of tents, to be known as the "Johnson Tent Link."

No. 130 of 1894.—William Hunt Sinclair Marriott, an Assistant of the Muir Mills Company, Limited, Cawnpore, for an improved fastener for the purdahs and *kanaths* of tents, to be known as the "Marriott Simplex Tent Catch."

No. 131 of 1894.—Cecil James Dissent, Deputy Superintendent of the Campbell Hospital and School, of No. 137, Lower Circular Road, Calcutta, for an improved cooking stove, to be called the "Cook and Baker."

No. 132 of 1894.—W. H. Casebourne, Manager of the Madras Portland Cement, Brick, and Tile Works, Washermanpett, Madras, for a process of manufacturing pipes, junctions, bends, etc., from dry or powdered Portland, Roman, and other artificial and natural cements.

No. 133 of 1894.—Frank Edmond Winsland, of Tippuk Tea Estate, in the District of Lakhimpore, in the Province of Assam, Tea Planter, for a furnace for drying tea.

No. 1103P.—The fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 28 of 1889.—John Henry Richardson Dinsmore of Emlyn Street, Liverpool, England, Engineer, for improvements in and connected with the manufacture of gas from coal and apparatus employed therein. (From 25th April 1894 to 24th April 1895.)

No. 41 of 1889.—Fuckeer Chand Dass, Mistry of Bantra, near Howrah, in the District of Hooghly, for improvements in sugar-cane mills. (From 26th March 1894 to 25th March 1895.)

No. 1104 P.—Whereas the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888) [or within the further time allowed under section 8, sub-section (4) of the said Act], the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorising others so to do has ceased :—

No. 297 of 1889.—Captain J W. Malet's invention for a light field service tent for two men, to be called 'Malet's Light Field Service Tent for two men" (Specification filed 23rd January 1890)

No. 307 of 1889.—Messrs. Wladimir Schevelin and Peter Mindovsky's invention for a process for cleansing and bleaching fibrous substances and for fixing organic colouring matters thereon by means of acid and alkaline residues of naphtha manufacture. (Specification filed 23rd January 1890.)

No. 308 of 1889.—Messrs. Wladimir Schevelin and Peter Mindovsky's invention for a process for the treatment of vegetable fibres by means of acid and alkaline residues of naphtha manufacture. (Specification filed 25th January 1890.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

No. 36 of 1888.—Mr. A. Graemiger's invention for processes and apparatus for dyeing, scouring bleaching, and otherwise treating yarn in cops. (Specification filed 26th January 1889.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of R50

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

H. S. JARRETT, *Colonel*,
for *Secy. under the Inventions and Designs Act, 1888.*

Orders by the Vice-Chancellor and Syndicate of the Calcutta University.

The undermentioned candidates have obtained Honours in the B. A. examination :—

Percentage 32·6.

AGENT TO THE GOVR.-GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 24th April, 1894.

No. 2687.—The following promotions and appointments are made in the Graded List of Extra Assistant Commissioners and Native Assistants to the Agent to the Governor-General in Baluchistan, consequent on the retirement, from the public service, of Khan Bahadur Hak Nawaz Khan, and with effect from the forenoon of the 16th February, 1894:—

Lala Chokhanand, Mir Munshi in the Office of the Agent to the Governor-General and Chief Commissioner, and an Extra Assistant Commissioner, substantive *pro tempore*, is confirmed in the appointment of Extra Assistant Commissioner, and is posted as Personal Native Assistant to the Governor-General's Agent at Quetta

Diwan Utam Chand, Head Clerk in the Office of the Deputy Commissioner, Thal-Chotiali District, and an Officiating Extra Assistant Commissioner, is appointed to be an Extra Assistant Commissioner, substantive *pro tempore*, and is posted, as at present, as Extra Assistant Commissioner at Duki.

Shaikh Abdul Rahman, Native Assistant to the Agent to the Governor-General, and Munsif at the Khojak, is appointed to officiate as an Extra Assistant Commissioner, and is posted as First Extra Assistant Commissioner in Zhob.

Mir Shams Shah, Sarishtadar in the Office of the Revenue Commissioner in Baluchistan, is appointed to officiate as Native Assistant to the Agent to the Governor-General, and Munsiff at the Khojak.

By Order,
W. STRATTON, *Captain*,
First Assistant.

CHIEF COMMISSIONER OF AJMERE-MERWARA.

NOTIFICATION.

Abu, the 26th April, 1894.

No. 446.—Mr. F. L. Reid, Principal of the Government College, Ajmere, and Inspector of Schools, Ajmere-Merwara, is granted extraordinary leave, without allowances, for one month and eight days from the 16th July to the 23rd August, 1894, both days inclusive, under Article 366, Chapter XIII, of the Civil Service Regulations.

By Order,
O. V. BOSANQUET,
First Asst. to the Agent to the Govr.-Genl., Rajputana, and Chief Commr., Ajmere-Merwara.

THE RESIDENT IN MYSORE.

NOTIFICATION.

Bangalore, the 26th April, 1894.

No. 1497—1585.—The provisions, so far as they may be suitable, of Act X of 1890 (an Act to amend Act XXV of 1867) having been in the Foreign Department Notification No. 167-I, dated the 18th January, 1894, declared to apply to the Civil and Military Station of Bangalore, the Resident in Mysore directs, under Section 20 of Act XXV of 1867, that the following modifications be made in the rules issued under his Notification No. 835, dated the 2nd April, 1886:—

In clause 1, *add* the words "free of expense to Government" between the words "by the printer" and the words "to the Collector and District Magistrate."

In clause 2, *omit* the words "and shall thereupon pay to the printer on production of the usual bill the *boná fide* sale price of the copy of the book described in the said memorandum."

By Order,

C. W. RAVENSHAW, *Major,*
First Assistant Resident.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.,*
Principal, Thomason College.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1894. The session begins on Monday, the 4th June, 1894. Candidates must furnish proof that they have passed one of the following tests:—

(1) The F. A. Examination of the Calcutta University or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B. A. Examination in the B. Course. The candidate's age must be under 23 years. (These students are admitted direct into the 2nd-year class.)

The number to be admitted each year is limited to 40. The position in the University Examinations and the age of candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

Ten scholarships will be awarded to students entering the Engineer Department, not being already holders of junior or senior scholarships.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eyesight.

Further particulars will be supplied on application to the Principal.

J. S. SLATER,
Principal, Civil Engineering College.

SIBPUR,
The 19th April, 1894.

Nepalese Buddhist Sanskrit Literature, by Dr R L. Mitra R5

N.B.—All Cheques, Money Orders, etc, must be made payable to the "Treasurer Asiatic Society," only.

Catalogue of Books printed at Thomason College Press and procurable from Thomason College Book Depot.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.
Drawing Instruments, drawing materials, etc, are not available at the College Book Depôt, but can be obtained from the Superintendent, Canal Foundry and Workshops, Roorkee

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo with numerous Plates.

First two Volumes are published in separate convenient sized Sections, as below, but can be bound up in Volumes if required.

VOLUME I*

Section I.	**Building Materials** (in the Press).		
" II.	**Masonry**	(1891),	R1-8
" III.	**Carpentry**	(1889),	R1-8
" IV.	**Earthwork**		R1 8
" V.	**Tools and Plant** (never published).		

VOLUME II*

Section VI.	**Buildings**	(1891),	R1-8
" VII	**Bridges**	(in the Press).	
" VIII.	**Roads**	(1888),	R2-0
" IX.	**Railways**	(1891),	R1-8
" X	**Irrigation Works**	(1873),	R2-0

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).
" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E) (6th edition), with Curve Table. R3-8
XIII **Drawing** (by Lieut. R. Pulford, R E)† R8.
XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition) R1-4.
XIV. **Simple Applied Mechanics**, Parts I and II (in the Press).

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition). R3-12.
XVI. **Earthwork Estimating**, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.
XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 8a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete for laying any curve. 4a.
Scantlings of Timber for Roofs Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.
Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8
O'Callaghan's Earthwork Tables for India, in one large sheet, 8a., mounted on cloth, to fold up. R1-12.
Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W Provinces (In the Press). R1-4.
Specifications and Schedules of Prices for execution of various kinds of Work by Contract, etc. By Major-General F. W. Peile, R.E. R3.
Tyndall's Hand-Book of Specifications (in the Press).
The Indian Engineer's Pocket Book 4a.
Wooden Bridges and Designs By Rai Kunhya Lal. R4.
Blasting under Water (2nd edition). 12a.
Waugh's Instructions for Topographical Surveying. R1 4.
Analysis of Lime and Cement Stones. By Murray Thomson, Esq, M.D., F.R S E 6a
Roorkee Hydraulic Experiments (in 3 Vols.—Text, Tables, and Plates). By Capt. A. Cunningham, R.E. R12
Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into Decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility. (4th edition.) R2.
Boileau's Tables of Log sin² ½ P (for computing time). 8a.
Cape's Logarithms, with Tables of Squares, Cubes, etc. (In the Press.) R1-4.
Cape's Geometry R1-8.
" **Mechanics.** R2-4.

HINDUSTANI.

Elements of Hindustani Grammar. 4a.
Technical Dialogues—English and Urdu. R1-4.
A Vocabulary of Common and Technical Words in English-Urdu. R1-4.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small, each. R1-4.
Surveying Field-Books (ruled). R1.
Levelling Field-Books (English Pattern). R1-8.
" " (Canal Pattern). R1-8.
" " (College Pattern). R1-12.
P. W. D. Note-Book (in the Press). R1-4.
" **Measurement Book.** R1-4.
Circular Card-board Protractors, 12 inches. R1-8.

MISCELLANEOUS.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1.
Ditto ditto, in Urdu. R1-4.

Perspective (fully explained). By Col. A. M. Brandreth, R.E. R1-12.

Calendars for 1891,* 1892, and 1893,* each. R4-12.

Sample Question Papers for 4th Grade Accounts Branch for 1891. R1.

Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English. R2.

Memo. of Instructions for Road Project. R1-8.

Project for College Mess (sample Project). R1-8.

Ferrotype Printing Processes. 8a.

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India. Drawn to a uniform scale, and prepared for the Government of India, P. W. Department, between 1864 and 1868. (Useful for Executive Engineers and Superintending Engineers' Offices.)

Bengal, 51 Plans. R5.

Madras, 99 Plans. R10.

Bombay, 91 Plans. R10.

N.-W. Provinces, 104 Plans. R10.

Oudh, 21 Plans. R2.

Rajputana, 4 Plans. R2-4.

British Burma, 19 Plans. R3-4.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(SECOND SERIES.)

Quarterly Numbers of Vols. II, VIII, and IX of the Series are available at R3-8 each, and Vol. XI at R2. Cloth covers for Volumes at R1 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15 at R2-8 each.

Index to Professional Papers, 1st and 2nd Series. 8a.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes held at the College will be forwarded to applicants.

* These include Question Papers for Engineer and Upper Subordinate Classes, and Superior Accounts Branch, P. W. D.

J. CLIBBORN, *Major, I.S.C.*,
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the pr..., on and from the 1st January, 188o, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R42-8.

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series . . .	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series . . .		
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India* . . .		
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India* . . .	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R a. p.	For mofussil. R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . .	0 5	5 9
„ the Calcutta Series. For the year .	7 2	6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1892 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 6
„ three issues . . .	„ 45	„ 30	„ 24
six „ . . .	„ 100	„ 68	„ 45
—— „	„ 145	„ 96	„ 64
twelve „	„ 180	„ 120	

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R a. p.	With postage. R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Press, 10, Lyon's Range, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

INDIAN LAW REPORTS.

NOTICE TO SUBSCRIBERS.

Subscribers are hereby informed that, unless complaints of non-receipt of any number is made to the Publisher of the series within three months of the date of publication, the benefits of the subscription rates for copies lost in transit will not be allowed, and full rates will be charged. The price per copy of each of the four at subscription-rates and at full rates is shown below:—

[Revised Advertisement.]

A Dictionary of the Economic Products of India.

BY DR GEO. WATT, C I E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Indian Wheat Trade, Parts, I, II and III, combined. Royal 8vo., Limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes:—Royal 8vo., cloth.

Spare copies of the List will, however, be kept in stock ready for issue on receipt of applications for them.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MAY 5, 1894.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

PROMISSORY NOTES.

Lost.

The Government Promissory Notes, Nós. $B\frac{007035}{324987}$ and $B\frac{007036}{324988}$, of the 4 per cent. loan of 1st May, 1865, for R100 each, originally standing in the name of the Accountant-General, High Court, Bombay, and last endorsed to Gunput Cassinathjee, the proprietor. by whom they were never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest, and for the issue of duplicates in favour of the proprietor, after two years from the date of last advertisement.

GUNPUT CASSINATHJEE,
Dadysett Agiary Road near Naviwady.

IN THE COURT OF SMALL CAUSES, AJMERE.

NOTICE.

Under Section 354, Civil Procedure Code, it is hereby notified that Chiman Ram, son of Kaluram Aggerwala, of Nassirabad, has been declared an insolvent, and that Lala Pyarelal, District Nazir, has been appointed Receiver of the property of the said insolvent.

HARNAM DAS,
Judge, Small Cause Court, Ajmere.

NOTICE.

In the matter of the Indian Companies Act, 1882,

and

In the matter of the Jutput Gold Mining Company, Limited.

By an order made by Her Majesty's High Court of Judicature at Fort William fn Bengal in the above matter, dated the 19th day of April instant, on the petition of Henry Thomas Hyde, Esq., Barrister-at-Law, Frederick Peacock, Esq., Barrister-at-Law, has been discharged from further acting as the Official Liquidator of the abovenamed Company, and the said Henry Thomas Hyde has been re-appointed as the Official Liquidator of the abovenamed Company upon the same terms and with the same powers as are mentioned in the order, dated the 17th day of September, 1891.

Dated this 28th day of April, 1894.

CARRUTHERS & CO.,
Solicitors for the Official Liquidator.

SUPPLEMENT TO

The Gazette of India.

No. 18.} CALCUTTA, SATURDAY, MAY 5, 1894

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

PART I.

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 4th May, 1894.

No. 10—The Governor General in Council has been pleased to accept the resignation by Mr. T. A. Pearson of his office of Reporter for the Indian Law Reports in the High Court, Calcutta, with effect from the date on which he may assume charge of the office of Chief Presidency Magistrate, Calcutta.

S. HARVEY JAMES,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Simla, the 4th May, 1894.

No. 233.—Sir A. Mackenzie, K.C.S.I., on return from leave, resumed charge of the office of Chief Commissioner of Burma from Mr. F. W. R. Fryer, C.S.I., on the forenoon of the 3rd instant.

No. 235.—The services of Mr. F. W. R. Fryer, C.S.I., are replaced at the disposal of the Government of the Punjab, with effect from the 3rd instant.

MEDICAL.

The 1st May, 1894.

No. 281.—The services of the undermentioned officers of the Indian Medical Service (Bengal), which were placed temporarily at the disposal of the Government of the Punjab by the Notifications marginally noted, are placed permanently at the disposal of that Government, with effect from the dates noted against their names:

Home Department No. 378, dated 29th May 1890.
Home Department No. 378, dated 29th May 1890.
Home Department No. 446, dated 10th July 1890.

Surgeon-Captain D. M. Davidson, M.B., C.M.,—2nd December 1892.

Surgeon-Captain W. R. Clark, M.B.,—2nd April 1893.

Surgeon-Captain G. F. W. Braide, M.B.,—1st January 1894.

JUDICIAL.

The 3rd May, 1894.

No. 468.—*Erratum*—In Home Department Notification No. 443, dated the 19th April 1894, *for* "9th April 1894" *read* "7th April 1894."

ECCLESIASTICAL.

The 3rd May, 1894.

No. 92.—The Reverend A. Ferrier, Senior Chaplain of the Church of Scotland on the Bengal Establishment, has obtained furlough for six months, with effect from the 5th May 1894.

No. 93.—The Reverend J. Taylor, Chaplain of the Church of Scotland on the Bengal Establishment (stationed at Fyzabad), is appointed to officiate as Senior Chaplain of the Church of Scotland during the absence on furlough of the Reverend A. Ferrier, or until further orders.

The 4th May, 1894.

No. 97.—With reference to the Notification of the Government of India in the Home Department, No. 1173, dated the 19th July 1888, publishing the rules made under Sections 26, 28 and 36 of the Births, Deaths and Marriages Registration Act, VI of 1886, the following rule, which it is proposed to substitute for Rule 20 of the above rules, is published for general information, in accordance with the provisions of Section 37, sub-section 1, of the aforesaid Act.

The draft will be taken into consideration on the expiration of two months from the date of this Notification :

"20. Every Registrar-General and every Registrar who is a Government servant and not a Minister of Religion shall keep a register in the form set forth in Schedule L of all fees realized under these rules, and shall forward such fees at the end of each month to the nearest treasury to be credited to Government. The Treasury Officer shall give each Registrar a certificate of the amount so credited, and the Registrar shall send a copy of the certificate to the Registrar-General. Registrars who are not Government servants or who are Ministers of Religion may retain for their own use any fees which they may realize under these rules."

C. J. LYALL,
Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATIONS.

EMIGRATION.

Simla, the 1st May, 1894.

Lieutenant C. B. Baldock, Indian Staff Corps, Wing Officer and officiating Adjutant, to officiate as Wing Commander and 2nd-in-Command during such time as Lieutenant-Colonel C. Ransford may officiate as Commandant of the Erinpura Irregular Force, or until further orders.

Lieutenant C. C. Jackson, Indian Staff Corps, officiating Wing Officer, to officiate as Adjutant, in addition to his other duties, *vice* Lieutenant Baldock, and until further orders.

No. 1482-*I*.—In exercise of the powers conferred on him by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, XXI of 1879, and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to apply the provisions, as modified below, of Act XII of 1886 (the Petroleum Act, 1886) to the lands in the territory of His Highness the Nizam of Hyderabad, which are occupied, or may be hereafter occupied, by the Nizam's Guaranteed State Railway Company, by the Great Indian Peninsula Railway, by the Dhond-Manmad Railway, and by the Madras Railway respectively (including the lands occupied as stations and outbuildings for other railway purposes).

Preliminary.

Short title, commencement and local extent.

1. This Act may be called the Petroleum Act, 1886.

Definitions.

2. In this Act, unless there is something repugnant in this subject or context,—

(*1*) "petroleum" includes also the liquids commonly known by the names of rock oil Rangoon oil, Burma oil, kerosine, paraffine oil, mineral oil, petroline, gasoline, benzol, benzoline, bezine, and any inflammable liquid which is made from petroleum, coal, schist, shale, peat or any other bituminous substance, or from any products or petroleum; but it does not include any oil ordinarily used for lubricating purposes and having its flashing point at or above two hundred degrees of Fahrenheit's thermometer:

(*2*) "dangerous petroleum" means petroleum having its flashing point below seventy-six degrees of Fahrenheit's thermometer: Provided that, when all or any of the petroleum in the possession of a dealer is declared by the dealer to be of one uniform quality, the petroleum shall

not be deemed to be dangerous if the samples selected from the petroleum have their flashing points on an average at or above seventy-three degrees of Fahrenheit's thermometer, and if no one of those samples has its flashing point below seventy degrees of that thermometer:

(3) "import" means to bring into *lands occupied by railways in His Highness the Nizam's territory* by land; and

"importation" means the bringing into *land occupied by railways in His Highness the Nizam's territory* as aforesaid.

(4) "transport" means to remove from one place to another within *lands occupied by railways in His Highness' the Nizam's territory;* and

(5) "ship" includes anything made for the conveyance by water of human beings or property.

Matters supplemental to the definitions

3. (1) The flashing point of petroleum means the lowest temperature at which the petroleum yields a vapour which will furnish a momentary flash or flame when tested in accordance with the directions in the schedule to this Act with an apparatus which has been stamped and certified as provided by this Act within a period of five years immediately preceding the date on which the apparatus is used for the testing, and after the corrections (if any) which the certificate declares are to be applied to the results of the testing have been made.

(2) Notwithstanding anything in the definitions of "import," "importation" and "transport," the Resident at Hyderabad may, with the previous sanction of the Governor General in Council, from time to time, by notification in Hyderabad Residency Orders, declare that petroleum imported into *the lands occupied by railways in His Highness the Nizam's territory* from any part of such lands across intervening territory, not being part of such lands, shall for all or any of the purposes of this Act be deemed to be transported, and

thereupon the provisions of this Act, and of the rules made under this Act with respect to transport, shall apply to petroleum so imported.

Dangerous Petroleum.

Dangerous petroleum in quantities exceeding forty gallons

4 (1) No quantity of dangerous petroleum exceeding forty gallons shall be imported or transported, or kept by any one person or on the same premises, except under, and in accordance with the conditions of, a license from the Resident at Hyderabad granted as next hereinafter provided.

(2) Every application for such a license shall be in writing, and shall declare—

(a) the quantity of the petroleum which it is desired to import, transport or possess, as the case may be,

(b) the purpose for which the applicant believes that the petroleum will be used; and

(c) that petroleum, other than dangerous petroleum, cannot be used for that purpose.

(3) If the *Resident at Hyderabad* sees reason to believe that the petroleum will be used for that purpose, and that no petroleum other than dangerous petroleum can be used for the purpose, *he* may grant the license for the importation, transport or possession (as the case may be) of the petroleum absolutely or subject to such conditions as *he* thinks fit.

Dangerous petroleum in quantities not exceeding forty gallons

5. No quantity of dangerous petroleum equal to or less than forty gallons shall be kept or transported without a license:

Provided that nothing in this section shall apply in any case when the quantity of the petroleum kept by any one person or on the same premises, or transported, does not exceed three gallons, and the petroleum is placed in separate glass, stoneware or metal vessels, each of which contains not more than a pint, and is securely stopped.

Vessels containing dangerous petroleum to be labelled

6. Dangerous petroleum—

(a) which is kept at any place after seven days from the date on which it is imported, or

(b) which is transported, or

(c) which is sold or exposed for sale,

shall be contained in vessels having attached thereto a label in conspicuous characters stating the description of the petroleum, with the addition of the words "highly inflammable," and with the addition—

(d) in the case of a vessel kept, of the name and address of the consignee or owner;

(e) in the case of a vessel transported, of the name and address of the sender; and

(f) in the case of a vessel sold or exposed for sale, of the name and address of the vendor.

Petroleum Generally.

Possession and transport of petroleum.

7. No quantity of petroleum exceeding five hundred gallons shall be kept by any one person, or on the same premises, or shall be transported, except under, and in accordance with the conditions of, a license granted under this Act.

8. (1) The Resident at Hyderabad, with the previous sanction of the Governor-General in Council, may make rules consistent with this Act as to the granting of licenses to possess or transport petroleum in cases where such licenses are by law required.

Power to make rules as to possession and transport

(2) The rules may provide for the following among other matters, that is to say:

in the case of licenses to possess petroleum—

(a) the nature and situation of the premises for which they may be granted, and

(b) the inspection of the premises and the testing of petroleum found thereon;

in the case of licenses to transport petroleum—

(c) the manner in which the petroleum is to be packed, the mode and time of transit, and the route by which it is to be taken, and

(d) the stoppage and inspection of it during transit;

in the case of both such licenses—

(e) the authority by which the license may be granted,

(f) the fee to be charged for it;

(g) the quantity of petroleum it is to cover;

(h) the conditions which may be inserted in it;

(i) the time during which it is to continue in force, and

(j) the renewal of the license.

9. Any officer specially authorised by name or by virtue of his office in this behalf by the Resident at Hyderabad may require any dealer in petroleum to show him any place and any of the vessels in which any petroleum in his possession is stored or contained, to give him such assistance as he may require for examining the same, and to deliver to him samples of the petroleum on payment of the value of the samples

Power to inspect and require dealer to sell samples

10. When any such officer has, in exercise of the powers conferred by section 9 or by purchase, obtained a sample of petroleum in the possession of a dealer, he may give a notice in writing to the dealer informing him that he is about to test the sample, or cause it to be tested, with the apparatus and in the manner described in the schedule to this Act, at a time and place to be fixed in the notice, and that the dealer or his agent may be present at the testing.

Notice to be given when officer proposes to test samples.

11 On any such testing, if it appears to the officer or other person so testing that the petroleum from which the sample has been taken is or is not dangerous petroleum, the officer or other person may certify the fact; and the certificate so given shall be receivable as evidence in any proceedings which may be taken under this Act against the dealer in whose possession the petroleum was found, and shall, until the contrary is proved, be evidence of the fact stated therein; and a certified copy of the certificate shall be given free of charge to the dealer at his request.

Certificate as to result of testing.

Penalties.

12. Any person who, in contravention of this Act or of any rules made under this Act, imports, possesses or transports any petroleum, and any person who otherwise contravenes any such rules or any condition contained in a license granted under this Act, shall be punished with imprisonment for a term which may extend to one month, or with fine which may extend to five hundred rupees, or with both.

Penalty for illegal importation, possession or transport of petroleum.

13. Any person keeping, transporting, selling or exposing for sale petroleum in vessels not labelled as prescribed by section *6* shall be punished with fine which may extend to five hundred rupees

Penalty for keeping, transporting, selling or exposing for sale petroleum in contravention of section 6.

14. Any dealer in petroleum who refuses or neglects to show to any officer authorised under section *9* any place or any of the vessels in which petroleum in his possession is stored or contained, or to give him such assistance as he may require for examining the same, or to give him samples of the petroleum on payment of the value of the samples, shall be punished with fine which may extend to two hundred rupees.

Penalty for refusing to comply with section 9.

15. In any case in which an offence under section *12* or section *13* has been committed, the convicting Magistrate may direct that—

Confiscation of petroleum.

(a) the petroleum in respect of which the offence has been committed, or

(b) where the offender is importing or transporting, or is in possession of, any petroleum exceeding the quantity (if any) which he is permitted to import, transport or possess, as the case may be, the whole of the petroleum which he is importing or transporting or is in possession of shall, together with the tins or other vessels in which it is contained, be confiscated.

16. The criminal jurisdiction under this Act shall be exercised by a Magistrate of the first class, or (where especially empowered by the Resident at Hyderabad to try cases under this Act) a Magistrate of the second class.

Jurisdiction.

Test apparatus.

17. A model of the apparatus for testing petroleum under this Act, constructed in accordance with the description contained in the schedule to this Act, shall be deposited in the office of the Chemical Examiner to Government, Calcutta, and be marked with the words "Model test-apparatus."

Model test-apparatus.

18. (1) The Chemical Examiner shall on payment of such fee (if any) as the Governor-General in Council may, from time to time, by notification in the *Gazette of India*, prescribe, compare with the said model test-apparatus, and verify every apparatus for testing petroleum which is submitted to him for the purpose.

Verification of test-apparatus.

(2) If any apparatus for testing petroleum, when compared and verified as provided by sub-section (1), is found correct, or correct subject to certain corrections to be applied to the results of the tests, the Chemical Examiner shall stamp the same with a special number, and with the date of the verification, and shall further give a certificate in writing under his hand, in a form to be prescribed by the Governor-General in Council, to the effect that on the date aforesaid the apparatus was compared and verified by him and found to be correct, or correct subject to certain specified corrections to be applied to the results of the tests.

(3) A certificate granted under this section shall, until the contrary is proved, be conclusive proof of the matters stated therein.

(4) The Chemical Examiner shall keep a register, in a form to be prescribed by the Governor-General in Council, of the certificates granted under this section.

(5) Subject to the payment of such fees as the Governor-General in Council may, by notification in the *Gazette of India*, prescribe in this behalf, the said model test-apparatus shall be at all reasonable times open to inspection by any person desiring to inspect it.

Miscellaneous

19. The Resident at Hyderabad may, from time to time, by notification in Hyderabad Residency Orders, exempt from the operation of all or any of the provisions of this Act, or of all or any of the rules made under this Act, any petroleum which has its flashing point at or above one hundred and twenty degrees of Fahrenheit's thermometer, and is imported as ordinary goods and in quantity not exceeding that specified in the notification.

Power to exempt petroleum from operation of this Act

20. The Governor-General in Council may, from to time time, by notification in the *Gazette of India*, apply the whole or any portion of this Act to any inflammable fluid other than petroleum, and may by the notification fix, in substitution for the quantities of petroleum fixed by sections 4, 5 and 7, the quantities of the fluid to which those sections shall apply.

Power to apply this Act to other fluids.

21. The Governor-General in Council may, from time to time, by notification in the *Gazette of India*, and in the local official gazette, limit in any manner he deems fit the operations of any enactment for the time being in force relating to municipalities in any local area or to any particular municipality, and the exercise of any power conferred by any such enactment in so far as the enactment relates to the possession or transport of petroleum.

Power to limit operation of enactments relating to municipalities.

22. A notification made under this Act may be revoked or varied by the authority making it by a notification published in the same manner as the notification so revoked or varied.

Power to revoke or vary notifications.

23. (1) The Resident at Hyderabad shall, before making rules under this Act, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

Procedure for making and publication of rules.

(2) The publication shall be made in the Hyderabad Residency Orders in English and such other language or languages as the said Resident may consider necessary, and also in such other manner (if any) as the Resident may think proper.

(3) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(4) The said Resident shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(5) A rule made under this Act shall not take effect until it has been published in the manner aforesaid.

(6) The publication in Hyderabad Residency Orders of a rule purporting to be made under this Act shall be conclusive proof that it has been duly made.

(7) All powers to make rules conferred by this Act may be exercised from time to time as occasion requires.

THE SCHEDULE.

I.—*Nature of the Test-apparatus.*

The apparatus consists of the following parts

(1) the oil cup ,

(2) the cover, with slide, test-lamp, and clock-work arrangement for opening and closing the holes in the cover and for dipping the test-flame ,

(3) the water bath or heating vessel ,

(4) the tripod stand, with jacket and spirit-lamp for heating the water-bath ,

(5) the thermometer for indicating the temperature of the oil in the oil cup ,

(6) the thermometer for indicating the temperature of the water in the water-bath ,

(7) the thermometer for indicating the temperature of the oil before it is poured into the oil cup

(8) the dropping bottle or *pipette* for replenishing the test lamp , and

(9) a barometer standardised at such Meteorological Office or other place as the Resident at Hyderabad may appoint in this behalf

The oil-cup is a cylindrical flat bottomed vessel made of gun metal or brass and tinned or silvered inside A gauge is fixed to the inside of the cup to regulate the height to which it is to be filled with the sample under examination

The cup is provided with a close fitting overlapping cover which carries the thermometer, the test lamp and the adjuncts thereto The test lamp is suspended upon two supports by means of trunnions, which allow it to be easily inclined to a particular angle and restored to its original position The socket in the cover which is to hold a round bulb thermometer for indicating the temperature of the oil during the testing operation, is so adjusted that the bulb of the latter is always inserted in a definite position below the surface of the liquid

The cover is provided with three holes, one in the centre and two smaller ones close to the sides These are closed and opened by means of a pivoted slide When the slide is moved so as to uncover the holes, the suspended lamp is caught by a projection fixed on the slide, and tilted in such a way as to bring the end of the spout just below the surface of the lid As the slide moves back so as to cover the holes the lamp returns to its original position Upon the cover in front of and in a line with the nozzle of the lamp is fixed a white bead, the diameter of which represents the size of the test-flame to be used.

The water-bath or heating vessel is so constructed that, when the oil-cup is placed in position in it, an air space or air-chamber intervenes between the two , consequently, in applying the test under ordinary circumstances, the heat is transmitted gradually to the oil from the hot water through the air-space. The water-bath is fitted with a socket for receiving a long bulb thermometer to indicate the temperature of the water It is also provided with a funnel, an overflow pipe, and two handles.

The water-bath rests upon a tripod stand, which is fitted with copper cylinder or jacket, so that the bath is surrounded by an enclosed air-space, which retains and regulates the heat One of the legs of the stand serves as a support for a spirit-lamp, which is attached to it by a small swing bracket.

The clock-work arrangement, by which during the operation of testing the slide is withdrawn and the test-flame dipped into the cup and raised again as the slide is replaced, is provided with a ratchet key for setting it in action for each test and with a trigger for starting it each time that the test-flame is applied.

II.—*Directions for drawing the sample and preparing it for testing*

1. *Drawing the sample* —In all cases the testing officer or some person duly authorised by him shall personally superintend the drawing of the sample from an original unopened tin or other vessel.

An opening sufficiently large to admit of the oil being rapidly poured or syphoned from the tin or other vessel shall be made

Two bottles, each of the capacity of about 40 fluid ounces, are to be filled with the oil. One of these, the contents of which is intended to be preserved for reference in case of need, is to be carefully corked, the cork being well driven home, cut off level with the neck, and melted sealing-wax worked into it The other bottle may be either stoppered or corked.

2. *Preparing the sample for testing.*—About ten fluid ounces of the oil, sufficient for three tests, are transferred from the bottle into which the sample has been drawn to a pint flask or bottle, which is to be immersed in water artificially cooled until a thermometer introduced into the oil indicates a temperature not exceeding 50° Fahrenheit.

III.—*Directions for preparing and using the test-apparatus.*

Preparing the water-bath.—The water-bath is filled by pouring water into the funnel until it begins to flow out at the overflow-pipe. The temperature of the water at the commencement of each test, as indicated by the long bulb thermometer, is to be 130° Fahrenheit, and this

is attained in this first instance by mixing hot and cold water, either in the bath or in a vessel from which the bath is filled, until the thermometer which is provided for testing the temperature of the water gives the proper indication; or the water is heated by means of the spirit-lamp (which is attached to the stand of the apparatus) until the required temperature is indicated.

2. *Preparing the test-lamp.*—The test-lamp is fitted with a piece of cylindrical wick of such thickness that it fills the wick-holder, but may readily be moved to and fro for the purpose of adjusting the size of the flame. In the body of the lamp, upon the wick, which is coiled within it, is placed a small tuft of cotton wool, moistened with petroleum, any oil not absorbed by the wool being removed. When the lamp has been lighted, the wick is adjusted by means of a pair of forceps until the flame is of the size of the bead fixed on the cover of the oil-cup; should a particular test occupy so long a time that the flame begins to get smaller through the supply of oil in the lamp becoming exhausted, three or four drops of petroleum are allowed to fall upon the tuft of wool in the lamp from the dropping bottle or *pipette* provided for that purpose. This can be safely done without interrupting the test.

3. *Filling the oil-cup.*—The oil-cup having been previously cooled by placing it bottom downwards in water at a temperature not exceeding 50° Fahrenheit is to be rapidly wiped dry, placed on a level surface in a good light, and the oil to be tested is poured in very slowly, without splashing, until its surface is level with the point of the gauge which is fixed in the cup. The round bulb thermometer is inserted into the lid of the cup, care being taken that the projecting rim of the collar touches the edge of the socket; the test lamp, prepared as already described, is placed in position, and the cover is then put on to the cup and pressed down so that its edge rests on the rim of the cup.

4. *Application of the test.*—The water-bath with its thermometer in position is placed in some locality where it is not exposed to currents of air, and where the light is sufficiently subdued to admit of the size of the entire test-flame being compared with that of the bead on the cover. The cup is carefully lifted without shaking it, and placed in the bath, the test-lamp is lighted, and the clock-work wound up by turning the key. The thermometer in the oil-cup is now watched, and when the temperature has reached 56° Fahrenheit, the clock-work is set in motion by pressing the trigger.

If no flash takes place, the clock-work is at once re-wound, and the trigger pressed at 57° Fahrenheit, and so on, at every degree rise of temperature, until the flash occurs, or until a temperature of 95° Fahrenheit has been reached.

If the flash takes place at any temperature below 77° Fahrenheit, the temperature at which it occurs is to be recorded. Two fresh portions of the sample are then to be successively tested in a similar manner and the results recorded. If no greater difference than 2° Fahrenheit exists between any two of the three recorded results, and if in no instance the flash has taken place within 8° of the temperature at which the testing is commenced, each result is to be corrected for atmospheric pressure as hereafter described, and the average of the three corrected results is the flashing point of the sample. In the event of there being a greater difference than 2° Fahrenheit between any two of the results, while in no instance has the flash taken place within 8° of the temperature at which the testing was commenced, the series of tests is to be rejected, and a fresh series of three similarly obtained, and so on, until a sufficiently concordant series is furnished, when the results are to be corrected and the average taken in the manner already described.

If, however, a flash has occurred at or below 64° when the test is applied in the manner above described, the next testing shall be commenced 10° lower than the temperature at which the flash had been previously obtained (that is to say, at 54° or thereunder), and this procedure shall be continued until the results of three consecutive tests do not show a greater difference than 2°, and until a flash has not occurred in any of the three tests within 8° of the temperature at which the testing is commenced: Provided always that if at the commencement of the series of tests a flash has occurred on the first application of the test-flame at 56°, and if a flash has also occurred on the first application of the flame in each of three successive tests in which thereupon the test-flame is first applied at 46° as above directed, the testing officer shall certify that the petroleum has a flashing point below 47°, and the sample shall be reported dangerous.

If a temperature of 76° Fahrenheit has been reached without a flash occurring, the application of the test-flame is to be continued at every degree rise of temperature until a temperature of 95° Fahrenheit has been reached. If no flash has occurred up to this point, and if the petroleum is declared to be imported subject to the provisions of the Act, the tests shall not be continued, and the testing officer shall certify that the petroleum has a flashing point over 95° and is not dangerous. But if the petroleum is oil ordinarily used for lubricating purposes, and is declared to have its flashing point at or above 200°, or oil to which a notification of the Local Government exempting it from the operation of the Act will be applicable in the event of the flashing point being found to be at or above 120°, the test shall be continued as follows:—The oil-cup is to be removed from the water-bath, and the temperature of the water in the water-bath is to be reduced to 95° Fahrenheit by pouring cold water into the funnel (the hot water escaping by the overflow pipe). The air chamber is then to be filled to a depth of 1½ inches with water at a temperature of about 95° Fahrenheit, the oil-cup is to be replaced in the water-bath, and the spirit-lamp attached to the water-bath is to be lighted and placed underneath. The test-flame is then to be again applied from 96° Fahrenheit at every degree rise of temperature as indicated by the thermometer in the oil-cup until a flash takes place or until a temperature of 200° Fahrenheit or 120° Fahrenheit, as the case may be, has been reached. If during this operation the test-flame appears to diminish in size, the lamp is to be replenished in the manner prescribed at (2) without interrupting the test.

If a flash occurs at any temperature between 76° and 200° Fahrenheit, the temperature at which it occurs, subject to correction for atmospheric pressure, is the flashing point of the sample.

In repeating a test a fresh sample of oil must always be used, the tested sample being thrown away, and the cup must be wiped dry from any adhering oil and cooled, as already described, before receiving the fresh sample.

5. *Correction for atmospheric pressure.*—As the flashing point of an oil is influenced by changes in atmospheric pressure to an average extent of 1·6° Fahrenheit for every inch of the barometer, a correction of the observed flashing point may become necessary. The height of the barometer must therefore be determined at the time of making the test for the flashing point. The true height of the barometer for the purpose of the test shall be considered to be the height of the column of mercury measured at 32° Fahrenheit, which is supported by the air-pressure at the time of the experiment,—that is, the actual height of the barometer at the time of observation duly corrected for any error of the instrument and for its temperature if necessary. For the purpose of applying the correction to the flashing point of the oil obtained by the test, a table is appended to this schedule giving the flashing points of oils ranging from 65° to 80° Fahrenheit under pressure ranging from 27 to 31 inches of mercury.

The table is used in the following manner:

Example.—An oil has given a flashing point of 71°, the barometer being at 28·6 inches; take the nearest number to 71° in the vertical column headed 28·6. This number is 70·8. Substitute for this the number in the same horizontal line in the column headed 30 (the normal height of the barometer). The substituted number, that is, the true flashing point of the oil, is 73°.

Table for correction of Flashing Points indicated by the Test for variations in Barometric Pressure on either side of Thirty Inches.

Barometer in Inches

W. J. CUNINGHAM,

Secretary to the Government of India.

The 4th May, 1894.

No. 710-G.—Mr. W. J. Cuningham, C.S.I., Indian Civil Service, Deputy Secretary, is appointed to be Secretary to the Government of India in the Foreign Department, with effect from the 18th April, 1894, *vice* Sir H. M. Durand, K.C.S.I., K.C.I.E.

Lieutenant-Colonel A. C. Talbot, C.I.E., Indian Staff Corps, Resident of the 2nd class and Political Resident in the Persian Gulf, is appointed, on return from furlough, to be Deputy Secretary to the Government of India in the Foreign Department, with effect from the date of assuming charge, *vice* Mr. Cuningham.

Captain H. Daly, C.I.E., Indian Staff Corps, officiating Political Agent of the 2nd class and Assistant Secretary, is appointed to officiate temporarily as Deputy Secretary to the Government of India in the Foreign Department, with effect from the 18th April, 1894, and until the arrival of Lieutenant-Colonel Talbot.

Lieutenant W. M. Cubitt, Indian Staff Corps, officiating Political Agent of the 3rd Class and Attaché, is posted temporarily as Assistant Secretary to the Government of India in the Foreign Department, with effect from the 18th April, 1894, *vice* Captain Daly.

A. WILLIAMS,

Offg. Under-Secy. to the Govt. of India.

FINANCE AND COMMERCE DEPARTMENT

ACCOUNTS AND FINANCE.
ESTIMATES AND ACCOUNTS.

No. 2235-A

Simla, the 3rd May, 1894.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read—

The Finance and Revenue Accounts for 1892-93 and the Comptroller and Auditor-General's Appropriation Report on these Accounts

RESOLUTION.—The following table compares the leading figures of the Accounts for the year 1892-93 with the Estimates of that year and with the Accounts of the preceding year:

		1891-92, Accounts	1892-93 Budget Estimate	1892-93 Revised Estimate	1892-93 Accounts	Accounts 1892-93 better + or worse − than Budget Estimate
Revenue—						
India	Rx	88,773,360	88,066,700	89,683,000	89,819,707	+ 1,753,00[illegible]
England	£	257,919	200,800	211,400	220,233	+ 19,43[illegible]
Exchange	Rx	112,004	100 400	126,800	132,498	+ 32,09[illegible]
Total	Rx	89,143,283	88,367,900	90,021,200	90,172,438	+ 1,804,53[illegible]
Expenditure—						
India	Rx	66,004,760	65,457,400	64,965,100	65,021 394	+ 436,00[illegible]
Provincial Adjustment	Rx	−240,924	1,161,700	−363,800	−177 359	984,34[illegible]
England	£	15,974,699	15,950,400	16,563,600	16,334,541	− 384,14[illegible]
Exchange	Rx.	6,937,213	7,975,200	9,938,200	9,827,274	− 1,852,07[illegible]
Total	Rx.	88,675,748	88,221,300	91,103,100	91,005,850	− 2,784,55[illegible]
Surplus (+) Deficit (−)	Rx	+467,535	+146,600	−1,081,900	−833,412	− 980,01[illegible]
Expenditure not charged against Revenue—						
Capital expenditure on Railways and Irrigation Works	Rx.	3,500,000	4,035,000	3,986,700	3,986,290	+ 48,71[illegible]

2. The accounts of 1892-93 showed a deficit of Rx. 833,412 against a surplus of Rx. 467,535 realised in 1891-92. This deterioration of Rx. 1,300,947 is due not to any falling off of revenue, but to an increase of expenditure caused by a heavy fall in Exchange and to some additional charges in England peculiar to the year 1892-93 In fact, the deficit shown in the accounts would have been considerably larger but for a satisfactory increase in the revenues in India, which counterbalanced to some extent the increased charges for Exchange and sterling expenditure. The increase in the net charge for exchange was no less than Rx. 2,869,567, of which Rx. 2,696,469 was due to the fall in the average rate of Exchange from 1*s*. 4·733*d*. in 1891-92 to 1*s*. 2·985*d*. in 1892-93. The net sterling expenditure in 1892-93 exceeded that of the preceding year by £397,528. On the other hand, the increase in the net revenues in India in 1892-93 amounted to Rx 1,966,148 as compared with the previous year

3. The Budget Estimate of 1892-93 anticipated a small surplus of Rx. 146,600; but the large deficit in the Accounts is the net result of a fall in Exchange and an increase in sterling expenditure counterbalanced by an improvement in the revenue and expenditure in India. The increase of revenue and reduction of expenditure in India as compared with the Budget Estimate amounted to Rx. 1,753,007 and Rx. 436,006 respectively, resulting in a net improvement of Rx. 2,189,013, of which Rx. 1,204,672 occurred in the Imperial section and Rx. 984,341 in the Provincial and Local section of the Accounts. The sterling receipts and expenditure were higher than the estimates by £19,433 and £384,141 respectively, while the increase in the net charge under Exchange amounted to Rx. 1,819,976.

4. The total increase of Rx. 1,753,007 in the revenues in India is distributed as follows:

		Increase + Decrease — Rx
Principal Heads of Revenue	+	1,198,975
Interest	—	43,082
Post Office, Telegraph, and Mint	+	111,918
Civil Department . .	—	10,104
Miscellaneous . .	—	104,897
Railways .	+	245,635
Irrigation	+	202,202
Buildings and Roads	+	44,017
Army	+	108,343
TOTAL	+	1,753,007

All the heads comprised in the Principal Heads of Revenue contribute to the increase under the group except Customs.

The Customs Revenue fell short of the estimates by Rx. 74,167 owing mainly to smaller exports of rice from Burma and Bengal.

The increase under the other heads of the group amounted to Rx. 1,273,142, and occurred principally under Land Revenue (Rx. 229,828), Opium (Rx. 358,580), Salt (Rx. 111,404), Stamps (Rx 218,940), Excise (Rx. 140,043), and Provincial Rates (Rx. 83,398).

The decrease in the Interest receipts is connected mainly with the capital transactions of Guaranteed Railway Companies.

The greater part of the increase under the group "Post Office, Telegraph, and Mint" occurred under the head Mint, and was obtained from the unexpected heavy silver coinage of the year.

The main feature about the falling off under the group Miscellaneous is a decrease of Rx. 158,814 under "Exchange," which is a very uncertain head of Revenue.

As regards the group "Irrigation," the increase occurred chiefly under "Major Works—Direct Receipts," the larger revenue from extended irrigation not having been fully anticipated.

The major portion of the enhanced receipts under Army was on account of effective services.

5. The most important saving in the expenditure in India occurred under the group Direct Demands on the Revenues, under which the decrease was Rx. 822,170, due mainly to a falling off under Opium (Rx. 632,304) owing to the partial failure of the opium crop. The other important decreases were: Salaries and Expenses of Civil Departments, Rx. 120,680; Famine Relief and Insurance, Rx. 96,336; and Buildings and Roads, Rx. 88,735. On the other hand, there was an increase of Rx. 582,391 under Army and of Rx. 93,260 under Interest. The variations in the other groups are unimportant.

6. The improvement of Rx. 984,341 in the Provincial and Local section of the accounts was the result of an increase in revenue of Rx. 748,885 and a saving in expenditure of Rx. 235,456. The improvements were largest in Madras, Burma, and Bombay.

7. The increase of £19,433 in the revenue in England is distributed under several heads, the major part occurring under the heads Telegraph, Miscellaneous, and Army.

8. As regards the expenditure in England, there was a total excess over the Budget of £384,141. which appeared mainly under the heads Marine (£112,776) and Army (£294,296). There were also some increases under Interest (£37,717) and Superannuation Allowances and Pensions (£ 62,346); but these and other small excesses were counterbalanced by savings under other heads, the most important being the head "Special Defence Works," under which a reduction of £102,768 occurred owing to smaller payments for stores and armaments.

9. Of the increase of Rx. 1,819,976 in the net charge for exchange, Rx. 1,637,622 was due to the fall in Exchange from the Budget rate of 1*s*. 4*d*. to 1*s*. 2·985*d*. actually realised on the drawings of the year. The remainder, Rx. 182,354, represents the Exchange on the increased sterling expenditure at the Budget rate.

10. The several heads of Revenue and Expenditure are noticed in detail in the following paragraphs:

PRINCIPAL HEADS OF REVENUE.

11. *Land Revenue.*—The collections of the year exceeded those of the preceding year and the Budget Estimate by Rx. 988,671 and Rx. 247,734 respectively. Of the increase of Rx. 988,671 over 1891-92, Rx. 735,214 were realised in Madras, and the remainder chiefly in Bombay and Burma. The increase in Madras was due to the recovery of arrears from the previous year, the collections having been postponed on account of scarcity. In Burma the increase was due to the progress of settlement operations and to a favourable season, and in Bombay part of the increase was nominal as representing the adjustment of alienated Land Revenue by a corresponding increase under Expenditure, and part represented normal growth of the Revenue and recovery of arrears. The improvement as compared with the Budget Estimate occurred chiefly in Burma and Bombay, and was due to the same causes that account for the increases over 1891-92. There was also a moderate improvement in Madras. In no Province were the collections below the Budget Estimate, except in the North-Western Provinces and Oudh, where floods and unfavourable weather in certain districts and the non-recovery of arrears to the extent anticipated caused a reduction of Rx. 82,988 below the estimate.

		I.—Land Revenue.	Portion due to Irrigation	Total.
		Rx.	Rx.	Rx.
1891-92	Accounts	23,965,774	673,189	24,638,963
1892-93	Budget	24,675,500	704,400	25,379,900
	Revised	24,857,600	725,600	25,583,200
	Accounts	24,905,328	722,306	25,627,634

The collections of the past five official years (including Land Revenue due to Irrigation) and those of the last five revenue years ending with 30th September were as follow:

	Year ending 31st March	Year ending 30th September.
	Rx	Rx.
1888-89	23,687,400	23,961,700
1889-90	24,671,200	24,782,300
1890-91	24,754,200	24,890,900
1891-92	24,639,000	24,700,400
1892-93	25,627,600	25,845,800

12. *Opium.*—The sale proceeds of Bengal provision opium exceeded those of the previous year by Rx. 143,605 and the Budget Estimate of the year by Rx. 423,265. The number of chests sold in 1892-93 was 48,852 against 56,250 chests sold in the preceding year and 54,000 chests taken in the Budget Estimate. This reduction in the quantity was necessitated by a very poor crop of opium, in consequence of which the quantity of the drug offered for sale from October 1892 was reduced to 3,642 chests a month against 4,500 chests sold in each of the preceding six months. The average price realised was, however, Rs. 1,247 per chest against Rs. 1,058 obtained in 1891-92 and Rs. 1,050 assumed in the Budget, and this large improvement in the price over the Budget Estimate more than counterbalanced the effect of the reduction in the quantity sold. The receipts from the Bombay Pass-fees were less than those of 1891-92 by Rx. 168,540, and less than the Budget Estimate by Rx. 75,270. The number of chests of Malwa opium weighed for export in 1892-93 was 27,313 chests against 31,236 chests weighed in 1891-92. The falling off in the revenue is less than the difference in the weighments would indicate owing to the realisation in 1892-93 of certain hundies issued in payment of opium weighed in 1891-92.

		Rx.
1891-92	Accounts	8,012,380
1892-93	Budget	7,634,600
	Revised	7,966,500
	Accounts	7,593,180

As already stated, the Bengal opium crop was again a very poor one. The figures in the margin show the outturn of provision opium for the last eight years. The outturn in 1892-93 was the lowest on record since 1861-62.

	Number of chests of provision opium manufactured.
1885-86	64,925
1886-87	64,500
1887-88	57,500
1888 89	69,500
1889 90	38,305
1890 91	44,760
1891-92	44,522
1892-93	33,679

13. *Salt.*—The Salt revenue in 1892-93 for all India shows a slight improvement over 1891-92, mainly the result of a large increase of Rx. 146,955 under Northern India, counterbalanced by a falling off in Madras and Bombay of Rx. 51,713 and Rx. 82,150 respectively. The important variations from the Budget Estimate were an increase of Rx. 138,090 in Northern India and a reduction of Rx. 35,542 in Bombay.

		Rx
1891-92	Accounts	8,636,182
1892-93	Budget	8,544,700
	Revised	8,648,600
	Accounts	8,656,104

14. *Stamps and Excise.*—The Stamp revenue shows a satisfactory increase in nearly all the provinces, the largest increase in 1892-93 having been realised in Madras. Next in order come Bengal and Bombay. The Excise revenue also shows the usual tendency to rise. The improvement in 1892-93 is shared by all the provinces, except Assam, Madras, and the Punjab, where there have been only small decreases due to

		Stamps.	Excise.
		Rx.	Rx.
1891-92	Accounts	4,262,156	5,117,264
1892-93	Budget	4,229,600	5,102,400
	Revised	4,458,200	5,203,600
	Accounts	4,448,540	5,242,443

temporary causes. The growth in the Stamp and Excise revenue in the last five years is indicated by the following figures:

	Stamps. Rx.	Excise. Rx.
1888-89	3,927,088	4,705,346
1889-90	4,087,908	4,891,894
1890-91	4,068,969	4,947,78c
1891-92	4,262,156	5,117,264
1892-93	4,448,540	5,242,443

The Stamp revenue received a check in 1890-91; but a renewed improvement began in 1891-92, which has continued during the following year.

15. *Provincial Rates.*—As usual, the variations in the receipts under this head follow those under Land Revenue, and the largest increase over 1891-92 appears in Madras, where the collections in that year were abnormally low in consequence of the scarcity in the Presidency. In Bengal there was an increase of Rx. 48,766 over the Budget Estimate owing to the revaluations going on in that Province.

		Rx
1891-92	Accounts	3,502,837
1892-93	Budget	3,623,100
	Revised	3,645,700
	Accounts	3,706,498

16. *Customs: Import duties.*—The receipts of 1892-93 exceeded those of the preceding year and the Budget by Rx. 47,693 and Rx. 32,374 respectively. The improvement occurred chiefly in Burma and Bengal owing to increased imports of kerosine oil, liquor, and wines.

		Total Customs Revenue. Rx
1891-92	Accounts	1,701,288
1892-93	Budget	1,691,600
	Revised	1,616,800
	Accounts	1,617,633

Export duties.—The receipts from export duties were lower than those of 1891-92, and the Budget Estimate by Rx. 138,601 and Rx. 111,644 respectively. The falling off was mainly in the export of rice from Burma and Bengal, and was due to the depression of trade in Europe and to high prices in this country.

17. *Assessed Taxes.*—The improvement under this head was general, being the necessary accompaniment of the increase in wealth and population and the more effective administration of the tax. In Bombay there was a special increase over 1891-92 of Rx. 5,199 in the tax on the surplus profits of Railway Companies.

		Rx
1891-92	Accounts	1,652,823
1892-93	Budget	1,645,200
	Revised	1,683,100
	Accounts	1,686,141

18. *Forest Revenue.*—The improvement in the revenue over that of 1891-92 and the Budget Estimate occurred almost entirely in Burma, and was due generally to a rise of prices and to an exceptionally favourable season for floating down timber. The increase in that Province over 1891-92 and the Budget Estimate of 1892-93 amounted to Rx. 147,458 and Rx. 99,000 respectively; but these excesses were counterbalanced to some extent by a decline in the larger provinces due generally to a slackness in the demand for timber and fuel.

		Rx.
1891-92	Accounts	1,490,582
1892-93	Budget	1,567,200
	Revised	1,627,600
	Accounts	1,591,332

19. *Registration.*—This head shows the usual growth. The improvement is distributed over all the provinces except Assam, where there was a very small decrease.

		Rx.
1891-92	Accounts	399,802
1892-93	Budget	392,200
	Revised	430,700
	Accounts	430,064

20. *Tributes.*—The increases were chiefly under the Baroda Tribute and in the recoveries from the Shan States and Manipur. A special claim for refund out of the Baroda Tribute was not settled in the year as expected, and the recoveries from the Shan States were not fully anticipated.

		Rx.
1891-92	Accounts	775,961
1892-93	Budget	762,100
	Revised	798,600
	Accounts	790,112

DIRECT DEMANDS ON THE REVENUE.

21. *Refunds.*—The charges under this head fluctuate considerably. The excess over the Budget Estimate of 1892-93 was the result of a number of variations, of which the more important were a refund to the Bombay Port Trust in connection with the composition of stamp duty chargeable on their debentures and increased payments to the Portuguese Indian Government on account of its share of the common customs receipts.

		Rx.
1891-92	Accounts	254,353
1892-93	Budget	242,700
	Revised	257,900
	Accounts	257,288

22. *Assignments and Compensation.*—The increased payments in 1892-93 are more than accounted for by the special adjustments of alienated Land Revenue in Bombay mentioned in paragraph 11.

		Rx.
1891-92	Accounts	1,531,860
1892-93	Budget	1,515,700
	Revised	1,517,500
	Accounts	1,567,776

23. *Land Revenue.*—The expenditure in 1892-93 exceeded that of the previous year by Rx. 101,219. Of the excess, Rx. 35,760 occurred in the charges for District Administration, and Rx. 56,449 under Survey and Settlement. The increase under the first head is distributed over nearly all the provinces, and follows the general growth of revenue and improvement of administration. The Survey and Settlement charges were higher chiefly in Burma and Bengal. The Budget Estimate proved too high for all the provinces except Bengal, where the charges for District Administration and Survey and Settlement were not sufficiently provided for.

		Rx.
1891-92	Accounts	3,835,126
1892-93	Budget	4,031,000
	Revised	3,950,100
	Accounts	3,936,345

24. *Opium.*—The expenditure consists almost entirely of the payments for Bengal opium. As already mentioned, there was a very poor crop in 1892-93; and though the expenditure has been reduced by successive failures of the crop for several years, the prospects of the Opium revenue have been rendered uncertain by the almost complete depletion of the reserve in stock.

		Rx.
1891-92	Accounts	1,861,813
1892-93	Budget	2,234,800
	Revised	1,595,000
	Accounts	1,602,496

25. *Salt.*—The charges in 1892-93 were about the same as in 1891-92, but the saving on the Budget Estimate was Rx. 38,793. About half of this saving occurred in the charges for manufacture and excavation at Sambhar, and the other half in the payments for salt purchase and freight in Madras. The short expenditure at the Sambhar lake was due to a bad season for manufacture; and the failure to manufacture and the consequent depletion of stock have prejudicially affected the revenue of the following year. In Madras the outturn in some of the Government factories was smaller, and some new factories and extensions provided for in the Budget Estimate could not be opened.

		Rx.
1891-92	Accounts	459,034
1892-93	Budget	497,500
	Revised	465,300
	Accounts	458,707

26. *Stamps.*—The excess in the charges as compared with the actuals of 1891-92 and the Budget was only slightly less than that appearing under the head of Exchange, an increase in the Indian expenditure being more than counterbalanced by diminished sterling payments.

		Rx.
1891-92	Accounts	138,447
1892-93	Budget	140,900
	Revised	141,400
	Accounts	141,264

27. *Excise.*—Of the total saving on the Budget Estimate of Rx. 13,087, almost three-fourths occurred in Madras and the remainder chiefly in Bombay.

		Rx.
1891-92	Accounts	190,097
1892-93	Budget	206,100
	Revised	194,100
	Accounts	193,013

28. *Provincial Rates, Customs, Assessed Taxes, and Registration.*—The noticeable points in connection with these figures are (1) the construction of a steam launch for the Calcutta Customs House, and larger payments of commission to Registrars and Sub-Registrars caused an increase in

		Rx.
1891-92	Accounts	432,506
1892-93	Budget	447,000
	Revised	440,740
	Accounts	439,580

the charges for 1892-93 over the previous year; and (2) the termination of the revaluation work for the purpose of assessing the Provincial rates in Bengal and vacancies in certain establishments produced a saving on the estimates.

The excess in 1892-93 over the previous year would have been larger but for a change of classification by which the cost of certain combined appointments hitherto shown as Registration charges was transferred to a different head.

29. *Forests*—The Estimates under this head generally prove too high. The large saving in 1892-93 of Rx. 105,275 is distributed among all the provinces except India, the larger part having occurred in Madras and Bombay. The saving is attributed to a general contraction of departmental operations. The following figures compare the Forest Revenue and Expenditure of the last five years:

		Rx.
1891-92	Accounts	843,926
1892-93	Budget	970 500
	Revised	895,600
	Accounts	865,225

	Revenue.	Expenditure.	Net revenue.
1888-89	1,349,047	792,000	557,047
1889-90	1,486,303	780,035	706,268
1890-91	1,448,002	784,113	663,889
1891-92	1,490,582	843,926	646,655
1892-93	1,591,332	865,225	726,107

INTEREST.

30. *Revenue.*—The receipts in 1892-93 were less than those in the preceding year by Rx. 9,716. There was a decrease in England of £33,923, equivalent with Exchange to Rx. 44,546, and an increase in India of Rx. 34,830 The receipts were also below the Budget Estimate by Rx. 41,273, the falling off occurring entirely in India. In England the amounts obtained by the investment of surplus cash balances were not so large as in the previous year. In India the receipts are increasing with the yearly additions to the advances to Municipalities and others; but in 1892-93 the Budget Estimate was not reached chiefly because the Guaranteed Railways did not find it necessary to overdraw their capital account to the extent anticipated, and the receipts from Interest on Overdrawn Capital were less than the Estimate by Rx. 36,632.

		Rx
1891-92	Accounts	879,443
1892-93	Budget	911,000
	Revised	868 600
	Accounts	869,727

31. *Expenditure: Interest on Debt.*—No new debt was incurred in India during 1892-93 except a Railway loan of Rx. 250,000 from the Rampur State, on which, however, no interest was paid during the year. The excess over the Budget was due chiefly to the conversion during the year of the greater portion of the outstanding balance of the 4½ per cent. Rupee loans into 4 per cents. These conversion operations necessitated the payment of a portion of one-half year's interest in the latter months of 1892-93 instead of in the earlier months of 1893-94, and also involved the payment of Rx. 10,786 as brokerage. There were also some unexpected payments of arrears from previous years. In England the expenditure charged to Ordinary Debt included in 1891-92 £254,353 on account of discount on the sterling loans of the year; but the similar charge in 1892-93 amounted to £43 940 only. As usual, no provision for the latter amount was made in the Budget. The increase in the interest charged to Railway Debt is due to fresh advances made to the Railway Companies. The funds for these advances are obtained by

		Charged to Ordinary Debt	Charged to Railways and Irrigation.	Total.

1891-92	Accounts	1,146,144	505,425	1,651,569
1892-93	Budget	1,197,900	618,600	1,816,500
	Revised	1,460,000	733,300	2,193,300
	Accounts	1,464,053	735,301	2,199,354

sterling loans, and a corresponding increase in the total interest charge in England is the result.

32. *Interest on other Obligations.*—The main factor producing the increase under this head from year to year is the increase in the Savings Bank Deposits. Excluding the adjustment of interest, the net addition to these deposits in the year amounted to Rx. 548,922 against Rx. 517,904 in 1891-92, and the interest charges were Rx. 306,227 in 1891-92 and Rx. 339,362 in 1892-93. Sufficient provision for these increases was not made in the estimate. The interest on the deposits of Service Funds was also higher than in the previous year and the Budget.

		Rx.
1891-92	Accounts	475,376
1892-93	Budget	506,600
	Revised	516,200
	Accounts	516,781

POST OFFICE, TELEGRAPH, AND MINT.

REVENUE.

33. *Post Office.*—The revenue continues to expand; the falling off below the Budget Estimate was due chiefly to a larger deduction from the receipts of the year on account of payments to English, Colonial, and other Foreign Post Offices.

		Rx.
1891-92	Accounts	1,446,355
1892-93	Budget	1,498,400
	Revised	1,491,400
	Accounts	1,488,875

34. *Telegraph.*—These receipts for 1891-92 were considered abnormally high, and the Budget Estimate for 1892-93 was therefore placed at a lower figure as compared with them; but an increase of Rx 18,408 over the high figure of the previous year was realised in the actual result. This was due to the general expansion of the department.

		Rx
1891-92	Accounts	919,335
1892-93	Budget	892,600
	Revised	937,700
	Accounts	937,743

The following table compares the receipts and expenditure of the Telegraph Department for the last five years:

	Revenue.	Expenditure	Net Revenue.
	Rx.	Rx.	Rx.
1888-89	742,148	704,092	38,056
1889-90	766,865	731,355	35,510
1890-91	781,035	763,980	17,055
1891-92	919,335	838,720	80,615
1892-93	937,743	875,073	62,670

35. *Mint.*—The silver coinage in 1892-93 was very high, the importation of silver having been enhanced by speculations about the closure of the Indian Mints. The increase due to the larger coinage was counterbalanced to some extent by a smaller gain on copper coinage, the issues of copper having been somewhat less than usual. The gain amounted to Rx. 37,893 in 1892-93 against Rx. 83,831 realised in 1891-92 and Rx. 65,000 taken in the Budget.

		Rx.
1891-92	Accounts	210,046
1892-93	Budget	227,000
	Revised	326,400
	Accounts	310,335

EXPENDITURE.

36. *Post Office.*—The expenditure in India, like the revenue, increases from year to year with the growth of the department. The saving on the Budget Estimate of Rx. 36,855 was due chiefly to smaller expenditure than was anticipated for stationery and printing in India. There were other small savings in India, but these were counterbalanced by an increase in the charge for exchange on sterling expenditure.

		Rx
1891-92	Accounts	1,493,359
1892-93	Budget	1,555,400
	Revised	1,547,600
	Accounts	1,518,545

37. *Telegraph.*—As in the case of the Postal Department, the increase in the expenditure follows the expansion of the operations of the department. Though the Telegraph revenue in 1892-93 was far in excess of the Budget Estimate, the provision for expenditure proved sufficient, and was closely followed by the actuals.

		Rx.
1891-92	Accounts	838,720
1892-93	Budget	877,200
	Revised	867,200
	Accounts	875,073

38. *Mint.*—Under this head also the expenditure was within the Budget Estimate, for though the large increase in the coinage necessitated charges for extra hours not contemplated in the estimates, the savings under other items fully covered these extra charges. The variation from the accounts of the preceding year is accounted for by the larger coinage in 1892-93.

		Rx.
1891-92	Accounts	97,109
1892-93	Budget	115,300
	Revised	113,600
	Accounts	112,007

CIVIL DEPARTMENT.

REVENUE.

39. *Civil Department.*—Under the heads comprised in this group there were no important variations in the receipts of 1892-93 as compared either with the corresponding receipts of 1891-92 or with the Budget Estimate. The apparent decrease in the total receipts of the year is due mainly to a change of classification introduced in the accounts of 1892-93 by which recoveries by the Marine Department for work done by it for other departments and Local Governments were deducted from expenditure instead of being credited as receipts. The only other point requiring notice in connection with this group was a general increase in the Police receipts in 1892-93 as compared with the estimates.

		Rx.
1891-92	Accounts	1,656,157
1892-93	Budget	1,615,800
	Revised	1,660,800
	Accounts	1,607,876

EXPENDITURE.

40. *General Administration.*—The expenditure on General Administration necessarily increases with the increasing efficiency and complexity of the administration. The Indian Expenditure closely followed the estimates, but in England there was some additional charge connected with the management of the conversion of the $4\frac{1}{2}$ per cent. Rupee loans. Nearly three-fourths of the total excess over the Budget is, however, accounted for by the heavy fall in exchange during the year.

		Rx
1891-92	Accounts	1,791,317
1892-93	Budget	1,831,600
	Revised	1,881,900
	Accounts	1,871,825

41. *Law and Justice: Courts of Law.*—The charges are increasing yearly. The excess over the Budget Estimate in 1892-93 occurred in the expenditure of Civil and Sessions Courts in Bengal, the North-Western Provinces and Oudh, and Madras either on account of new courts opened or new judicial establishments entertained during the year.

		Rx.
1891-92	Accounts	2,840,007
1892-93	Budget	2,855,900
	Revised	2,873,700
	Accounts	2,876,430

42. *Law and Justice: Jails.*—The expenditure in 1892-93 exceeded that of 1891-92 chiefly in Port Blair and Bengal. The excess over the Budget was largest in Madras, and was due to an increase in the jail population and an advance in the manufacturing industry.

		Rx
1891-92	Accounts	899,732
1892-93	Budget	913,600
	Revised	917,100
	Accounts	918,742

43. *Police*—Certain schemes for Police reorganisation were contemplated in framing the Estimates of 1892-93 for Madras and Bombay; but they were not carried out during the year. This fact, combined with the short strength of the District Executive Force in Burma, produced a large saving on the Estimates. On the other hand, the expenditure in Bengal exceeded the

		Rx.
1891-92	Accounts	3,868,610
1892-93	Budget	3,910,000
	Revised	3,856,000
	Accounts	3,873,645

estimate owing to the measures taken in connection with the administration of the Lushai country, and that in the North-Western Provinces and Oudh was higher than expected owing to a reorganisation scheme sanctioned by the Secretary of State. On the whole, a larger saving was anticipated in the Revised Estimate than was actually realised.

44. *Marine.*—The reduction in the Indian expenditure is more apparent than real owing to the change in the method of accounting for recoveries for work done by the Marine Department mentioned in paragraph 39.

		India. Rx.	England. £	Exchange. Rx.
1891-92	Accounts	436,553	133,447	57,951
1892-93	Budget	513,600	177,700	88,900
	Revised	480,000	301,100	180,700
	Accounts	391,875	290,476	174,758

The increase in the expenditure in England was special, and was due to payments made for the construction of two troopships and a dredger.

45. *Education, Ecclesiastical, and Medical.*—The provision made in the estimates on account of Education charges was not fully spent in the Central Provinces, Madras, and Bombay. The large increase in the Medical charges of Rx. 56,958 over the previous year was distributed over all the provinces.

		Education Rx.	Ecclesiastical Rx.	Medical Rx
1891-92	Accounts	1,424,796	161,596	884,684
1892-93	Budget	1,496,700	169,300	931,100
	Revised	1,445,900	168,300	935,300
	Accounts	1,437,024	168,107	941,642

46. *Political.*—The expenditure in 1892-93 exceeded that of the preceding year by Rx. 74,406. The more important of the excesses were: (1) an increase of Rx. 30,180 under Political Agents chiefly on account of the North Lushai and the Gilgit Agencies; (2) increased payment of Political Subsidies to the extent of Rx. 25,349 on account of arrears due to the Amir of Afghanistan from previous years; and (3) higher expenditure for entertainment of Envoys and Chiefs (Rx. 7,383) owing to the visit of the Prime Minister of Nepal. The Special Political expenditure in 1892-93 connected with missions and expeditions on the frontiers, amounting to Rx. 23,747, was also higher than in the previous year The greater part of this as well as the other excesses mentioned could not be anticipated in the estimates.

		Rx.
1891-92	Accounts	767,711
1892-93	Budget	771,600
	Revised	824,700
	Accounts	842,117

47. *Scientific and other Minor Departments.*—The difference under this head between the actual expenditure of the two years was mainly in the Census charges, only Rx. 15,594 having been incurred on account of the Census in 1892-93 against Rx. 182,082 expended in 1891-92. The Budget Estimate was closely followed as regards the total expenditure, certain savings in India having been counterbalanced by an increase in the sterling expenditure and in the charge for exchange.

		Rx.
1891-92	Accounts	587,438
1892-93	Budget	472,500
	Revised	479,400
	Accounts	473,271

MISCELLANEOUS.

RECEIPTS.

48. *Superannuation.*—The receipts on account of contributions for pensions and gratuities were specially high in 1891-92 owing to the recovery of the arrears of previous years in Bengal and Madras. The subscriptions to the Military, Military Orphan, and Medical Retiring Funds are declining yearly; but sufficient allowance was not made for the decline in the Budget Estimate.

		India Rx.	England. Rx.	Exchange. Rx.
1891-92	Accounts	217,223	100,605	43,689
1892-93	Budget	206,300	98,400	49,200
	Revised	199,000	101,000	60,600
	Accounts	200,741	101,000	60,764

49. *Stationery and Printing.*—The receipts in 1891-92 included large recoveries on account of printing work done for the Census Department. There were no corresponding receipts in 1892-93; but, on the other hand, the recoveries on account of stationery supplied to State Railways and to the Berar Administration were larger than in the previous year, and were not fully anticipated in the Budget.

		Rx.
1891-92	Accounts	83,408
1892-93	Budget	74,000
	Revised	80,500
	Accounts	80,841

50. *Exchange.*—This is a very uncertain head of revenue depending on a number of factors, and the receipts are not susceptible of reliable forecast. The large divergence of the actuals from the Budget was due to the loss on miscellaneous remittances owing to the difference between the official rate and the average rate obtained by the Secretary of State for his bills having been as much as 1¾*d*.

		Rx.
1891-92	Accounts	31,529
1892-93	Budget	78,500
	Revised	57,800
	Accounts	19,686

51. *Miscellaneous.*—There are always some extraordinary receipts under this head not foreseen in the Estimates. The amounts of such unforeseen receipts were Rx. 13,625 only in 1892-93 against Rx. 30,890 in 1891-92; but the receipts from unclaimed deposits, from miscellaneous fees, fines, and forfeitures, and from rents and the recoveries of insurance and other departmental charges on English stores supplied to Provincial Governments exceeded the actuals of 1891-92 and the Budget Estimate.

		Rx.
1891-92	Accounts	420,830
1892-93	Budget	353,500
	Revised	399,500
	Accounts	413,962

EXPENDITURE.

52. *Territorial and Political Pensions.*—The payments in India in 1892-93 exceeded those of the preceding year by Rx. 14,607, while there was a decrease under England and Exchange of Rx. 30,?74. The payments in England in 1891-92 included large arrears of pension drawn by the late Maharaja Duleep Singh. In India the excess over 1891-92 was caused chiefly by the grant of certain commutations of pensions and by payments of arrears. In England certain special payments on account of the Maharaja Duleep Singh were also made in 1892-93, which caused an excess over the Budget.

		Rx
1891-92	Accounts	557,959
1892-93	Budget	536,200
	Revised	542,100
	Accounts	541,592

53. *Civil Furlough and Absentee Allowances.*—The whole of the excess over the Budget under this head and more than two-thirds of the excess over the actuals of 1891-92 were due to the fall in the rate of Exchange.

		Rx.
1891-92	Accounts	276,362
1892-93	Budget	314,500
	Revised	335,400
	Accounts	334,194

54. *Superannuation Allowances and Pensions.*—These charges continue to grow both in India and in England; but, apart from the addition to the pension list, the payments in England in 1892-93 were specially high owing to the adoption in that year of a rule for the payment of pensions monthly instead of quarterly.

		India. Rx.	England £	Exchange. Rx.
1891-92	Accounts	848,506	1,726,046	749,557
1892-93	Budget	875,300	1,748, 00	874,100
	Revised	873,300	1,830,100	1,098,100
	Accounts	881,190	1,810,546	1,089,270

55. *Stationery and Printing.*—The expenditure under this head increases with the growth of public business. In 1892-93 the excess over the Budget occurred in nearly all the provinces, notably in Bengal, where large supplies were made to the Survey and Settlement Department. Larger demands of stores from England and the fall in Exchange also contributed to the increase to some extent.

		Rx.
1891-92	Accounts	602,885
1892-93	Budget	576,800
	Revised	627,100
	Accounts	647,973

56. *Miscellaneous.*—The savings on the Budget Estimate occur chiefly in the Remittance charges and in the cost of petty Provincial and Local establishments. In 1891-92 the charges for Municipal taxes on Government buildings in Bombay were high, and certain special Commissions of Enquiry necessitated considerable expenditure. There was also a special adjustment in 1891-92 on account of the loss at Manipur. The payments in England on account of stores lost in transit to India were also much less than in 1891-92.

		Rx.
1891-92	Accounts	285,307
1892-93	Budget	245,800
	Revised	253,000
	Accounts	233,075

FAMINE RELIEF AND INSURANCE.

57. As in the preceding year, the Famine Insurance grant was maintained at Rx. 1,500,000 in 1892-93, including the net charge on the Revenues on account of the Indian Midland and Bengal-Nagpur Railways. The following are the details making up the total of the grant:

		Rx.
1891-92	Accounts	1,268,319
1892-93	Budget	1,206,700
	Revised	1,133,700
	Accounts	1,116,103

	1891-92.	1892-93.		
	Accounts.	Budget	Revised.	Accounts.
	Rx.	Rx.	Rx.	Rx.
Famine Relief	23,423	130,000	76,800	70,841
Construction of Protective Railways	484,795	1,011,700	993,900	984,469
Construction of Protective Irrigation	77,931	65,000	63,000	60,793
Reduction of Debt	682,170	...	...	...
Loss on the Bengal-Nagpur and Indian Midland Railways	231,681	293,300	366,300	383,897
Total	1,500,000	1,500,000	1,500,000	1,500,000

The expenditure for the relief of distress chargeable to the grant was much less than was anticipated in Madras and Bombay; but, on the other hand, some expense was incurred on account of the distress in Ajmere-Merwara, which was not foreseen when the Budget was framed. The capital expenditure on Protective Railways shown above represented only such a portion of the total expenditure on those Railways as would, with the other authorised charges against the grant, raise the total to the fixed limit of Rx. 1,500,000.

CONSTRUCTION OF RAILWAYS CHARGED AGAINST REVENUE IN ADDITION TO THAT UNDER FAMINE INSURANCE.

58. The expenditure under this head in 1891-92 was wholly on account of lines constructed from the balances of Provincial Governments. The similar expenditure in 1892-93 amounted to Rx. 138,262 against a Budget provision of Rx. 183,200, the outlay on the Mayavaram-Mutupet Railway having been smaller than expected. But, in addition to the expenditure charged to Provincial Revenues, Rx. 201,225 out of the total Imperial expenditure on the construction of railways was shown under this head in 1892-93. This was necessary, as the capital expenditure chargeable to the Famine grant and to loans and balances could not exceed a fixed limit, and the amount above mentioned represented the excess of the total expenditure of the year above these limits taken together.

		Rx.
1891-92	Accounts	163,233
1892-93	Budget	301,500
	Revised	292,900
	Accounts	339,487

RAILWAYS.

59. *Earnings*.—The figures in the margin show the net earnings of railways, both State and Guaranteed, since 1888-89. The earnings of 1891-92 were exceptionally heavy owing to a combination of favourable circumstances, such as an exceptionally heavy export traffic of wheat and seeds, and a large pilgrim traffic connected with certain Hindu religious festivals. The Budget Estimates of 1892-93 therefore anticipated the normal receipts according to previous experience. The result shows that there was a moderate improvement of Rx. 178,335 over the Budget Estimate. This improvement was made up of a number of differences, of which the more important are the following:

		Rx.
1888-89		9,461,440
1889-90		9,741,162
1890-91		10,464,038
1891-92		11,723,566
1892-93	Budget	10,953,900
	Revised	11,261,800
	Accounts	11,132,235

Improvements—

	Rx.
Rajputana-Malwa System	298,193
East Indian Railway	147,969
Burma Railway	83,259
Bombay, Baroda and Central India Railway	75,810
Carried forward	*605,231

		Rx.	Rx.
	Brought forward		605,231
Deduct falling off on—			
North-Western Railway		241,959	
Great Indian Peninsula Railway		123,714	
Bengal-Nagpur Railway		31,422	
Other Railways (net)		29,801	
		Total	426,896
		Net	178,335

The traffic on the Rajputana-Malwa Railway proved to be exceptionally heavy in 1892-93, and a long pending claim against the Indian Midland Railway for certain interest charges was settled in that year, though no credit for such settlement was taken in the estimate. The estimates for the East Indian Railway were too low. There was a general development of traffic and an exceptionally good passenger traffic on the Burma Railway. The improvement on the Bombay, Baroda and Central India Railway was in the traffic in cotton, oil seeds, coal, and railway materials.

The falling off on the North-Western Railway was the result partly of reduced grain exports following an unfavourable crop, and partly of breaches on the line during the monsoon of 1892-93. There were also large outstandings at the end of the year which have been realised in 1893-94. The failure of the linseed crops in the Central Provinces and the small movement of food grains to Southern India account for a part of the falling off on the Great Indian Peninsula Railway. The decrease on the Bengal-Nagpur Railway occurred in the goods traffic.

60. *Interest and Annuities.*—These charges continue to grow with the extension of railways in the country. Apart from the charge for Exchange, the expenditure shows a saving on the Budget Estimate owing mainly to some of the Guaranteed Railway Companies not having overdrawn their accounts as anticipated. The Assam-Bengal Railway Company could not also pay up their subscribed capital to the extent anticipated.

	India and England Rx.	Exchange Rx
1888-89	8,351,697	2,629,890
1889-90	8,385,403	2,517,221
1890-91	8,556,121	1,863,201
1891-92	8,702,362	2,454,962
1892-93 Budget	8,952,500	2,871,000
1892-93 Revised	8,904,800	3,434,000
1892-93 Accounts	8,906,378	3,443,396

61. *Other Expenditure.*—This expenditure in 1892-93 was less than in the preceding year by Rx. 252,593. The differences were mainly in the charges for surplus profits paid to Guaranteed Railways and the expenditure on Railway Surveys. The payments for surplus profits were Rx. 155,735 less as a result of the smaller traffic earned in 1892-93; and a sum of Rx. 81,572 on account of past expenditure on the Bengal-Assam Railway Survey was recovered from the Company in 1892-93 and deducted from expenditure. No provision was made for this deduction in the Budget Estimate.

	Rx
1891-92 Accounts	882,106
1892-93 Budget	704,900
1892-93 Revised	633,800
1892-93 Accounts	629,513

62. *Loss on Railway Revenue Account.*—The following figures show the net loss to Government on the Railway Revenue Account from its connection with railways since 1888-89:

	Net receipts, excluding charge for Exchange. Rx	Charge for Exchange. Rx.	Net loss. Rx.
1888-89	396,498	2,629,890	2,233,392
1889-90	664,620	2,517,221	1,852,601
1890-91	1,175,910	1,863,201	687,291
1891-92	2,139,098	2,454,962	315,864
1892-93	1,596,344	3,443,396	1,847,052

The year 1891-92 was exceptional, and, allowing for the specially heavy railway traffic of that year, the net receipts, excluding the charge for Exchange, show a steady improvement; but, though this improvement amounted in 1892-93 to

Rx. 931,724 as compared with 1889-90, the charge for Exchange has been so great as to counterbalance the whole of this improvement, and to leave the net loss at about the same figure as in 1889-90.

IRRIGATION.

MAJOR WORKS.

63. *Net earnings, excluding Land Revenue.*—These earnings showed in 1892-93 an advance of Rx. 73,487 over the previous year owing chiefly to an extension of irrigation from canals in the Punjab, to the recovery of arrears of water rates in Bengal, and to the seasons having been more favourable for canal irrigation in Madras and Bombay. The estimates were too low.

		Rx
1891-92	Accounts	643,292
1892-93	Budget	552,200
	Revised	696,600
	Accounts	716,779

64 *Interest.*—These figures require no remarks, except that the charge continues to grow with the progress in the construction of irrigation works.

		Rx
1891-92	Accounts	1,109,678
1892-93	Budget	1,138,900
	Revised	1,138,900
	Accounts	1,138,386

MINOR WORKS.

65. *Receipts.*—The variations are unimportant. The actuals of 1891-92 included certain arrears of clearance rates.

		Rx.
1891-92	Accounts	194,114
1892-93	Budget	189,100
	Revised	191,500
	Accounts	185,866

66. *Expenditure.*—The decrease in the expenditure in 1892-93 as compared with the previous year occurred almost entirely in Lower Burma and Madras. The Budget Estimate was closely followed as a whole. There was, however, a considerable excess in the Imperial expenditure on account of Famine Relief works in Upper Burma which was counterbalanced by savings chiefly in Bombay and Lower Burma.

		Rx
1891-92	Accounts	1,07[illegible],896
1892-93	Budget	1,009,600
	Revised	1,052,8[illegible]
	Accounts	1,008,142

BUILDINGS AND ROADS.

67. *Receipts.*—The increase in the receipts as compared with 1891-92 and with the Budget was the largest in the North-Western Provinces and Oudh owing to the sale of the bridge-of-boats over the rivers Gogra and Chowka at Byramghat. The receipts on account of contributions from Municipalities in Bombay were also higher than expected.

		Rx
1891-92	Accounts	627,124
1892-93	Budget	606,400
	Revised	630,100
	Accounts	653,1[illegible]

68. *Expenditure.*—The Imperial expenditure in 1891-92 was unusually high owing to special grants for the restoration of buildings at Quetta damaged by rain and for expenditure on famine relief works. The lapse on the Budget Estimate of 1892-93 was partly nominal, as a portion of the grant under India was transferred to Upper Burma for expenditure on minor irrigation works required for famine relief.

		Imperial Rx	Provincial and Local Rx
1891-92	Accounts	2,095,876	4,112,876
1892-93	Budget	2,025,800	3,891,300
	Revised	1,904,800	3,032,600
	Accounts	1,969,530	3,870,950

As regards Provincial and Local charges, the expenditure in 1892-93 was lower than in the previous year in all the larger provinces. One cause of this general reduction was the fact that the year 1892-93 was the first year of the new Provincial Contracts; and, though the contracts did not entail a material reduction in the rate of expenditure of the Provincial Governments, the usual tendency appears to be to increase the Public Works expenditure towards the end of the term for which the contracts are framed.

ARMY.

69. *Receipts.*—The increase over the receipts of 1891-92 and the Budget Estimate occurred mainly under Commissariat, Remount, and Veterinary Establishments, and was due (1) to larger sales of Commissariat provisions, stores, and malt liquor; (2) to the transfer of certain cast remounts to the Bengal Cavalry regiments on payment; and (3) to the credit of the value of 260 horses taken by the 7th Dragoon Guards on their transfer to Egypt. There were also larger sales of regimental necessaries and unserviceable ordnance stores. In England a special credit was received in 1892-93 on account of the sale of the troopship *Jumna*.

		Rx.
1891-92	Accounts	780,404
1892-93	Budget	730,000
	Revised	793,300
	Accounts	804,[illegible]

70. *Expenditure: India.*—The expenditure in 1892-93 was less than that of the preceding year by Rx. 151,971. The charges for Special Military expeditions were considerably less in the year than in 1891-92; but, on the other hand, there was a large increase in Commissariat charges owing to a rise in the price of food for men and animals and an increase in the pay of British troops due to the fall in the rate of Exchange for converting their sterling pay into rupees. The Budget Estimate was exceeded to the extent of Rx. 582,391. The excess was due chiefly to the following items of additional expenditure:

		Rx
1891-92	Accounts	15,741,062
1892-93	Budget	15,006,700
	Revised	15,522,200
	Accounts	15,589,091

	Rx.
Increased cost of food for men and animals	242,900
Kashmir transport arrangements	86,662
Kajuri Kach Force	84,936
Kuram Escort	39,216
Lushai operations	47,203
Chin Hill operations	30,319
Isazai Field Force	32,515
Arrear charges of Missions and Expeditions undertaken in previous years	11,477
Total	575,228

The Revised Estimate did not provide sufficiently for the increase in the cost of food for men and animals.

71. *Expenditure: England and Exchange.*—The sterling expenditure in 1892-93 exceeded that of the previous year and the Budget Estimate by £329,283 and £294,296 respectively. The important variations comprised in these excesses were the following:

		Sterling. £	Exchange. Rx
1891-92	Accounts	4,559,513	1,980,026
1892-93	Budget	4,594,500	2,207,300
	Revised	5,022,300	3,013,400
	Accounts	4,558,790	2,941,2[illegible]4

	Increase + / Decrease — Compared with actuals, 1891-92	Increase + / Decrease — Compared with Budget Estimate, 1892-93
Effective Services.		
Payment to the War Office in respect of British Forces serving in India	+264,303	+206,766
Furlough allowances of officers of the Indian service	+ 35,351	+ 41,654
Stores for India	—197,793	—138,824
Non-effective Services.		
Payment to the War Office in respect of British Forces for service in India	+ 38,974	+ 11,182
Pay and pensions of non-effective and retired officers of the Indian service	+199,471	+181,360
Total	+340,306	302,138

The increase in the payments to the War Office represented chiefly amounts paid in settlement of arrear claims.

The rise in the charges for furlough allowances and pensions was connected with the payment of the allowances monthly instead of quarterly. The figures for stores were affected by a falling off in the demands for special ordnance stores.

SPECIAL DEFENCE WORKS.

72. The expenditure for these works is diminishing yearly. The decrease in 1892-93 as compared with the previous year and the Budget was largest in England. The Budget Estimate was too high.

		Rx
1891-92	Accounts	6[illegible]4,848
1892-93	Budget	614,500
	Revised	55[illegible],300
	Accounts	458,060

CAPITAL EXPENDITURE NOT CHARGED TO REVENUE.

73. In 1891-92 the total expenditure not charged to Revenue was shown as Rx. 3,500,000. This was the maximum limit of the expenditure not so charged at the time the Budget Estimate of 1892-93 was framed; but, as a special case, the Secretary of State authorised the expenditure in 1892-93 on the Jherriah Extension of the East Indian Railway and on the Rampur-Moradabad Railway, the funds for which were to be advanced by the Rampur Durbar, to be treated as outside the fixed limit. The Budget Estimates for outlay on the Jherriah Extension and the Rampur-Moradabad Railway were taken at Rx. 160,000 and Rx. 375,000 respectively; and, in accordance with the decision of the Secretary of State just alluded to, the estimate of the total capital expenditure not charged to Revenue was placed at Rx. 4,035,000,—namely, outlay on Railway construction at Rx 3,485,000, and that on Irrigation Works at Rx. 550,000.

74. *Railways.*—The total expenditure on the construction of railways from Imperial Funds exceeded the Budget Estimate by Rx. 25,893. This excess was made up of a reduction of Rx. 48,710 in the expenditure on the Bareilly-Rampur-Moradabad Railway and the Jherriah Extension, and an increase of Rx. 74,603 under all the other Railways taken together. As there was a saving of Rx. 18,909 on the estimate of capital outlay on Irrigation Works not charged to Revenue, the total outlay on Railways not so charged was (Rx. 48,710—Rx. 18,909) Rx. 29,801 less than the estimate. The Railway Capital Expenditure that could be charged to the Famine Grant (paragraph 57) was also Rx. 27,231 less than the estimate; and the excess in the total being Rx. 25,893, the excess over the estimate that was charged in the Imperial section of the head "37—Construction of Railways" (paragraph 58) amounted to (29,801 + 27,231 + 25,893) Rx. 82,925.

		Rx.
1891-92	Accounts . .	2,770,[illegible]6
1892-93	Budget	3,4[illegible]5,000
	Revised	3,4[illegible]6,[illegible]00
	Accounts . .	3,455,109

75. *Irrigation.*—The expenditure in 1891-92 was high owing to special grants for the more rapid completion of the Chenab Canal and the Periyar Project. The lapse on the Budget Estimate of 1892-93 occurred in Bengal and the North-Western Provinces and Oudh.

SEPARATE REVENUE.

STAMPS (NON-JUDICIAL).

Exemptions and Reductions under the Act.

The 3rd May, 1894.

No. 2106-*S.R.*—Whereas under the terms of the Resolution in the Finance and Commerce Department, No. 3646, dated the 13th November 1880, the Municipality of Sukkur has paid into the Government Treasury the sum of Rupees 1,000 as composition for the stamp-duty chargeable on a sum of Rupees 2,00,000 which the said Municipality was authorized to borrow, and which is to be raised by the issue of the undermentioned debentures of Rupees 500 each, *viz*:

Nos. 1 to 130, dated the 21st June 1894;

Nos. 131 to 140, dated the 10th July 1894;

Nos. 141 to 152, dated the 13th July 1894;

Nos. 153 to 162, dated the 15th July 1894;

Nos. 163 to 174, dated the 17th July 1894,

Nos. 175 to 184, dated the 27th July 1894;

Nos. 185 to 204, dated the 30th July 1894;

Nos. 205 to 212, dated the 2nd August 1894;

Nos. 213 & 214, dated the 3rd August 1894;

Nos. 215 to 257, dated the 5th August 1894;

Nos. 258 to 285, dated the 9th August 1894;

Nos. 286 to 295, dated the 13th August 1894;

Nos. 296 to 337, dated the 14th August 1894;

Nos. 338 to 397, dated the 10th September 1894;

Nos. 398 & 399, dated the 12th September 1894;

No. 400, dated the 14th September 1894:

In exercise of the power conferred by section 8 of the Indian Stamp Act, I of 1879, the Governor General in Council has exempted the said debentures from any stamp-duty with which they might otherwise be chargeable, whether on issue, renewal, sub-division, or consolidation.

STEPHEN JACOB,

Offg. Secretary to the Government of India.

MILITARY DEPARTMENT.

Simla, the 4th May, 1894.

APPOINTMENTS.

ARMY STAFF.

H. W. Smith . . .	Assistant Superintendent, Class VI, 1st Grade.	Superintendent, Class V, 2nd Grade.	20th March 1894.

F. L. O CALLAGHAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 28th, 1894.

General Summary.—With the cessation of the snowfall in Upper Sikkim temperature in North-Eastern India began to rise and pressure to give way. The fall of pressure continued till the morning of the 27th, when pressure rose slightly owing to the action of numerous thunderstorms in Bengal and Burma only to fall again rapidly next day in sympathy with a general fall of pressure over the whole of the country. The fall was largest in Northern India, and was also large in Burma, where it was caused by the advance of a cyclonic storm from the Andaman Sea into the Gulf of Martaban. A feeble and temporary advance of humid winds which has been giving unusually heavy rain for the time of the year in Malabar and Ceylon would appear to have reached the Tenasserim Coast and Lower Burma at the commencement of the week. Rain was reported from stations in that area on nearly every day of the week, and on the morning of the 27th a slight fall of the barometer at Diamond Island and a cyclonic tendency in the winds at the Lower Burma Coast stations indicated the possibility of a depression having formed in the Andaman Sea to the south, which was confirmed next day by a rapid fall of pressure and the appearance of a cyclonic storm of some intensity in the Gulf of Martaban.

At the commencement of the week a brisk fall of pressure intensified the depression in Sind, and by the morning of the 23rd it had moved north-eastwards into the Punjab, giving thunderstorms and light showers of rain to a few stations in that province. But it broke up among the Punjab Hills during the next twenty-four hours, and a very rapid rise of pressure took place in the Punjab and Upper Sind, due partly to the filling up of this depression, and partly to an inrush of cool and very dry air from the Afghanistan and Baluchistan plateau area, indicated by strong winds from the north and west at the Upper India frontier stations. These winds caused an abnormally large decrease of humidity in Upper India. At Peshawar the humidity percentage on the 24th was only 14 as against 85 per cent. on the previous day, showing a decrease of 71. The cool wave thus introduced advanced eastwards, lowering the temperature of North-Western and Central India to below the normal; but its effects did not last long, and by the morning of the 26th temperature had again commenced to rise in the north-west.

The mean temperature for the whole of India for the week was normal.

Daily Summary.—*Sunday.*—Pressure had given way briskly in Rajputana and the Punjab, and the Sind depression had extended eastwards; but its very shallow and diffused character made it of little importance. Easterly winds continued in the Gangetic plain. Showers of rain were reported from Burma, Bengal, and the Bombay Deccan. Tavoy received 2·80 inches, False Point 1·02 inches, and Dhubri and Poona a little more than a third of an inch.

Monday.—Pressure had fallen briskly to rapidly in the Punjab, causing the transference of the Upper India depression to the Central and East Punjab. Pressure had also given way in the Central Provinces, and a very shallow depression was shown in that area. Pressure continued to fall slightly in North-East India. Winds were strong in the Punjab and were cyclonic in direction at Murree and Cherat. Rain fell in the North Punjab, Bengal, and South India, but the heaviest fall was only 0·54 inch at Narainganj.

Tuesday.—A wave of cool dry air from Afghanistan and Baluchistan had caused a very rapid rise of pressure in the Punjab and a large decrease in humidity. Peshawar registered the abnormally large decrease of 71 in the humidity percentage and Cherat a decrease of 50. Pressure had continued to give way

slightly in North-Eastern India, and shallow depressions were shown covering Central and Upper Burma and the Central Provinces and Chota Nagpur. Temperature had decreased very rapidly in Baluchistan, Sind, and Rajputana, and rapidly in the Punjab. Jalpaiguri received 0·51 inch of rain, and a few other stations reported light showers.

Wednesday.—Pressure had given way generally, but somewhat irregularly, and the changes did not appreciably affect the pressure distribution. Westerly winds had set in over the western and central districts of the North-Western Provinces. Temperature had fallen over the whole of North-Western and Central India. Remarkably low humidities were recorded over the whole of North-Western and Central India, Berar, and the Central Provinces. Moderately heavy rain had fallen in Tenasserim, North Bengal, Malabar, and Ceylon. Calicut reported 1·94 inches, Colombo 1·45 inches, Tavoy 1·15 inches, and Jalpaiguri 1·12 inches.

Thursday.—Pressure was in moderate to considerable defect in Assam, Burma, and the Peninsula. The area of deficient pressure in Southern India was of the most importance. Westerly or north-westerly winds prevailed generally in the North-Western Provinces and were extending into Bihar. Rain was received in Southern India, Ceylon, Assam, and Sikkim. Colombo reported a fall of 2·32 inches, Mysore 1·97 inches, Calicut 1·3 inches, and Dhubri 1·34 inches.

Friday.—Pressure had increased over nearly the whole of India, but the changes, though not large, were irregular. Rain continued in Ceylon, Burma, Assam, and Southern India, and showers were also reported from Bengal. Falls of one inch and above were registered at Bassein (1·49 inches), Sibsagar (1·86 inches), Dinajpur (1·75 inches), Toungoo (1·48 inches), Mangalore (1·07 inches), and Berhampore (1·00 inch).

Saturday.—A brisk to rapid fall of pressure had taken place over the whole of Northern India and Burma. Pressure was in large defect in the north of the Andaman Sea, where a depression of some importance had formed. Winds were cyclonic in direction at the Lower Burma Coast stations, and had increased very rapidly in strength, their velocity at Diamond Island at 8 A.M. being 24 miles per hour. Winds were unchanged in direction and strength at the head of the Bay. Light showers of rain were reported from Burma and the south of the Peninsula, the only fall exceeding half an inch being one of 1·69 inches registered at Khammamet.

Temperature.—The following table gives the variations of the mean temperature from the normal on each day of the week for the different provinces of India :

Province	April 1894.							Mean variation of week.
	22nd.	23rd.	24th.	25th.	26th.	27th.	28th.	
	°	°	°	°	°	°	°	°
Burma	—0·9	0	+0·2	+1·0	+1·9	+0·9	+1·1	+0·6
Bengal and Assam	—2·8	—0·9	+0·6	+1·6	+1·1	+0·5	+1·1	+0·2
North-Western Provinces and Oudh.	—2·0	+1·1	+3·4	+0·3	—0·5	—3·1	—3·0	—0·5
Punjab	+1·8	+3·3	—0·5	—5·2	—3·6	—3·4	—2·4	—1·4
Bombay	+0·9	+2·2	+2·0	+1·7	+0·3	—0·8	—0·9	+0·8
Central Provinces and Berar	—0·7	+2·1	+3·1	+3·6	+1·7	—1·3	—2·5	+0·9
Central India and Gujarat	+3·5	+5·2	+1·7	—1·6	—2·7	—2·6	—3·1	+0·1
Sind and Rajputana	+6·1	+5·7	—2·3	—5·1	—4·6	—3·3	—4·0	—1·1
Madras	—1·4	—0·5	+0·3	+1·3	—0·1	—2·0	—1·5	—0·6
Mean for whole of India	+0·5	+2·0	+0·9	—0·3	—0·7	—1·7	—1·7	—0·1

Higher temperatures than usual obtained at the commencement of the week, especially in Central India, Gujarat, Sind, and Rajputana; but the advance of the cool wave from the north-west, which has already been referred to, reduced temperature in several provinces to below normal, and on the last two days of the week temperature was in defect everywhere, except in Burma and Bengal. The mean temperature of the week was nearly normal in every province, except in the Punjab, Sind, and Rajputana, where it was slightly in defect. The mean temperature for the whole of India was two degrees in excess on the 23rd, and nearly two degrees in defect on the 27th and 28th. For the whole week it was normal.

Rainfall.—From the table at the close it will be seen that light to moderate rain has fallen during the week in all divisions of Burma, Bengal, Assam, and the south of the Peninsula. The heaviest falls have been received in Burma and Bengal. No rain has fallen in the North-Western Provinces and Oudh, Gujarat, Kathiawar, Sind, Rajputana, Central India, Khandesh, and the greater part of the Punjab.

Of the thirty-three divisions that have received rain, eight have received an average fall of over an inch, the largest average being that of 3·70 inches in North Bengal. Only five other divisions received an average of more than half an inch, while in fifteen others it did not exceed a quarter of an inch. The rainfall of the week was in excess of the normal in eighteen of the divisions that received rain, and in defect in the remaining fifteen.

The rainfall of the period 4th March to 28th April was in defect generally in Burma, Assam, Bengal, the North-Western Provinces and Oudh, the Central Provinces, Gujarat, Kathiawar, Sind, Rajputana, and Central India. It was in excess in Central Burma, North Bengal, Punjab Hill Districts, North-West and West Punjab, Bombay and Malabar Coast Districts, Berar, Central Provinces (West), and Madras, with the exception of South Hyderabad.

The following are the largest amounts received during the week at individual rain gauge stations: Cooch Behar, 12·99 inches; Kyaikto (Central Burma), 8·46 inches; Kurigram (Rangpur), 6·42 inches; and Alipur (Jalpaiguri), 5·82 inches.

Snowfall.—Further reports received during the week confirm the information already received as to the exceptionally heavy snowfall experienced during the past winter in the interior and higher elevations of the Himalayas. The Superintendent of the Kailang Observatory in Lahul states that the total snowfall was somewhat less than that of the previous winter, but still considerably above the normal, and that on the higher elevations it has almost certainly been two or three times as large. Snow was lying 4 feet deep on the fields on the 10th April. Revd. T. Schreve, stationed at Poo in the Upper Sutlej Valley, states that the past winter has been exceptionally severe and the snowfall abnormally heavy, and that the natives of the district say they do not remember such heavy snowfalls as those of the past two winters. The Deputy Conservator of Forests, Chamba, reports that the accumulation of snow on the 15th April was considerable, and in the ravines appeared to be much larger than usual, masses of snow remaining unmelted in ravines down to 6,000 feet. The snowfall in the interior to the north and west is stated by the natives of the district to have been heavier than even the exceptionally heavy fall of 1890-91.

SIMLA, *3rd May, 1894.*

W. A. BION,

Actg. Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 28th April.*—Rainfall fair on West Coast and Nilgiris; moderate showers in Ganjam and the greater portion of the Deccan and Central and Southern districts; elsewhere scanty or *nil.* Summer cultivation going on. Standing crops generally fair. Harvests continue to yield moderately. Water-supply generally fair. Pasture scarce, but fodder generally available. Condition of cattle good. Prices generally stationary.

Bombay.—*For week ending 2nd May.*—Rain generally slight in parts of seven districts. Standing crops damaged by blight, rust, or winds in parts of two districts; otherwise good, except cotton in Surat. Reaping of late crops progressing in seven and cotton picking in six districts. Preparations for the next season general. Agricultural stock generally good and fodder sufficient, except in three districts. Prices steady, except in three districts. Numbers on relief works: Baroda, 1,129.

Bengal.—*For week ending 28th April.*—There was rain over the greater part of the province during the week, the falls being heavier and more general in North Bengal than elsewhere. Ploughing is now general, and early rice and jute are being sown. Sugarcane, indigo, and millets are doing well, and the prospects of tea in Darjeeling have improved. Spring rice is being cut, and the general outturn is expected to be satisfactory. Opium weighments are still going on in Bihar. In Hazaribagh the weighments are nearly finished, and the outturn is reported to be much below the estimate. The supply of fodder and water for cattle is sufficient. Prices of common rice are steady.

North-Western Provinces and Oudh.—*For week ending 2nd May.*—Weather getting hotter. Threshing and winnowing of spring crops nearing completion. Irrigation of sugarcane and other summer crops continue. Weighments of opium in progress. Sowing of indigo has commenced. Markets well supplied and fodder abundant. Prices generally stationary.

Punjab.—*For week ending 2nd May.*—Rain has fallen in three districts. Reaping and threshing of spring crops going on and sowings of extra spring crops nearly over. The outturn of the spring crops is expected to be above average. Prospects of standing crops are good. Spring crops are said to have been damaged by recent hail in parts of the Dera Ismail Khan district. Cattle are generally in good condition, and fodder is sufficient throughout the province. The poppy crops are in good condition. Prices unsettled in one district; falling in two others; stationary elsewhere.

Central Provinces.—*For week ending 2nd May.*—Weather hot and cloudy in places. Slight rain in parts of Nagpur. Harvesting still continues

in Jabalpur, Seoni, Hoshangabad, and Raipur; completed in Bilaspur. Distress prevailing among the poorer classes in Saugor. Imports of grain increasing day by day, and relief works have granted relief to several thousands. Preparation of land for autumn sowings in progress in Nimar, Wardha, and Nagpur. Prices remain unchanged, except in Saugor.

Burma.—*For week ending 28th April.*—Rain fell in most districts. In Upper Burma agricultural operations in connection with dry-weather paddy are progressing satisfactorily. Reaping of this crop is well in hand in several districts. Early wet-weather paddy is being planted in a few places, and hill clearings have been prepared and will be planted when the rains set in. Standing crops thriving. Fodder and water-supply sufficient. The price of paddy has risen in Thongwa and fallen in Pakokko. The price of rice has risen slightly in Rangoon and fallen in Mandalay.

Assam.—*For week ending 1st May.*—Weather warm. Sowing of early rice and planting of sugarcane progressing. Condition of cattle good. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 2nd May.*—MYSORE: Good rain in parts of the Bangalore, Tumkur, Mysore, and Hassan districts; slight elsewhere. Standing crops in good condition. Rice sown in parts of the Tumkur and Shimoga districts. Prices slightly fallen in two districts.

COORG: Rainfall good. No standing crops. Prospects of coffee and cardamom fair. Fodder and water for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 2nd May.*—BERAR: Rainfall moderate. Weather hot. Threshing of wheat and linseed still continues in the Melghat taluka. Preparation of land for autumn sowings in progress. Fodder insufficient in three talukas and water-supply inadequate in the Melghat taluka. Prices have fallen in the Kelapur taluka

HYDERABAD: Rainfall good. Cutting of hot-weather crops continues. Harvesting of spring crops completed in some parts. Prices steady.

Central India.—*For week ending 2nd May.*—No rain during the week. Harvesting still continues in Bundelkhand and completed in all other Agencies. Outturn below average in Bhopal, Bundelkhand, Goona, and parts of Gwalior, and average in Baghelkhand. Pasturage bad and indifferent in parts of Gwalior, but good in other Agencies. Prices of food-grains falling in Bhopawar and Goona; steady at high rates elsewhere. Opium has been gathered. The crops in Malwa are reported to have been much injured, and the yield will be probably below average.

Rajputana.—*For week ending 2nd May.*—Rainfall slight in Kherwara and Meywar. Agricultural operations and cattle generally satisfactory. Reaping of crops nearly completed. Prospects generally good. Pasturage or fodder sufficient, except in Dholpur, where it is reported to be failing. Prices rising in four States, falling in one, fluctuating in one, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 1st May.*—Weather fine. Standing spring crops in good condition. Rapeseed ripening. Autumn ploughings going on. Rice sowings commenced in some places. Prices stationary.

JAMMU PROVINCE.—*For week ending 30th April.*—No rain. Crops reaped. Prospects of outturn good. Prices falling.

Nepal.—*For week ending 28th April.*—Storms in the hills. Weather cool. Prospects good.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

PATENTS.

Calcutta, the 5th May 1894.

NOTIFICATIONS.

No. 1124P.—APPLICATIONS in respect of the undermentioned inventions have been filed, during the week ending 5th May 1894, under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888:—

No. 134 of 1894.—Joseph Lindsay, of Blackness Foundry, Dundee, in the County of Forfar, Scotland, Engineer, for improvements in calendering machines.

No. 135 of 1894.—William Herbert Hyatt, of 1, Milton Road, Herne Hill, in the County of Surrey, England, Fellow of the Chemical Society of Great Britain, Chemical Engineer, Consulting Chemist and Metallurgist, for improvements in the manufacture of paint.

No. 136 of 1894.—William Walker, the younger, of Birmingham, England, Electrician, and Frank Richard Wilkins of Handsworth, England, Chemical Merchant, and Jabez Lones of Smethwick, England, Manufacturer, for improvements in primary voltaic batteries.

No. 137 of 1894.—John Henry Rose Harley, Merchant of No. 20, China Bazar Lane, in the town of Calcutta, for testing the quality of an egg, to be called the "Acme egg tester."

No. 138 of 1894.—Ernst Abund Richard Avenarius, of Ganalgesheim, Rheinland, in the Empire of Germany, Manufacturer, for improvements in and connected with Moulding Boxes for the manufacture of Artificial Sand Stone.

No. 139 of 1894.—George Denis Blake of Ashleigh, Dorking, in the County of Surrey, England, Indigo Planter, for improvements in the drying of indigo and in apparatus for the purpose.

No. 140 of 1894.—Sarah Ann Kelly of No. 8, The Mall, Meerut, North-Western Provinces, for providing a patent catch to door and window Tower bolts.

No. 141 of 1894.—Henry Adolphus Muller, Engineer, residing at 14, Canal Street, Entally, Calcutta, for expressing the juice from sugar-cane.

No. 1125P.—A specification of the undermentioned invention has been filed, under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M.

to 4 P.M., at the Office of the Secretary appointed under the Inventions and Designs Act, 1888, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one Rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying :—

No. 313 of 1893.—William Bull, Civil Engineer, at present residing in Calcutta, for an improved method of working continuous kilns for burning bricks and tiles by means of a single movable chimney. (Filed 9th April 1894.)

No. 1126P.—The fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 91 of 1889.—Howard Matravers Ashby, of Ferrybridge, in the County of York, England, Machinist, for improvements in machinery for the manufacture of glass bottles and similar hollow glass articles. (From 25th May 1894 to 24th May 1895.)

No 119 of 1890—Carl Albert Roepke, of Manchester, England, Watchmaker, for improvements in musical boxes. (From 1st September 1894 to 31st August 1895.)

No. 1127P.—Whereas the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888) [or within the further time allowed under section 8, sub-section (4) of the said Act], the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 154 of 1889.—Mr. T. D. Sil's invention for a balanced punkah and a self-acting machine to work the same. (Specification filed 30th January 1890.)

No. 204 of 1889.—Mr. J. J. Hooker's invention for improvements in power-storing apparatus for stopping and starting tramcars. (Specification filed 3rd February 1890.)

No 301 of 1889.—Mr. S. Bamforth's invention for improvements in fire-bars for furnaces. (Specification filed 30th January 1890.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

G. W. FORREST,

Secy. under the Inventions and Designs Act, 1888.

MOOLTAN,
The 20th April, 1894.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Candidates for admission to the Engineer Department should apply to the Principal before the 15th May, 1894. The session begins on Monday, the 4th June, 1894. Candidates must furnish proof that they have passed one of the following tests :—

(1) The F. A. Examination of the Calcutta University or a similar standard of any Indian University recognised by the Calcutta University. The candidate's age must be under 21 years.

(2) The B. A. Examination in the B. Course. The candidate's age must be under 23 years. (These students are admitted direct into the 2nd-year class)

The number to be admitted each year is limited to 40. The position in the University Examinations and the age of candidates will be taken into consideration when selection is made, and such selection will be made by the Principal.

Ten scholarships will be awarded to students entering the Engineer Department, not being already holders of junior or senior scholarships.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eyesight.

Further particulars will be supplied on application to the Principal.

J. S. SLATER,

Principal, Civil Engineering College.

JOHN OWENS,
Presidency Postmaster, Calcutta.

REDUCTION IN PRICE OF CINCHONA FEBRIFUGE.

From 1st April, 1891, and until further orders, Cinchona Febrifuge can be purchased by all Government officers and by any one taking *ten pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—four-ounce tin, *R2-8;* eight-ounce tin, *R5;* one pound tin, *R10.* The general public can be supplied by the Superintendent, Botanical Garden, *for cash only* at the undernoted rates—per four-ounce tin, *R3,* per eight-ounce tin, *R6;* per pound tin, *R12* This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

জ্বরঘ্ন সিনকোনার মূল্য কম করণ ।

১৮৯১ সালের এপ্রেল মাসের ১লা তারিখ অবধি যাবৎ অন্য আজ্ঞা না হয় তাবৎ কলিকাতার বোটানিকেল গাডণের অর্থাৎ কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট গবর্ণমেণ্টের কর্ম্মচারিগণ এবং অপর কোন ব্যক্তি এক কালীন দশ পৌণ্ড ক্রয় করিলে নিম্নলিখিত হিসাবে জ্বরঘ্ন সিনকোনা পাইবেন অর্থাৎ চারি ঔন্স টিন ২॥০ টাকায়, আট ঔন্স টিন ৫৲ টাকায় ও এক পৌণ্ড টিন ১০৲ টাকায় পাইবেন। সর্ব্ব সাধারণে কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট নগদ মূল্য দরে এই এই হিসাবে অর্থাৎ চারি ঔন্স টিন ৩৲ টাকায়, আট ঔন্স টিন ৬৲ টাকায় এবং এক পৌণ্ড টিন ১২৲ টাকায় পাইতে পারিবেন। কলিকাতার প্রধান প্রধান ইউরোপীয় ও দেশীয় ঔষধ বিক্রেতাগণও এই ঔষধ বিক্রয় করিয়া থাকেন। উপরোক্ত হার ছাড়া চারি ঔন্স টিনের ।০, আট ঔন্স টিনের ॥০ ও এক পৌণ্ড টিনের ৸০ ডাক মাশুল দিতে হইবে।

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

The price of this Quinine is as follows.—

1 Pound tin.	R 10,	or, post free,	R 10-12
½ ,,	R 8,	,,	R 8-8
¼ ,,	R 4,	,,	R 4-8

Analysis shows this Quinine to be of the purest manufacture, and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta. It can be had either white or coloured pink.

বঙ্গদেশের গবর্ণমেণ্টের সিনকোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

এই কুইনাইনের নিম্নলিখিত মূল্য যথা—

১ এক পৌণ্ড টিন . ১৬৲ বা ডাকমাশুল বিনা ১৩৷৷০

৷ আধ „ „ ৮৲ বা ডাকমাশুল বিনা ৮৷০

৷ পোয়া „ „ ৪৲ বা ডাকমাশুল বিনা ৪৷০

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধরূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিনকোনাইন ও সিনকোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারিগণের নিকট বিক্রয় করা যাইবে এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে। ইহা খামে বা পার্শেল বহের পার্শেল পাঠান যাইতে পারিবে।

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes held at the College will be forwarded to applicants.

* These include Question Papers for Engineer and Upper Subordinate Classes, and Superior Accounts Branch, P. W. D

J. CLIBBORN, *Major, I.S.C.*,
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8.

	Without postage.			With postage.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
For the Calcutta Series	10	0	0	12	8	0
,, each of the Madras, Bombay, and Allahabad Series. .	6	0	0	7	0	0
,, a part of the Calcutta Series purchased separately, *inclusive of postage in India* . .						
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India* . .						

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
For the Calcutta Series, per copy .	0	8	9			
,, each of the Madras, Bombay, and Allahabad Series; per copy.	0	5	3	0	5	9
,, the Calcutta Series For the year	7	2	0	8	6	3
,, each of the Madras, Bombay and Allahabad Series. For the year . . .	4	4	0	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
Superintendent of Government Printing, Bengal

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page*
one issue	R 20	R 14	R 6
three issues	,, 55	,, 30	,, 24
six ,, ...	,, 100	,, 68	,, 45
nine ,, ...	,, 145	,, 90	,, 04
twelve ,, . .	,, 160	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates —

	Without postage.			With postage.		
	R	*a.*	*p.*	*R*	*a.*	*p.*
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies, R2 per copy

Horse Surra, Report on, Vol. I, by ALFRED LINGARD, M.B., M.S., Durham. Super royal quarto. R10 (R1-4.)

[*Revised Advertisement.*]

A Dictionary of the Economic Products of India.

BY DR GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Indian Wheat Trade, Parts, I, II and III, combined. Royal 8vo., Limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes:—Royal 8vo., cloth.

PROMISSORY NOTES.

Lost.

The Government Promissory Notes, Nos. B$\frac{007035}{374987}$ and B$\frac{007036}{324088}$, of the 4 per cent. loan of 1st May, 1865, for R100 each, originally standing in the name of the Accountant-General, High Court, Bombay, and last endorsed to Gunput Cassinathjee, the proprietor by whom they were never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest, and for the issue of duplicates in favour of the proprietor, after two years from the date of last advertisement.

GUNPUT CASSINATHJEE,
Dadysett Agiary Road
near Naviwady.

Lost.

The Government Promissory Note No. $\frac{015282}{011091}$, of the 4½ per cent. of 1878, for R1,500, originally standing in the name of Mr. V. N. Gopauliengar, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon has been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of a duplicate in favour of Papannah, son-in-law of Gowder Chenna Basannah of Bangalore, who has obtained the rights and interests of the said Mr. V. N. Gopauliengar over the said Promissory Note from the said V. N. Gopauliengar, under a registered deed dated 10th October, 1890.

PAPANAH,
Son-in-law of Gowder Chenna Basannah,
of Bangalore.

The 24th March, 1894.

SUPPLEMENT TO

The Gazette of India.

No. 19.} CALCUTTA, SATURDAY, MAY 12, 1894.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

25	Other accidents		107	175		124	130						
	TOTAL FOR THE NINE MONTHS ENDING THE 30TH SEPTEMBER 1893					3,378	3,480	(c) 4			58		78
	Average of the corresponding periods of 1891 and 1892				146	3,251	3,397		47		40	26	87

(a) One of these was a postal employé.

(b) Not passengers.

(c) Of these, three were not passengers.

2. As compared with the average of the two corresponding periods of 1891 and 1892, the number of accidents to trains, rolling stock, permanent-way, etc., during the nine months ending the 30th September 1893 shows an increase of 83, or of 2·44 per cent., with an increase of 682·21 miles or of 3·94 per cent. in the mean mileage worked, and of 1,679,636 miles or of 3·57 per cent. in the train-mileage run.

Principal variations as compared with the average of the corresponding periods of 1891 and 1892.

3. The chief variations occurred under "Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line," 21 against 42; "Passenger trains or parts of passenger trains leaving the rails," 63 against 79; "Goods trains or parts of goods trains, engines, etc., leaving the rails," 231 against 259; "Trains running over cattle on the line," 1,686 against 1,539; "The bursting of tubes, etc., of engines," 142 against 91; "The failure of machinery, springs, etc., of engines," 337 against 320; "The failure of axles," 28 against 40; "The failure of couplings," 183 against 151; "The flooding of portions of permanent-way, 101 against 85; "Slips in cuttings or embankments," 29 against 47; "Fires in trains," 101 against 137; "Fires at stations or involving injury to bridges or viaducts," 35 against 50; and "Other accidents," 130 against 175.

4. "Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line" showed a decrease of 21 accidents, *viz.*, 8 under "Serious" and 13 under "Minor." The decrease under "Serious" was chiefly due to the numbers recorded on the East Indian and North Western (state) railways having fallen from 5 to 2 and 3 to 1 respectively, while under "Minor" the chief variations were an increase of 6 on the East Indian railway and decreases of 8 on the Eastern Bengal (state) railway, 4 on the Bengal and North-Western railway, including the Tirhoot section, and 3 on the Burma (state) railway.

5. There was a decrease of 16 accidents under "Passenger trains or parts of passenger trains leaving the rails," of which 14 were under "Serious" and 2 under "Minor." Under "Serious" the largest decrease took p lace on the East Indian railway, which returned 1 against 7, while four other railways showed a decrease of 2 each. The decrease under "Minor" was chiefly the result of a decrease of 6 on the Eastern Bengal (state) railway, which was, however, nearly counterbalanced by an increase of 5 on the Southern Mahratta railway.

6. The decrease of 28 accidents under "Goods trains or parts of goods trains, engines, etc., leaving the rails" was made up of 5 under "Serious" and 23 under "Minor." The North Western (state) railway showed a decrease of 3 under "Serious," while under "Minor" the principal variations were an increase of 15 on the East Indian railway and decreases of 16 on the South Indian railway and 15 on the Eastern Bengal (state) railway.

7. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 397; next to that line comes the South Indian railway with 216; then the North Western (state) railway with 130; the Eastern Bengal (state) railway with 126; the Rajputana-Malwa (state) railway with 116; the East Indian railway with 112; the Nizam's Guaranteed State railway with 99; the Oudh and Rohilkhand (state) railway with 88, and the Great Indian Peninsula railway with 85.

As compared with the average of the corresponding periods of the two previous years, the chief increases occurred on the Southern Mahratta, the Nizam's Guaranteed State, and the Great Indian Peninsula railways, *viz.*, 47, 34, and 32 accidents, respectively.

In relation to train-mileage run, the number was highest on the Nizam's Guaranteed State railway, which gave an average of 1 accident in 5,042 train miles, the Dibru-Sadiya railway coming next with an average of 1 in 5,130; then the Southern Mahratta, the South Indian, the Bengal-Nágpur, and the Eastern Bengal (state) railways with averages of 1 in 5,730, 1 in 11,254, 1 in 19,029, and 1 in 19,120, respectively.

The lowest number recorded relatively to train-mileage run was on the Bombay, Baroda and Central India railway, *viz.*, 1 in 175,178; the Morvi railway coming next with an average of 1 in 118,634; then the Great Indian Peninsula railway with 1 in 100,723, the East Indian railway with 1 in 68,799, the Gaekwar's Dabhoi railway with 1 in 66,022, and the Darjeeling-Himalayan railway with 1 in 54,488.

8. Under "The bursting of tubes, etc., of engines," there was an increase of 51 accidents, with an increase of 38 on the Southern Mahratta railway alone.

9. The number of accidents from "The failure of machinery, springs, etc., of engines" was more by 17. The principal variations were an increase of 69 on the Great Indian Peninsula railway, and decreases of 27 on the East Indian railway and 21 on the Bengal-Nágpur railway.

10. There was a decrease of 12 accidents from "The failure of axles," made up of 3 under "Serious" and 9 under "Minor." The decrease under "Serious" was due to a falling off of one each on four railways and that under "Minor" chiefly to a decrease of 6 on the Jorhát railway.

11. Under "The failure of couplings," the accidents rose from 151 to 183, there being a decrease of 1 under "Serious" and an increase of 33 under "Minor." The increase under "Minor" was chiefly contributed by the Dibru-Sadiya and the South Indian railways, on which the figures rose from 11 to 29 and 2 to 12, respectively.

12. "The flooding of portions of permanent-way" showed an increase of 5 accidents under "Serious" and of 11 under "Minor." The principal variations under "Serious" were an increase of 11 on the Bhávnagar-Gondal-Junágarh-Porbandar railway and a decrease of 7 on the North Western (state) railway, while the increase under "Minor" was chiefly contributed by the North Western (state) railway, on which the accidents numbered 21 against 9.

13. The accidents from "Slips in cuttings or embankments" were less by 18, *viz.*, 2 under "Serious" and 16 under "Minor." The Bengal-Nágpur railway chiefly accounted for the decrease, the figures being 1 against 4 under "Serious" and 2 against 15 under "Minor."

14. Under "Fires in trains" there was a decrease of 36 accidents, of which 3 were under "Serious" and 33 under "Minor." The decrease under "Serious" was due to there having been one less on each of four railways, and that under "Minor" chiefly to the number recorded on the Great Indian Peninsula railway having fallen from 40 to 17.

15. The decrease under "Fires at stations, or involving injury to bridges or viaducts" was chiefly due to a falling off of 18 accidents on the Eastern Bengal (state) railway.

16. The decrease in the number of cases recorded under the head "Other accidents" was made up of 2 under "Serious" and 43 under "Minor." The decrease under "Minor" was chiefly accounted for by a decrease of 27 accidents on the East Indian railway.

17. Under "Trains or engines travelling in the wrong direction through points," there was a decrease of 4 accidents under "Serious" and an increase of 15 under "Minor." The decrease under "Serious" was equally distributed over four railways, while of the increase under "Minor" the North Western (state) railway was responsible for 12 accidents.

18. The accidents from "Trains running through gates at level-crossings" numbered 38 against 48, of which 5 against 12 took place on the South Indian railway alone.

Casualties to passengers and servants not included in paragraph 1.

19. The casualties to passengers and to servants in the employ of railways or of contractors from accidents not coming under the classification adopted in paragraph 1 were, as compared with the average of the corresponding periods of 1891 and 1892, in the case of passengers, 46 killed and 126 injured against 48 killed and 136 injured, and, in the case of servants, 120 killed and 408 injured against 131 killed and 426 injured. (For details, *vide* abstract No. 2.)

Statistical summary.

20. Compared with the average of the corresponding periods of the two previous years, the mean mileage open was 18,004·44 miles against 17,322·23 miles, the train-mileage run amounted to 48,738,467 miles against 47,058,831 miles, and the number of

passengers carried was 94,808,788 against 87,236,391. There were seven accidents for every 100,000 train-miles run.

Out of a total of 94 808,788 passengers travelling, only one passenger was killed and 26 were injured by accidents to trains as classified in paragraph 1. This gives an average of one casualty in 4,514,704 persons travelling and an average of one in 199,511,885 miles travelled.

Including casualties to passengers from causes other than accidents to trains, rolling stock, etc. (*vide* paragraph 19), the total numbers of passengers killed and injured were 47 and 146, respectively, giving an average of one killed in 2,017,208 and one injured in 649,375, or an average, on the total number of killed and injured, of one in 491,237 passengers travelling.

Total casualties from all causes.

21. The total casualties to persons from all causes, including trespassers cases of suicide, etc., were 441 killed and 696 injured against 460 killed and 727 injured, the average of the two corresponding periods of 18 ,1 and 892. (For details, *vide* abstract No. 2.)

Casualties in yards, workshops, etc.

22. In addition to the above, 48 persons were reported to have been killed and 171 injured in yards, workshops, etc., and 517 persons to have died in carriages and at stations from causes unconnected with the working of trains.

23. The accidents *for the third quarter of 1893* are dealt with in the following note.

Note on accidents for the 3rd quarter of 1893.

Casualties resulting from accidents to trains, rolling stock, etc., for the 3rd quarter of 1893

The following table gives the number of accidents, as classified in paragraph 1 of the previous note, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred :—

RAILWAY.	Number of accidents during the 3rd quarter of 1893.	PASSENGERS AND OTHERS		SERVANTS		TOTAL	
		Killed.	Injured	Killed	Injured	Killed.	Injured.
East Indian	2	...	2	...	1	.	3
North Western (state)	1		.	...	1	...	1
Great Indian Peninsula	2		...	2	39	2	39
Rajputana-Malwa	1	..	...	1	..	1	.
Jodhpore-Bickaneer	1	..	.	.	3	...	3
TOTAL		...	2	3	44	3	46
Average of the two corresponding quarters of 1891 and 1892	.	2	4	1	6	3	10

2. *East Indian railway.*—On the 7th July 1893, the leading door of a covered wagon attached to an up passenger train, which had been opened by some passengers, collided at Mánkar with the sunshade and cooler of a second class carriage on a down mail train. Two passengers were slightly injured.

On the 12th September 1893, a collision took place at Moghal Sarai between a light engine and some wagons standing in a siding. The driver was seriously injured.

3. *North Western (state) railway.*—On the 4th July 1893, a double engine ballast train, whilst shunting in the Mandra yard, parted owing to the draw bar hook and side chains of a truck having broken. The rear portion after breaking away, went down an incline towards Riwát, and then, running for some distance up an ascending grade, commenced to roll back, and, when about a mile out of Mandra, collided with the rest of the train, which was being taken out by the guard to pick up this run-away portion. A railway servant was slightly injured, and there was also considerable damage to rolling stock.

4. *Great Indian Peninsula railway.*—On the 24th July 1893, the rear brake and some wagons of a ballast train were thrown off the line down a bank at mileage 111 near Deoláli owing to the train having come in contact with a

trolly. The accident was due to the excessive speed at which the train was moving and to the failure of the engine staff to act promptly on the guard's signal. Two coolies were killed and thirty-seven coolies and the guard of the train injured.

On the 9th August 1893, a carriage door of a down train, supposed to have been opened by a passenger, struck the engine and incline van of an up ghat train at mileage 82¾ near Igatpuri. A railway servant was injured.

5. *Rajputana-Malwa railway.*—On the 3rd July 1893, an up local mixed train was received on a wrong line at the Kharwa station. A railway servant who was standing on this line was killed by the train.

6. *Jodhpore-Bickaneer railway.*—On the 11th September 1893, an up local mixed train collided with an engine shunting at the Lúni junction. Three railway servants were injured.

ORDER.—Ordered, that the above note, with the abstract returns, be communicated for information to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, North Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India and Baluchistan.
The Director General of Railways
The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, Lucknow and Assam.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that the note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

T. B. HEBBERT,

Under-Secretary.

Documents accompanying.

Abstract returns of accidents for the nine months ending the 30th September 1893.

Enclosure to P. W. D. No. 148 R. Stat., dated the 26th April 1894.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the NINE months ending the 30th September 1893, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Killed	Injured.
PASSENGERS —		
From accidents to trains, rolling-stock, permanent-way, etc.		20
By accidents from other causes, including accidents from their own want of caution or misconduct	46	126
SERVANTS —		
From accidents to trains, rolling-stock, permanent-way, etc.		58
By accidents from other causes, including accidents from their own want of caution or misconduct	120	408
OTHER PERSONS —		
Whilst passing over railways at level-crossings	10	
Trespassers	198	70
Suicides	56	
Miscellaneous, not included in either of the above		
TOTAL	441

ABSTRACT No. 3.

ACCIDENTS TO TRAINS, ROLLING STOCK, PERMANENT-WAY, etc, reported during the nine months ending 30th September 1893, as having occurred on the several railways open for traffic in **INDIA**, distinguishing the different classes of accidents and the number of passengers and others and of railway servants killed or injured in each class of accident

HOME DEPARTMENT.

—

NOTIFICATIONS.

ESTABLISHMENTS.

Simla, the 8th May, 1894

No. 246—The services of Mr. A H. Collins, of the Indian Civil Service, are placed on his return from furlough at the disposal of the Chief Commissioner of Burma.

MEDICAL.

The 10th May, 1894.

No. 294.—His Excellency the Viceroy and Governor General has been pleased to appoint Assistant Surgeon Charles Arthur Lafrenais, L.M.S., Madras, to be an Honorary Assistant Surgeon on His Excellency's personal staff, *vice* Assistant Surgeon Iyasawmy Pillai, Rao Bahadur, deceased.

The 11th May, 1894.

No. [illegible]—The services of Surgeon-Captain C. N. Bensley, I.M.S. (Bengal), are placed temporarily at the disposal of the Chief Commissioner of the Central Provinces.

JUDICIAL.

The 9th May, 1894.

No 480.—The services of Major A. W. D. Campbell, I.S.C., Cantonment Magistrate, Lucknow, are replaced at the disposal of the Government of the North-Western Provinces and Oudh, with effect from the 11th April 1894.

The 11th May, 1894

No. 489—In exercise of the power conferred by Section 139 of Act XXVI of 1881 (the Negotiable Instruments Act, 1881, as amended by Act II of 1885), the Governor General in Council is pleased to make the following rules for the

guidance and control of Notaries Public appointed under that Act, and fixing the fees payable to such Notaries exercising their functions in Upper Burma:

1. Notaries Public shall, in transacting business under the Act, use the forms set forth in the Appendix to this notification.

2. Besides recording declarations of payment for honour (section 113), Notaries Public shall, following the practice existing in the presidency-towns, also register notings and protests made by them. No particular form of register is necessary for these purposes, but Notaries Public shall keep a substantial blank book in which to enter copies of all the letters which they may write presenting bills for acceptance or payment or better security; of all bills* noted or protested, or paid for honour, together with all endorsements thereon (including that made by themselves, to the effect that the bill has been noted or protested for non-acceptance, or non-payment, or want of better security); and of all protests made by themselves and of all declarations made by payers for honour. Notaries Public shall further, after examination of each entry in the book, affix their signature thereto, and where demand of acceptance or payment, or better security, was made by a clerk, shall cause him to affix his signature also to the entry relating to the demand.

3. The book shall be known as the Notarial Register, and the pages thereof shall be numbered consecutively.

4. Every Notary Public shall permit the District Judge or such officer as the Local Government from time to time appoints in this behalf to inspect his register at such times, not oftener than twice a year, as the District Judge or officer may fix.

5. When the original instrument is in an Oriental language, any noting or protest, or entry in his register which has to be made in respect of the instrument by a Notary Public, may be made either in that language or in English.

6. In making presentments of bills or notes, Notaries Public shall observe the provisions of Chapter V of the Act:

Provided that it shall not be necessary for a Notary Public to allow the drawee of a bill of exchange time for deliberation as provided by section 63.

7. Every Notary Public shall use a plain circular seal, bearing, if he has been appointed by name, his name and the name of the local area within which he has been appointed to exercise his functions and the circumscription "Notary Public," and, if he has been appointed by virtue of his office, the name of his office and of the local area within which he has been appointed to exercise his functions and the circumscription "Notary Public."

8. Every Notary Public shall have an office at such place within the local area for which he has been appointed as may be approved in this behalf by the District Judge.

9. Notaries Public shall charge fees at the rates mentioned below, namely:

(1) For noting an instrument—

					Rs.	Rs
If the amount of the instrument does not exceed				...	1,000	2
If it exceeds Rs.	1,000, but does not exceed			...	5,000	3
Ditto	,,	5,000,	ditto	...	20,000	5
Ditto	,,	20,000,	ditto	...	30,000	6
Ditto	,,	30,000,	ditto	..	50,000	7
Ditto	,,	50,000,	ditto	...	...	8

(2) For protesting an instrument—

					Rs.	Rs.
If the amount of the instrument does not exceed					1,000	6
If it exceeds Rs.	1,000, but does not exceed			.	5,000	7
Ditto	,,	5,000,	ditto		20,000	10
Ditto	,,	20,000,	ditto		30,000	11
Ditto	,,	30,000.	ditto		40,000	12
Ditto	,,	40,000,	ditto		50,000	13
Ditto	,,	50,000,	ditto		60,000	14
Ditto	,,	60,000,	ditto		70,000	15
Ditto	,,	70,000,	ditto		80,000	16
Ditto	,,	80,000,	ditto		90,000	17
Ditto	,,	90,000,	ditto		1,00,000	18
Ditto	,,	1,00,000,	...		...	22

(3) For recording a declaration of payment for honour ... 2-8

(4) Duplicate protests,—half the charge for the original.

NOTE.—In addition to the above fees, travelling allowance at the rate of three annas a mile by rail and eight annas a mile by road may be charged when the Notary Public is required to attend at any place more than one mile from his office.

10. These rules shall come into force on the first day of January 1887.

* In cases where the language of the bill is unknown to the Notary Public, and where it is impossible to find any one acquainted with the language of the bill to copy it into the register, an entry in the register of an abstract of the bill will be sufficient.

NOTE.—When, after a bill is protested and before the protest is drawn up, it is paid for honour, the protest should further state the name of the person by whom, and of the person for whom, and the manner in which, such payment was offered and effected.

V.

PROTEST OF PROMISSORY NOTE OR BILL OF EXCHANGE FOR NON-PAYMENT WHEN THE MAKER, DRAWEE, OR ACCEPTOR (AS THE CASE MAY BE) CANNOT BE FOUND.

(SEE SECTION 101.)

(*a*) *Where search was made by Notary Public in person or by his clerk.*

On the day of 18 , I, *A.B.*, a Notary Public appointed under the Negotiable Instruments Act, 1881, of in (*here state the local area for which the Notary Public has been appointed*) in British India, at the request of *C.D.* of , did (*in person*) (*by my clerk*) make due search at for *E.F.*, the maker (*or* drawee *or* acceptor, *as the case may be*) in order to present to and demand from him payment of the promissory note (or "bill of exchange," as the case may be) hereto annexed (or "a literal transcript whereof and of everything written or printed thereupon is hereto annexed"), but was unable to find him; wherefore I, the said Notary, at the request aforesaid, by this writing, do, in the presence of *M.N.* and *O.P.*, witnesses, protest against the maker of the said promissory note (*or* drawer of said bill of exchange, *as the case may be*) and all other parties thereto and all others concerned for all exchange, re-exchange, and all costs, damages, and interest present and to come for want of payment of the said promissory note (*or* bill of exchange, *as the case may be*).

(*b*) *Where registered letter was sent to the maker, drawee, or acceptor.*

On the day of 18 , I, *A.B.*, a Notary Public appointed under the Negotiable Instruments Act, 1881, of in (*here state the local area for which the Notary Public has been appointed*) in British India, at the request of *C.D.* of , did send by post a registered letter addressed to *E.F.* at , the maker (*or* drawee *or*

acceptor, *as the case may be*), wherein I enclosed and demanded from him payment of the promissory note (or " bill of exchange," *as the case may be*) hereto annexed (or " a literal transcript whereof and of everything written or printed thereupon is hereto annexed "), but the letter was returned undelivered because the said *E.F.* could not be found; wherefore I, the said Notary, at the request aforesaid, by this writing, do, in the presence of *M.N.* and *O.P.*, witnesses, protest against the maker of the said promissory note (*or* the drawer of the said bill of exchange, *as the case may be*) and all other parties thereto and all others concerned for all exchange, re-exchange, and all costs, damages, and interest present and to come for want of payment of the said promissory note (*or* bill of exchange, *as the case may be.*)

Which I attest.

(Sd.) *A. B.*,
Notary Public.

M. N.
O. P. } Witnesses.

NOTE.—When, after a bill is protested and before the protest is drawn up, it is paid for honour, the protest should further state the name of the person by whom, and of the person for whom, and the manner in which, such payment was offered and effected.

VI.

FORM OF PROTEST OF BILL OF EXCHANGE FOR BETTER SECURITY.

(SEE SECTION 101.)

On the day of 18 , I, *A.B.*, a Notary Public appointed under the Negotiable Instruments Act, 1881, of in (*here state the local area for which the Notary Public has been appointed*) in British India, at the request of *C.D.* of , did exhibit the bill of exchange hereto annexed (or "a literal transcript whereof and of everything written or printed thereupon is hereto annexed") to *E.F.*, the person on whom the said bill is drawn and whose acceptance appears thereon, and did demand better security for the payment thereof when the same should become payable in consequence of the said *E.F.* having become insolvent (or "his credit having been publicly impeached," as the case may be), to which demand he made answer (or "to which demand he gave no answer"); wherefore I, the said Notary, at the request aforesaid, by this writing, do, in the presence of *M.N.* and *O.P.*, witnesses, protest against the drawer of the said bill of exchange and the acceptor and all other parties thereto and all others concerned for all exchange, re-exchange, and all costs, damages and interest present and to come for want of better security for the payment of the said bill when due and payable.

Which I attest.

(Sd.) *A. B.*,
Notary Public.

M. N.
O. P. } Witnesses.

NOTE.—When, after a bill is protested and before the protest is drawn up, it is accepted for honour, the protest should further state the name of the person by whom, and of the person for whom, and the manner in which, such acceptance was offered and effected.

VII.

FORM OF PROTEST OF BILL OF EXCHANGE FOR BETTER SECURITY WHEN THE ACCEPTOR CANNOT BE FOUND.

(SEE SECTION 101.)

(*a*) *Where search was made by Notary Public in person or by his clerk.*

On the day of 18 , I, *A.B.*, a Notary Public appointed under the Negotiable Instruments Act, 1881, of in (*here state the local area for which the Notary Public has been appointed*) in British India, at the request of *C.D.* of , did (*in person*) (*by my clerk*) make due search at for *E.F.* in order to exhibit the bill of exchange hereto annexed (or "a literal transcript whereof and of everything written or printed thereupon is hereto annexed") to the said *E.F.*, the person on whom the said bill is drawn, and whose acceptance appears thereon, and demand better security for the payment thereof when the same should become payable in consequence of his having become insolvent (or " his credit having been publicly impeached," *as the case may be*), but was unable to find him; wherefore I, the said Notary, at the request aforesaid, by this writing, do, in the presence of *M.N.* and *O.P.*, witnesses, protest against the drawer of the said bill of exchange and the acceptor and all other parties

thereto and all concerned for all exchange, re-exchange, and all costs, damages, and interest present and to come for want of better security for the payment of the said bill when due and payable.

(*b*) *Where registered letter was sent to the acceptor.*

On the day of 18 , I, *A.B.*, a Notary Public appointed under the Negotiable Instruments Act, 1881, of in (*here state the local area for which the Notary Public has been appointed*) in British India, at the request of *C.D.* of , did send by post a registered letter addressed to *E.F.* at wherein I enclosed the bill of exchange hereto annexed (or "a literal transcript whereof and of everything written or printed thereupon is hereto annexed"), and did by such letter demand from the said *E.F.*, the person on whom the said bill is drawn and whose acceptance appears thereon, better security for the payment thereof when the same should become payable in consequence of his having become insolvent (or "his credit having been publicly impeached," *as the case may be*), but the said letter was returned undelivered because the said *E. F.* could not be found; wherefore I, the said Notary, at the request aforesaid, by this writing, do, in the presence of *M. N.* and *O. P.*, witnesses, protest against the drawer of the said bill of exchange and the acceptor and all other parties thereto and all others concerned for all exchange, re-exchange, and all costs, damages, and interest present and to come for want of better security for the payment of the said bill when due and payable.

Which I attest.

(Sd.) *A. B.*,
Notary Public.

M. N.
O. P. } Witnesses.

NOTE.—When, after a bill is protested and before the protest is drawn up, it is accepted for honour, the protest should further state the name of the person by whom, and of the person for whom, and the manner in which, such acceptance was offered and effected.

Capper, Captain J. E., R.E.	Executive Engineer, 3rd Grade sub *pro tem.*	Executive Engineer, 3rd Grade.	Permanent	2nd February 1894.
Cowie, Captain C. H., R.E.	Assistant Engineer, 1st Grade, and Executive Engineer, old 4th Grade.	Executive Engineer, 3rd Grade.	Permanent	2nd February 1894.
Chirnside, J. B.	Executive Engineer, 3rd Grade, sub *pro tem.*	Executive Engineer, 3rd Grade.	Permanent	2nd February 1894.
Jones, H. S.	Assistant Engineer, 1st Grade, and Executive Engineer, old 4th Grade.	Executive Engineer, 3rd Grade.	Permanent	2nd February 1894.
Eaton, J. N. A.	Assistant Engineer, 1st Grade, and Executive Engineer, old 4th Grade.	Executive Engineer, 3rd Grade	Permanent	2nd February 1894.
Guinness, H. S.	Executive Engineer, 3rd Grade.	Executive Engineer, 2nd Grade.	Sub. *pro tem.*	2nd February 1894.
Rowland, A.	Executive Engineer, 3rd Grade, temporary rank	Executive Engineer, 3rd Grade.	Sub. *pro tem.*	2nd February 1894.
Roberts, F. W.	Assistant Engineer, 1st Grade.	Executive Engineer, 3rd Grade.	Temporary	2nd February 1894.
Gales, R. R.	Assistant Engineer, 1st Grade.	Executive Engineer, 3rd Grade.	Temporary	2nd February 1894.
Woodside, J.	Assistant Engineer, 1st Grade.	Executive Engineer, 3rd Grade.	Temporary	2nd February 1894.

The promotions and reversions from 1st to 23rd November 1893 inclusive, notified in Public Works Department Notification No. 4, dated 2nd January 1894, are accordingly cancelled.

No. 193.—The services of Lieutenant H. Prentice, R.E., Assistant Engineer, 2nd Grade, are replaced at the disposal of the Military Department, with effect from the 13th May 1894.

No. 194.—Mr. F. Morrison, Government Examiner of Accounts, East Indian Railway Company, is appointed to officiate as Examiner of Telegraph Accounts, in addition to his own duties, during the absence of Mr. F. E. Godfrey on privilege leave.

The 10th May, 1894.

No. 195.—Lieutenant R. E. Tomlin, R.E., Officiating Assistant Secretary to the Government of India in the Public Works Department, is confirmed in that appointment, with effect from the forenoon of the 2nd February 1894.

No. 196.—Mr. C. S. R. Palmer, Executive Engineer, 2nd Grade, Central Provinces, has been permitted to retire from the service of Government under the provisions of Government

of India, Public Works Department, Resolutions Nos. 2873-G. and 463-G., dated the 2nd November 1893 and the 9th February 1894 respectively, with effect from the forenoon of the 2nd May 1894.

No. 197.—Mr. J. H. Heap, Assistant Engineer, 3rd Grade, State Railways, passed the Departmental Standard Examination prescribed in Public Works Department Code, Volume I, Chapter II, paragraph 18, on the 8th May 1894.

No. 198.—Mr. J. R. Swinden, Executive Engineer, 2nd Grade, Bengal, has been permitted to retire from the service of Government under the provisions of Government of India, Public Works Department, Resolutions Nos. 2873-G. and 463-G., dated the 2nd November 1893 and the 9th February 1894 respectively, with effect from the afternoon of the 30th April 1894.

No. 199.—Rai Sahib Krith Chunder Chowdry, Assistant Engineer, 2nd Grade, Bengal, has been permitted to retire from the service of Government under the provisions of Government of India, Public Works Department, Resolutions Nos. 2873-G. and 463-G., dated the 2nd November 1893 and the 9th February 1894 respectively, with effect from the afternoon of the 1st May 1894.

The 11th May, 1894.

No. 200.—Mr. J. C. Wyatt, Executive Engineer, 3rd Grade, Burma, has been permitted to retire from the service of Government under the provisions of Government of India, Public Works Department, Resolutions Nos. 2873-G. and 463-G., dated the 2nd November 1893 and the 9th February 1894 respectively, with effect from the forenoon of the 2nd May 1894.

No. 201.—Rai Bahadur Prosunna Coomar Daniari, Executive Engineer, 3rd Grade, Bengal, has been permitted to retire from the service of Government under the provisions of Government of India, Public Works Department, Resolutions Nos. 2873-G. and 463-G., dated the 2nd November 1893 and the 9th February 1894 respectively, with effect from the forenoon of 1st May 1894.

No. 202.—The following promotions and reversion are ordered in the Accounts Branch.

Name	From	To	With effect from
Carey, Lieutenant-Colonel H. R. Le M., I.S.C.	Examiner, 3rd Class	Examiner, 2nd Class, temporary.	17th April 1894.
O'Donoghue, W. F.	Examiner, 4th Class, 1st Grade	Examiner, 3rd Class, temporary.	19th April 1894.
Sowerby, C.	Examiner, 4th Class, 3rd Grade, temporary	Deputy Examiner, 1st Grade	19th April 1894.

No. 203.—Mr. A. Sprenger, Executive Engineer, 1st Grade, Burma, has been permitted to retire from the service of Government under the provisions of Article 712 (c) of the Civil Service Regulations, with effect from the forenoon of the 24th September 1893.

F. L. O'CALLAGHAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 5th, 1894.

General Summary.—The storm which entered the Gulf of Martaban at the close of the previous week had by the morning of the 29th advanced further north, and had entered Lower Burma, following the course of a storm similar to it in many respects which formed in the same area at the end of April last year. Pressure was upwards of a third of an inch in defect at Rangoon, and was probably from four to five-tenths of an inch in defect in the centre of the storm area. By next morning pressure had increased briskly to rapidly in Lower Burma, and the storm had during the previous twenty-four hours advanced inland and broken up among the hills. The effects of it were apparent, however, as far inland as Fort Stedman and Lashio, where the barometer had fallen briskly, and moderately heavy rain had been received. Heavy rain had also fallen at the Lower Burma Coast stations, Moulmein registering 4·00 inches during the previous twenty hours, Diamond Island 3·19 inches, and Rangoon 2·59 inches. Rain continued at the majority of the Burma stations throughout the rest of the week, but in nearly all cases the amounts reported each day were small.

Weather was slightly disturbed in Northern India at the close of the week, and showers of rain, in the majority of cases accompanying thunderstorms, were reported during the week from Bengal, Southern India, the North-Western Provinces, and the Punjab, but the falls were generally light and not of any great importance. Snow fell again at Gnatong in Upper Sikkim at the beginning of the week, unusually late in the season. Temperature was on the whole in excess in Northern India, but was slightly to considerably in defect in Burma and Southern India. The mean temperature of the week for the whole of India was normal.

Daily Summary.—*Sunday.*—Pressure had given way over the whole of India,—briskly over the greater part of Northern and Central India, and briskly to rapidly in Lower Burma, where the cyclonic storm noticed at the close of the previous week had advanced into the Gulf of Martaban and was crossing over into Lower Burma, following the same track as the similar storm of the last week of April 1893. Strong cyclonic winds were blowing in Lower Burma, but winds on the Bengal and Orissa Coasts were weaker than for some days past. Diamond Island registered 3·55 inches of rain and Bassein, Rangoon, and Thayetmyo over 1 inch. Rain was also reported from Southern India, where Trivandrum and Cochin each received over an inch, and a snowstorm occurred at Gnatong, the fall amounting to half an inch of melted snow. Temperature fell largely in Lower Burma due to the general rainfall.

Monday.—A brisk to rapid rise of pressure had taken place in Lower Burma, and the depression in that area had advanced inland and broken up during the past twenty-four hours. Pressure changes elsewhere were generally small. Pressure was in defect everywhere, the largest defect being in Upper India and Assam. Winds in Burma were very irregular, but were generally southerly at the coast stations At some of the Upper India hill stations abnormal northerly winds prevailed. Moderate to heavy rain was reported from Burma and Southern India. Moulmein received 4·00 inches, Diamond Island 3·19 inches, Rangoon 2·59 inches, Fort Stedman 2·33 inches, Toungoo 2·15 inches, Lashio 1·83 inches, and Bassein 1·49 inches. In Southern India Calicut received 2·45 inches, Cochin 1·47 inches, and Trichinopoly 1·41 inches. Temperature had again fallen considerably at the Burma stations. Abnormally high temperatures were registered at the Madras Coast stations due to westerly land winds. At Masulipatam and Madras the day temperature was 8° in excess of the normal.

Tuesday.—Pressure had increased over the whole of India, the rise exceeding a tenth of an inch in Burma, Assam, and East Bengal, where pressure had been restored to the normal. Shallow depressions of no great importance lay over the West Punjab and the Madras Coast districts. Light showers of rain were received at the majority of stations in Burma and at a few stations in Bengal and Southern India. Temperature had increased in all provinces except Madras.

Wednesday.—Pressure continued to rise, but by small and irregular amounts, and was nearly normal over the whole of India. Temperature had increased rapidly in the north-west, but had fallen slightly in Bengal and Burma owing to thunderstorms and showers of rain. Toungoo received 1·17 inches, Rangoon 1·15 inches, and Jessore 61 inch. Cocanada reported a fall of 1·17 inches.

Thursday.—The barometric changes were small and irregular, but did not affect the pressure distribution, which continued nearly normal. Very hot dry weather prevailed generally. Diamond Island received 1·10 inches of rain. A few other showers were reported, but none of them exceeded a quarter of an inch. Easterly winds prevailed in Bihar and the eastern districts of the North-Western Provinces. Temperature had fallen in Sind and Rajputana, but in all other provinces it had increased by small amounts.

Friday.—Pressure had changed very irregularly, increasing briskly to rapidly in Baluchistan, Upper Sind, and West Punjab, and falling slightly to briskly in the South-East Punjab. The Upper India depression had hence moved eastwards to the foot of the hills. Rain had fallen in Southern India, Burma, North Bengal, and the North Punjab. Amounts exceeding one inch were received at Calicut, Wellington, Rajahmundry, Purnea, and Jalpaiguri.

Saturday.—Pressure had fallen at most stations, but the changes were very irregular. Pressure was lowest in a tract extending from the South-East Punjab to Chota Nagpur. Easterly winds had extended over the Gangetic plain into the South-East Punjab, and had caused a considerable increase of humidity in the North-Western Provinces. Rain was reported from most of the stations in Burma and from a few stations in Bengal and Southern India, but the falls were in all cases small.

Temperature.—The following table gives the variations of the mean temperature from the normal on each day of the week :

PROVINCE.	April 1894.		May 1894					Mean variation of week
	29th.	30th.	1st.	2nd.	3rd.	4th.	5th.	
				°	°	°	°

Sind and Rajputana .	-2·6	—0·4	+2·3	+3·2	+0·7	+1·6	+2·1	+1·0
Madras . . .	-1·1	—0·9	—1·6	—1 5	—1·3	—2·5	—1·9	—1·5
Mean for whole of India	—1·9	—1·6	—0·3	+0·6	+1·0	+0·8	+0·6	

Temperature has been below the normal throughout the week in both Burma and Madras, due to the unusually heavy rainfall received in those provinces. At the commencement of the week it was considerably in defect in the North-Western Provinces, Central India, and the Central Provinces; and in slight to moderate defect in all other provinces, except Bengal, where it has been in

excess throughout the week. But temperature rose steadily over the whole of Northern India as the week advanced, and strongly marked hot weather conditions prevailed over this area during the greater part of the week. Temperature was most in excess in the Punjab. In Central India, the Central Provinces, and in the Peninsula generally the variations from the normal were not large. The mean temperature for the week was two degrees in excess of the normal in Bengal and the Punjab, and one degree in Sind and Rajputana. It was in defect in all other provinces, the defect being greatest in Burma (—2·3°) and in Madras (—1·5°).

The mean temperature for the whole of India was in defect in the first three days of the week, and was slightly in excess on the remaining four days. For the whole week it was normal, being only 0·1° in defect.

Rainfall.—General rain has fallen during the week in Burma, Bengal, and Southern India. It has been heaviest in Burma, where the average rainfall in Tenasserim was 10·97 inches, and in Lower and Central Burma over 4 inches. With the exception of Burma, the rainfall of the week has been small in amount.

Thirty-two of the fifty-two rainfall divisions received rain, but, excluding those of Burma, there were only five divisions the average rainfall of which exceeded half an inch, and in none of these did it amount to as much as one inch. In fifteen others it did not exceed a quarter inch.

Only the divisions of Tenasserim, Lower and Central Burma, South Oudh, the Konkan, and east coast (north *a*) of Madras received amounts in excess of the usual average rainfall of the week.

For the period 4th March to 5th May the rainfall has been in excess of the normal in Tenasserim, Lower and Central Burma, North Bengal, North-West and West Punjab, Bombay and Malabar Coast districts, Berar, Central Provinces (West), and Madras, with the exception of Hyderabad (South). The rainfall has been most excessive in Tenasserim and Lower and Central Burma; and nearly the whole of the rainfall of the period in these divisions has been received during the past week. The rainfall was more than 75 per cent. in defect in South Bihar, the submontane and west districts of the North-Western Provinces, South Punjab, Central Provinces (East), Kathiawar, Sind, and Rajputana.

The largest amounts received during the week were at the following stations in Burma: Thaton (Amherst), 12·19 inches; Moulmein, 9·75 inches; Kyaikto (Shwegyin), 8·03 inches; and five other stations amounts exceeding 6 inches. The largest amounts received in India were Calicut, 4·16 inches and Seringapatam (Mysore), 3·56 inches.
